# NTN SHIELDED BEARINGS

- Meets or exceeds all industry standards
- Pressed steel cages
- Prelubricated and permanently sealed for a lifetime of quiet, maintenance-free operation
- Provides protection from contamination
- Lower cost alternative to sealed bearings
- Shield made of rust-resistant metal
- Shields (ZZ type) provide protection from two sides
- V-shaped groove acts as "flinger" to keep dirt out
- Series 63200 and 63300 bearings have larger grease capacity for extremely dusty or dirty conditions

**Typical Applications:** Electric motors, machine tools, generators, fans, pumps, power tools, and appliances.

Bearings are individually wrapped and boxed to protect from contaminants during shipping and storage.

# NTN SHIELDED BEARINGS CROSS-REFERENCE GUIDE

NTN

ZZ

- Metallic
- Noncontact
- Low friction
- Low torque

- Good for most electric motor applications
- Effective for general protection
- Directly interchangeable with competitive shield designs

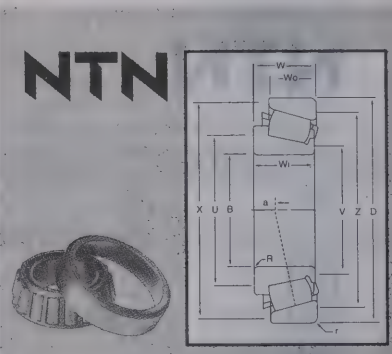
# TAPERED ROLLER BEARINGS

- **Carry combination of high radial and thrust loads simultaneously**
- **Roller guiding inner ring construction**
- **Two component design offers a variety of bore and O.D. options**
- **Bearing steel is case hardened -perform better in applications where higher shock loads are present -contributes to longer life than through-hardened bearings**
- **Steel is consumable electrode vacuum melt (CEVM) and electro-slag remelt (ESR) which removes impurities**
- **Meets or exceeds RBEC-1 standards**



**Typical Uses:** Where there are lower speeds; a high degree of thrust or radial load; and/or alternating thrust and radial loads. Also suitable for heavy shock loads.

**Typical Applications:** Gearmotors and reducers, machine tools, pumps, compressors, agricultural equipment and machinery, lawn mowers, conveyor rolls, golf carts, snow blowers, and automobiles.

**NOTE:** When replacing bearings, replace both cone and cup to insure optimum performance and longer life (**cup and cone are usually listed separately**).

**For Tapered Roller Bearing Cross-Reference Guide, See Page 338.**

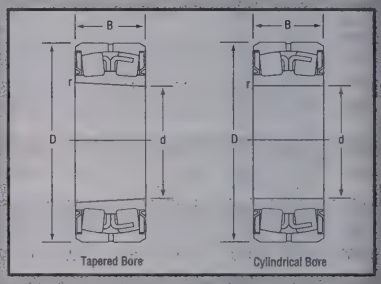
## SPHERICAL ROLLER BEARINGS



- Vacuum degassed, roll-forged 52100 steel
- Outer ring lubrication holes
- Choice of cylindrical or tapered bore
- Double row construction
- Two-piece pressed steel cage designed to control flow of lubricant for longer life
- Type B bearing design
  -asymmetrical rollers with one-piece ribbed inner ring for unequaled roller guidance
  -ideal for higher speed applications
- Type C bearing design
  -symmetrical rollers with one-piece plain inner ring and center floating guide ring
- Meets or exceeds REBC-1 standards

**Typical Uses:** Where a large capacity for radial loads, axial loads in either direction, and/or combinations of these loads are required. Also suitable for heavy shock loads and/or when misalignment between inner and outer rings occur.

**Typical Applications:** Conveyors, clutches, brakes, foundry equipment, speed reducers, fans, blowers, hydraulic equipment, pumps, paper machines, hoists, and cranes.

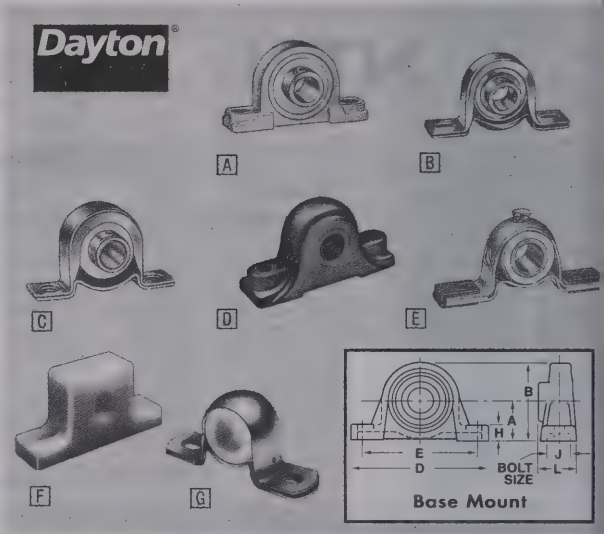
STANLEY®

PROTO® PROFESSIONAL TOOLS

Blackhawk™ A BRAND OF STANLEY PROTO

MANY TYPES OF HAND TOOLS ARE AVAILABLE, SEE INDEX AT BACK OF CATALOG FOR COMPLETE LISTINGS

# PILLOW BLOCK BEARING UNITS: BALL, BRONZE, AND UHMW-PE WASHDOWN



## BALL BEARING UNITS

- "Precision Grade" ball bearing insert is prelubricated with premium grease for a long, maintenance-free life
- Made to ABEC-1 tolerances
- Wide inner race locks to shaft with setscrews
- Neoprene seal keeps contaminants out and permits use in wet or dry environments
- Temperature range: -30 to +200°F

**Rigid Type:** Bearing insert is securely retained in solid Zamak® die-cast housing by pressing lip on housing 360° over outer race. Zamak is a zinc-based alloy that is stronger and lighter than cast iron with excellent corrosion-resistant properties. Provides excellent strength under severe operating conditions. Ideal for applications which require strong load support in limited mounting area.

**Self-Aligning Type:** Bearing insert is encased in nonconductive, oil-resistant rubber liner which corrects misalignment up to 2° while reducing noise and vibration. Housings are pressed cold-rolled steel with rust-proof plated finish; base mount is two-piece and flange mount is one piece.

Standard and heavy gauge styles available. Heavy-gauge style features thicker steel housings and rubber liners for added strength and quieter operation; plus, ball bearing inserts have a longer inner race for extra shaft support.

## BRONZE BEARING UNITS

- High quality porous bronze bearings for continuous/even lubrication
- Temperature range: -5° to 220°F
- Low cost alternative for lighter-duty mounted bearing applications

**Rigid Type (pillow block style only):** Plain sleeve bearings are press-fit in solid, compact Zamak® die-cast housing for strong support. Include oiler hole for lubrication.

**Self-Aligning Type:** Flanged sleeve bearings are press-fit in rugged die-cast sphere. Housings are two-piece pressed cold-rolled steel with rustproof plated finish. Vertical or horizontal mounting. Oil filler can be rotated to four different positions on base mount models; flange mount models have oil filler at 45° from bolt holes. Large, felt-lined oil reservoir for low maintenance and even lubrication. Includes two nonconductive rubber grommets which reduce noise and vibration.

## UHMW-PE (WASHDOWN) BEARING UNITS

- Bearings are Ultra-High Molecular Weight Polyethylene (UHMW-PE)
- For washdown applications in wet/harsh environments or where sanitary conditions must be maintained; USDA and FDA approved
- Resistant to corrosion, abrasion, and high impact
- Self-lubricating requires little or no maintenance
- Dimensionally interchangeable with most metal units
- Temperature range: -60 to +180°F
- Low friction, durable and lightweight

**Rigid Type:** Entire bearing unit is UHMW-PE plastic.

**Self-Aligning Type:** Bearing is UHMW-PE plastic. Housing is sturdy, two-piece pressed stainless steel (304).

(*) To calculate PV factor see below.

## CALCULATING PV FACTOR

he load carrying ability of bronze and UHMW-PE bearings can be expressed as a "PV ıctor." This factor is calculated by multiplying the maximum pressure (P) in pounds per quare inch on the bearing surface by the maximum sliding velocity (V) in surface feet er minute on the shaft.

he PV rating capacity is 50,000 for oil-impregnated bronze and 3,000 for UHMW-PE.

OTE: Load ratings are provided as guidelines only; testing in actual operating environent is recommended to determine if a bearing unit is suitable for a given application.

$$P = \frac{\text{Bearing Load}}{\text{Bearing Diameter x Bearing Length}}$$

$$V = \text{Shaft Diameter x Shaft RPM x 0.262*}$$

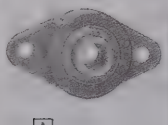
(*) 0.262 is the constant used for sleeve bearings.

## BEARING SELECTION

selecting the proper bearing for a given pplication several factors need to be conidered including unit costs, desired life, ad ratings, operating environment, mainnance, and mounting configurations. It recommended that testing be done in the tual operating environment to determine a particular bearing unit is suitable for a ven application because of the many riations which can occur including RPM, mperature, shafting used, shock loads, id support structures.

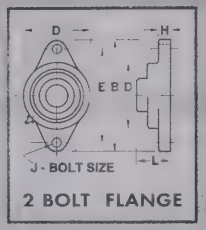
## LOAD RATINGS FOR BALL BEARING UNITS

- **The basic rating life of a group of bearings is defined statistically as the number of revolutions (or hours at some given constant speed) that a minimum of 90% of the group of bearings will complete or exceed before the first evidence of fatigue develops**
- **The dynamic load rating is defined as the constant stationary radial load which a group of bearings with stationary outer rings can endure for a rating life of one million revolutions (500 hours @ 33-1/3 RPM) of the inner ring**
- **The static load rating is based on a bearing's ability to resist permanent deformation in carrying a static load (non-rotating shaft)**



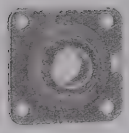
(*) Load capacities are based on the ball bearing inserts in each unit.

# 100 & 200 SERIES PRELUBRICATED MACHINED BALL BEARING PILLOW BLOCKS

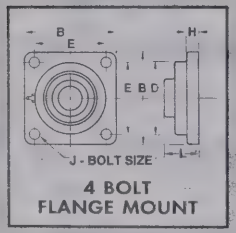


**Browning**

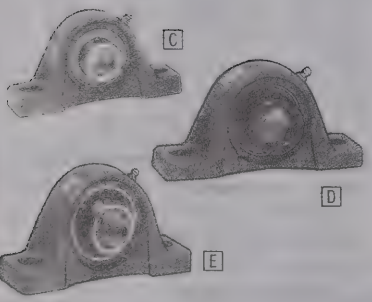
**VALULINE**



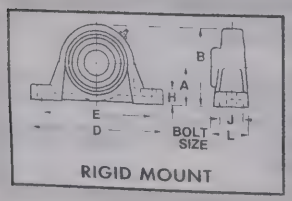
- Flange or rigid mounted models
- Temperature range: -30 to +200°F
- Bore range: 1/2 to 2 7/16"
- Cast-iron construction
- Prelubricated bearings
- Regreasable



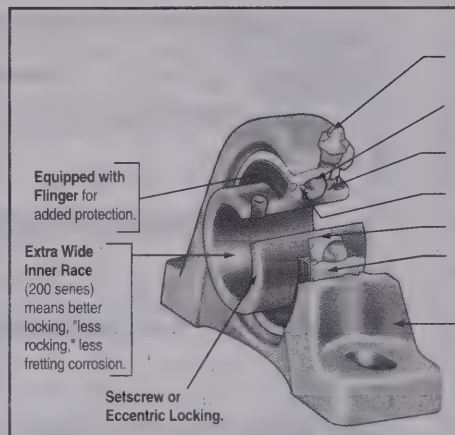
A



2 BOLT FLANGE



B



4 BOLT FLANGE MOUNT

RIGID MOUNT

**All Units Factory Lubricated** with grease fitting installed for normal service.

**Deep Groove Zone Hardened Ball Path** for improved race to shaft locking.

**Vacuum Degassed 52100 Steel,** the finest bearing material.

**Molded Lip Contact Seal** for wet or dry environments.

**Molded Nylon Retainers.**

**Fully Self-Aligning** with anti-rotation device. Ideally suited for HVAC applications.

**Rugged One Piece Cast-Iron Housing** with solid feet.

- Dimensionally interchangeable; industry standard housing dimensions.
- Bearing inserts manufactured to ABEC-1 tolerances.

**Equipped with Flinger** for added protection.

**Extra Wide Inner Race** (200 series) means better locking, "less rocking," less fretting corrosion.

**Setscrew or Eccentric Locking.**

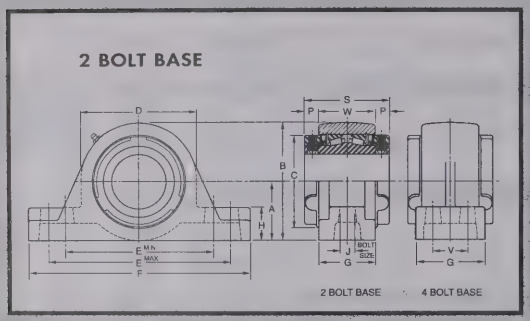
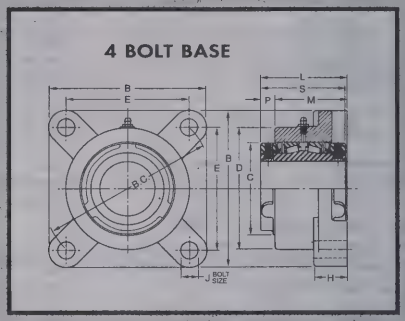
# E920 SERIES TAPERED ROLLER BEARING PILLOW BLOCKS

Browning



New



No. 3HX88

No. 3HX38

- Tapered roller bearings with double extended inner race with two locking collars
- Heavy-duty cast-iron housings
- Flinger-type locking collars to repel contaminants
- Low torque purgeable face contact seals
- Bearings dimensionally interchangeable with comparable competitive type E units (Dodge, SKF, Linkbelt)
- Bore range: 2 to 4 15/16"

## SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE

Grainger features quality products from the brand name manufacturers you know and trust.

More than 900 national brands are listed in the Brand Index at the back of this catalog.

# TAKE-UP BEARINGS AND FRAMES

- Primarily used on conveyor systems to properly tension conveyor belt, and for adjusting conveyor position to allow for correct conveyor belt tracking
- Extra wide inner race 200 series bearing
- Neoprene lip contact sealed bearing
- Setscrew lock
- Rugged cast-iron bearing housing
- Heavy-duty painted steel constructed take-up frame
- Cadmium-plated threaded rod and nut included with frame
- 3-12" travel available for take-up depending on frame selected
- Browning brand

Browning VALULINE

Note Above units are functionally interchangeable with Browning units. Please verify that critical dimensions E,S, and G meet each individual application. If dimension F and H is critical, contact Technical Support Department for this information.

## ADJUSTABLE DRILL DEPTH STOP COLLAR SET

Deluxe set contains clamp-style (one piece) split collars which grip around the outer diameter of the drill bit for a strong hold that will not slip and will not damage the bit. Takes the guesswork out of drilling holes to a uniform depth. Easy-to-use and fast—just measure the desired depth, slip the collar over the drill bit, then tighten the screw and drill to exact depth. Includes 7 collar sizes (from 1/8" to 1/2" in 1/16" increments) with hex wrenches in sturdy plastic box. Additional sizes are available, see page 350.

**No. 1F616.** Shpg. wt. 0.4 lbs. List $21.00. Each ..... $10.50

Dayton

- 1-Pc. Clamp-style Collars
- 7 Sizes (1/8" to 1/2")

We deliver the products that deliver the power.

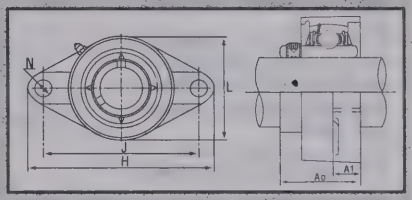
# CORROSION RESISTANT BEARING UNITS AND STAINLESS STEEL BEARING INSERTS

## BEARING UNITS (2-BOLT FLANGE AND PILLOW BLOCK UNITS)

- Corrosion and water resistant
- Low moisture absorption
- Interchangeable with standard cast-iron housings
- Not affected by most organic, sodium, acid, or oil based solvents
- Non-magnetic, glass reinforced polyster
- Operating temperature range: -10 to 60° C with intermittent 80°C maximum
- Weigh 30%-60% less than cast-iron units
- Self aligning
- Removable/replaceable stainless steel bearing inserts
- Grease fitting included

## STAINLESS STEEL BEARING INSERTS

- Nitrile rubber contact seal and stainless steel flinger provide labyrinth seal characteristics for superior resistance to water, dirt and dust
- Critical components offer optimum corrosion resistance
- Operating temperature range -20°C to 100°C with intermittent 120°C maximum
- Prelubed with USDA approved H-1 polymer grease -high resistance to water and wash out -approved for incidental contact with food
- Requires little to no maintenance
- Electric motor quality with honed raceways
- Meets or exceeds ABEC-1 standards



**Typical Uses:** Where bearing units are constantly exposed to high pressure washdowns and other high humidity or wet environments.

**Typical Applications:** Food processing plants, dairy industry, beverage, brewing, bottling, agricultural harvesting/machinery, pharmaceutical plants, chemical processing plants, car/truck washes.

# STEEL THRUST WASHERS AND THRUST BALL BEARINGS

## STEEL THRUST WASHERS

- Hardened alloy steel
- Ground on both sides to provide smooth, flat surfaces
- Bore sizes from 3/16 to 2"
- Close dimensional tolerances for precise accuracy
- Provides superior strength and rigidity
- Use in washer, spacer, and standoff applications

## THRUST BALL BEARINGS

- Hardened thrust washers are ground on both sides to provide smooth, flat, parallel ball raceway surfaces
- High quality hardened steel balls retained in a nylon cage
- Quality and number of balls assure high load carrying capacity
- Bore sizes from 3/16 to 1/2"
- Available in hardened alloy or stainless steel
- Nylon retainer cage assures minimum frictional loss
- Each package includes two washers and one cage

### TOLERANCES

We deliver the products that deliver the power.

# SPHERICAL ROD ENDS

## SUPERIOR LINKAGE

remium quality Teflon race rod ends are constructed to SAE pecification J1120. Rod ends are available with or without stud.

**earing Raceway**—Special PTFE raceway, bonded to housing I.D., iminates need for lubrication.

**pherical Ball**—Precision-made from low carbon steel. Surface ardened for wear resistance, plated for corrosion resistance.

**Housing**—Low carbon steel, plated and dichromate-treated for corrosion resistance.

**Threaded Stud**—Threaded studs are made from carbon steel, plated and dichromate-treated for corrosion resistance.

# SHAFT COLLARS

Shaft collars are used on tools, machinery, and equipment to lock various components, including bearings, sprockets, and pulleys, in place. Also used as shaft protectors, spacers, and depth stops.

**Choose from three materials:** cold-rolled plated steel (#12L14), stainless steel (#303), or plastic (Delrin/white).

**Plastic Shaft Collars** provide high strength, weigh less than steel units, and are ideal for washdown applications because Delrin plastic is USDA/FDA approved. Delrin absorbs less moisture than other plastics, holds its form in temperatures up to 185°F and has good resistance to impact, abrasion, solvents, chemicals, and other harsh operating elements.

**Setscrew Type Shaft Collars** are furnished with cup-point socket setscrews. Cold-rolled steel type are zinc-plated.

**One-Piece and Two-Piece Clamp Type Shaft Collars** are furnished with socket head capscrews and assemble easily on nominal or oversized shafts without marring. Tolerances for nominal/oversize shafting is ± 0.005 for one piece, ± 0.010 for two piece. Feature extra strong grip. Cold-rolled steel type are black oxide-plated. Two-piece clamp style are easy-to-install—can be located anywhere on the shaft without having to disassemble any machinery or components.

Both stainless steel and plastic collars have stainless steel setscrews.

FOR ADJUSTABLE DRILL DEPTH STOP COLLAR SET, SEE PAGE 351

Dayton®

Made in U.S.A.

Additional Cold-Rolled Steel Sizes

**THREE TYPES:**

- Setscrew
- One-Piece Clamp
- Two-Piece Clamp

**THREE MATERIALS:**

- Cold-Rolled Steel
- Stainless Steel
- Delrin Plastic

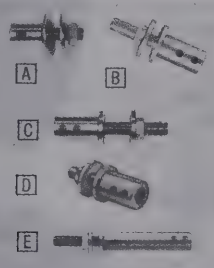
## ADJUSTABLE DRILL DEPTH STOP COLLAR SET

Deluxe set contains clamp-style (one piece) split collars which grip around the outer diameter of the drill bit for a strong hold that will not slip and will not damage the bit. Takes the guesswork out of drilling holes to a uniform depth. Easy-to-use and fast—just measure the desired depth, slip the collar over the drill bit, then tighten the screw and drill to exact depth. Includes 7 collar sizes (from 1/8" to 1/2" in 1/16" increments) with hex wrenches in sturdy plastic box. Additional sizes are available, see pages 350.

**No. 1F616.** Shpg. wt. 0.4 lbs. List $21.00. Each.....**$10.50**



Dayton®

- 1 Pc Clamp Style Collars
- 7 Sizes (1/8 to 1/2")

## FRACTIONAL HP MOTOR SHAFT ARBORS

Dayton®

- Wide selection of sizes and styles
- Right-hand and left-hand threads available
- Machined from solid bar stock

FOR MORE INFORMATION SEE PAGE 204

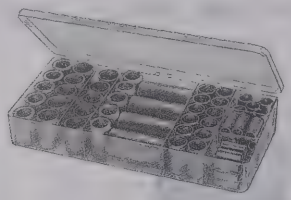
# SLEEVE BEARINGS, REDUCER BUSHINGS, AND BUSHING AND BEARING TOOLS

## BRONZE SLEEVE BEARINGS

Dayton®



High quality sintered bronze alloy. Oil-impregnated and self-lubricating for long service life. Maximum PV is 50,000. Temperature range is -5 to +220°F. Sold in packages of three.

### BRONZE SLEEVE BEARINGS

Dayton®

**56-Pc. Bronze Sleeve Bearing Assortment** contains 56 sintered bronze sleeve bearings from 1/4" I.D. x 5/16" O.D. to 3/4" I.D. x 1" O.D. — a total of 9 assorted sizes. Ideally suited for motor bearing applications. In plastic box with size reference chart.

**No. 1X968.** 56-Pc. Bronze Sleeve Bearing Assortment Kit. Shpg. wt. 2.3 lbs. List $54.40. Each.....$30.45

## UHMW-PE SLEEVE BEARINGS

Dayton®

UHMW-PE (Ultra-high molecular weight polyethylene) provides excellent durability and low friction. Resistant to corrosion, abrasion, and high impact. Self-lubricating, requires little or no maintenance. Ideal for applications involving slow rotating or linear motion. USDA/FDA approved. Color is white. Maximum PV is 3000. Temperature range: -60 to +180°F.

### UHMW-PE SLEEVE BEARINGS

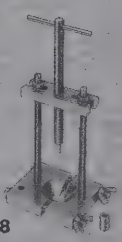
## BUSHING AND BEARING TOOLS

- **All parts plated**
- **Durable molded plastic carrying case included**



**Bushing Driver Sets** removes or inserts internal bushings and bearings in various equipment. Sizes marked on each adapter. No. 4X083 has 3 drivers and 16 adapters for 3/8" to 1 1/4" I.D. and 7/16" to 1 3/8" O.D. No. 1F614 has 1 driver and 7 adapters for 1 5/16" to 1 3/4" I.D. and 1 7/16" to 1 7/8" O.D.

**Bearing Tool Set No. 1X351** removes or inserts any sleeve motor bearing or bushing. Exerts even pressure to eliminate broken bearings or end bells. Removes frozen bushings without peening the bushing end, scratching, or marring. Has 9 adapters for 1/2" to 1" I.D. (in 1/16" increments) x 1 1/8" maximum O.D.

**Portable Arbor Press No. 3ZM98** removes or inserts various press-fit components from shafting such as bushings, bearings, commutators, fan blades, and seals. Adjustable base has circular pocket that provides complete 360° surface contact for even distribution of pressure which eliminates damage to shafts and parts. Tool can be held-in-hand, bolted or clamped to workbench, or mounted in vise. Spread range: 1/2" to 2 3/8" O.D. Reach: 5 1/2" max. Capacity: 3 tons.

## TRANTORQUE GT® KEYLESS BUSHINGS

- For mounting high torque timed components
- Unique single nut locking feature
- Functions as mechanical shrink fit
- Easy to install with relaxed machining tolerances
- Hex flats for counter-torque eliminate the need to hold shaft or component while applying installation torque
- Eliminates fretting corrosion, backlash, and key wallowing
- Fast and easy component repositioning and synchronization
- Can be mounted directly over worn and damaged keyways
- Excellent balance and concentricity

Fenner Drives™
Technology in Motion

TRANTORQUE GT is the solution to the problems of keyed mountings—a keyless bushing ideal for critical timing and high-torque applications. TRANTORQUE GT is a three-piece bushing consisting of an inner collet-like element, a single element outer sleeve, and a single locking nut. Hex flats are machined into the outer element to provide a counter-torque facility on installation.

The inner and outer elements have matching opposite tapers. As a result, when the nut is turned, the unit expands within the component and contracts on the shaft. To find out which bushing is appropriate for your application, simply start with the shaft size and determine if the Outside Diameter and Torque Requirements are adequate.

Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog. The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.

## Lovejoy D-TYPE AND DD-TYPE UNIVERSAL JOINTS

**D-Type Universal Joints** are standard industrial-type universal joints with pin and block design. Special tapered shape of yokes provide exceptional strength for long life, while allowing full free movement of joint. Stainless steel D-type universal joints for applications where contact with corrosive chemicals, exposure to corrosive atmosphere, or sanitation requirements are a factor. For applications with angles up to 25° and speeds up to 1750 RPM. Boot retaining grooves are standard.

**DD-Type Universal Joints** are designed with two quality Lovejoy standard D-type universal joints with a center connection shaft tailored for specific application requirements. This configuration is typical of industrial universal joint applications to compensate for parallel misalignment and shaft separation. In a double joint arrangement, the input and output speeds are near constant velocity. When assembled correctly yoke ears are aligned and angles are equal.

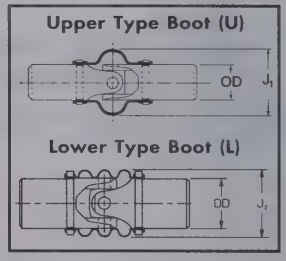
(*) No bore provided, must be machined to user requirements. No keyway or setscrew provided. (†) Bored units may be re-bored to maximum diameter shown.



## Lovejoy UNIVERSAL JOINT BOOTS

The life of a universal joint can be extended substantially if booted. Wear areas of the universal joint are protected from dirt and contaminants, while lubrication is retained. On-site replaceable boots ensure proper lubrication for up to 5 times longer universal joint life. Installation and replacement is fast and easy.

Use upper type boots for D-type universal joints with diameters of 1½" and smaller. Use lower type boots for D-type universal joints with diameters greater than 1½". All Lovejoy universal joints come pregrooved to accommodate the field replaceable boots. Use grease No. 6Y786 (not included); must order separately. Sold in packages of 2.

| Boot Type | Lovejoy Model | Dimensions (In.) O.D. | Upper J1 | Lower J2 | Stock No. | List | Each Pkg. | Shpg. Wt. |

# UNIVERSAL JOINT SELECTION GUIDE AND KITS

## SELECTION GUIDE FOR UNIVERSAL JOINTS

Joint selection depends on running application.

**Intermittent application**—operation limited to 15 minutes due to need for dissipating heat before restart.

**Continuous application**—operation under load longer than 15 minutes up to 8 hours a day.

### PART NUMBER INTERCHANGE GUIDE

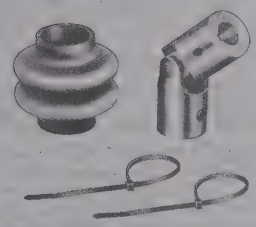
**SOLID TYPE**

| Outside Diameter (In.) | Manufacturer's Model Numbers Lovejoy | Curtis | Boston | Browning | Alves | Apex |
|---|---|---|---|---|---|---|
| 1/2 | D-2 | C-642 | J-50 | UJ-4S | S-500 | 300-8 |
| 5/8 | D-3 | C-643 | J-62 | UJ-5S | S-625 | 300-10 |
| 3/4 | D-4 | C-644 | J-75 | UJ-6S | S-750 | 300-12 |
| 7/8 | D-5 | C-645 | J-87 | UJ-7S | S-875 | 300-14 |
| 1 | D-6 | C-646 | J-100 | UJ-8S | S-1000 | 300-16 |
| 1 1/8 | D-7 | C-647 | — | UJ-9S | S-1125 | — |
| 1 1/4 | D-8 | C-648 | J-125 | UJ-10S | S-1250 | 300-20 |
| 1 1/2 | D-10 | C-650 | J-150 | UJ-12S | S-1500 | 300-24 |
| 1 3/4 | D-11 | C-651 | J-175 | UJ-14S | S-1750 | 300-28 |
| 2 | D-12 | C-652 | J-200 | UJ-16S | S-2000 | 300-32 |
| 2 1/2 | D-13 | C-653 | J-250 | UJ-20S | S-2500 | 400-40 |
| 3 | D-14 | C-654 | J-300 | UJ-24S | S-3000 | 400-48 |

**Step 1:** For a given operating speed and angle of operation in an **intermittent** application, refer to the Correction Factor Table below for appropriate value. If a **continuous** application, multiply the value shown by 2.

**Step 2:** Multiply the correction factor obtained in Step 1 by the specific application torque requirements (be sure to use inch-pounds).

**Step 3:** Refer to Static Breaking Torque Column in tables below for the type of U-joint desired and select a joint having same or greater torque than result from Step 2.



### CORRECTION FACTOR TABLE

| Operating RPM | Angle of Operation in Degrees 0° | 3° | 5° | 7° | 10° | 15° | 20° | 25° |
|---|---|---|---|---|---|---|---|---|
| 1800 | 9 | 20 | 34 | 45 | — | — | — | — |
| 1500 | 8 | 16 | 28 | 39 | — | — | — | — |
| 1200 | 7 | 13 | 22 | 32 | 40 | — | — | — |
| 900 | 6 | 11 | 16 | 23 | 34 | — | — | — |
| 600 | 5 | 8 | 11 | 15 | 22 | 34 | 40 | — |
| 300 | 4 | 5 | 7 | 8 | 11 | 16 | 22 | 28 |
| 100 | 3 | 4 | 4 | 5 | 6 | 8 | 9 | 11 |

## CURTIS TURN-KEY UNIVERSAL JOINT KITS

- **Ready to go; includes standard bored hubs (1/2 of the O.D.), standard keyway, installed setscrews, one boot, and two ties**
- **Exclusive TakeApart design (1" O.D. and larger) facilitates quick disassembly and reassembly without the use of special tools so that custom machining of the hubs is easy and economical**
- **Built-in lubrication passages**
- **Maximum wear with less galling and seizing**
- **Use with Mobilgrease HP multipurpose auto grease, No. 6Y788, or Mobilgrease special with moly for high torque applications, No. 4ZF44**

**CURTIS**

**Includes one U-joint with standard bored hubs and keyway, installed setscrews, one cover (boot), and two ties**

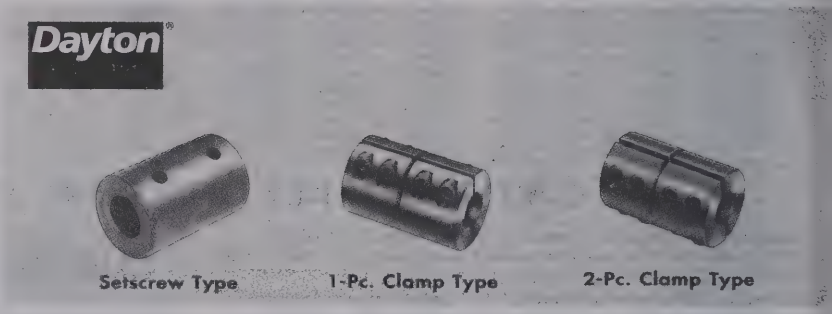
# FLEXIBLE AND RIGID COUPLINGS

## FLEXIBLE COUPLINGS

For direct-drive equipment. Flexible buna-nitrile rubber sleeve with knurled steel hub inserts on each end. Locks to shaft with socket setscrews provided (1/4"-20). Coupling permits misalignment up to 1/8" parallel and up to 7° angular. Rated capacity 1/2 HP at 1725 RPM.

| Bore Size (In.) | O.D. (In.) | Overall Length (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 1/2 | 1 1/8 | 2 1/2 | 2X497 | $5.95 | $4.32 | 0.2 |
| 1/2 | 1 1/8 | 3 | 2X498 | 6.12 | 4.44 | 0.2 |
| 1/2 | 1 1/8 | 3 1/2 | 2X499 | 6.29 | 4.55 | 0.2 |

## RIGID STEEL COUPLINGS



- **For applications where alignment is critical**
- **Three types to choose from:**
  **Setscrew**
  **1-Pc. Clamp (with or without keyway)**
  **2-Pc. Clamp (with or without keyway)**
- **Bore sizes available from 1/4 to 1 1/2"**
- **Machined from bar stock**

For applications where flexibility is not required and alignment is critical, particularly when no backlash is desired. Also useful when timing, joining, and/or aligning shafts at lower speeds and torque.

Three types to choose from:

**Setscrew Type:** Locks securely to shafting with socket setscrews. Provides high strength at lower cost. Zinc plated.

**Clamp Type (1 Pc. and 2 Pc.):** Provides extra holding power for higher load applications. Will not mar shafts. 1-pc. units have four vibration-resistant socket cap screws and 2-pc. units have eight screws. 2-pc. type can be installed without having to disassemble any machinery or components. Both styles are available with or without keyway. Black oxide plated.

### SETSCREW TYPE — RIGID STEEL COUPLINGS

# FLEXIBLE COUPLINGS AND SPIDERS

For use with motors, gearmotors, pumps, tools, and drive equipment. A complete 3-pc. coupling assembly consists of two coupling bodies (ends) with desired bores and one spider (center). Coupling bodies are made of sintered iron, cast iron, or aluminum and do not require lubrication. 3-pc. coupling is easily assembled and aligned. Standard keyways on 5/8" and larger bore sizes; No. 4X177 and 3KX86 have no keyway. All have hollow head setscrews.

## COUPLING SPIDERS

**A Buna N Spiders** are made of oil-resistant, highly resilient long-life material. Serviceable temperature range: -40° to +212°F. Accommodates 1° angular and 0.015" of parallel misalignment. Black color.

**B Hytrel® Spiders** provide 2.5 times torque capability than Buna-N. Hytrel spiders have a wider temperature range, -60° to +250°F, and better chemical-resistance than Buna N spiders. Accommodates 1/2° angular and 0.015" of parallel misalignment. Tan color.

**C Urethane Spiders** provide 1.5 times greater torque capability than Buna N and offer good resistance to oil and chemicals. However, this material provides less dampening effect and operates at a temperature range of -30° to +160°F. Accommodates 1° angular and 0.015" of parallel misalignment. Blue color.

## KEYWAY CHART

| Bore Range (In.) | Keyway (In.) |
|---|---|
| 1/8-1/2 | No Keyway |
| 5/8-7/8 | 3/16 x 3/32 |
| 1-1¼ | 1/4 x 1/8 |
| 1⅜ | 5/16 x 5/32 |
| 1½-1¾ | 3/8 x 3/16 |
| 1⅞ | 1/2 x 1/4 |

## SINTERED IRON OR CAST-IRON COUPLING BODY (Two Required for Each Complete Coupling)

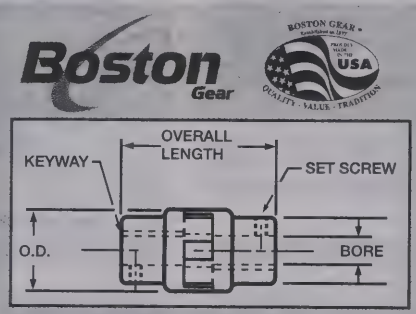
(*) Cast iron. (‡) For use on hydraulic units which have 1/8 x 1/16" keyway. (#) No keyway.

## COUPLING SELECTION GUIDE

Coupling selection depends on Load Service Factor (L.S.F.) and drive. L.S.F. for applications defined as light duty, smooth loads, 1.0; for medium duty, 1.5; for heavy duty, intermittent loads, 2.0. For Gear Driven Applications: 1) multiply L.S.F. times Drive Output Torque, 2) select style with rated torque (†) in chart which meets or exceeds step 1.

For Motor Driven Applications, 1) multiply L.S.F. times Horsepower, 2) select style with HP capacity (†) at RPM in chart which meets or exceeds step 1.

## 1.0 LOAD SERVICE FACTOR RATINGS FOR BUNA N SPIDER† COUPLINGS



| Style | Rated Torque (In.-Lbs.) | HORSEPOWER CAPACITY AT VARYING SPEEDS 300 RPM | 1200 RPM | 1800 RPM | 3600 RPM | Overall Dimensions (In.) Assembled Length O.D. | Long | Iron Shpg. Wt. | Aluminum Shpg. Wt. |

| A/L095 | 194.0 | 0.93 | 3.72 | 5.50 | 11.11 | 2 7/16 | 2½ | 1.6 | 0.7 |
| A/L100 | 417.0 | 2.00 | 7.92 | 11.90 | 23.80 | 2 15/16 | 3½ | 3.0 | 1.3 |
| A/L110 | 792.0 | 3.78 | 15.12 | 23.00 | 46.00 | 3 5/16 | 4¼ | 5.7 | 2.4 |
| A/L150* | 1240.0 | 6.00 | 24.00 | 36.00 | 72.00 | 3¾ | 4½ | 8.0 | 3.4 |
| L190 | 1726.0 | 8.10 | 32.40 | 49.00 | 98.00 | 4½ | 4⅞ | 15.0 | |

(†) Hytrel ® spiders will transmit 2½ times and urethane spiders 1½ times the torque or HP capacity indicated.
(*) Torque and Horsepower ratings for the AL150 are 17% higher than the L150.

# SHAFT COUPLINGS AND SPIDER INSERTS

## SHAFT COUPLINGS

- Precision machined high quality steel permits accurate assembly, minimizes vibration, and assures quiet operation
- Insert (3-jaw) type
- Three types of spider inserts available for different service requirements (see listing below)
- No lubrication needed
- Complete with keyway and setscrew

## SHAFT COUPLING SPIDER INSERTS

**Oil-Impregnated Bost-Bronz Inserts**—Recommended for high torque loads, particularly at slower speeds.

Serviceable Temp. Range: -60 to +250°F

**Oil-Resistant Synthetic Rubber Inserts**—Recommended where quietness is desired, particularly at motor speeds.

Serviceable Temp. Range: -32 to +200°F

**Polyurethane Inserts**—Recommended where moderate to heavy shock loads are encountered.

Serviceable Temp. Range: -32 to +220°F

### SELECTION PROCEDURE

1. Select Service Factor:

| Load Classification | Service Factor |
|---|---|
| Uniform | 1.00 |
| Moderate Shock | 1.75 |
| Heavy Shock | 2.50 |

2. Determine Design Load:

**Design Torque = Application Torque (T) x SF or**
**Design HP = Application HP x SF**
**T=(HP(63025)) ÷ RPM**

3. Select coupling size which has a rating equal to or greater than the design load.

| Coupling Size | Shaft Dia. Range (In.) | Maximum Horsepower Rating at RPM For Uniform Load 50 | 100 | 300 | 690 | 870 | 1150 | 1750 | 3450 | Max. Torque | Boston Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|

We deliver the products that deliver the power.

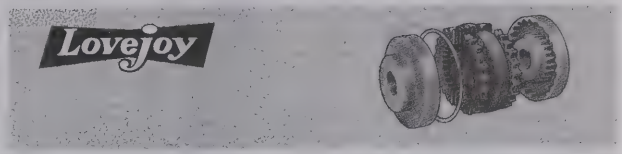
# S-FLEX SHAFT COUPLINGS

### 95, 105 and 115 Body Styles and H Inserts

Versatile S-Flex couplings are for applications in motors, pumps, engines, compressors, blowers, mixers, and conveyors. Use to protect equipment from various combinations of misalignment, vibration, and shock loads. Rubber-in-shear design utilizes a simple, industry-wide accepted design. Assembly and maintenance are easy—there are few parts and no lubrication is required. Angular misalignment capability is 1° with EPDM rubber inserts and 1/4° with H inserts.

A complete coupling consists of two bodies and one insert. The 4J body is made of die-cast zinc alloys, the 5J, 6J, and S bodies are constructed of cast-iron. Each body has a keyway and two setscrews (one over the key and one at 90°).

## COUPLING INSERTS



Inserts are intended for general industrial use and operate within the temperature range of -30° to +275°F. JES and E inserts are ideal for applications where small shaft separations restrict the installation of a one-piece insert. Four designs of inserts are available:

**JE Inserts** are one-piece EPDM rubber inserts.

**JES Inserts** are one-piece EPDM rubber inserts with a split in the material at one point.

**E Inserts** are two-piece EPDM rubber inserts held together with a retaining ring.

**H Inserts** are one-piece molded Hytrel® and are designed to transmit power for high torque applications.

## KEYWAY CHART

| Bore (In.) | Keyway (In.) | Bore (In.) | Keyway (In.) | Bore (In.) | Keyway (In.) |
|---|---|---|---|---|---|
| 1/2 | 1/8 x 3/16 | 1 1/8 | 1/4 x 1/8 | 2 1/8 | 1/2 x 1/4 |
| 5/8 | 3/16 x 3/32 | 1 1/4 | 1/4 x 1/8 | 2 1/4 | 1/2 x 1/4 |
| 3/4 | 3/16 x 3/32 | 1 3/8 | 5/16 x 5/32 | 2 3/8 | 5/8 x 5/16 |
| 7/8 | 3/16 x 3/32 | 1 1/2 | 3/8 x 3/16 | 2 1/2 | 5/8 x 5/16 |
| 1 | 1/4 x 1/8 | 1 5/8 | 3/8 x 3/16 | 2 3/4 | 5/8 x 5/16 |
| 1 1/8 | 1/4 x 1/8 | 1 7/8 | 1/2 x 1/4 | 2 7/8 | 3/4 x 3/8 |
| | | 2 | 1/2 x 1/4 | 3 3/8 | 7/8 x 7/16 |

## SERVICE FACTOR RATINGS FOR S-FLEX COUPLINGS WITH EPDM INSERT

| Body Style | Rated* Torque (In.-Lbs.) | Max. RPM | Rated Horsepower 1750 RPM | Rated Horsepower 3500 RPM | Overall Dimensions (In.) O.D. | Overall Dimensions (In.) Length | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 4J | 120 | 7600 | 3.3 | 6.7 | 2 15/32 | 2 3/8 | 0.9 |
| 5J | 240 | 7600 | 6.7 | 13.0 | 3 1/4 | 2 7/8 | 2.4 |
| 6J | 450 | 6000 | 12.5 | 25.0 | 4 | 3 1/2 | 4.4 |
| 7S | 725 | 5250 | 20.0 | 40.0 | 4 5/8 | 3 15/16 | 6.6 |

# POWER TRANSMISSION LUBRICANTS

### BEARING LUBRICANTS

Mobilith® AW2: For bearings, cams, ways, and other sliding elements. NLGI Grade 2. Lithium complex, soap-based.

**No. 4ZF46.** ❸ 14 oz. Cartridge. Shpg. wt. 1.2 lbs. List $2.12. Each **$1.80;** Lots 10 ..... **$1.71**

**No. 4ZF47.** ❸ 35 lb. Pail. Shpg. wt. 40.0 lbs. List $78.25. Each..... **$66.50**

**Mobilith SHC PM® (14 oz. cartridge):** For high temperature, high load bearing applications. NLGI Grade 1.5. Synthetic base with lithium complex soap thickener.

**No. 4ZF48.** ❸ Shpg. wt. 1.2 lbs. Each **$5.44;** Lots 10 ..... **$5.04**

### BEARING LUBRICANT

**Mobilith SHC® 100 (14 oz. cartridge):** For high temperature, very low start/run torque applications. NLGI Grade 2. Synthetic base with lithium complex soap thickener. For most grease-lubricated rolling electric motor bearings.

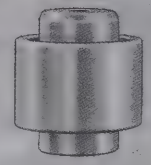
**No. 4ZF49.** ❸ Shpg. wt. 1.2 lbs. List..... $6.36. Each ..... **$5.44**

### COUPLING GREASE

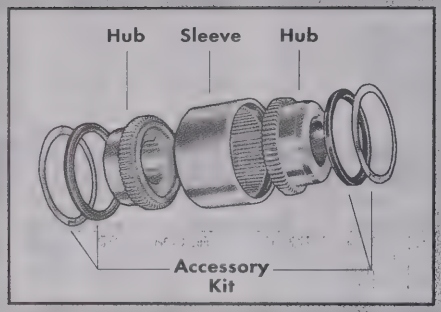
**Mobilith® EP 111(35 lb. pail):** For gear couplings. NLGI Grade 1. Lithium 12 hydroxystearate, black, tacky grease-heavy oil base with moly additive package.

**No. 4ZF45.** ❸ Shpg. wt. 40.0 lbs. List ..... $93.62. Each ..... **$78.90**

### SYNTHETIC GEAR OIL



**Mobilith SHC 634®** (quart): For gear and wide range of speed and gear reducers (worm, helical, spur). Multi-viscosity synthetic oil based on synthesized hydrocarbon fluid technology. Recommended for industrial enclosed gear sets and heavily load plain or rolling bearings operating under severe conditions. Provides corrosion protection and oxidation stability.



**No. 4ZF30.** ❸ Shpg. wt. 2.0 lbs. List..... $10.11 Each ..... **$8.60**

**For Main Listings of Lubricants, See Page 2771**

❶ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# CONTINUOUS SLEEVE GEAR COUPLINGS

- **Highest torque capacity per size of any coupling design**
- **Maximum operating temperature of 250°F (120°C)**
- **Very high torsional stiffness**
- **Good inherent balance for high speed capability**

For applications in pumps, mixers and agitators, compressors, blowers, machine tools, and paper mill equipment. Lightweight, compact, and simple design offers a misalignment capability of 1° without compromising torque carrying capacity.

A complete coupling consists of two hubs (one for each shaft in the application), one sleeve and one accessory kit. The accessory kit has two Buna-N seals and two spiral wound snap rings made from hardened spring steel. The seals have a reinforcing washer bonded to their inside face which positively retains lubricant and seals the interior against foreign matter. The snap rings are easy to install and remove yet withstand over 100,000 pounds of end-thrust.

The hubs and sleeve are machined from medium carbon steel, patented Vari-Crown® gear teeth are precision cut at a 20° pressure angle with minimum backlash. These teeth are smaller for even distribution of load, greater capacity, and longer life.

### ORDERING INSTRUCTIONS

After determining the coupling style needed (e.g. C 7/8 thru C 2½), select one hub for each shaft in the application, one sleeve for that size coupling, and one accessory kit for the same.

Coupling grease is required, see page 2771 (Lovejoy recommends NLGI Grade 2 at minimum, prefer Grade 1).

## KEYWAY CHART

| Nominal Bore Dia. (In.) | Actual AGMA Interference Fit on Bore* | Keyway Nominal (In.) |
|---|---|---|
| 3/4 | 0.749/0.7495 | 3/16 x 3/32 |
| 7/8 | 0.874/0.8745 | 3/16 x 3/32 |
| 1 | 0.999/0.9995 | 1/4 x 1/8 |
| 1¼ | 1.249/1.2495 | 1/4 x 1/8 |
| 1⅜ | 1.374/1.3745 | 5/16 x 5/32 |
| 1½ | 1.499/1.4995 | 3/8 x 3/16 |
| 1⅝ | 1.623/1.624 | 3/8 x 3/16 |
| 1⅞ | 1.873/1.874 | 3/8 x 3/16 |
| 2⅛ | 2.123/2.124 | 1/2 x 1/4 |
| 2¼ | 2.248/2.249 | 1/2 x 1/4 |
| 2⅜ | 2.373/2.374 | 5/8 x 5/16 |

(*) Interference fit on bore is standard.

## SERVICE FACTOR RATINGS FOR CONTINUOUS SLEEVE GEAR COUPLINGS

| Style | Rated Torque (In.-Lbs.) | Max. Bore (In.) | Max. RPM* | Rated Horsepower (RPM) 100 | 1180 | 1750 | Overall Dimensions (In.) O.D. | Long | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| C 7/8 | 2500 | 1¼ | 6000 | 4 | 47 | 70 | 3⅝16 | 3⅛ | 5.0 |
| C 1½ | 7600 | 1⅝ | 5000 | 12 | 142 | 210 | 3¾ | 3¾ | 8.0 |
| C 2 | 20200 | 2⅛ | 4200 | 32 | 378 | 560 | 4¾ | 4¼ | 13.0 |
| C 2½ | 30200 | 2⅝ | 3750 | 48 | 566 | 840 | 5½ | 4¾ | 20.0 |

(*) This is the maximum speed for an unbalanced coupling. The maximum speed for a balanced coupling is approximately three times speed shown.

## CONTINUOUS SLEEVE GEAR COUPLING HUBS (Two Required for Each Complete Coupling)

| Style | Rough Stock Bore RSB* Stock No. | Rough Stock Bore RSB* Each | Bore Diameter 3/4" | 7/8" | 1" | 1¼" | 1⅜" | 1½" | 1⅝" | Each |

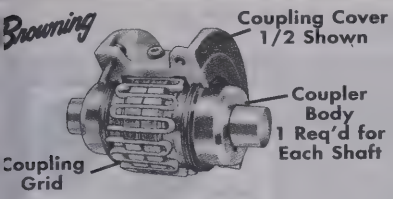
Link up with Grainger's Web site and tap into a fast, convenient way to access up-to-date information. Our Online Catalog allows you to search and display products as well as place orders online. . . day or night.



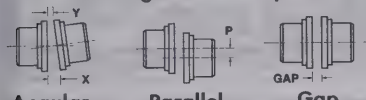
DESK SPACE AT A PREMIUM?

USE THE GRAINGER CD-ROM, ELECTRONIC CATALOG TO REVIEW THOUSANDS OF PRODUCTS!

Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog.

The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.

# GRID-FLEX SHAFT COUPLINGS



**Misalignment Examples**

Angular Parallel Gap

- Grid-flex couplings serve a wide range of medium to high HP applications from low to high RPM
- Ideal shaft coupling for handling misalignment situations and shock loads
- Kop-Flex brand interchangeable with competitive grid-type couplings (Falk, Dodge)
- Couplings are easily matched by selecting coupling size number and bore type and are available with either horizontal or vertical split cover kits (set required)
- Available with finished bore with keyway, bushed bore that requires a bushing (select from page 320), and minimum plain bore with no keyway or setscrew

## COUPLER GRIDS

| Size | Stock No. | Each | Shpg. Wt. |
|---|---|---|---|
| 1020GRID | 3HV63 | $32.40 | 0.2 |
| 1030GRID | 3HV74 | 41.00 | 0.2 |
| 1040GRID | 3HV86 | 47.80 | 0.3 |
| 1050GRID | 3HV98 | 59.75 | 0.6 |
| 1060GRID | 3HW11 | 76.85 | 0.7 |
| 1070GRID | 3HW24 | 105.80 | 0.8 |
| 1080GRID | 3HW38 | 143.45 | 2.0 |
| 1090GRID | 3HW53 | 193.00 | 2.2 |
| 1100GRID | 3HW71 | 246.25 | 4.2 |
| 1110GRID | 3HW86 | 316.00 | 5.0 |
| 1120GRID | 3HX03 | 474.75 | 8.7 |
| 1130GRID | 3HX17 | 656.00 | 11.0 |
| 1140GRID | 3HX30 | 982.00 | 12.0 |

## HORIZONTAL COVERS

| Size | Stock No. | Each | Shpg. Wt. |
|---|---|---|---|
| 1020T10 | 3HV54 | $17.10 | 0.5 |
| 1030T10 | 3HV64 | 20.53 | 0.7 |

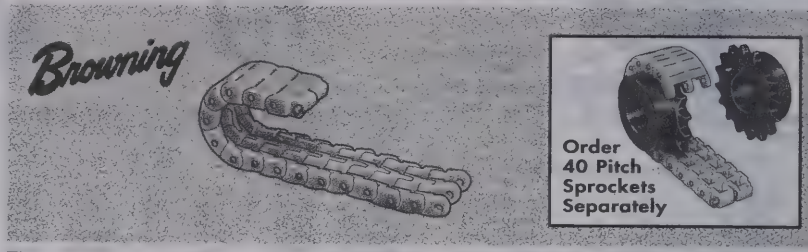
# DELRIN & CHAIN TYPE SHAFT COUPLERS

## DELRIN CHAIN COUPLINGS



- Uses standard 40 pitch sprockets up to 24 teeth and 1½" bore (order separately from page 294); costs less to install and maintain
- Use with stainless steel sprockets for washdown applications
- Corrosion resistant
- Pollution-free couplings
- Run quieter than metal couplings
- A slip-fit coupler pin for ease of assembly or disassembly is supplied with all couplings
- No lubrication required; no dirt-catching problems associated with grease

**Temperature Range:** -25° to 150°F

**Angular Misalignment Tolerance:** 1° (10T-19T); 1/2° (20T-24T)

**Parallel Misalignment Tolerance:** 0.005"

**Total End Float Tolerance:** 0.060"

| Pitch | Sprockets (Qty. 2) Required Max. No. of Teeth | Chain Couplings Dimensions (In.) O.D. | Width | HP Per 100 RPM† | Browning Model | Stock No. | Each | Shpg. Wt. |

| 10 Ft. Box of 40 Pitch Delrin Coupling Chain | | | | | — | 3HX53 | 179.25 | 4.0 |

Note: Delrin chain can be used with minimum bore, fixed bore, and bushed bore 40 pitch sprockets.
(†) Horsepowers listed above are based on a 1.0 service factor.

## CHAIN TYPE SHAFT COUPLERS

- Ideal for use with gearmotors, farm equipment, pumps, and other applications requiring low speed, high torque couplings
- Handle angular misalignment up to 1/2° and parallel misalignment of 0.0100 on 40 pitch chain, 0.0125 on 50 pitch chain, and 0.015 on 60 pitch chain
- Complete unit consists of two coupling halves, double strand roller chain and coupling cover. 50 and 60 pitch couplings also require split taper bushings (not included) found on page 320
- Solid steel construction with hardened teeth for long life
- Finished bore couplings have standard keyway and hollow head setscrew
- Coupling covers equipped with neoprene seals, 1/8" pipe plug, hollow head capscrews and positive continuous lubrication

(*) Normal service ratings are based on steady, non-reversing, 8-hour day service with normal starting torque motor. For more than 8-hour day service and/or shock-load applications, multiply HP of motor by two and select coupling.
(†) Warning: Couplings with covers must not be operated beyond this speed. (‡) Coupling selected for these load ratings must be well lubricated.

# CIRCUIT BREAKER SELECTION GUIDE

## SQUARE D® CIRCUIT BREAKER SELECTION GUIDE

ne guide below lists circuit breaker components available on ages 364 through 390. The ratings shown are for the most com- only configured system.

For DC and higher interrupting rating specifications, refer to the pages indicated in the tables below.

### LOAD CENTERS AND LOAD CENTER BREAKERS

**omeline Load Centers:**

- Single phase load centers
- Flush or surface mount • Indoor or outdoor
- Main Lug or Main Breaker load centers containing from 2 to 40 spaces
- Plug-on, GFI, and Tandem Breakers

**QO Load Centers:**

- Single and three phase load centers
- Flush or surface mount • Indoor or outdoor
- Main Lug or Main Breaker load centers containing from 2 to 42 spaces
- Plug-on standard, GFI, Tandem, HID, or Switched Neutral Breakers

### PANELBOARDS AND PANELBOARD BREAKERS

**IQOD Panelboards:**

- 240 VAC, 48 VDC max.
- Flush or surface mount
- Indoor only
- Copper or aluminum bus
- From 12 to 42 circuits

**NF Panelboards:**

- 480Y/277 VAC max.
- Flush or surface mount
- Indoor only
- Copper or aluminum bus
- From 12 to 42 circuits

**I-Line Panelboards:**

- 600 VAC, 250 VDC max.
- Flush or surface mount
- Indoor only
- Copper or aluminum bus
- From 27 to 63 mounting inches

# HOMELINE® LOAD CENTERS

No. 1D450

Replacement Parts Available 1-800-323-0620

No. 5B666

- Single phase, 3-wire 120/240VAC
- 10,000 AIR rating
- Includes box, interior, and cover
- When QOM...VH main breaker is used unit is series rated 22,000 AIR
- Ground bar kits and other accessories available, see page 366
- Reversible top or bottom feed
- Split branch neutral terminals
- 100 thru 125 amp units use QOM1 main breakers, see page 366
- 150 thru 200 amp units use QOM2 main breakers, see page 366

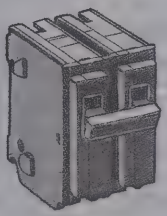
(†) Rated 200 amp when using copper wire. See NEC Table 310-16, Note 3 when using aluminum wire.

# HOMELINE® CIRCUIT BREAKERS

SQUARE D
GROUPE SCHNEIDER

HOM 1-Pole GFI

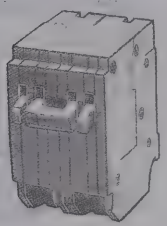


1 Space Required

HOM 1-Pole

1 Space Required

HOM 2-Pole



2 Spaces Required

HOMT 1-Pole Tandem

1 Space Required

HOMT 2-Pole Quad

2 Spaces Required

- 10,000 AIR
- Rated 120/240 VAC (except 1D341 & 1D343 are rated 120 VAC only)
- Plug-in breaker 1" wide per pole
- 15-30 amp models suitable for 60 or 75°C wire
- 40-110 amp models suitable for 75°C wire

- GFI units will trip when a fault current to ground is 6mA or more
- Two-Pole breakers are common trip
- Quad breaker has two 1-Pole breakers and one 2-Pole common trip breaker
- Only for use with HOMELINE® load centers (see page 364)

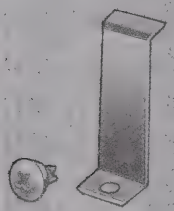
GROUPE SCHNEIDER



No. 1D347
Handle Tie

No. 1D525
Filler Plate

No. 1D522
Neutral Lug

No. 1D513
Retaining Kit

## HANDLE TIE No. 1D347

- Converts any two adjacent 120/240VAC single pole HOM breakers to independent trip two pole breaker

## HANDLE TIE No. 1D367

- Converts any two adjacent 120/240VAC single pole HOMT breakers to independent trip two pole breaker

## HANDLE PADLOCK ATTACHMENT No. 1D348

- For padlocking 1-pole HOM breakers in "ON" or "OFF" position

## HANDLE PADLOCK ATTACHMENT No. 1D363

- For padlocking 2-pole HOM breakers in "ON" or "OFF" position

## FILLER PLATE No. 1D525

- Fills opening in covers for branch breakers if twistout is removed

## FILLER PLATE No. 1D445

- Fills main breaker opening in convertible load centers up to 125 amp

## MAIN LUG KIT No. 5B773

- 125 amp main lug kit for convertible load centers up to and including 125 amps

## MAIN LUG KIT No. 1D444

- 225 amp main lug kit for convertible load centers over 125 amp up to 225 amp

## NEUTRAL LUG No. 1D522

- Field installed for #12 to #2 Al or #14 to #4 Cu wire—70A rated

## NEUTRAL LUG No. 1D447

- Field installed for #1 to #1/0 Al/Cu wire—100A rated

## RETAINING KIT No. 1D513

- Secures circuit breaker to interior when used as a back-fed main
- For use with Load Center Nos. 1D519, 1D520, and 1D521

## LOCK KIT No. 1D373

- For use with convertible indoor load centers

## GROUND BAR KITS Nos. 5B717 thru 1D371

- For #14-#4 Cu or #12-#3 Al wire

## GROUND BAR KIT No. 5B713

- With #1 to #4/0 Al/Cu Lug

# QO® THREE PHASE LOAD CENTERS

SQUARE D
GROUPE SCHNEIDER

No. 1D400
Main Lug

No. 1D766
Main Breaker

Replacement Parts Available
1-800-323-0620

- Three-phase, 4 wire 208Y/120, 240/120 or 3 wire 240 Delta
- Federal Spec W-P-115c as Type 1 Class 2 (thru 225 amp)
- Main breakers are convertible to main lug
- Shielded Copper bus construction
- Indoor types can be rotated for top or bottom feed; outdoor types can be bottom fed but wires must be routed to top of panel
- Indoor models use low profile covers with automatic flush adjustment, order separately on page 369
- One piece plated copper bus 12-42 circuit
- Use only QO circuit breakers, see pages 370 and 371

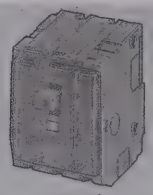
**A NATIONWIDE NETWORK OF BRANCH LOCATIONS**

**Across the street or across the country, finding the Grainger branch location nearest you is a snap when you reference our Branch Locations listed in the front of this catalog. We have more than 350 locations, ready to serve you in all 50 states.**



# QO® CIRCUIT BREAKERS

1-Pole
1 Space Required

2-Pole
2 Spaces Required

3-Pole
3 Spaces Required

SQUARE D
*GROUPE SCHNEIDER*

- Plug-in breakers 3/4" wide per pole
- QWIK-OPEN® circuit breakers with VISI-TRIP® indicator
- 10-30 amp models suitable for 60° or 75°C wire
- 35-125 amp models suitable for 75°C wire
- Use only with QO load centers and NQOD panelboards

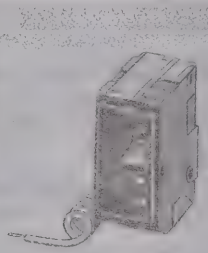
# QO® CIRCUIT BREAKERS



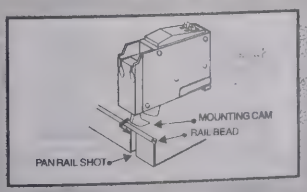
GFI 1-Pole

GFI 2-Pole

HID 1-Pole

Switch Neutral 2-Pole

SQUARE D
*GROUPE SCHNEIDER*



- Plug-in breakers 3/4" wide per pole
- QWIK-OPEN® circuit breakers with VISI-TRIP® indicator
- 10-30 amp models suitable for 60°C or 75°C wire
- 35-60 amp models suitable for 75°C wire
- GFI models will trip with a fault current to ground of 6mA or more
- Use only with QO load centers and NQOD panelboards

SQUARE D
GROUPE SCHNEIDER

# NQOD (240VAC MAX.) PANELBOARDS

Box

Interior

Cover

Complete Unit

- 65°C rise
- 40°C ambient rating
- 240VAC/48VDC maximum rated voltage
- 400A Maximum main lugs or main circuit breaker
- Uses Square D circuit breaker branches QO (plug-in), QOB (bolt-on). See pages 370, 371, and 375
- 10,000 AIR Standard. Higher ratings available with use of QOB-VH, Q2-H, KA & LA main circuit breakers
- Type 1 indoor enclosures

**Panelboards Consist of Three Parts:**

1. Interior (with dead front)
2. Box
3. Cover (Flush or Surface)

The selection guide below matches the Grainger Stock No. to the required interiors, boxes, and covers needed to build a panelboard. Ordering data for the individual components can be found on the following pages.

**SELECTION EXAMPLE**

**Panel Desired:**

240VAC, 1 phase, 100 amp, 20 circuit breaker space, Al bus bar, main breaker (breaker included)

**Components Required:**

1. No. 1D821 (Interior)
2. No. 1D687 (Box)
3. No. 1D723 (Flush Cover) or 1D724 (Surface Cover)

# QOB BOLT-ON CIRCUIT BREAKERS AND ACCESSORIES FOR NQOD PANELBOARDS

1-Pole Requires 1 Space

2-Pole Requires 2 Spaces

3-Pole Requires 3 Spaces

- USED WITH NQOD PANELBOARDS
- 10,000 AIR rating at 120 and 240VAC
- 5,000 AIR rating at 48VDC
- 10 to 30 amp models rated for 60° to 75°C wire
- 40 amp models and higher rated for 75°C wire

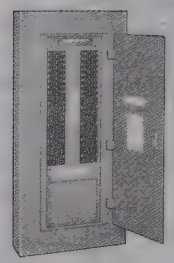
### TECHNICAL REFERENCE LITERATURE

Technical reference literature is available on such subjects as welding, basic electricity, electric motors, and hydraulics and pneumatics. See Index under Books.

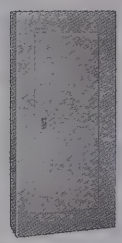
SQUARE D GROUPE SCHNEIDER

LR37055 E61239



## TYPE TF TRANSFORMERS WITH TOP MOUNTED FUSE BLOCKS

- Comply with UL Standard 508 and NEC 450
- Primary fuse clips accommodate Class CC time delay, rejection type fuses
- Secondary fuse clips use a midget (1.5 x 13/32") fuse
- 50/60 Hz
- Designed to handle high inrushes associated with contactors and relays
- 50-150VA models 55°C rise, 105°C temperature class
- 200-350VA models 80°C rise, 130°C temperature class
- 500-1000A models 115°C rise, 180°C temperature class



SEE PAGE 405 FOR ORDERING DATA

# LIGHTING AND APPLIANCE PANELBOARDS

## NF (480Y/277VAC) PANELBOARDS

NF Panelboard Interior

Flush Cover

Surface Cover

- **480Y/277VAC maximum rated voltage**
- **125 thru 400A main lug**
- **Accepts EDB bolt-on breakers**
- **Suitable for use as service entrance with main breakers**
- **Type 1 indoor enclosures**

Panelboards Consist of Three Parts:
(1) Interior (with dead front);
(2) Box;
(3) Cover (Flush or Surface)

The selection guide below matches the Grainger Stock No. to required interiors, boxes, and covers needed to build a panelboard. Ordering data for individual components follows.

**No. 3TW52.** Filler Plate for a Twistout. Square D brand (EFP).
Shpg. wt. 0.1 lbs. List $7.20. Each ..... **$4.32**
Priced each, sold only in packages of 20.

•Circuit breakers must be ordered separately on page 379

### MAIN BREAKER KITS (BREAKER INCLUDED)

| Amps | Square D Model | Stock No. | List | Each | Shpg. Wt. |

# EDB BOLT-ON CIRCUIT BREAKERS

SQUARE D
GROUPE SCHNEIDER

## USED ON NF PANELBOARDS

- 25,000 AIR at 120 and 240VAC
- 18,000 AIR at 277 and 480VAC
- 15 to 30 amp models rated for 60°C and 75°C wire
- 35 amp models and higher rated for 75°C wire

# I-LINE PANELBOARDS

## I-LINE (600VAC MAXIMUM) PANELBOARDS

SQUARE D
GROUPE SCHNEIDER

- **Rated 600VAC or 250VDC**
- **Accepts FA/FH/FC/FI/FY/Q2/Q2H/KA/KH circuit breakers**
- **Up to 800A main lug or main breaker**
- **NEMA Type 1 indoor enclosure**

**Panelboards Consist of Four Parts:**

1. Interior (with Dead Front)
2. Box
3. Trim (No Door) or Cover (Surface or Flush)
4. Blanks

Circuit breakers must be ordered separately on pages 379 - 382. The selection guide below matches the Grainger Stock No. to the required interiors, boxes, trims and covers needed to build a panelboard. Ordering data for the individual components follows.

Solid Neutral Assembly 800 Amp

## QO® DISTRIBUTION PANEL FOR USE IN I LINE PANELBOARDS 3 POLE, 240VAC Max.

SQUARE D
GROUPE SCHNEIDER

- **30A maximum branch breaker**
- **Maximum number of six 1-pole QO breakers see page 372**
- **ABC phase connection**
- **Requires 4½" of I-line mounting space**

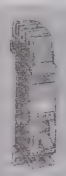
**No. 1H237.** Square D brand (HQ0306). Shpg. wt. 4.2 lbs. List $234.00. Each ..... **$146.25**

## USE ON I-LINE PANELBOARDS-FA AND FY 100 AMP FRAME SIZE

- **2 & 3 pole 480 VAC and 3-pole 600 VAC FA frame breakers are also rated 250 VDC at 10,000 AIR**
- **1½" mounting height for single-pole models; 3" two-pole models; 4½" three pole models**
- **15 to 30 amp models use (1) #14-4 AWG Cu or (1) #12-4 AWG Al wire size**
- **35 to 100 amp models use (1) #14-1/0 AWG Cu or (1) #12-1/0 AWG Al wire size**

No. 2DL09 Handle Padlock Attachment (locks On or Off) for 1, 2, & 3 pole breakers

**No. 2DL09.** Square D brand (HPAFK). Shpg. wt. 0.1 lbs.
List $15.30. Each.....$9.58



### AC MAGNETIC TRIP RATINGS

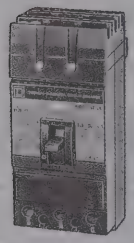
## HEAVY-DUTY SAFETY SWITCHES

NEMA Type 1

SQUARE D
GROUPE SCHNEIDER

UL
E2875



NEMA Type 3R

- For commercial and industrial use
- 240/600 VAC or VDC
- Horsepower rated
- Up to 200,000 amperes short circuit withstand rating when used with or protected by Class R type fuse with Class R kits installed, see page 396
- NEMA Type 3R uses bolt on hubs, see page 396
- NEMA Type 12 suitable for NEMA 3R application by removing screw from bottom end wall
- Red and black, two piece handle knobs to indicate switch position
- Front removable mechanical lugs. Terminations for copper or aluminum (NEMA Type 1 & 3R) and for copper only (NEMA Type 12, 4-4X-5)
- Tangential knockouts NEMA Type 1 and 3R
- UL 98, Standard for Safety, Enclosed and Dead Front Switches
- NEMA Standards Publication KS1-1990, Enclosed Switches
- Federal Specifications WS-865c for Type HD

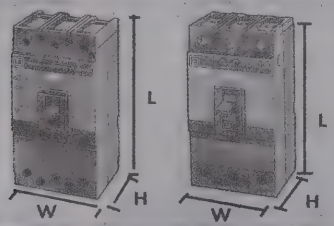
**Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog. The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.**

# THERMAL-MAGNETIC MOLDED CASE CIRCUIT BREAKERS

SQUARE D
GROUPE SCHNEIDER

No. 5B948
3-Pole



No. 5B939
2-Pole

## Q2L 225 AMP FRAME

- Q2L models have standard interrupting rating; Q2L-H models have high interrupt rating
- Wire size: (1) #4 AWG-300 kcmil
- Dimensions: 2-pole models 6.44L x 3W x 3.16"H; 3-pole models 6.44L x 4.5W x 3.16"H
- AC magnetic trip setting: hold 1400 amps; trip 2400 amps

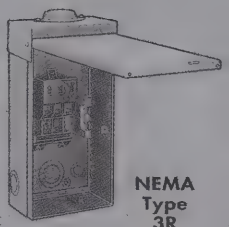
# CIRCUIT BREAKER ENCLOSURES AND ACCESSORY KITS



## CIRCUIT BREAKER ENCLOSURES

NEMA Type 1 Surface Mount

SQUARE D
GROUPE SCHNEIDER

- Order circuit breakers separately

NEMA Type 3R

- Suitable for use as service entrance equipment
- Short circuit current rating of enclosed breaker is equal to interrupt rating at the supply voltage marked on circuit breaker
- Enclosures should be used with 80% ampere rated circuit breakers listed on pages 363 - 385
- NEMA Type 3R enclosures have provisions for 3/4-2½" bolt-on hubs (see page 396), except No. 1H914 has blank endwalls and requires field cut openings

### TECHNICAL REFERENCE LITERATURE

Technical reference literature is available on such subjects as welding, basic electricity, electric motors, and hydraulics and pneumatics See Index under Books.

# DOOR MOUNTED OPERATING MECHANISMS

Type L, door mounted, variable depth operating mechanisms are complete kits featuring heavy-duty, all-metal construction with trip indication. All models can be padlocked in the "OFF" position when the enclosure door is open. Handle assemblies can be locked in "OFF" position with up to three padlocks, which also locks the door closed.

Door drilling template is included with each kit for easy installation. Complete kits rated for use with NEMA 1, 3R, and 12 enclosures. Kits include handle assembly, operating mechanism, and shaft assembly. Optional extended shafts and replacement handles available below.

## KIT ORDERING DATA

| Circuit Breaker or Interrupter Type | No. of Poles | Frame Size (Amps) | Handle Length (In.) | Mounting Depth (In.)* Min. | Max. | Square D Model 9421... | Stock No. | List | Each | Shpg. Wt. |

# CURRENT LIMITING MINIATURE CIRCUIT BREAKERS

## MULTI-9 MINIATURE CIRCUIT BREAKERS

- Available with several different instantaneous magnetic trip characteristics
- DIN rail or panel mount with accessories below
- Withstand 6000V impulse
- Suitable for reverse feed
- Line and load side box lug terminals (pressure plate type) suitable for use with multiple wires
- 1-25 amp models use #18 to 4 AWG Cu wire; 32–63 amp models #18 to 2 AWG Cu wire
- Rated for 20,000 tripping operation cycles

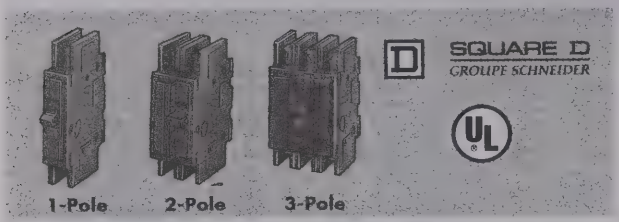
### NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE



Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

### SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE

Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.

# MINIATURE AND MAG-GARD® CIRCUIT BREAKERS

## THERMAL-MAGNETIC MINIATURE CIRCUIT BREAKERS

- Terminal lug wire size (1) #14-2 AWG Cu or Al
- Reversible line and load lugs for flush or surface mount wiring on 10 to 70-amp units (excluding 6B008)
- 35mm DIN/EN 50022 mountable
- One and two-pole models rated for 120/240VAC at 10,000 AIR
- Three-pole models rated 240VAC at 10,000 AIR
- All models are also 48VDC rated at 5,000 AIR
- UL Listed as HACR type (except 10 amp)
- See page 372 for handle lock-off accessory

(*) Priced each, sold only in package quantity.

## MAG-GARD® CIRCUIT BREAKERS WITH ADJUSTABLE INSTANTANEOUS TRIP

- 600VAC, 50/60 Hz
- Used in combination with motor starters with overload relays for protection of motor circuits against short circuits
- Magnetic trip only—provides no overload protection
- Trip point adjustable from front
- Interrupt ratings are determined by testing in combination with motor starter and overload relay
- Trip setting tolerances are ±20% of nominal values

**SUITABLE FOR MOTORS WITH LOCKED ROTOR CODES (Found on Motor Nameplate)**

| Horsepower | Motor Code |
|---|---|
| 1/2 or LESS | A-L |
| 3/4 to 1½ | A-K |
| 2 to 3 | A-J |
| 5 to 25 | A-H |

# MAGNETIC CIRCUIT BREAKERS

## CARLINGSWITCH

- Applications include telecommunications, medical equipment, HVAC, data processing, and power supplies
- Designed for world market applications requiring extra insulation and tongue groove half shell construction
- White actuator handle with black housing
- Series trip design
- Trip point not affected by temperature fluctuations
- UL Recognized, CSA Certified; VDE Certified on Nos. 3XC62-3XC64 and 3XC66-3XC68
- Functionally equivalent to Heinemann, Airpax, and Potter & Brumfield

E75596 LR47848

## SIEMENS

Potter & Brumfield Products Division
Siemens Electromechanical Components, Inc.

E69543 LR15734

## W28 SERIES

- Precision breakers to protect instrumentation applications
- Use to replace costly fuses

Single pole, thermal type breakers securely snap into standard panel cutouts from the front panel; can be prewired in front of the panel, then snapped into place. Feature a reset button that cannot be pulled out manually top disconnect circuit. When an overload occurs and breaker opens, reset button and white indicator extend for visual trip indication. Dielectric strength is over 1500V rms. Connections are made with 0.250" quick connectors.

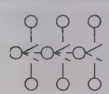
# DOUBLE THROW, NON-FUSIBLE SWITCHES

SQUARE D
GROUPE SCHNEIDER

- Designed for manual transfer of loads from one supply to another



NEMA Type 1

NEMA Type 3R

- All double throw switches are series E
- Nos. 1H314-1H317 equipped with factory installed bondable neutral and are suitable for use as service equipment
- Double throw switches are load make/break (except Nos. 1H299 and 1H300) and continuous duty rated for their nameplate ampere value; suitable for use as service equipment
- NEMA Type 1, 82,000 model switches supplied with dual cover interlock mechanism and key defeat
- Equipment grounding kits available below (for service equipment)
- UL 98, Standard for Safety, Enclosed and Dead Front Switches; meet or exceed NEMA Standard KS1-1990
- NEMA Type 3R uses bolt on hubs, see page 396

(#) Does not contain overcurrent protection. Suitable for systems with up to 10,000 RMS Symmetrical Amperes available fault current at 240 VAC max. when protected by a fuse or circuit breaker rated 60 ampere or less.
(‡) Suitable for systems with up to 10,000 RMS Symmetrical Amperes available fault current at 240 VAC max.

# GENERAL DUTY SAFETY SWITCHES

- For residential and commercial applications such as lighting, air conditioning and appliances
- 240VAC maximum
- 10,000 Ampere short circuit withstand rating when used with or protected by Class H fuse
- 100,000 Ampere short circuit withstand rating when used with or protected by Class R cartridge type fuse with Class R fuse kits installed; see page 396 for Class R fuse kits
- Suitable for use as service entrance equipment. Requires equipment grounding kit, see page 396
- NEMA type 1 indoor and 3R rainproof enclosures
- Visible blades for positive identification that switch is "OFF"
- Quick-make, quick-break operating mechanism
- Lugs suitable for Al or Cu conductors
- Multiple padlock provisions in "OFF" position
- Spring reinforced plated copper fuse clips
- UL 98, Standard for Safety, Enclosed and Dead Front Switches; meet or exceed NEMA Standard KS1-1990

‡) For corner grounded delta systems only. (†) Refer to switch series when selecting accessories on pages 395 and 396.
§) Requires field installation of an equipment grounding kit suitable for use as service equipment, see page 396

# HEAVY-DUTY SAFETY SWITCHES

SQUARE D
GROUPE SCHNEIDER

E2875

NEMA Type 1

NEMA Type 3R

Replacement Parts Available 1-800-323-0620

- For commercial and industrial use
- 240/600 VAC or VDC
- Horsepower rated
- Up to 200,000 amperes short circuit withstand rating when used with or protected by Class R type fuse with Class R kits installed, see page 396
- NEMA Type 3R uses bolt on hubs, see page 396
- NEMA Type 12 suitable for NEMA 3R application by removing screw from bottom end wall
- Red and black, two piece handle knobs to indicate switch position
- Front removable mechanical lugs. Terminations for copper or aluminum (NEMA Type 1 & 3R) and for copper only (NEMA Type 12, 4-4X-5)
- Tangential knockouts NEMA Type 1 and 3R
- UL 98, Standard for Safety, Enclosed and Dead Front Switches
- NEMA Standards Publication KS1-1990, Enclosed Switches
- Federal Specification WS-865c for Type HD

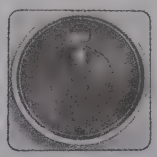
TYPE
ME2U
ME3U

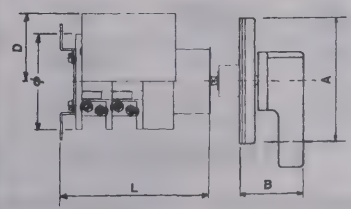
Nos. 6A615, 6A617, 6A619, and 6A621



TYPE
LE2U
LE3U

Nos. 6A616, 6A618, 6A620 and 6A622

LE2U, LE3U Types (Front)



LE2U, LE3U Types meet OSHA Standard 1910.147 (Lockout) for Control of Hazardous Energy Source

Shaft (included)

DIMENSIONS

**ME2U, ME3U Series** have black handle, legend plate with clear plastic cover, and gasket. Door interlock feature keeps door closed until handle is in the Off position.

**LE2U, LE3U Series** have yellow housing with red knob; can be padlocked. Mounts directly to enclosure or panel face. **Complies with OSHA regulations.**

Load break switches are designed to disconnect main power source. Accommodates single or three-phase applications.

Switches supplied with protective cover for line side terminals, legend plate, shaft/gasket assembly, and handle. Mounted switch is dust tight, oil, and water resistant (IP54).

Simply installs in panels from 6 to 12" deep. Shaft must be cut to the length required for the box depth—25 and 32 amp switches can be installed in 6 to 10" deep enclosures; 40 amp switches in 7 to 12" deep enclosures; and 63 amp switches in 8 to 12" deep enclosures.

### SIZING SWITCH

Select the correct switch based on the total amp draw of all the devices in the enclosure or panel. If a control transformer is used in the panel, add power consumption of the transformer to motor load.

*Example:*

5 HP, 230 Volt motor draws 13.5 Amps

$$\frac{50VA}{230V} = .22 \text{ Amps}$$

13.5A + .22A **= 13.72 Amps**

### USE A 25 AMP DISCONNECT SWITCH

If no control transformer is used, total all the loads in the panel such as motor loads, relays, timers, pilot lights etc.

*Example:*

| | |
|---|---|
| 5 HP, 30, 230 Volt motor | 13.5 Amps |
| 2 Relays | .5 Amps |
| 1 Pilot Light | + 10 mA (0.1A) |
| | **= 14.1 Amps** |

**USE A 25 AMP DISCONNECT SWITCH**

# PANEL MOUNT DISCONNECT SWITCHES

## DOOR MOUNT, NON-FUSIBLE LOADBREAK SWITCHES

Telemecanique

No. 4B999

Loadbreak switches are used as an enclosure disconnect in applications where short circuit protection is provided upstream of the switch. They are UL Listed as manual motor controllers.

- **Complete switch includes mounting handle operator, shaft, door interlock plate, and line terminal shroud**
- **3-pole**

# MGE UNINTERRUPTIBLE POWER SUPPLY SYSTEM (UPS)

MGE UPS SYSTEMS

New

Off-Line UPS

No. 3TV76

## MGE PULSAR OFF-LINE UPS

The MGE series UPS's are specifically designed to provide effective single work station, PC, hub, terminal or small key system battery backup and surge protection.

**FEATURES**

- **Compact and lightweight design enables easy plug and play power protection from outages and surges**
- **LED indicators and an audible alarm provide visual and audible indicators of the UPS's operation**
- **Test button gives users the ability to test the condition of the batteries and the inverter**
- **Energy saving mode**
- **Safety agency listed/certified and standards tested to UL 1776, CSA 22.2, FCC Class A & B, ANSI/IEEE C62.41 Cat. A**
- **Fax and phone surge suppression**
- **Two year warranty**

### EXTENDED RUN BATTERY

Extended run battery. For use with No. 4LW22 UPS and No. 4LW23 battery to extend run time up to 30 minutes. Custom DC connector input line connection. Dimensions 9.8"H x 6.8"W x 18.0"D. (EB22XLA).

***New!*** **No. 4LW21.** Shpg. wt. 83.0 lbs. List $559.00. Each .....**$553.50**

## MGE PULSAR LINE INTERACTIVE UPS

The MGE series UPS's incorporate line-interactive technology for brownout, blackout and surge protection of network servers, UNIX systems, PABX and other sensitive computer telephony equipment.

**FEATURES**

- **Active boost circuitry supplies computer grade power during low voltage brownout conditions without going to battery**
- **LED indicators, site wiring fault light and an audible alarm provide comprehensive visual and audible indicators of the UPS's condition and operation**
- **Test button gives users the ability to test the condition of the batteries and the inverter**
- **Extended battery cabinets (ESV 22+ model only) offer customized extended battery backup**
- **Energy saving mode (automatic shut down with no load applied)**
- **Safety agency listed/certified and standards tested to: UL 1778, CSA 22.2, FCC Class B ANSI/IEEE C62.41 Cat. A**
- **OMNIBUS communications port enables unattended shutdown and monitoring of networks and the UPS when used with Merlin Gerin Solution-Pac™ UPS software that's compatible with all major network operating systems (included)**
- **Cold start (ability to use UPS without input power present)**
- **Fader on 3TV79 and 3TV81 corrects high input voltage without transferring to battery**
- **Fax and phone surge suppression**

# TOPAZ® POWER CONDITIONERS

## ESCORT™ POWER CONDITIONERS

MGE UPS SYSTEMS

E1012 LR22.2

No. 5B591

No. 5B595

No. 5B594

The ESCORT™ Power Conditioner is a blend between ferroresonant technology and computer-grade performance. Provides noise suppression and voltage regulation for computers, process control equipment, test equipment, and POS equipment.

### FEATURES

- Multi-voltage industrial wallmount hardwire models
- Portable with NEMA receptacles
- 6 foot line cord and NEMA plug

### SPECIFICATIONS

- Voltage regulation ±3% out with −25% +10% input. +3% −6% out with −35% +10% input
- Noise attenuation 120db common mode, 60db normal mode

### MGE FIVE YEAR LIMITED WARRANTY

MGE warrants Power Conditioners for 5 years. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

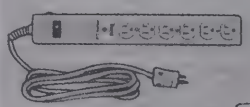
## SURGE STRIPS

### APPLICATIONS

- Industrials, institutions, hospitals, offices, labs, wholesale/retail
- For personal computers, fax machines, CAD/CAM & test equipment, point-of-purchase terminals, medical devices, etc.



### LISTING & APPROVALS

- UL Listed to Standard 1449 (Transient Voltage Surge Supp.), 1363 (Temp. Power Taps), 498 (receptacles). CSA Certified to Spec C22.2 No. 42M. Suitable for ANSI/IEEE C62.41-1980 (IEEE 587) installation cat. "A" & "B"

### FEATURES & BENEFITS

- Protect sensitive electronic equipment from transient voltage surges
- Rugged tamperproof metal enclosure
- Power cords are 6 ft., 14/3 AWG-SJT
- Noise filtering reduces possibility of EMI/RFI interference
- Visual and audible surge status indicators
- Resettable circuit breaker with overload/short circuit protection

# ISOLATION TRANSFORMERS

## ULTRA-ISOLATOR® NOISE SUPPRESSOR ISOLATION TRANSFORMERS

The ULTRA ISOLATOR® Noise suppressor protects sensitive electronic equipment against electrical noise disturbances. Provide noise protection and isolation for computers, test equipment and process control equipment.

- Multi-voltage industrial wallmount hardwire models
- Portable with NEMA receptacles
- 6 ft. line cord and NEMA plug
- Noise attenuation 146 db common mode, 60 db normal mode
- Portable units 120 VAC input/output voltage, 60 Hz
- Hardwire units 120/240 VAC input/output voltage, 50/60 Hz
- Meet UL544, medical and dental equipment standard

**FIVE YEAR LIMITED WARRANTY**

MGE warrants Noise Suppressor for 5 years. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

## CONTROL POWER TRANSFORMER SELECTION GUIDE

1) Determine inrush and sealed VA of each coil in the control circuit. 2) Total the sealed VA of all coils. 3) Total the inrush VA of all coils at 100% secondary voltage. Add this value to the total sealed VA present (if any) when inrush occurs. 4) If the supply voltage is stable and varies no more than ±5%, refer to the 90% secondary voltage column. If voltage varies as much as ±10%, use the 95% voltage column. 5) Using the regulation chart, select a transformer: a) With a continuous VA rating equal to or greater than the value obtained in Step 2 and b) With a maximum inrush VA equal to or greater than the value obtained in Step 3.

### INRUSH VA AT 30% POWER FACTOR

| VA | 95% Secondary Voltage | 90% Secondary Voltage | 85% Secondary Voltage | VA | 95% Secondary Voltage | 90% Secondary Voltage | 85% Secondary Voltage |
|---|---|---|---|---|---|---|---|
| 25 | NA | NA | NA | 350 | 1480 | 2104 | 2712 |
| 50 | 170 | 238 | 308 | 500 | 1836 | 2651 | 3441 |
| 75 | 236 | 353 | 471 | 750 | 3482 | 5042 | 6564 |

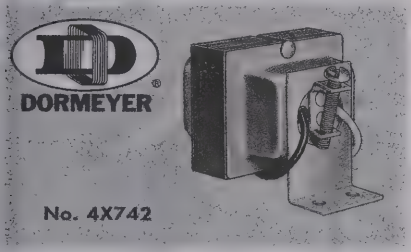
| 300 | 1237 | 1775 | 2299 | | | | |

### RECOMMENDED FUSE SIZES FOR PRIMARY VOLTAGES

- **Use Class CC time delay fuses (see page 422)**

NOTE: NEC sizing in tables satisfies NEC requirements (Art. 450-3) for primary and secondary control circuit protection. For motor control (MCC's) applications with primary current rated 2 amps or less, NEC Article 430-72(b) allows primary fuses to be sized at or less than 500% of rated primary current.

| VA | 120 Volts Primary Current (Amps) | 120 Volts Fuse Rating | 240 Volts Primary Current (Amps) | 240 Volts Fuse Rating | 480 Volts Primary Current (Amps) | 480 Volts Fuse Rating |
|---|---|---|---|---|---|---|
| 50 | .41 | 1 | .21 | 1/2 | .10 | 1/4 |
| 75 | .63 | 1½ | .31 | 3/4 | .16 | 4/10 |
| 100 | .83 | 2 | .42 | 1 | .21 | 1/2 |
| 150 | 1.25 | 3 | .63 | 1½ | .31 | 3/4 |
| 200 | 1.67 | 4 | .83 | 2 | .42 | 1 |
| 250 | 2.08 | 5 | 1.04 | 2½ | .52 | 1¼ |
| 300 | 2.50 | 6¼ | 1.25 | 3 | .63 | 1½ |
| 350 | 2.92 | 7 | 1.46 | 3½ | .73 | 1⅘ |
| 500 | 4.17 | 10 | 2.08 | 5 | 1.04 | 2½ |
| 750 | — | — | 3.13 | 7½ | 1.56 | 3½ |
| 1000 | — | — | 4.17 | 10 | 2.08 | 5 |



### RECOMMENDED FUSE SIZES FOR SECONDARY VOLTAGES

- **Use 1¼ x 1/4" fuses**

NOTE: Fuse sizing in tables satisfies NEC requirements (Art. 450-3) for primary and secondary control circuit protection.

| VA | 24 Volts Secondary Current (Amps) | 24 Volts Fuse Rating | 120 Volts Secondary Current (Amps) | 120 Volts Fuse Rating |
|---|---|---|---|---|
| 50 | 2.08 | 3⅘ | .42 | 6/10 |

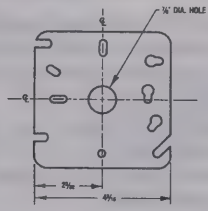
## 5 THRU 40VA TRANSFORMERS



No. 4X742

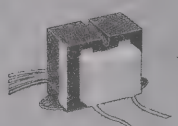
- For use with relays, chimes, bells, thermostats, HVAC equipment, and electrical apparatus

E32963 E32963

- Class 2 rated
- 50/60 Hz
- All-position mounting bracket simplifies installation and eliminates the need to inventory transformers with different mounting styles
- Mounts to standard 7/8" knockout in mounting foot plate (included), handy box, or control enclosure
- Order cover plate No. 4X748, if mounting on handy box is required
- 12" primary leads, stripped 3/4" and twisted

### UNIVERSAL MOUNT COVER PLATE

For mounting transformer Nos. 4X742 thru 4X747 on front of any handy or junction box. Dormeyer brand (BR-146-01).



**No. 4X748.** Shpg. wt 0.4 lbs. List.....$1.60. Each .....**$1.07**

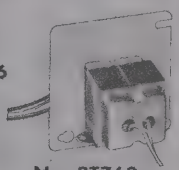
## 40 - 75VA TRANSFORMERS

- Designed for industrial and HVAC control applications
- Overload and short circuit protection
- For applications including residential furnaces where special mounting may be required
- All models are energy limiting and unaffected by momentary short circuits
- On Nos. 3TZ66, 3TZ67, and 3TZ68 extended secondary short circuits cause primary winding to open—minimizes fire hazards
- Nos. 3TZ69 and 3TZ70 have resettable breaker
- Class 2 rated
- UL Listed and CSA Certified

steveco E33334 LR700786



No. 3TZ67

No. 3TZ70

FOOT MOUNT TYPE

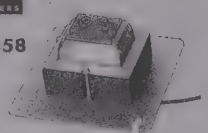
- Can be foot or channel mounted

No. 3TZ68

UNIVERSAL MOUNT TYPE

- Can be foot, plate or 7/8" hub mounted

## 96VA POWER TRANSFORMER



Dual primary/dual secondary
UL Recognized (E68100)

### APPLICATIONS

Automatic assembly equipment and automatic musical equipment
Relays, solenoids, speed changers, door openers, spark plug testers, heating elements, and electronic tubes
Small motors, elevators, pumps, fans and blowers, and control valves for fluids and gases
Mechanical and electrical signs, signal lamps, and low voltage lighting

WR WHITE-RODGERS steveco E12139 LR13360

No. 3A358

96VA Power Transformer No. 3TZ65

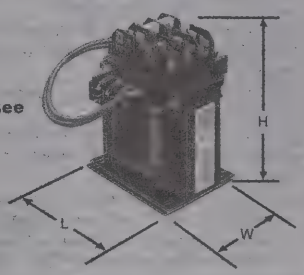
# CONTROL POWER TRANSFORMERS AND FUSE PROTECTION KITS



## TYPE TF TRANSFORMERS WITH TOP MOUNTED FUSE BLOCKS

- Comply with UL Standard 508 and NEC 450
- Primary fuse clips accommodate Class CC time delay, rejection type fuses • Secondary fuse clips use a midget (1.5 x 13/32") fuse
- 50/60 Hz • Designed to handle high inrushes associated with contactors and relays
- 50-150VA models 55°C rise, 105°C temperature class
- 200-350VA models 80°C rise 130°C temperature class
- 500-1000VA models 115°C rise, 180°C temperature class
- Meets UL, CSA, NOM requirements
- Use Finger-Safe accessories to meet CE requirements EN60204, see page 404

SQUARE D
GROUPE SCHNEIDER

- Order fuses separately, see pages 420-423

E61239 LR37055

### FUSE PULLER

For use with type TF transformers. Square D brand (9070FP1).

**No. 4R936.** Shpg. wt. 0.1 lbs, List $9.90. Each.....$9.29

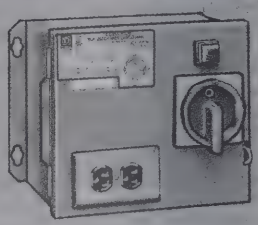
†) Primary rejection-type fuse clips and 1 secondary non-rejection type clip. (*) For single voltage secondaries only.

# TRANSFORMER DISCONNECTS AND BUCK-BOOST TRANSFORMERS



## TYPE SK TRANSFORMER DISCONNECTS

- Provide power to auxiliary 1Ø loads when main 3Ø disconnect is "On" or "Off"
- Applications include isolated loads such as lighting panels, portable power tools, and programmable controller equipment
- Mount inside or outside control system enclosure; NEMA 1 enclosure
- 100,000A short circuit withstand integrated rating when protected by Class CC rejection-style fuses
- Type TF transformer
- Top-mounted fuse block accommodates 2 Class CC time delay primary fuses and 1 secondary fuse (1½" x 13/32")
- External handle mechanically interlocked with enclosure cover; handle locks in "Off" position
- Knockouts
- Ground terminal
- External mounting flanges with slotted holes for hook or hang mounting
- 90° access cover stop
- UL Listed and CSA Certified
- 50/60 Hz

SQUARE D
GROUPE SCHNEIDER

E61239 LR37055

- Order fuses separately, see pages 421 and 422
- Duplex receptacle and indicator light not included

### BUCK/BOOST SELECTION GUIDE

(1Ø LOADS)

1. Determine:

a) Total kilovolt-ampere (KVA) load to be supplied by transformer

b) Required nameplate voltage (120 or 240VAC plus/minus 12, 16, 24 or 32VAC)

c) Available line voltage (120 or 240VAC plus/minus 12, 16, 24 or 32VAC)

2. Calculate buck-boost transformer rating by using the formula:

$$\frac{\text{(High Voltage—Low Voltage)}}{\text{High Voltage}} \times \text{load KVA} = \text{Rating}$$

**DO NOT UNDERSIZE**

Examples:

1. Load KVA = 2.0

Required nameplate voltage =120VAC

Actual line voltage = 132VAC

$$\frac{(132—120)}{132} \times 2.0 = 0.18 \text{ KVA}$$

**Select 0.25 KVA Rated Transformer**

2. Load KVA = 4.0

Required nameplate voltage = 230VAC

Actual line voltage = 208VAC

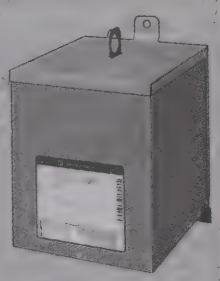
$$\frac{(230—208)}{230} \times 4.0 = 0.38 \text{ KVA}$$

**Select 0.50 KVA Rated Transformer**

**OUR PRODUCT SELECTION IS BIGGER AND BETTER THAN EVER!**

In addition to our new product listings from the leading brand names, Grainger now offers you more than 78,000 products to meet your maintenance, repair, or operation supply needs.

# GENERAL PURPOSE TRANSFORMERS AND WEATHERSHIELDS



## GENERAL PURPOSE TRANSFORMERS

- Corrosion-resistant, phosphatized enclosures
- Indoor ventilated transformers have core and coil assemblies mounted on rubber isolation pads to minimize sound level
- Compact size allows installation near load being supplied
- Tested to meet or exceed IEEE, NEMA, and ANSI standards

No. 48443

- Combination hinge/screw cover wireway is a steel enclosed wiring trough, surface metal raceway, wireway and auxiliary gutter designed to house electrical wiring where dust, dirt, oil and water are not serious problems
- Wireway fittings have removable covers to permit complete "lay-in" of wires
- Cover has keyhole slots to accept captive screws locking the cover securely closed
- 4" x 4" Square wireway is 16 gauge steel
- Finish: ANSI-49 gray epoxy paint
- UL Listed and CSA Certified
- Conforms to NEMA Type 1 enclosure
- Making taps and splices for additions or modifications is simple. Adding, removing, or re-routing circuits is easy
- Wireway is 100% salvageable and reusable. When changing wiring there is no need to scrap major portions of the system as there is with conduit

**Connectors required for each length and fitting.**

**No. 4B457.** Connector (without Knockouts). Shpg. wt. 0.6 lbs.

# TERMINAL BLOCKS, FUSE BLOCKS AND CIRCUIT PROTECTORS

**Terminal blocks** are suitable for use with copper stranded or solid wire. Box lug terminal blocks up to 250MCM wire have terminal hardware recessed into the molding, reducing the chance of contact with current carrying parts.

**Box lugs, flat terminals and pressure wire terminal** sections have a built-in wire strip gage and built-in marking area.

**Mounting:** All sections have a removal arm (except Nos. 2DC71 and 5B364) on the terminal block which allows the section to be snapped on or off the mounting channel by hand or with the use of a screwdriver. The assembly can be mounted on snap-off channel so that shorter assemblies can easily be snapped off as needed.

**SPECIFICATIONS**

- All blocks can be mounted on mounting channel and 35mm DIN track except Nos. 5B364
- No. 5B364 can be mounted on G, H mounting channel or panel mounted through foot hole on base
- Circuit protectors and fuse blocks mount to G, H channel or 35mm DIN rail
- Maximum voltage 600VAC on terminal and fuse blocks
- Temperature rating -40 to 257°F (-40 to 125°C)
- Flammability rating UL94V2
- Block material is nylon
- Blocks and barriers are natural nylon color
- No. 2DD09 includes banana test plug adapter
- Priced each, sold in package quantities only

## 35mm DIN TRACK

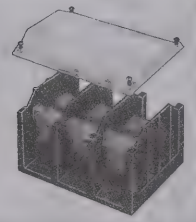
Symmetrical rail 35 x 7.5mm (1.38 x .295") in compliance with EN50022 standard (DIN 46277-3). Prepunched galvanized steel 39.97" (1 m) in length. Square D brand (9080MH339). Priced Each, sold only in pkg. of 10.

**No. 5B357.** Shpg. wt. 0.8 lbs. List $15.43. Each ..... **$15.27**

**GRAINGER HAS OVER 350 BRANCHES NATIONWIDE**

We're well stocked with items you use everyday and our salespeople are knowledgeable, courteous professionals who care about your business. To find the branch nearest you, check the Branch Locations listed in the front of this catalog.

# POWER DISTRIBUTION BLOCKS



- Splice cables or split primary power into a wide range of secondary circuits—also provides fixed tap-off point
- One or two primary connections with up to 12 secondary connections
- 600 volt appliance and industrial rating
- Standard aluminum box to box connectors accept aluminum and copper wire
- Ideal for contractor rework-saves splicing and taping time
- UL Recognized and CSA Certified

TOUCH SAFE COVERS

- Guard against accidental contact with live parts
- Clear with write-on surface for field termination identification
- For industrial controls, HVAC, and other control automation panel applications

# INTEGRAL FUSE AND HOLDER KNOBS AND IN-LINE FUSE HOLDERS

COOPER Bussmann

CE

UL E75865 CSA LR53787

- 10,000 amp interrupting rating
- Rated 300VAC
- Integral one-piece fuse and insulating knob

## GLQ/GLR/GMF/GMQ/GRF Series-For use in fluorescent fixtures

- GLR and GLQ Series are fast acting types
- GMQ, GMF, and GRF are time delay types
- All GLR, GMF, and GRF fuses fit Bussmann HLR fuse holder (see below for ordering data)

### A GLQ SERIES
- Fast acting Fuse
- Rejection type

### B GLR SERIES
- Fast acting Fuse
- Non-rejection

### C GMF SERIES
- Time delay fuses
- Non-rejection type

### D GMQ SERIES
- Time delay Fuse
- Rejection type

### E GRF SERIES
- Time delay Fuse
- Non-rejection type
- 125 volts

# IN-LINE FUSE HOLDERS

## HLR and HLQ MODELS

- For use with integral one-piece fuses
- 6" insulated 18AWG copper line lead
- Receptacle provided for 18AWG load wire
- Rated 300VAC
- HLQ model is a rejection type holder to prevent overfusing and is used with Bussmann type GLQ and GMQ fuses (see above for fuse ordering information)
- HLR model is for use with Bussmann type GLR, GMF, and GRF fuses for fluorescent fixtures (see above for fuse ordering information)

| Maximum Fuse Size | Bussmann Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/2 | HLQ-½ | **1CW03** | $4.66 | **$3.73** | 0.1 |
| 1 6/10 | HLQ-1-6/10 | **1CW02** | 4.66 | **3.73** | 0.1 |

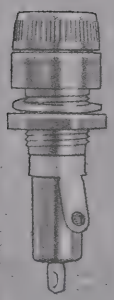
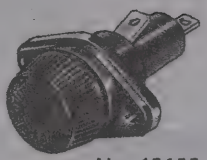
| 12 A | HLR | **1CW08** | 2.28 | **1.82** | 0.1 |



# FUSE HOLDERS, SURGE PROTECTOR, & FUSE PULLERS

## PANEL-MOUNT FUSE HOLDERS



COOPER Bussmann

LR47235

E14853

No. 6F457

No. 6F455

### HTB-22M MODEL

- Panel-mount fuse holder for 5mm x 20mm fuses
- Rated 250 VAC, 15 amps maximum
- Bayonet-style knob
- Functionally equal to Gould GPM-A and Littelfuse 345633

**No. 6F456.** Shpg. wt. 0.1 lbs. List $4.72.
Each ..... $3.78

### HKP MODEL

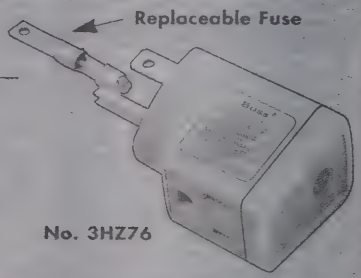
- Panel-mount fuse holder for 1/4" x 1¼ " fuses
- Rated 250 VAC, 30 amps maximum
- Bayonet-style knob
- Functionally equal to Gould GPM-G and Littelfuse 342012

**No. 6F457.** Shpg. wt. 0.1 lbs. List $2.70.
Each ..... $2.16

### HPS MODEL

- Panel-mount fuse holder for 13/32" x 1½ " fuses
- Rated 600 VAC, 30 amps
- Bayonet-style knob
- Functionally equal to Gould GPM-B and Littelfuse 571007

**No. 6F455.** Shpg. wt. 0.1 lbs. List $9.35.
Each ..... $7.48



## SENTRY SURGE PROTECTOR WITH REPLACEABLE FUSES

- Provides dual protection against voltage surges and short circuits
- 125 Volt, 8 ampere rated
- Provides overcurrent protection for cords and power tools, and transient voltage spike protection
- Includes 5 ampere fuse installed (No. 1DJ74) and 8 ampere fuse in package (No. 3KT28)
- Can be used on power tools 1/3 HP or less
- Bussmann brand (SEN-PT)

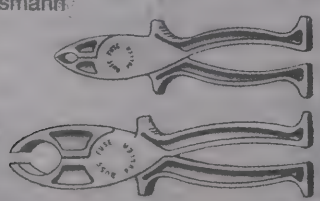
**No. 3HZ76.** Sentry Surge Protector. Shpg. wt. 0.2 lbs. List $10.68.
Each ..... $8.55

COOPER Bussmann

E182300

No. 3HZ76

## GLASS FUSES FOR SENTRY SURGE PROTECTOR



- Replacement fuses for sentry surge protector
- Rated 125 VAC
- 10,000 Amp interrupting rating
- UL Listed (E56412), CSA Certified (LR53787), and CE Certified

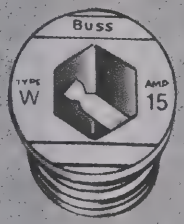
**GLASS FUSE ORDERING DATA**

| Fuse Amps | Bussmann Model | Stock No. | List | Each | Pkg. Qty. | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 5 | ECF-5 | 1DJ74 | $13.53 | $10.83 | 5 | 0.5 |
| 8 | ECF-8 | 3KT28 | 13.53 | 10.83 | 5 | 0.1 |

COOPER Bussmann

Nylon Fuse Pullers
No. 6F446

## NYLON FUSE PULLERS



- Fully insulated with no-slip handles and protective finger stops
- No. 6F446 blue in color; No. 6F447 gray in color

| Size | Application | Bussman Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Small | 13/32" to 13/16" dia. fuses | FP-2 | 6F446 | $7.95 | $6.37 | 0.2 |
| Medium | 1" to 1¾" dia. fuses | FP-3 | 6F447 | 17.51 | 14.01 | 0.2 |
| Large | 1¾" to 2½" dia. fuses | FP-4 | 1BZ80 | 66.64 | 53.35 | 0.7 |

# PLUG FUSES AND BOX COVER UNITS

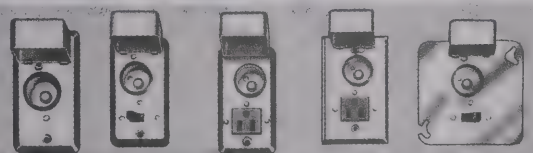
## PLUG FUSES

COOPER Bussmann

No. 6F469

E12112 LR53787 Type S Only

**W Series plug fuses are used for** residential loads and non-motor industrial circuits. TL Series plug fuses are used on normal duty motor loads. The T Series with spring-loaded time delay are used when extra time delay is needed or sensitivity to temperature is desired. S Series fuses are spring loaded time delay fuses with Type S tamper resistant dimensions to prevent substitution of incorrectly sized fuses. SL Series plug fuses have normal time delay and Type S tamper resistant dimensions to prevent substitution of incorrectly sized fuses.



- **S and T series are dual-element**
- **SL, TL, and W series are single element**
- **10,000 amp interrupting rating**
- **Rated 125 VAC**
- **Functionally equal to Gould and Littelfuse; see Cross-Reference on page 436**

## FNQ SERIES—13/32" x 1½"

- 10K amp interrupting rating
- Rated 500 VAC
- Protect small motor control circuits, machine tool transformers, and gas discharge lighting
- Longest time delay of midget fuse types
- Functionally equal to Gould ATQ and Littelfuse FLQ Series (See Cross-Reference Guide on page 436)

| Fuse Amp | Bussmann Model | Stock No. | List | Each | Shpg. Wt. |

### FUSE SPECIFICATIONS (†)
**For Small Motor Protection, 250V or less**

| Motor Full-Load Amperes | Fuse Amp Ratings Normal Duty‡ | Heavy Duty# |
|---|---|---|
| Up to 0.8 | 1¼ | 1⅘ |
| 1.0-1.2 | 1⅘ | 2½ |
| 1.3-1.7 | 2½ | 3½ |
| 1.8-2.0 | 3⅘ | 5 |
| 2.1-2.5 | 5 | 6¼ |
| 2.6-3.5 | 7 | 9 |
| 4.0-4.5 | 9 | 12 |
| 5.0-6.0 | 12 | 20 |
| 6.5-7.5 | 15 | 20 |
| 8.0-9.0 | 20 | 25 |
| 10.0-12.0 | 25 | 30 |
| 12.5-15.0 | 30 | — |

(†)Use for 100VA control transformer primary rating 240V. (‡) Normal duty ratings will withstand locked rotor current of 5 to 10 seconds. (#) Heavy-duty ratings will withstand rotor current of 6.6 times for 10 seconds. (*) Fuse ratings above will withstand inrush currents of 25 times transformer full load 1/2 cycle.

# MIDGET FUSES

## MIDGET CLASS CC FAST-ACTING FUSES

COOPER Bussmann

E4273

LR53787

### KTK-R SERIES—13/32 x 1½"

- 200K amp interrupting rating
- Rated 600 VAC
- Rejection feature
- Fiberglass body
- Protect branch circuits
- Functionally equal to Gould ATMR and Littelfuse KLK-R Series

Applications include protection of control circuits when available short circuit currents exceed 10,000 amps. Rejection fuses will not allow the replacement of a lower voltage fuse or lower interrupting rating provided they are used with rejection fuse blocks; see page 424

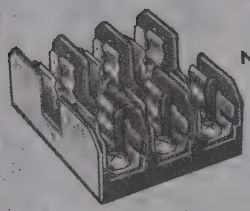
# FUSE BLOCKS



## MIDGET FUSE BLOCKS

1-Pole
No. 4XC30

2-Pole
No. 4XC31

3-Pole
No. 4XC32

COOPER Bussmann

E14853 LR47235

- **Rated 30 amp maximum**
- **Designed for applications such as control panels, motor control centers, switchgear, or elevator systems**
- **Class CC blocks accept high interrupting capacity rejection style Class CC fuses; see page 422**
- **1, 2, or 3-pole assemblies for multiple configurations**

Class CC type fuses are used on circuits with variable fault currents up to 200K amps.

Clips are high conductivity copper and have standard pressure plate terminals that accept solid or stranded #14-#10 AWG wire. Insulators are made of thermoplastic for high impact resistance.

### FUSE BLOCK SPECIFICATIONS AND ORDERING DATA

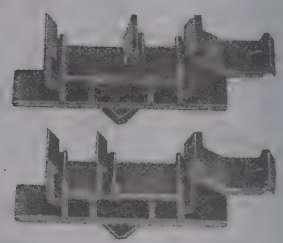
| No. of Poles | Bussmann Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **FOR BAF, FNW/FNM, KTK, AND FNQ MIDGET FUSES** | | | | | |
| 1 | BM6031PQ | **4XC30** | $4.48 | **$3.59** | 0.1 |
| 2 | BM6032PQ | **4XC31** | 7.67 | **6.14** | 0.2 |
| 3 | BM6033PQ | **4XC32** | 9.82 | **7.86** | 0.2 |
| **CLASS CC BLOCKS FOR KTK-R, FNQ-R, AND LP-CC FUSES** | | | | | |
| 1 | BC6031P | **4XC34** | 6.68 | **5.35** | 0.1 |
| 2 | BC6032P | **4XC35** | 10.03 | **8.03** | 0.2 |
| 3 | BC6033P | **4XC36** | 13.22 | **10.58** | 0.2 |

## DIN RAIL MOUNT KIT

- **Snap-on plastic clip goes under midget fuse block—allows block to be mounted on DIN rail. Two kits are needed for 3 pole blocks**

**No. 4XK09.** Bussmann brand (DRA-1). Shpg. wt. 0.1 lbs. List $2.05. Each.....**$1.64**

## IN-LINE BREAKAWAY FUSEHOLDER



- **Accepts any 13/32 x 1½" fuse**
- **Rated 600 VAC, 30A**
- **(6F453) UL Recognized; (E14853) CSA Certified (LR47235)**
- **Boots can be cut at appropriate rib to fit outside diameter of conductor insulation**

Tin-plated copper end terminals can be crimped to copper conductors, solid or stranded from #12 to #8 AWG; or two, #12 solid or stranded conductors on either end. Internal O-ring seal provides a water resistant compartment for the fuse. Breakaway capability allows safe isolation of equipment vulnerable to accidental damage. Cone-shaped boots are included.

**No. 6F453. In-Line Breakaway Fuseholder.** Bussmann brand (HEB-AW-RLC-A). Shpg. wt. 0.3 lbs. List $31.47. Each.....**$25.20**

**No. 6F454. Boot.** Bussmann brand (1A0512). Shpg. wt. 0.1 lbs. List $1.80. Priced Each (Sold only in packages of 2).....**$1.44**

COOPER Bussmann

**Din Rail Mount Kit**
**No. 4XK09**

### A NATIONWIDE NETWORK OF BRANCH LOCATIONS

**Across the street or across the country, finding the Grainger branch location nearest you is a snap when you reference our Branch Locations listed in the front of this catalog. We have more than 350 locations, ready to serve you in all 50 states.**

# OPTIMA™ OVERCURRENT PROTECTION MODULES

COOPER Bussmann

LR47235 E161277

No. 4CX82 OPM-SW Series

No. 4CX81 OPM-CC Series E14835 LR47235

No. 4CX79 Load Break Disconnect Switch OPM-1038 Series

E14853 No. 4CX73 Non-Switch OPM-1038 Series LR47235

## OPM-SW AND OPM-CC SERIES

- Provides Type 2 protection for motor starters when used with properly sized Low-peak® Class CC fuses on page 423
- OPM-SW has 100KA interrupting rating; OPM-CC has 200KA interrupting rating
- 45mm IEC starter width
- 3-Pole
- Phil/slot screws
- Pressure plate terminations
- Rejection of non-Class CC fuses
- Blown fuse indicators
- Safety handle
- Finger safe terminals, 35mm DIN-rail or screw mount
- Dead-front protection
- Padlockable

### NO. 4CX82 LOAD BREAK DISCONNECT SWITCH

- Fits #14-10 gauge wire, both stranded and solid
- Handle and shaft are required for proper operation (order separately below)
- Load break. Interlock prevents fuse removal unless switch is in the OFF position
- Pull-out module for convenient fuse loading and removal

### NO. 4CX81 OVERCURRENT PROTECTION MODULE

- Rated for #18-10 gauge wire, both stranded and solid, and a variety of dual wire combinations
- Removable module for convenient fuse loading

## OPM-1038 SERIES

- Small size matches 45mm IEC starter width
- Use Bussmann series LP-CC, KTK-R or FNQ-R fuses with rejection clips
- Use Bussmann series KTK, FNM, or FNQ fuses with non-rejection clips
- Fits #8-18 gauge wire, both stranded and solid
- 3-Pole
- POZIDRIV® screws
- "Open" fuse indication lights
- Finger safe terminals
- Cam action handle for easy module removal
- 35mm DIN-rail or screw panel mounting
- Padlockable for lock-out, tag-out requirements
- Remote "open" fuse status indication feature available (reduces downtime)
- Offered with Class CC rejection clips or European 10 x 38 mm clips

### OPM-1038 SWITCH SERIES WITH DISCONNECT SWITCH AND CAM ACTION HANDLE

- Handle and shaft required for through-the-door operation (order separately below)
- Load break. Interlock prevents fuse removal unless switch is in the OFF position
- Dead-front construction. No exposed contacts for added safety

### OPM-1038 NON-SWITCH SERIES WITH CAM ACTION HANDLE

- Cam action handle for easy removal
- Removable module for convenient fuse loading
- Dead-front protection

## OPM SERIES ORDERING DATA

| Amp Rating | Volts | Fuse Clip Type | Remote Open Fuse Indication Option | Bussmann Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|

(†) UL Recognized (E15513C)

# TIME DELAY CLASS J FUSES

- 0–60 amps ferrule type; 70-600 amps knife-blade type
- 300K amps interrupting rating
- Rated 600 VAC
- Dual-element fuse
- Rejection feature prevents substitution of less capable fuses in terms of voltage rating, interrupting rating, or current limitation
- Fuses provide time delay for motor loads
- High degree of current limitation allows protection of circuit breakers, panel boards, switchboards, and bus duct where high available short circuits exist
- Small physical size requires approximately half the mounting space of 600 volt Class RK1 and Class RK5 fuses
- Functionally equal to Gould AJT Series and Littelfuse JTD Series; see page 436
- Order fuse blocks up to 100 amps on page 427

Cross-Reference on page 436

**LPJ SERIES—For Use With IEC and NEMA Controls. Protect Service Entrance Equipment, Feeder Circuits, and Branch Circuits Serving both Motor and Non-Motor Loads**

## MOTOR PROTECTION CHART

| Optimal Branch Circuit Protection | Maximum for General Motor Protections |
|---|---|
| Motor FLA x 150% or next size larger | Motor FLA x 175% or next size larger |

DESK SPACE AT A PREMIUM? USE THE GRAINGER CD-ROM, ELECTRONIC CATALOG TO REVIEW THOUSANDS OF PRODUCTS!

Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog. The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.

# FAST-ACTING CLASS J FUSES

COOPER Bussmann

CE

UL E4273

CSA LR53787

- 0-60 amp ferrule type; 70-600 amp knife-blade type
- 200K amp interrupting rating
- Rated 600 VAC
- Single-element fuse
- Rejection feature prevents substitution of a lesser capable fuse in terms of voltage rating, interrupt rating, or current limitation
- Fiberglass body for dimensional stability
- Plated contact surfaces
- Functionally equal to Gould A4J and Littelfuse JLS Series
- Order fuse blocks up to 100 amps below

**JKS SERIES—Protect Capacitors, Circuit Breakers, Load Centers, Panel Boards, Switchboards, and Bus Ducts (where high available short circuit currents exist)**

## CLASS J FUSE ORDERING DATA

# CLASS J FUSE BLOCKS

- Rejection feature
- Use with Class J fuses on page 426 and listed above
- Rated 600 VAC
- Spring reinforced
- No. 1DX69 is pyramid style

## FUSE BLOCK SPECIFICATIONS AND ORDERING DATA

| Ampere Rating | No. of Poles | Connector Type | Wire Range | Bussmann Model | Stock No. | List | Each | Shpg. Wt. |

# MODULAR FUSE BLOCKS FOR BOLT-ON FUSES

- For mounting semiconductor fuses, Class T and Class J fuses rated up to 600 amps and 5000 volts AC
- Each fuse block consists of two identical half-blocks
- Base is constructed of light weight, high temperature thermoplastic
- Studs and nuts are plated steel

## MODULAR FUSE BLOCKS FOR BOLT-ON FUSES SPECIFICATIONS AND ORDERING DATA

| Amps | Fuse Volt Rating | Stud Size. | Holes/ Blocks | Wire Range Size | Bussmann Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| 200 | 700V | 1/4-20 | 1 | #14-2/0 copper wire | BH-0211 | 3HZ52 | $45.57 | $36.50 | 0.6 |

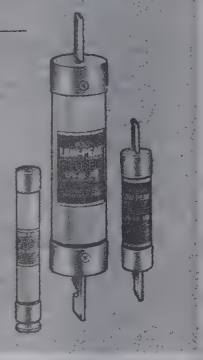
# TIME DELAY CLASS RK 1 FUSES

## LPN-RK/LPS-RK SERIES—Protect Service Entrance Equipment and Feeder and Branch Circuits



- 0–60 amp ferrule type; 70-600 amp knife-blade type
- 300K amp (UL) and 200K amp (CSA) interrupting rating for AC voltages; 20K amp interrupting rating for DC voltages
- LPN-RK rated 250VAC and 125VDC; LPS-RK rated 600VAC and 300VDC
- Dual-element fuse
- Rejection feature
- High degree of current limitation
- Minimizes short circuit current damage
- Carry 500% rated current for minimum of 10 seconds
- Functionally equal to Gould A2D (250V) and A6D (600V); Littelfuse LLNRK (250V) and LLSRK (600V)
- Use fuse blocks on page 434

Cross-Reference on page 436

# TIME DELAY CLASS RK5 FUSES

- 0–60 amp ferrule type; 70–600 amp knife-blade type
- UL Class RK5; 200K amp interrupt rating for AC voltages and 20K amp for DC voltages
- Rated 250VAC and 125VDC
- Dual-element fuse
- Class R rejection feature
- High interrupting rating and time delay for motor starting
- Moisture resistant fiberglass bodies
- Carry 500% of rated current for minimum of 10 seconds
- Functionally equal to Gould TR and Littelfuse FLNR; see Manufacturer Cross-Reference on page 436

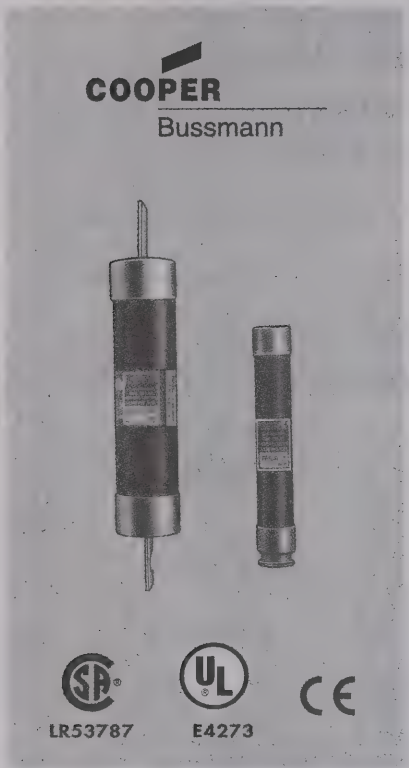
## 250 VOLT MODELS

### FRN-R SERIES—Protect Motors and Controllers

### How To Order Time Delay Fuses

1. Obtain Full Load Amps (FLA) from motor nameplate or manufacturer.
2. Obtain motor Service Factor (SF).
3. Know or obtain motor Voltage (V).
4. Determine number of fuses required; one for single phase motors, two for single phase motors over 115VAC, three for three phase motors.
5. Select fuses according to applications and formula below.

**For AC Motors**



| | Motor Running Protection | Short Circuit Protection |
|---|---|---|
| 1. | Motors with 1.15 SF or more: FLA x 1.25 = Fuse Amp Size | FLA x 1.75 = Fuse Amp Size |
| 2. | Motors with 40°C Rise: FLA x 1.25 = Fuse Amp Size | FLA x 1.75 = Fuse Amp Size |
| 3. | All other motors: FLA x 1.15 = Fuse Amp Size | FLA x 1.75 = Fuse Amp Size |

**Note**: In all cases, select fuse with amp rating equal to or next size larger than Fuse Amp Size calculated. Fuse voltage rating should be equal to or greater than motor nameplate volts.

# TIME DELAY CLASS RK5 FUSES

## 600 VOLT MODELS

### FRS-R SERIES—Protect Motors and Controllers

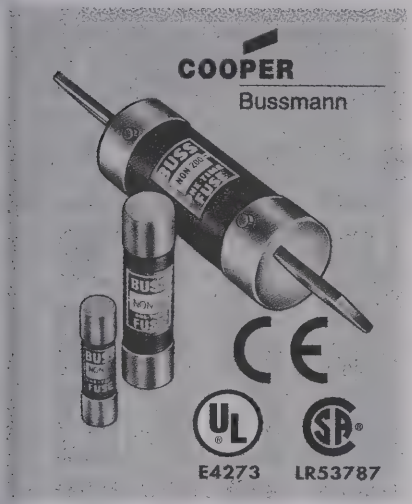
- **0–60 amp ferrule type; 65–600 amp knife-blade type**
- **UL Class RK5; 200K amp interrupt rating for AC voltages and 20K amp for DC voltages**
- **Rated 600 VAC and 300 VDC**
- **Dual-element fuse**
- **Class R rejection feature**
- **High interrupting rating and time delay for motor starting**
- **Moisture resistant fiberglass bodies**
- **Carry 500% of rated current for minimum of 10 seconds**
- **Functionally equal to Gould TRS and Littelfuse FLSR; see Manufacturer Cross-Reference on page 436**

### How To Order Time Delay Fuses

1. Obtain Full Load Amps (FLA) from motor nameplate or manufacturer.
2. Obtain motor Service Factor (SF).
3. Know or obtain motor Voltage (V).
4. Determine number of fuses required: one for single phase motors, two for single phase motors over 115VAC, three for three phase motors.
5. Select fuses according to applications and formula below.

**For AC Motors**

| Motor Running Protection | Short Circuit Protection |
|---|---|
| 1. Motors with 1.15 SF or more: FLA x 1.25 = Fuse Amp Size | FLA x 1.75 = Fuse Amp Size |
| 2. Motors with 40°C Rise: FLA x 1.25 = Fuse Amp Size | FLA x 1.75 = Fuse Amp Size |
| 3. All other motors: FLA x 1.15 = Fuse Amp Size | FLA x 1.75 = Fuse Amp Size |



**Note:** In all cases, select fuse with amp rating equal to or next size larger than Fuse Amp Size calculated. Fuse voltage rating should be equal to or greater than motor nameplate volts.

TELL US WHAT YOU NEED—WE'LL DO OUR BEST TO HELP YOU!

# ONE TIME CLASS K-5/CLASS H FUSES

**NON/NOS SERIES—Protect Main and Feeder Circuits Serving Lighting, Heating, and Other Non-Motor Loads**

- 0-60 amp ferrule type; 70-600 amp knife-blade type
- 50K amp interrupting rating 1-60 amp
- 10K amp interrupting rating 70-600 amp
- 250V Models: UL Class K-5 (0-60A), UL Class H (70-600A)
- 600V Models: UL Class K-5 (15-60A), UL Class H (0-12A, 70-600A)
- NON Models rated 250 VAC; NOS Models rated 600 VAC
- Economical general purpose fuse
- Functionally equal to Gould OT (250V) and OTS (600V) and Littelfuse NLN (250V) and NLS (600V)
- See Cross-Reference on page 436

NYLON FUSE PULLERS AVAILABLE ON PAGE 418

# RENEWABLE 250 VOLT CLASS H FUSES AND LINKS AND FUSE REDUCERS

COOPER Bussmann

UL E5033 (0-60, 225-600A)

CSA LR53787 (0-60, 225-600A)

## REN SERIES — Use with Low Fault Current & Non-Motor Loads

- 0-60 amp ferrule type; 70-600 amp knife-blade type
- 10K amp interrupting rating
- REN Series rated 250 VAC
- Time lag feature
- Knurled bushings for easy assembly
- Order replacement links below
- Bodies are functionally equal to Gould RF (250V) and Littelfuse RLN (250V); links are not interchangeable
- Use fuse blocks on page 434
- See Cross-Reference on page 436

### ORDER DIRECT FROM GRAINGER

You can order directly from Grainger, call your local branch and place an order. To find the branch nearest you, check the Branch Locations listed in the front of this catalog.

## FUSE REDUCERS

- For Ferrule or Knife Blade Clips
- Allow the use of lower ampere rated fuses in existing switches and clips with higher ampere ratings
- Use of lower ampere rated fuses can improve circuit protection
- Rated 30 to 100 amps
- Fuse reducers will accept Class H and K fuses and may be used in non-rejection Class H or Class K fuses clips
- UL Listed(E12853); CSA Certified (CLR47235)

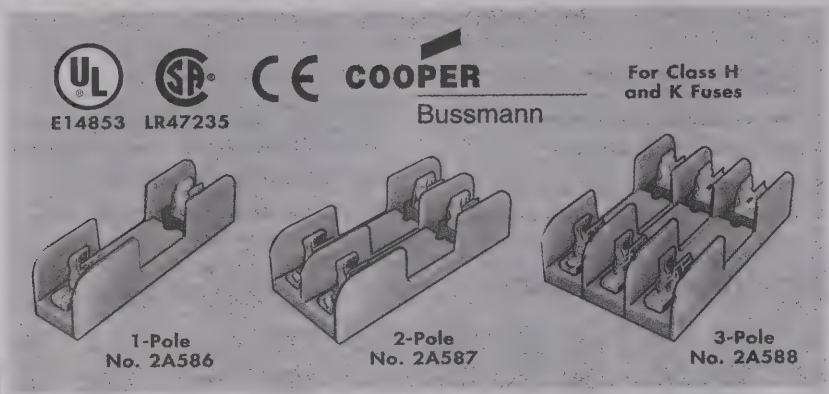
# FUSE REDUCERS



COOPER Bussmann

- For Ferrule or Knife Blade Clips
- Allow the use of lower ampere rated fuses in existing switches and clips with higher ampere ratings
- Use of lower ampere rated fuses can improve circuit protection
- Rated 30 to 100 amps
- Fuse reducers will accept Class H and K fuses and may be used in non-rejection Class H or Class K fuses clips
- UL Listed

| Description | Bussmann Model | Stock No. | List | Each | Shpg. Wt. |

# SEGMENTED FUSE BLOCKS AND FUSE COVERS

## FUSE BLOCKS

- Applications include control panels, motor control centers, switch gear, elevator systems, heating, air conditioning, and refrigeration systems
- Single, double, and triple pole fuse blocks
- Thermoplastic
- Blocks rated 30 through 100 amps
- Rated 250VAC and 600VAC
- Pressure plate and box type wire connectors
- All have spring reinforced fuse clips

(*) For aluminum and copper wire and cable. (†) P.P. = Pressure Plate. (‡) Block does not provide rejection feature.

## FUSE COVERS

- Provides dead front protection and blown fuse indication
- Fit most brands of fuse blocks and disconnect switches
- Easy snap-in installation
- Covers are reusable

## TIME-LAG CLASS G FUSES

SC Series—For use in fluorescent fixtures

- 100,000 amp interrupting rating
- Rated 480VAC
- Can be used in 120/208, 120/240, and 277/480 volt circuits
- Highly compact for use in branch circuits with high interrupting rating and current limitations
- Rejection feature prevents substitution of a lesser capable fuse in terms of voltage rating, interrupting rating, or current limitation

You can order directly from Grainger, call your local branch and place an order. To find the branch nearest you, check the Branch Locations listed in the front of this catalog. You can pick your order up or we'll ship it today.

# CLASS T LOW-PEAK® TIME LAG FUSES AND FUSE BLOCKS

## CLASS T LOW-PEAK® TIME LAG FUSES

### LPT SERIES—0.81 x 1.56"

- An all-purpose space-saving branch circuit fuse that meets most protection requirements up to 60 amps
- Very compact, physical size only 0.81" x 1.56" (20.6mm x 39.7mm) with 1.0" Class T rejection feature
- Time lag to avoid unwanted fuse openings from surge currents when sized appropriately per NEC®
- Protect motor circuits up to 15 HP at 460V, or 20 HP at 575V
- Fast response under short-circuit conditions for a high degree of current limitation
- 200,000 Amp interrupting rating
- For use in large capacity systems

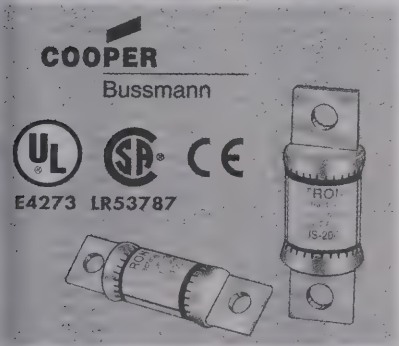
See cross-reference information on page opposite inside back cover.
(*) Up to 8 amps.
(#) Renewable links fit only the corresponding manufacturers renewable fuses.

# CLASS T FUSES



- 0-60 amp ferrule type; 70-1200 amp knife-blade type
- 200K amps interrupting rating
- Rated 300 VAC
- Small dimension fuse provides a high degree of current limitation
- Class T dimensions prevent the substitution of another fuse which may be less capable in terms of voltage rating, interrupting capability, or current limitation
- Provisions for mounting are normally included in the equipment using T Class fuses
- Fuses may be used in single phase line-to-neutral circuits supplied from 3-phase, 4-wire, solidly grounded neutral systems where the line-to-neutral voltage does not exceed 300V
- Functionally equal to Gould A3T and Littelfuse JLLN Series
- See Cross-Reference on page 436

**JJN SERIES**—Protect Circuit Breakers in UL Series Rating System, Load Centers, Panelboards, Switchboards, and Metering Centers (where high available short circuit currents exist)

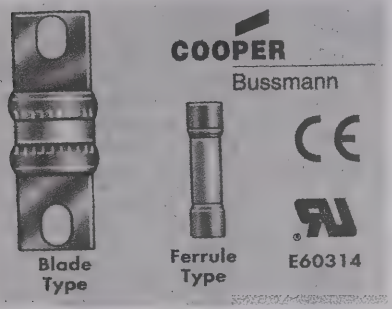
**JJS SERIES**—Protects Circuit Breakers in UL Series Rating System, Load Centers, and Switchboards



- 0-60 amp ferrule type; 70-800 amp knife-blade type
- 200K amps interrupting rating
- Rated 600 VAC
- Current limiting action minimizes energy let through under short circuit conditions
- Small size saves space
- Functionally equal to Gould A6T and Littelfuse JLLS
- See Cross-Reference on page 436

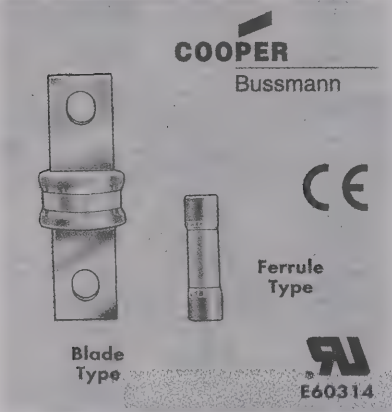
# SEMICONDUCTOR FUSES

## FWA SERIES—Protect Diodes, Thyristors, Triacs, and Other Solid State Components and Devices



- 0-60 amp ferrule type; 70-1000 amps blade type
- 200K amp interrupting rating
- Rated 150 VAC and 200 VDC
- Extremely fast-acting fuses
- Primarily for short circuit protection; also provide a degree of overload protection against currents of approximately twice the fuse ampere rating—see melting time current curves for proper selection
- Functionally equal to Gould A13X and Littlefuse KLA (see page 436)

Blade Type

Ferrule Type

## FWH SERIES—Protect Diodes, Thyristors, Triacs, and Other Solid State Components and Devices

- 0-30 amp ferrule type; 35-1600 amp blade type
- 200K amp interrupting rating
- Rated 500VAC and VDC
- Extremely fast-acting fuses
- Primarily for short circuit protection; also provide a degree of overload protection against currents of approximately twice the fuse ampere rating—see melting time current curves for proper selection
- Functionally equal to Gould A50P and Littelfuse L50S

## NEMA ENCLOSURE DEFINITIONS

**Open**—Motor starter comes with no enclosure. Typically used in separate multi-motor panel.

NON-HAZARDOUS LOCATIONS

**Type 1**—Enclosures are intended for indoor use. Primarily used to provide a degree of protection against limited amounts of falling dirt.

**Type 4**—Enclosures are intended for indoor and outdoor use. Primarily used to provide a degree of protection against windblown dust and rain, splashing water, hose-directed water, and damage from external ice formation.

**Type 4X**—Enclosures are intended for indoor and outdoor use. Primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water, hose directed water, and damage from external ice formation.

**Type 12**—Enclosures are intended for indoor use. Primarily used to provide a degree of protection against circulating dust, falling dirt, and dripping non-corrosive liquids.

HAZARDOUS (CLASSIFIED) LOCATIONS—See NEC Explosive Atmosphere Classifications Below

**Type 7**—Enclosures intended for indoor use in locations classified as Class I, Groups A, B, C, or D as defined by National Electric Code.

**Type 9**—Enclosures intended for indoor use in locations classified as Class II, Groups E, F, or G as defined by the National Electric Code.

## NATIONAL ELECTRICAL CODE EXPLOSIVE ATMOSPHERE CLASSIFICATIONS

Certain locations are hazardous because the atmosphere does or may contain gas, vapor or dust in explosive quantities. The National Electrical Code (NEC) divides these locations into Classes and Groups according to the type of explosive agent which may be present. Listed are some of the agents in each classification. For complete list, see NFPA (National Fire Protection Association) publication 497M.

Underwriters' Laboratories tests motors and other devices for safety in explosive atmospheres, and publishes a list of those meeting its standards for each Class and Group.

Use of UL Listed devices does not necessarily make an installation conform to the NEC or local codes. Consult Chapter 5 of the NEC, local building codes, OSHA requirements and insurance inspectors for detailed data as to proper procedures. This Catalog does not contain any motors designed for Class I, Groups A, B, and C atmospheres.

### CLASS I

**Group A:** Acetylene.

**Group B:** Butadiene, ethylene oxide, hydrogen, propylene oxide, manufactured gases containing more than 30% hydrogen by volume.

**Group C:** Acetaldehyde, cyclopropane, diethyl ether, ethylene.

**Group D:** Acetone, acrylonitrile, ammonia, benzene, butane, ethanol, ethylene dichloride, gasoline, hexane, isoprene, methane (natural gas), methanol, naphtha, propane, propylene, styrene, toluene, vinyl acetate, vinyl chloride, xylene.

### CLASS II

**Group E:** Aluminum, magnesium and other metal dusts with similar characteristics.

**Group F:** Carbon black, coke or coal dust.

**Group G:** Flour, starch or grain dust.

### CLASS III

Easily ignitable fibers, such as rayon, cotton, sisal, hemp, cocoa fiber, oakum, excelsior and other materials of similar nature.

# DEFINITE PURPOSE MOTOR STARTERS

No. 5B091

No. 4DD89

E42240

LR25490

SQUARE D
GROUPE SCHNEIDER

- Applications include air compressors, agricultural equipment, pumps, and HVAC equipment
- Melting alloy overload block
- Trip-free reset mechanism
- 500,000 mechanical operations
- Three-phase models require three thermal units, single phase models require one thermal unit; order on page 445

Replacement Parts Available 1-800-323-0620

### ORDERING HAS NEVER BEEN EASIER!

**Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.**

# THERMAL UNITS

## HOW TO SELECT THERMAL UNITS

Use the table below to determine which maximum full-load motor amp column (A, B, C, D) to order from. Order thermal units by Stock No. from large table.

**All thermal units listed below.** Shpg. wt. 0.1 lbs. List $9.89.
Each ..... **$9.79**

## FOR DEFINITE PURPOSE STARTERS

| Square D Motor Starter | No. of Heaters Required | Select Heater From Column |
|---|---|---|
| 1Ø, 2-Pole, Enclosed | 1 | A |
| 1Ø, 2-Pole, Open | 1 | B |
| 3Ø, 3-Pole, Enclosed | 3 | C |
| 3Ø, 3-Pole, Open | 3 | D |

# IEC MANUAL STARTER AND PROTECTOR

Telemecanique

E89451

LR81630

Replacement Parts Available
1-800-323-0620

**IEC manual starter and protectors** are 3-pole, HP rated manual starters. Includes a manual disconnect, Class 10 ambient-compensated, bimetallic thermal overload relay, and instantaneous magnetic trip mechanism. Can be used alone for local, manual control of a single motor.

- **Vertical operating position**
- **Rated 600 VAC, 25 amps**
- **Interrupting rating at 480V: 10 kA**
- **Maximum operating rate: 25 operations per hour**
- **Operating current of magnetic trip approximately 13 times maximum thermal trip (non-adjustable setting)**
- **Mechanical and electrical life: 100,000 operations**
- **UL Listed and CSA Certified**
- **Conforms to IEC standards**
- **Accessories available below**

### Ambient Temperature

-40 to +176°F (-40 to +80°C) for storage
-4 to +140°F (-20 to +60°C) operation

### Ambient Temperature Compensation

-4 to +140°F (-20 to +60°C) operation

# IEC MOTOR STARTERS, MINIATURE

Telemecanique

LR43364 E164862

No. 6B177

No. 6B182

## CONTACTORS

- For light to medium duty applications
- Suggested Applications: Packaging machines, small hoists, small conveyors, car wash machines, farm equipment, food processing etc.
- UL Listed and CSA Certified for 600 VAC with saddle clamp terminals
- Accessories available below
- Non-Reversing Contactor Dimensions 2.24H x 1.73W x 1.97"D
- Reversing Contactor Dimensions 2.24H x 3.54W x 1.97"D

## OVERLOAD RELAYS

- NEMA Class 10 Trip characteristics
- Ambient temperature compensation from –10° to 60°C
- Adjustable current setting
- Directly heated bimetallic elements
- Dimensions 2.56H x 1.77W x 2.28"D

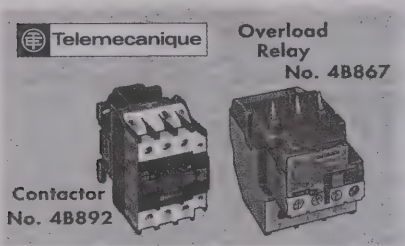
## MOUNTING KIT

Terminal block for separate mounting of the overload relay onto 35mm DIN rail. Telemecanique brand (LA7K0064).



**No. 6B405.** Shpg. wt. 0.1 lbs. List $8.40. Each.....$7.47

## MANY TYPES OF MOTOR STARTERS AVAILABLE

- Definite Purpose
- Self-Protected
- Solid State Reduced Voltage
- IEC Types: Manual, Magnetic, Miniature, Open and Enclosed, Reversing and Non-Reversing
- NEMA Types: Manual, Magnetic, Open and Enclosed, with built-in Motor Logic Solid State Overload Relay, and Combination

See Index Under Appropriate Heading

# IEC MOTORS STARTERS, MAGNETIC, OPEN

## MOTOR STARTER = CONTACTOR + OVERLOAD RELAY

### CONTACTORS

- Designed for industrial motor control applications
- Rugged design ensures high mechanical and electrical life
- Overload relay mounts directly to underside of contactor
- Contactors are not enclosed

### OVERLOAD RELAYS

- Bi-metallic, ambient compensated
- Lockable and sealable Manual/Automatic reset
- Adjustable current range
- Separate "Stop" and "Reset" controls and trip indicator

E48539

LR43364

# IEC OPEN REVERSING AND ENCLOSED NON-REVERSING CONTACTORS

Telemecanique

No. 4B874

Open Type

E164862 LR43364

## IEC OPEN REVERSING CONTACTORS

- Built-in capability for mounting on 35mm DIN rail plus keyhole slots for panel mounting
- Snap on accessories available on page 450
- Terminals shipped ready to wire
- Inclined wire guides for easy wiring. Contactors supplied with captive screws in the ready-to-wire position
- Removable Fingersafe terminal cover provides IP 20 degree of protection
- Mechanical life of up 30 million operations
- Used with overload relays on page 448

# SELF-PROTECTED MOTOR STARTERS

Telemecanique

E164862 LR64862

## INTEGRAL™

- **Contactor and short circuit functions independent of each other for coordinated protection of motor and starter components**
- **Models are rated at 18, 32, or 63 amps continuous current @ 460 VAC, for non-reversing motors**
- **Current limiting circuit breaker can clear fault currents up to 42kA rms @ 460 VAC, within 1.7 msec (32 amp models)**
- **Auxiliary contact blocks can be added to multiply interlocking and signaling capability of each starter**
- **Finger Guard™ terminals keep all terminal wiring safely recessed within the plastic housing**
- **No damage to contactor or overload protection module after interrupting short circuit faults. Verified by UL to meet "Type 2" coordinated protection per IEC 947-4-1**
- **Overload protection modules for Integral 32 & 63 combine independently adjustable thermal and magnetic trip units for complete system coordination**

Isolator contacts allow complete control system testing without energizing any loads, and can be padlocked open for maintenance safety. Provide complete status indication locally and can send status signal to automated systems through remote monitoring. Starters may be rail-mounted or panel-mounted, vertically or horizontally. Uses less than half the panel space required for conventional starters and short-circuit protection devices. 32 amp contactor has a life expectancy of 1.5 million operations.

### COIL SUPPRESSOR BLOCK

For reduction of electrical noise. For use on 18A, 32A, and 63A starters. Telemecanique brand (LA9D09982.)

**No. 2CJ40**. Shpg. wt. 0.1 lbs. List .....$13.20.
Each .....**$12.18**

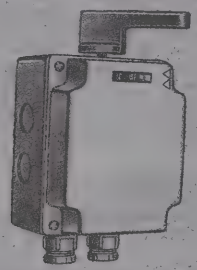
# DRUM SWITCHES

## GENERAL DUTY TYPES

No. 2X440

Dayton



E37709 (except 2X442)

65426 (except 2X442)

- For starting and reversing of motors (does not provide overload protection)
- Heavy copper drum segments, pressed steel case and frame
- Maintained copper contacts and bakelite arc shields
- Metal enclosure with plastic handle

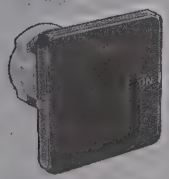
# NEMA MANUAL SWITCHES

SQUARE D
GROUPE SCHNEIDER

E78360

No. 1H406 No. 1H400 No. 1H408

**Non-reversing manual switches** provide manual "On-Off" control of single or three phase AC motors where overload protection is not required or is provided separately. Applications include small machine tools, pumps, fans, conveyors and electrical machinery. Can also be used on non-motor loads such as resistance heaters.



- **Open types fit standard single gang switch boxes, and can be used with any cover plate having a standard toggle cutout**
- **Single-unit flush mounting types, including those with pilot light, are suitable for wall mounting in a standard switch box or for machine cavity mounting without a box**
- **NEMA Type 1 surface mounting enclosures are sheet metal with a thermoplastic wrap-around cover**
- **Zinc alloy die casting used for NEMA Type 4 enclosures**
- **Accessories available, order on page 460**

# ROTARY CAM SWITCHES

Advance Controls, Inc.

E101686 LR39540

### DIMENSIONS

Mounts to Enclosure Face

### SWITCHES

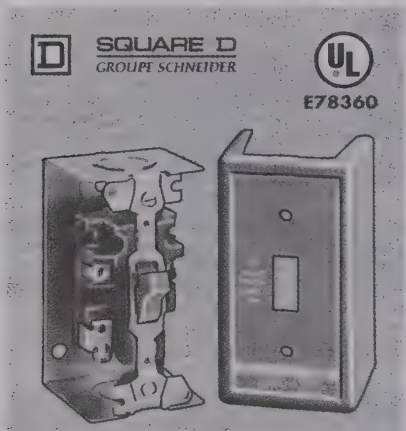
Cam operated, modular element switches with isolated double breaking silver contacts are built to international standards. On/Off switches are designed to start single or three-phase motors across the line or any other on/off application.

Switching angle on all models is 60°. Switches may be mounted in the conduit box of electric motors or any metallic or non-metallic enclosure. Switch and faceplate are mounted to enclosure face using two screws.

### SWITCH APPLICATIONS

**Eliminate start-stop pushbuttons** on single or three-phase motors.

**Single-phase applications.** On/off cam switches replace contactors and should be used in conjunction with a single-phase motor that has manual or automatic thermal overload protection or where no overload protection is required.



**Three-phase applications.** Three phase switches replace contactors and are used where no overload protection is required.

# FRACTIONAL HP MOTOR STARTERS, MANUAL, OPEN AND ENCLOSED

No. 1H385

**Fractional HP starters** provide overload protection as well as manual On/Off control for small motors. Available in one or two pole. Two pole starters can also be used with DC motors to 3/4 HP. Applications include fans, conveyors, pumps, and small machine tools.

- **277 volts maximum AC (1 or 2 pole) and 230 volts maximum DC (2 pole only)**
- **16 amps max. continuous current**
- **Toggle-operated fractional HP starter for single phase motors. Manual reset type**
- **NEMA type 1, 4, 7 & 9 enclosures available**
- **Motor protection is provided by a thermal unit (see below). A thermal unit must be installed before the starter will operate (see below)**
- **Binder head screw type terminals are suitable for #10 or smaller copper wire, and are accessible from the front**
- **Handle Guard/Lock-Off models prevent accidental operation of the toggle operator and also allows the toggle operator to be padlocked in either the ON or the OFF position**
- **Mounting for open types (without pilot light) fit standard single gang switch boxes, and can be used with any cover plate having a standard toggle cutout. Single-unit flush mounting types, including those with pilot light, are suitable for wall mounting in a standard switch box or for machine cavity mounting without a box**

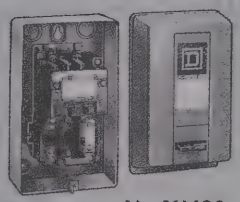
# NEMA MAGNETIC MOTOR STARTERS OPEN AND ENCLOSED



SQUARE D
GROUPE SCHNEIDER

E78351

LR60905

No. 1H490

No. 1H481

- Full voltage motor starters for starting and stopping AC squirrel cage motors • 600VAC, 50/60 Hz
- Overload protection provided by melting alloy type thermal overload relays. Provide accurate response to overload currents and consistent tripping time.
- Class 20 thermal protection
- Replacement overload contact module allows quick repair of overload relay without replacing entire block
- Angled contacts provide high contact pressure and positive seating maximizing contact life
- Spring-assisted gravity dropout on de-energizing contacts quickly extinguishes any arcing
- Normally open holding circuit contact for three wire control
- AC coils operate on line voltages of 85%-110% of rated voltage
- Manual trip-to-test and visible trip indicator. Trip-free construction allows overload relay to trip even if reset lever is blocked or in the reset position
- NEMA Type 1, 3R, 4 & 4X, and 12 enclosures available
- Auxiliary contacts available on page 463

### How To Select The Proper Motor Starter

1. Determine phase requirement—single or three phase.
2. Determine if application is non-reversing or reversing.
3. What is the load rating of the device being controlled either in amps or HP?
4. What type of enclosure is required?
5. What coil voltage is required?
6. Select thermal units on 464 and 465 by determining the full load amps of the device being controlled. Order (1) thermal unit for single phase applications; (3) thermal units for three phase applications.

(*) Order thermal units separately on pages 464 and 465. (†) 120 Volt three phase starters wired for separate control.

# NEMA MOTOR STARTERS WITH MOTOR LOGIC™ SOLID STATE OVERLOAD RELAY

SQUARE D
GROUPE SCHNEIDER

No. 5E748

E78351

LR60905

- Full voltage starters for starting and stopping AC squirrel cage motors
- NEMA rated starter
- 3 Pole, 3 phase, 50/60 Hz, 600VAC
- Open, NEMA 1 and 3R enclosures
- Angled contacts provide high contact pressure and positive seating maximizing contact life
- Spring-assisted gravity dropout on de-energizing contacts quickly extinguishes any arcing
- Class 20 thermal protection
- Normally open holding circuit contact for three wire control
- Overload relay has heaterless construction - adjustable full load amps
- Phase loss and phase unbalance protection
- Alarm contact, remote reset, DIN adapter, and lug-extender kits available on page 462

# MOTOR LOGIC™ SOLID STATE OVERLOAD RELAY

SQUARE D
GROUPE SCHNEIDER

No. 5F583

E14839

LR104591

Motor Logic™ solid state overload relays may be purchased for separate mounting or for retrofit of an existing Square D type S application. Select overload relay by full load amp current range.

- **Overload relay has heaterless construction—adjustable full load amps**
- **3:1 Current adjustment range**
- **Phase loss and phase unbalance protection**
- **Self-powered with power ON LED**
- **Visible trip indication**
- **3 Phase 50/60 Hz, 600VAC**
- **Alarm contact, remote reset, DIN adapter, and lug-extender kits available, see page 462**

GROUPE SCHNEIDER

E78351 LR60905

Replacement Parts Available
1-800-323-0620

No. 1H452

No. 1H451

- Magnetic contactors are for use with heating loads, capacitors, transformers, electric motors, and other power loads
- For use where overload protection is separately provided
- 600 Volts AC maximum
- 50/60 Hz
- Rated in accordance with NEMA standards, UL Listed and CSA Certified
- Normally open holding circuit contact for three wire control is provided as standard

# ACCESSORIES FOR NEMA MOTOR STARTERS WITH MOTOR LOGIC™ OVERLOAD RELAYS

SQUARE D GROUPE SCHNEIDER

Replacement Parts Available 1-800-323-0620

## DIN ADAPTER KIT

The DIN adapter kit allows Motor Logic™ solid state overload relay type 9065 (18, 27, and 45 amp) to be DIN rail mounted. Square D brand (9999DA01).

**No. 5F593.** Shpg. wt. 0.1 lbs. List $11.03. Each.....**$10.93**

## MOTOR LOGIC™ REMOTE RESET

The Motor Logic™ remote reset is used to reset a Motor Logic™ solid state overload relay from a remote location up to 150 feet away. Allows a starter to be reset with a standard 110/120VAC, 50/60 Hz, normally open pushbutton.

For use with nonreversing 3 phase Motor Logic™ type 8536 (NEMA 0-4) and Motor Logic™ solid state overload relay type 9065 (18, 27, and 45 amp). Square D brand (9999RR04).

**No. 5F596.** Shpg. wt. 0.5 lbs. List $74.95. Each.....**$74.25**

## ISOLATED AUXILIARY CONTACT

Isolated alarm contact with NEMA A600/P300 rating. This auxiliary is field convertible from normally-open to normally-closed. For use with nonreversing 3 phase Motor Logic™ type 8536 (NEMA 0-4) and Motor Logic™ solid state overload relays type 9065 (18, 27, and 45 amp). Square D brand (9999AC04).

**No. 5F592.** Shpg. wt. 0.1 lbs. List $26.33. Each.....**$26.10**

## LUG-LUG KIT

**Lug-Lug Kit No. 5F595** provides lugs for use with overload relay Nos. 5F583 and 5F585. The Lug-Lug kit provides line and load-side lugs to facilitate separate mounting of the overload. Square D brand (9999LL0).

**No. 5F595.** Lug-Lug Kit. Shpg. wt. 0.3 lbs. List $19.77. Each.....**$19.59**

## LUG-EXTENDER KIT

**Lug-Extender Kit No. 5F594** is designed for NEMA size 0 and size 1 retrofit applications. This kit allows the lugs to be in the same location as the type 9065 melting alloy overload relay, eliminating the need for additional wire length. The standard 6-18A and 9-27A overload relays are supplied without lugs. Square D brand (9999LB0).

**No. 5F594.** Lug-Extender Kit. Shpg. wt. 0.2 lbs. List $16.44. Each.**$16.29**

## UNIVERSAL BASEPLATE

A universal baseplate can be used to retrofit a Square D type S NEMA starter into an application which is currently using a competitive NEMA starter. Baseplate matches footprints of Allen-Bradley 509 & 709, Cutler-Hammer Citation & Freedom Series, Furnas ESP100 & INNOVA, General Electric CR306, and Westinghouse Advantage & A200.

## SEPARATELY MOUNTED OVERLOAD RELAY

- **For size 1 starters • Melting alloy design**
- **25 A maximum full load current • 3 Pole**
- **3 Thermal elements required (see pages 464 and 465)**
- **Trip-free reset • SquareD brand (9065SE05)**

**No. 2BZ24.** Shpg. wt. 1.0 lbs. List $59.33. Each.....$58.80

## EXTERNAL OVERLOAD RESET MECHANISM

- **For NEMA 1 or 12 enclosures of up to 9.25" in depth**
- **Square D brand (9066RA1)**

**No. 2CF48.** Shpg. wt. 0.3 lbs. List $26.33. Each.....$26.10

## TRANSIENT SUPPRESSION MODULES

Designed to be used where transient voltage, generated when opening coil circuit, interferes with proper operation of nearby integrated or solid state control circuits. Module consists of an RC circuit and is designed to suppress coil voltage transients to approximately 200% of peak coil supply voltage. Module is wired across coil for Type S, (sizes 00-5) and is designed for coil voltages of 120 volts only. UL Listed (E78360).

| Description | Square D Model 9999... | Stock No. | List | Each | Shpg. Wt. |

# THERMAL UNITS

All thermal unit specifications are based on the motor and controller being operated in an ambient temperature of 40°C (104°F) or less.

**Thermal Unit Selection Guidelines:**

1. Determine motor full-load current rating and service factor.

2. Motor and controller (in same ambient temperature) For 1.15 to 1.25 service factor motors use 100% of motor full load current for thermal unit selection.

For 1.0 service factor motors use 90% of motor full load current for thermal unit selection.

3. Motor and controller (in different ambient temperature) Multiply motor full load current by multiplier in table A. Use the resultant full load current for thermal unit selection.

4. Locate proper thermal unit selection column using table B.

SQUARE D
GROUPE SCHNEIDER

E78360 LR60905

FOR SQUARE D NEMA MAGNETIC STARTERS

## HOW TO SELECT THERMAL UNITS

Use table directly below to determine which maximum full-load motor amp column (A, B, C, D) to order from. Order thermal units by Stock No. from large table.

**Enclosed Starter** - Starter mounted in its own enclosure

**Open Starter** - Starter mounted in panel with other components

### Table A—Selection of Thermal Units for Special Applications

| Continuous Duty Motor Service Factor | Melting Alloy Relays — Ambient Temperature of Motor | | |
|---|---|---|---|
| | Same as Controller Ambient | 18°F* Higher than Controller Ambient | 18°F Lower than Controller Ambient |
| | Full Load Current Multiplier | | |
| 1.15 to 1.25 | 1.0 | 0.9 | 1.05 |
| 1.0 | 0.9 | 0.8 | 0.95 |

(*) Constant Ambient Temperature.

### Table B—Enclosure Classification

| Square D Motor Starter | No. of Thermal Units Required | Select Thermal Unit From Column |
|---|---|---|
| 1Ø, 2-Pole, Enclosed | 1 | A |
| 1Ø, 2-Pole, Open | 1 | B |
| 3Ø, 3-Pole, Enclosed | 3 | C |
| 3Ø, 3-Pole, Open | 3 | D |

## ORDERING DATA

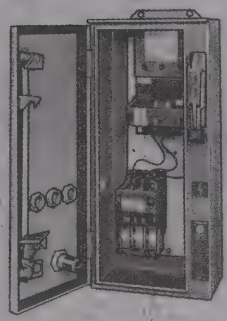
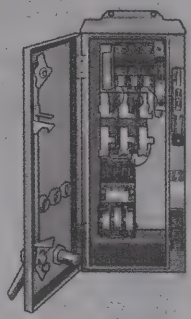
## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE



Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

# NEMA COMBINATION MOTOR STARTERS, MAGNETIC, ENCLOSED



SQUARE D
GROUPE SCHNEIDER

New

E78360

No. 1H694
Class 8539 Type
Starter

No. 1H688
Class 8538 Type
Starter

- Class 8538 and 8539 combination starters designed to operate at 600 VAC maximum, 50/60 Hz
- Class 8538 combination starters feature fusible disconnect switch and come complete with fuse blocks for Class H type fuses
- Class R fuse clips are available (ordering data below)
- All models are 120V coil wired for separate control
- Class 8539 combination starters feature a MAG-GARD® motor circuit protector
- Fusible disconnect switch types utilize flange operated visible blade switch
- NEMA Type 12 Enclosures can be modified for use in NEMA Type 3R applications as follows:
  1. Watertight conduit hubs or equivalent provision for watertight connection at the conduit entrance, when the conduit enters at a level higher than the lowest live part, shall be used
  2. Drain holes of 1/8 inch diameter shall be added to the bottom of the enclosure
- For control transformers, use "Type T" on page 404
- Order accessories below; contact your local branch for accessories not shown

# SOLID STATE REDUCED VOLTAGE STARTERS

SQUARE D
GROUPE SCHNEIDER

New

LR96921 E116875

- Applications include pumps, air compressors, fans, blowers, conveyor systems
- 50/60 Hz, 3 phase, 500 volts maximum
- AC3 duty
- For use with 3 phase induction motors
- Includes thermal protection
- Open enclosure type
- All models include a door-mounted keypad for setup and monitoring

## STARTING AND STOPPING

Four types of starting:

- Soft start, adjustable from 1 to 60 seconds
- Voltage boost, adjustable from 50 to 100% of mains voltage
- Voltage ramping
- Current limit, adjustable from 150 to 500% of controller rating

Three types of stopping:

- Freewheel or coast to stop
- Soft stop, adjustable from 1 to 60 seconds
- DC braking, adjustable from 50 to 100%

## FACTORY PRESETS

A switch located behind keypad allows for selection between Standard Duty or Heavy Duty, defined as:

**Standard Duty:** The controller is preset for Class 10 overload, a 10-second acceleration ramp, and a 300% current limit. Standard-duty operation is defined as 10 starts per hour, with a maximum start time of 23 seconds at 300% current limit or equivalent.

**Heavy Duty:** The controller is preset for Class 20 overload, a 15-second acceleration ramp, and 350% current limit. Heavy-duty operation is defined as 5 starts per hour, with a maximum start time of 46 seconds at 350% current limit or equivalent. For heavy-duty operation, the controller must be derated one size unless a shorting contactor is used, in which case the controller may be used for heavy-duty operation at its standard-duty rating.

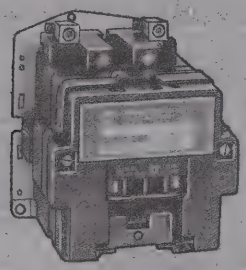
) Motor Full-Load Amperage (FLA) must not exceed the amp rating of the starter.

## UL LISTING AND CSA CERTIFICATION



When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.

# LIGHTING CONTACTORS

## MULTIPOLE LIGHTING CONTACTORS

SQUARE D
GROUPE SCHNEIDER

E78427 LR60905

Electrically Held Models No. 5B136

Mechanically Held Models No. 5B147

**ELECTRICALLY HELD TYPE S MODELS**

- Open type
- Mixed load ratings (lighting and motors)
- Factory wired controls and clearly marked termination points
- UL Listed (withstand ratings up to 100,000 amps); CSA Certified

**ELECTRICALLY AND MECHANICALLY HELD TYPE L/LX MODELS**

- Open type
- Field convertible contacts with normally open and normally closed indicators—8 normally closed contacts maximum
- Silver cadmium oxide double break contacts
- UL Listed and CSA Certified

(*) 30 Amp ballast loads; 20 Amp tungsten loads.

## MECHANICALLY HELD, UNLATCH REPLACEMENT COIL

- For lighting contactors only
- Coil Voltage: 120VAC @ Hz; 110VAC @ 50Hz

**No. 2FK39.** Square D brand (9998LX44). Shpg. wt. 0.3 lbs. List $60.42. Each ..... $59.80

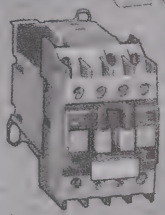
*Relay it, suppress it, enclose it — The leading brands are all right here.*

# MINIATURE IEC CONTROL RELAYS

- 600 volt, 10A rating (A600)
- Ideal for OEM and panel builders
- DIN mounting capability saves space and simplifies mounting
- Built-in cavity for easy insertion of a transient suppressor
- Dimensions: 2.2H x 1.1W x 2.4"D

Telemecanique

E78403 LR60905



Miniature IEC Control Relay No. 3TR45

# IEC CONTROL RELAYS

- 600 volt, 10A rating (A600)
- Relays have serrated contacts which provide a wiping action to ensure excellent performance with low control voltage (24 volts)
- Basic four-pole relay can be installed with a snap-on adder cartridge in two or four poles in a combination of NO and NC contacts
- Standard instantaneous auxiliary contact blocks available for front snap-on or side snap-on. See listing on page 450
- DIN rail mounting capability in both AC and DC ratings
- Built to a design specification of 30,000,000 mechanical operations

IEC DC Control Relay No. 4B545

IEC AC Control Relay No. 4B540

AC Control Relay

AC Master Control Relay

## GENERAL FEATURES

- Rugged heavy-duty design for improved performance, reliability and long life
- Field convertible color-coded contact cartridges
- Replaceable coil
- Mechanical tie between all cartridges
- Operating temperature range: -40°C to 71°C (-40°F to +160°F)

## AC CONTROL RELAY FEATURES

- 600 volt, 10A continuous rating (A600)
- 2 to 12 pole relay
- Straight-through wiring
- Plug-in contact cartridges for easy contact conversion and replacement
- Contact conversion without removing terminal screws or wires
- Self-lifting pressure wire connectors
- Average operating time in milliseconds: 15 pick-up; 16 drop-out

## AC MASTER RELAY FEATURES

- 600 volt, 20A contact rating due to use of Master Contact Cartridges (A600)
- Provisions for Standard Cartridges to be used in contact cavities not occupied by Master Cartridges in 2-8 pole AC relay
- Average operating time in milliseconds: 15 pick-up; 16 drop-out

## DC CONTROL RELAY FEATURES

- 250 volt, 5A rating (P600)
- 2 to 8 pole relay
- Offers all the same features as the AC Relay
- All contact poles are usable since no overlapping contacts are needed
- Average operating time in milliseconds: 37 pick-up; 21 drop-out

# NEMA INDUSTRIAL CONTROL RELAY ACCESSORIES

## MECHANICAL AC LATCH ATTACHMENT

Mounts on any 2 through 8-pole relay except XMO master relay. AC latch attachment has a continuous duty 120VAC coil which is replaceable. Square D brand (8501XLV02).

**No. 4B518.** Shpg. wt. 1.0 lbs. List $92.64. Each.....$91.80

## PNEUMATIC TIMER ATTACHMENT

Mounts on any 0 through 4-pole AC or DC relay except XMO master relay. It provides 1 NO and 1 NC convertible timed contacts, which are the same standard cartridges used on the basic relay (see below for standard cartridges). Timing range is .2-60 seconds.

**No. 4B531. Off Delay.** Square D brand (8501XTD1). Shpg. wt. 0.8 lbs. List $184.25. Each.....$182.50

**No. 4B532. On Delay.** Square D brand (8501XTE1). Shpg. wt. 0.8 lbs. List $184.25. Each.....$182.50

## ADDER DECKS

Adder decks are used to increase the number of poles on a relay. Basic 4-pole relay can be easily converted to an 8-pole or 12-pole relay by installing one or two adder decks. The same type adder deck can be used for both the middle and upper decks.

No. 4B512 comes with 2 convertible contact cartridges and will accept 2 additional convertible contact cartridges. Square D brand (8501XB20).

**No. 4B512.** Shpg. wt. 0.5 lbs. List $26.33. Each.....$26.10

No. 4B513 comes with 4 convertible contact cartridges. Square D brand (8501XB40).

**No. 4B513.** Shpg. wt. 0.5 lbs. List $53.09. Each.....$52.60

## MOUNTING TRACK

Mounting track has pre-punched mounting holes to simplify mounting the track on control panel. Relay mounting screws are factory installed on track so that relays can be hung prior to tightening the screws. 9" long for 4 relays. Square D brand (8501XM4).

**No. 4B519.** Shpg. wt. 0.7 lbs. List $10.82. Each.....$10.72

## TRANSIENT SUPPRESSOR

Consists of an R-C circuit designed to suppress coil generated transients to approximately 200 percent of peak voltage. It is useful when switching NEMA control relays near solid state equipment. Mounts directly on the coil and is designed for use on coils up to 120VAC. Square D brand (8501XS1).

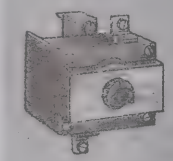
**No. 4B530.** Shpg. wt. 0.1 lbs. List $26.33. Each.....$26.10

## NEMA 1 ENCLOSURE

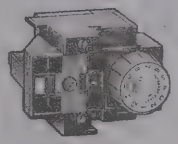
Two conduit knockouts are located in both the top and bottom of enclosure. Enclosure is furnished with self tapping screws for mounting the relay inside the enclosure. Accommodates 4 and 8-pole AC or DC relays, 12-pole AC relay, 4-pole AC latching relay, and 4-pole AC timing relay. Square D brand (9991UE7).

**No. 4B533.** Shpg. wt. 4.4 lbs. List $46.11. Each.....$45.70

## MAGNETIC COILS



### AC MAGNET COIL FOR RELAYS, TIMERS, CONTACTORS



| Coil Volts 60 Hz | Square D Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 24-60 VAC | 9998X23 | 4B534 | $35.19 | $34.85 | 0.3 |
| 120-60/110-50 | 9998X44 | 4B535 | 35.19 | 34.85 | 0.3 |
| 240-60/220-50 | 9998X53 | 4B536 | 35.19 | 34.85 | 0.3 |

Contact Cartridge

## CONTACT CARTRIDGES

**Standard Cartridge**—Used for most applications. Standard cartridges are non-overlapping; rated NEMA A600 and NEMA P600. Black case. Square D brand (8501XC1).

**No. 4B514.** Standard Cartridge Shpg. wt. 0.1 lbs. List $13.22. Each..... $13.09

**Overlapping Cartridge**—Same NEMA A600 AC rating as standard cartridge and a NEMA P150 DC rating. When used in normally open mode it will close early. When used in normally closed mode it will open late. If two or more are used together, normally open contacts will close before normally closed contacts open as the relay picks up. Overlap also occurs during dropout. Red case. Square D brand (8501XC2).

**No. 4B515.** Overlapping Cartridge. Shpg. wt. 0.1 lbs. List $13.22. Each..... $13.09

**Master Cartridge**—Features the same contact ratings as standard cartridge, except it has 20-ampere continuous current rating. It can be used in circuits where a master relay is required. Maximum of 6 master cartridges may be used on any 7 and 8-pole AC relays. Do not use any master cartridges on 9 through 12-pole AC or DC operated devices. Blue case. Square D brand (8501XC4).

**No. 4B516.** Master Cartridge. Shpg. wt. 0.1 lbs. List $33.00. Each.....$32.70

### CONTACT CONVERSION

The contact cartridges of the NEMA relays can be easily converted from normally open to normally closed and vice versa without disturbing relay wiring or removing terminal screws. To convert contacts:

1. Remove relay cover and captive T-bar actuator
2. Remove contact cartridge and rotate 180°
3. Plug contact cartridge back in
4. Replace T-bar actuator and cover

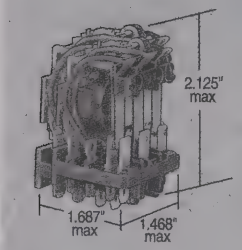
# GENERAL PURPOSE RELAYS

Dayton®

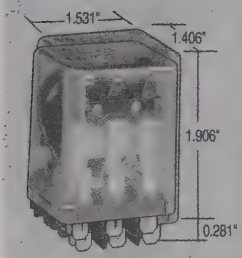
E40944



15734

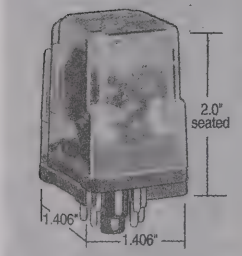
## FEATURES

- Silver alloy contacts
- Compatible with relay sockets on page 480
- Clear plastic covers on enclosed models for inspection of contacts
- Plug-in termination
- Relays rated at 50/60 Hz



## APPLICATIONS

- Starting or switching small motors, vending machines, power supplies, machine tools, elevator systems, control panels, and more



## OPEN, SQUARE BASE MODELS

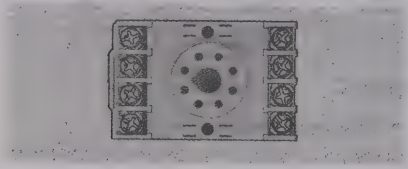
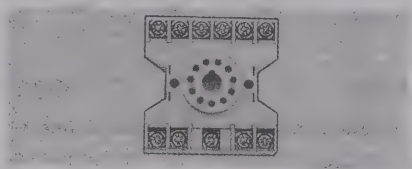
# RELAY SOCKETS



Dayton

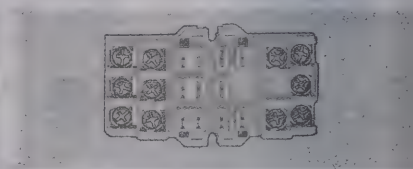
E84694

LR15734



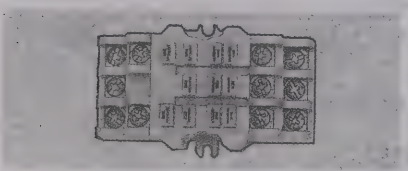
- Brass connectors
- Replaces equivalent Aromat, Custom Connector, Deltrol, Fujitsu, Guardian, IDEC, Magnecraft, Midtex, Omron, Potter Brumfield, Square D, and Struthers Dunn brands; see chart on page 481
- Nos. 5X852, 5X853, 6X156, 2A582, 2A584 and 4A161 feature pressure clamp screws that handle wire sizes from 22 AWG to 12 AWG
- DIN units can be mounted to No. 6X295 (order on page 481) DIN track or surface mounted

## NO. 5X852



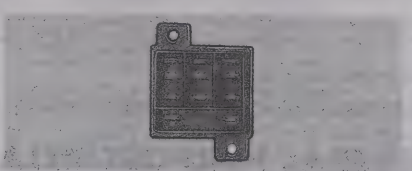
**Socket:** Octal
**No. of Pins:** 8
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Ratings:** 300VAC, 10A
**Dimensions:** 2.01L x 1.575W x 0.970"D.
**No. 5X852.** Shpg. wt. 0.2 lbs. List.....$4.75.
Each.....**$3.96**

## NO. 6X156



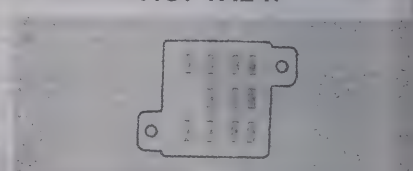
**Socket:** Octal
**No. of Pins:** 11
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Ratings:** 300VAC, 10A
**Dimensions:** 2.035L x 2.332W x 0.970"D.
**No. 6X156.** Shpg. wt. 0.1 lbs. List.....$10.01.
Each.....**$8.36**

## NO. 5X853



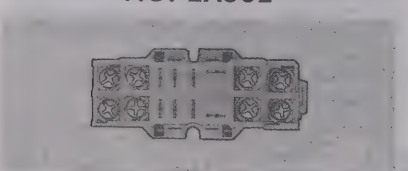
**Socket:** Square
**No. of Pins:** 11
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Ratings:** 300VAC, 10A
**Dimensions:** 3.00L x 1.703W x 1.030"D.
**No. 5X853.** Shpg. wt. 0.2 lbs. List.....$11.08.
Each.....**$9.21**

## NO. 4A161



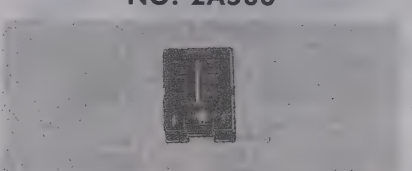
**Socket:** Square
**No. of Pins:** 11
**Mounting:** Screw
**Terminals:** Screw
**Electrical Ratings:** 300VAC, 15A
**Dimensions:** 3.150L x 1.700W x 0.895"D.
**No. 4A161.** Shpg. wt. 0.1 lbs. List.....$9.89.
Each.....**$8.26**

## NO. 5X854



**Socket:** Square
**No. of Pins:** 11
**Mounting:** Screw
**Terminals:** Quick Connect
**Electrical Ratings:** 300VAC, 10A
**Dimensions:** 2.030L x 1.500W x 0.640"D.
**No. 5X854.** Shpg. wt. 0.1 lbs. List.....$2.55.
Each.....**$2.13**

## NO. 1A247



**Socket:** Square
**No. of Pins:** 11
**Mounting:** Screw
**Terminals:** PC Board
**Electrical Ratings:** 300VAC, 10A
**Dimensions:** 2.030L x 1.500W x 0.640"D.
**No. 1A247.** Shpg. wt. 0.1 lbs. List.....$2.63.
Each.....**$2.18**

## NO. 2A582

**Socket:** Square
**No. of Pins:** 8
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Ratings:** 300VAC, 10A
**Dimensions:** 2.736L x 1.181W x 0.984"D
**No. 2A582.** Shpg. wt. 0.1 lbs. List.....$8.87.
Each.....**$7.37**

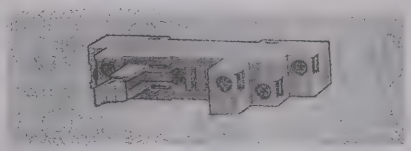
## NO. 2A583

**Socket:** Square
**No. of Pins:** 8
**Mounting:** PC Board
**Terminals:** PC Board
**Electrical Ratings:** 300VAC, 10A
**Dimensions:** 1.156L x 0.843W x 0.437"D.
**No. 2A583.** Shpg. wt. 0.1 lbs. List.....$2.49.
Each.....**$2.07**

## NO. 2A584

**Socket:** Square
**No. of Pins:** 14
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Ratings:** 300VAC, 7A
**Dimensions:** 2.559L x 1.81W x 0.984"D.
**No. 2A584.** Shpg. wt. 0.1 lbs. List.....$12.47.
Each.....**$10.42**

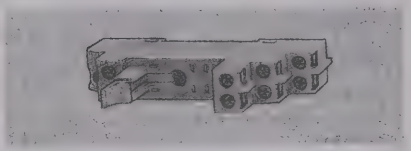
# RELAY SOCKETS



OMRON.

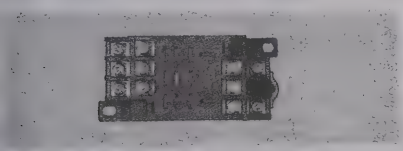
## RELAY SOCKETS

E87929 LR31928



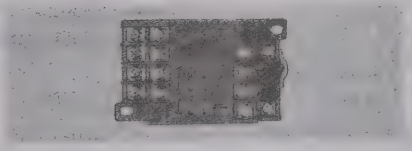
- No. 4KN18 fits H3YN-2 series relays on page 495
- Nos. 2XC08 and 2XC09 fit LY series relays on page 475
- Nos. 6C898 and 6C899 fit G2R Series relays on page 479
- DIN rail mountable; order separately below

## NO. 6C898



**Socket:** Square
**No. of Pins:** 5
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Rating:** 10A, 300V
**Dimensions:** 3.57L x 0.61W x 2.40"H
**Omron Brand:** P2RF-05
**No. 6C898.** Shpg. wt. 0.1 lbs. List..... $4.08.
Each ..... **$3.64**

## NO. 6C899



**Socket:** Square
**No. of Pins:** 8
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Rating:** 5A, 300V
**Dimensions:** 3.61L x 0.63W x 2.48"H
**Omron Brand:** P2RF-08
**No. 6C899.** Shpg. wt. 0.2 lbs. List..... $6.63.
Each ..... **$5.82**

## NO. 2XC08

**Socket:** Square
**No. of Pins:** 11
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Ratings:** 10A, 240V
**Dimensions:** 3.09L x 1.46W x 1.18"D
**Omron Brand:** PTF11A
**No. 2XC08.** Shpg. wt. 0.2 lbs. List.....$7.58.
Each ..... **$6.64**

## NO. 2XC09

**Socket:** Square
**No. of Pins:** 14
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Ratings:** 10A, 240V
**Dimensions:** 3.09L x 1.79W x 1.18"D
**Omron Brand:** PTF14A
**No. 2XC09.** Shpg. wt. 0.2 lbs. List.....$7.58.
Each ..... **$6.64**

## NO. 4KN18

**Socket:** Square
**No. of Pins:** 8
**Mounting:** DIN/Screw
**Terminals:** Screw
**Electrical Ratings:** 5A, 300V
**Dimensions:** 2.83L x 0.91W x 1.18"H
**Omron Brand:** PYF08A-E
**No. 4KN18.** Shpg. wt. 0.1 lbs. List .....$6.03.
Each ..... **$5.42**

## DIN TYPE MOUNTING TRACK

OMRON.
35 Millimeter

Extruded aluminum mounting track for snap on mounting of IEC type contactors, starters, relays and relay sockets. For use with Telemecanique starters, contactors, relays and Dayton relay sockets. Overall dimensions: 1/3H x 1⅜W x 39⅜"L. Omron brand (PFP-100N).

**No. 6X295.** Shpg. wt. 1.0 lbs. List.....$8.01.
Each ..... **$6.45**

## RELAY SOCKET COMPATIBILITY CHART

The chart below identifies national brand relay series that can be used with relay sockets. Fit is determined by the number of relay pins not exceeding the socket pin openings.

| Socket Stock No. | Allen Bradley | Aromat | Deltrol | Eagle Signal | Fujitsu | Guardian | IDEC | Magnecraft | Midtex | Omron | P & B | Sigma | Square D | Struthers Dunn |

# POWER RELAYS

## OPEN MODELS

- Use for switching motor loads in applications such as elevators, machine tools, air handling, and HVAC equipment
- Screw head terminals
- Silver cadmium oxide, self-wiping contacts
- Molded thermoset plastic base
- Must operate voltage for AC relays is 85% of nominal voltage at 25°C (77°F)

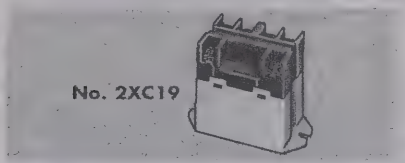
**DESK SPACE AT A PREMIUM? USE THE GRAINGER CD-ROM, ELECTRONIC CATALOG TO REVIEW THOUSANDS OF PRODUCTS!**

Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog. The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.

# POWER RELAYS

No. 2W935



## G4B SERIES

- Top mounted quick-connect .187" spade coil terminals; .250" for load terminal
- Operates at 80 to 110% of rated voltage. Dropout at 30% of rated voltage
- Dielectric strength 2000 VAC, 1 min.
- Flange type mounting bracket
- Dimensions: 1.52L x 1.28W x 2.00"D

OMRON.

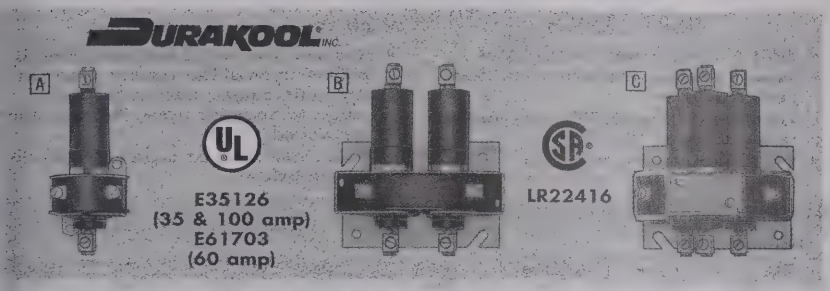
LR15734 Dayton® E40944

Relay Cross Reference On Page 473



Flange Mount No. 1A489

- Suitable for motor loads, HVAC equipment, pumps, and welding equipment
- Enclosed relays designed to switch loads to 20 amps (DPDT); 30 amps (SPDT)
- Pull-in at 85% of nominal voltage for AC coils or 75% for DC coils
- Silver cadmium oxide contacts
- Non-socket mount—use 1/4" quick-connect
- Operating temperature -45° to +50°C (DC); -45° to +45°C (AC)

# MERCURY DISPLACEMENT RELAYS

- Hermetically-sealed, liquid mercury contacts
- Used for motor loads, compressors, power switching, heating, lighting, automation control, oven/furnace control
- Frictionless plunger eliminates metal-to-metal wear
- Normally open contacts
- Temperature range -35° to +60°C ambient under continuous load
- Designed for vertical mounting only

# VERTICAL MOUNT MERCURY DISPLACEMENT CONTACTORS

- Hermetically sealed, liquid mercury contacts
- Applications include heating, air conditioning, and processing equipment
- 3-pole, normally open design
- Identical footprint to 30-amp definite purpose contactors
- Provide longer service life than definite purpose electromechanical contactors
- UL Listed for 240V, 3-phase motor applications
- Dimensions: 3.75L x 3.14W x 3.43"D

# SOLID-STATE AND LATCHING RELAYS

SIEMENS

Potter & Brumfield Products Division
Siemens Electromechanical Components, Inc.

E29244 E29244

No. 3A968

## OPTO-ISOLATED SOLID-STATE RELAYS

### SSRT SERIES

- SPST-NO solid-state Triac output
- Typical turn-on and turn-off at first zero crossover
- Isolation voltage 4000V rms; insulation resistance $10^{10}$ ohms
- #6-32 input screw terminals
- #8-32 output screw terminals
- Heatsink thermal resistance rating is 2°C/W: typical flat surface area per unit is 36 square inches. Mount relays to heatsink using thermal joint compound.
- Heat sinks must be ordered separately; see below

### RELAY SPECIFICATIONS AND ORDERING DATA

| Series | Input Range VDC | Input Typical mA | Output w/Heat Sink Amps RMS Min. | Amps RMS Max. | VAC Min. | VAC Max. | V peak Blocking | Switching Type | P & B Model | Stock No. | List | Each | Shpg. Wt. |

## SOLID-STATE RELAYS

### G3NA SERIES

- Built-in varistor effectively absorbs external surges
- LED operation indicator
- Protective cover for greater safety
- Heat sinks must be ordered separately; see below
- Typical turn-on and turn-off at first zero crossover

## LATCHING RELAYS

### KUL SERIES

- Small, magnetic latching relay requires half the space needed for mechanical latching relays
- Rated for 50 Hz
- For continuous duty applications that need good memory stability
- Maintain contact position without maintaining coil energization
- Reset by applying power to an alternate set of coil terminals
- Quick connect, solder terminals or socket mount
- 3A965 is single-coil latch; 3A966 and 2XC36 are dual-coil latch

Input/Output Module

Mounting Boards for Input/Output Modules

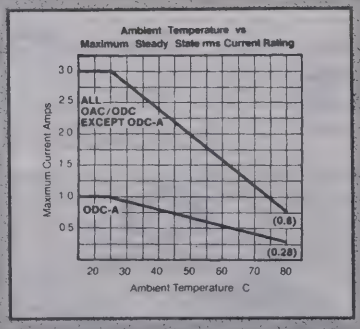
### IAC/OAC, IDC/ODC SERIES

**Opto-isolated solid-state input/output modules** provide a means of reliably interfacing between microprocessor or computer based control systems and external input devices and loads.

**Series compatible.** On modules of the same voltage type, AC or DC, output of the output modules is compatible with the input modules. This makes them ideal for series operation applications. Output modules can be controlled from sinking (NPN) or sourcing (PNP) logic.

**Color-coded by function:** IAC—AC input (yellow), OAC—AC output (black), IDC—DC input (white) and ODC—DC output (red). All models have standard plug-in enclosure with captive hold down screw for quick interchanging. Continuous duty. Isolation voltage is 4000V rms; isolation resistance $10^9$ ohms. High immunity to transient noise, less than $3000V_{p\text{-}p}$**. UL Recognized. CSA Certified (LR38595).

### MOUNTING BOARDS FOR I/O MODULES



**Mounting boards accept 4, 8 or 16 input/output modules** in any combination. Insert and remove modules quickly and easily, without disturbing field wiring. Once inserted, secure modules to board by threading captive hold-down screws into the nuts attached to board.

**LED status indicator,** plug-in 5-amp fuse and 3.3K ohm pull-up resistor are provided on the mounting board for each module. Each module position may be color coded for convenience.

**Screw terminals in barrier strips** are used for logic supply input connections and field input/output connections on all mounting boards. Screw terminals on all mounting boards will accept two #12 AWG wires.

**Card edge patterns on mounting boards** Nos. 4A035 and 4A036 accept standard 50-pin cable connectors for logic connections. 4A034 uses screw terminals. Eight position mounting board No. 4A035 also accepts a 26-pin cable connector. Each module position on these boards is served by two of the cable's conductors. Odd numbered pins are used for signals while even numbered pins are connected to logic ground. Jumper locations permit logic supply input to be introduced through cable rather than screw terminals. UL Recognized. CSA Certified (LR15734).

### ELECTRICAL CHARACTERISTICS OAC/ODC MODULES

### MOUNTING BOARD SPECIFICATIONS

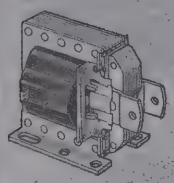
| No. of Module Positions | Dimensions (In.) L | W | D* | P&B Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 4† | 4.5 | 3.5 | 2.2 | 2104B | **4A034** | $28.11 | **$27.30** | 2.0 |
| 8‡ | 8.4 | 3.5 | 2.2 | 2108 | **4A035** | 46.96 | **45.70** | 0.5 |
| 16‡ | 14.4 | 3.5 | 2.2 | 2I016 | **4A036** | 83.06 | **80.70** | 0.9 |

(*)Height is measured to top of mounted models

(†)Designed to operate with either negative or positive true logic systems and different logic voltages.

(‡)Designed to operate with negative true logic systems and one logic voltage.

(**)Transient noise immunity is the ability to withstand external noise without triggering the load switch or transmitting the noise. These I/O modules typically demonstrate noise immunity of > $8000V_{p\text{-}p}$.



### INPUT/OUTPUT RELAY MODULE SPECIFICATIONS AND ORDERING DATA

| Type (Series) | Case Color | System Voltage | Input Voltage Range | Input Current at Maximum Voltage | Output Load Current Over Load Voltage Range | Output Switching Type | P&B Model | Stock No. | List | Each | Shpg. Wt. |

(***) LED in series with input. (††) Input will operate on AC or DC voltage.

# LAMINATED, BOX FRAME AND C-FRAME TYPE SOLENOIDS

## LAMINATED TYPE SOLENOIDS

DORMEYER®

Super T Series

No. 4X239

- Pull type, continuous duty cycle rated at 40°C
- Polyester encapsulated coil, polyester bobbin
- Laminated steel, zinc dichromate plated frame and plunger
- Steel plunger springs, brass plunger guides
- Class A coil insulation, solder lug coil terminals

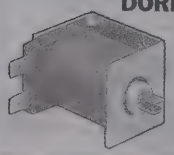
## BOX FRAME TYPE SOLENOIDS

DORMEYER®

B-Series

No. 2A167

Individually Packaged



- Pull type, continuous duty cycle rated at 40°C
- Varnished cotton tape coil insulation
- Phenolic bobbins (2A170 has nylon with brass tube bobbin)
- Steel, zinc dichromate plated, frames and plungers
- Steel spring
- Type 1 solder lug coil terminations

# TUBULAR TYPE SOLENOIDS

- Pull type
- Rated 24VDC
- Polyester coil insulation
- Corrosion resistant steel plunger
- Stainless steel plunger cavity
- Corrosion resistant steel plunger stop
- Spring steel, zinc plated, lock washer
- Steel, zinc chromate plated housing
- 6" lead coil termination
- Continuous duty cycle rated at 40°C
- P16 series equivalent to obsolete P6 series

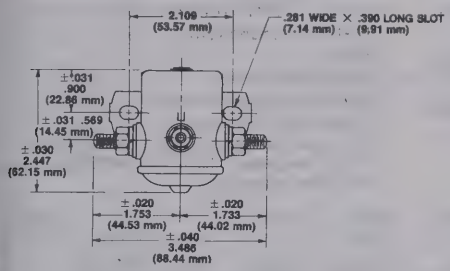
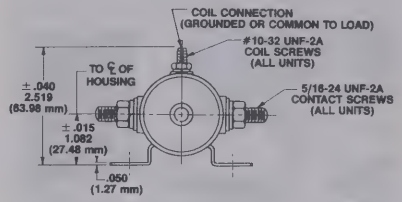
HOW TO ORDER
DC POWER SOLENOIDS
See Page 491
For Dimensions



1. Select coil voltage
2. Determine whether isolated or ground coil is required by matching number of terminals to original part. Example: SPNO grounded coils have a total of 3 terminals; SPNO isolated coils have a total of 4 terminals; and SPDT isolated coils have a total of 6 terminals.
3. Determine pole form: Single Pole, Normally Open (SPNO) or Single Pole, Double Throw (SPDT)
4. Determine maximum inrush and carrying current and match to appropriate listing in chart above
5. In starting applications, select intermittent duty coils
6. Closely match mounting dimensions on page 491 with original part

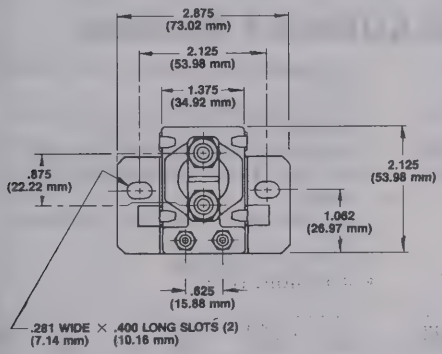
NOTE: Caution must be used in coil selection for use in 12 volt systems where battery charging may be exposed to continuous, higher-than-rated voltage.

Relay it, suppress it, enclose it — The leading brands are all right here.



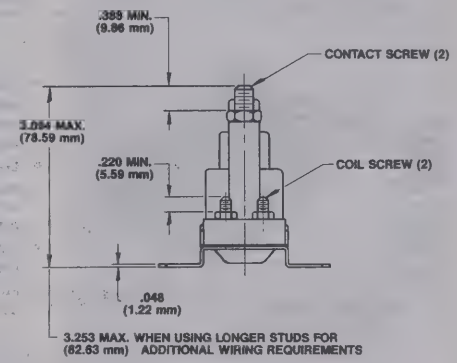
# DC POWER SOLENOIDS

## Isolated Type — TYPE 70 — Grounded Type

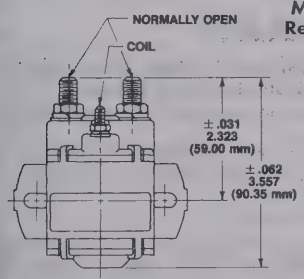


**SINGLE POLE NORMALLY OPEN**

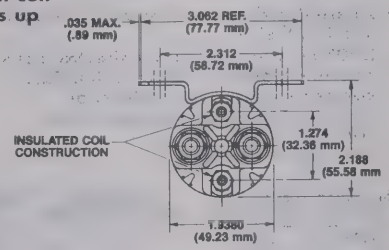
**Mounting Position:** Recommend vertical plane with cap down



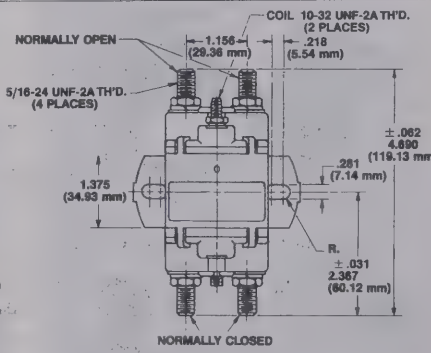
## TYPE 120



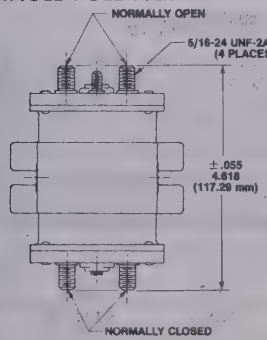
**SINGLE POLE NORMALLY OPEN**



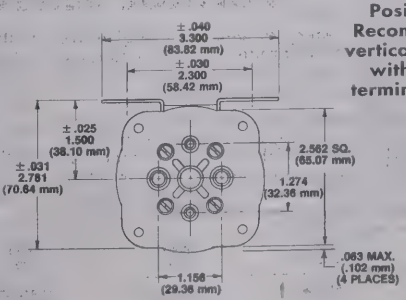
**Mounting Position:** Recommend vertical plane with coil terminals up or horizontal

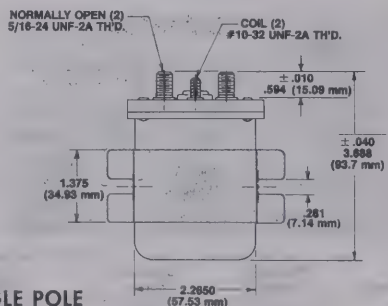


## SINGLE POLE NORMALLY OPEN — TYPE 124



**Mounting Position:** Recommend vertical plane with coil terminals up





## SINGLE POLE NORMALLY OPEN — TYPE 586

**Mounting Position:** Recommend vertical plane with coil terminals up

**SINGLE POLE DOUBLE THROW**

## THREE-PHASE LINE MONITOR

- Protects equipment and motors from dangerous line conditions such as: Incorrect phase sequence, loss of a phase, low voltage conditions (88 to 92% of adjusted nominal voltage), and voltage unbalance between phases
- Features easy-to-set line voltage
- Wye or Delta 3-wire hookup
- 8 amp, SPDT isolated relay contacts
- LED indicator signals normal operation
- Automatic reset
- 4% voltage unbalance
- 5 second trip delay
- No. 6C058 uses socket No. 5X852 listed on page 480; No. 6C059 includes socket

| Adjustable Nominal Line Voltage @ 50/60 Hz | Maximum Line Voltage | Socket Required | SSAC Model | Stock No. | List | Each | Shpg. Wt. |

| 400 to 480 | 530 | Included | PLM9405 | 6C059 | 73.34 | 72.60 | 0.8 |

## UNIVERSAL AC CURRENT SENSOR

- Designed for use in: Pumping and irrigation, conveyers and loaders, material handling equipment, fans, blowers, ovens, and heaters
- Detects locked rotor, loss of current, open heater or lamp load, whether an operation has taken place or ended
- Switch selectable overcurrent or undercurrent sensing
- Adjustable trip points from 2 to 20 amps
- Adjustable trip delays 0.5 to 50 seconds
- Complete isolation between sensed current and control circuit
- Encapsulated solid-state circuitry
- 10 amp, SPDT isolated output contacts
- Toroidal sensor has 3/8" through hole
- LED fault indicator
- Automatic reset

| Input Operating Voltage @ 50/60 Hz | Maximum Inrush Current | Output Rating @240VAC | Mount | SSAC Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 24 VAC | 300 amps | 10 amps | Surface | ECS21BC | 6C054 | $65.85 | $65.40 | 0.5 |
| 120 | 300 | 10 | Surface | ECS41BC | 6C055 | 65.85 | 65.40 | 0.5 |

## ALTERNATING RELAYS

- Alternates the operation of two loads sharing their run time
- DPDT crosswiring allows simultaneous operation of two motors, solenoids, compressors, pumps, valves, or heaters. Provides dual stage load capacity
- LED status indicators
- Selector switch allows alternating or electrically locked operation
- Returns to load "A" after power outage
- DPDT 10 amp contacts @ 240VAC
- Uses socket No. 5X852; order on page 480

| Line Voltage 50 / 60 Hz | Contact Form (Crosswired) | Contact Rating (Resistive) @ 240VAC | Maximum Voltage | SSAC Model | Stock No. | List | Each | Shpg. Wt. |

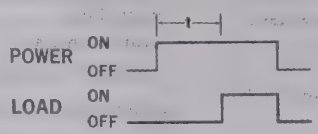
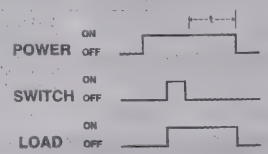
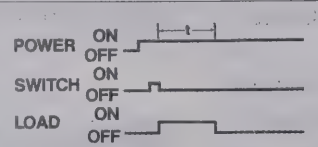
## VOLTAGE SENSOR RELAYS

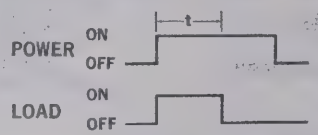
**Designed to energize and de-energize** its internal relay at predetermined voltages. Desired levels are knob-adjustable and can be varied over a selected range.

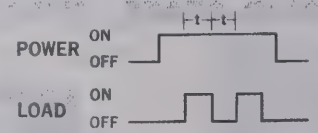
**Consist of sensing circuit** that turns On or Off a solid state switch, energizing or de-energizing the internal DPDT relay. Device can be used as an over voltage sensor when load is connected to NO contact. Enclosed in nylon dust cover. Octal terminals fit standard 8-pin socket. Typically 2.5 watt units; they are not constant impedance. DPDT contacts are rated 10 amps @ 28VDC or 120VAC, resistive. Continuous-duty relay has a repeatability of ±1% (max.) and an operating temperature range from -10°C to 55°C; temperature coefficient of 0.2%°C. DC model has reverse polarity protection.

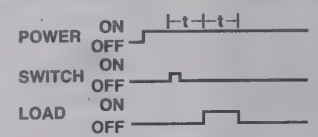


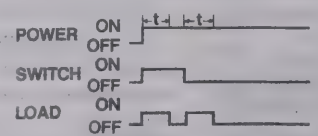


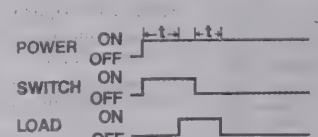












- For single-phase applications only

| Series | Pick-Up Range | Drop-Out Range | Type of Voltage | Max. Voltage | P&B Model | Stock No. | List | Each | Shpg. Wt. |

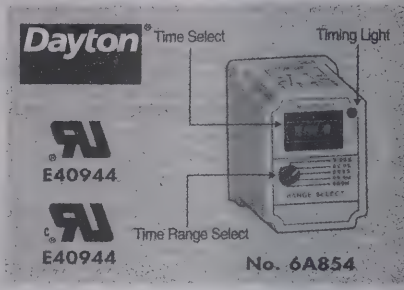
# TIME DELAY RELAY SELECTION GUIDE

| Description | Timing Chart (t = time) | Dayton No. | Omron Series | P & B Series |
|---|---|---|---|---|
| **ON DELAY**<br>When power is applied to input terminals, the time delay starts. At the end of the preset time delay, the output contacts transfer, either connecting or disconnecting the load. Reset by removing input power. |  | 5X828,<br>5X829,<br>5X830,<br>6X601,<br>6A854,<br>6A855 | H3CA-A<br>—<br>SYD,<br>H3Y-2,<br>H3Y-4,<br>H5CR-B<br>H3CR-A8 | CG,<br>CD,<br>CH,<br>CL,<br>CNS,<br>CNT |
| **OFF DELAY I**<br>Power is applied at all times. Upon the closure of the normally open switch, the output contacts transfer and remain in this position as long as the switch is kept closed. When the switch opens, timing starts. At the end of the preset time delay, the output contacts transfer back to their original position and the unit is ready for a new cycle. **NOTE:** Do not ground or apply voltage to the start switch. |  | 6X153,<br>6X154,<br>6X155,<br>6X602,<br>6A855 | H3CA-A,<br>H5CR-B | CD,<br>CH,<br>CNS,<br>CNT |
| **OFF DELAY II**<br>Power is applied at all times. Upon the closure of the normally open switch, the output contacts transfer and timing starts. At the end of the preset time delay, the contacts transfer back to their original position. |  | — | H3CA-A,<br>H5CR-B | CNT |
| **INTERVAL DELAY**<br>When power is applied to the input terminals, the contacts transfer and the timing cycle starts. At the end of the preset time delay, the output contacts transfer back, either disconnecting or connecting the load. Reset by removing input power. |  | 6X603,<br>6X604,<br>6X605,<br>6A855 | H3CA-A,<br>SYD,<br>H5CR-B<br>H3CR-A8 | CNS,<br>CNT |
| **REPEAT CYCLE**<br>When power is applied to the input terminals, OFF delay is initiated. At the end of the OFF preset time, contacts transfer from OFF to ON position and ON delay starts. At the end of ON preset time, contacts transfer from ON to OFF position and a new cycle begins. The ON and OFF cycles will continue to alternate until power to input terminals is removed. |  | 1A366,<br>1A367,<br>1A368,<br>6A855 | H3CR-F8<br>H3CA-A,<br>H5CR-B | CR,<br>CNS,<br>CNT |
| **CYCLE ONE-SHOT**<br>The start terminals are connected. Timing starts when power is applied. The output relay will be OFF for the set time then ON for the set time. The timer is reset when power is disconnected or a reset input is applied. |  | — | H3CA-A,<br>H5CR-B | CNT |
| **SIGNAL INTERVAL/OFF DELAY**<br>Power is applied at all times. The first timing cycle begins when the input signal is applied. The second timing cycle begins when the input signal is removed. The output relay is energized during both timing cycles. |  | — | H3CA-A,<br>H5CR-B | CNT |
| **SIGNAL ON DELAY/OFF DELAY**<br>Power is applied at all times. The first timing cycle begins when the input signal is applied, the second when it is removed. The output relay is energized when the lapsed time from the first timing cycle equals the setpoint. It will remain energized until the lapsed time of the second timing cycle equals the setpoint. |  | — | H3CA-A,<br>H5CR-B | CNT |

# TIME DELAY RELAYS



## ON-DELAY MULTI-TIME RANGE RELAY

- FCC Approved
- User programmable, multiple time ranges
- ±0.1% Repeatability
- 120VAC ±10% 50/60 Hz input voltage
- DPDT relay output rated 10 amps resistive at 120 VAC
- Coil Current Rating 16mA
- 8-pin design; uses socket No. 5X852—order on page 480
- Timing light indicates when unit is operating
- Digital time set
- Transient voltage protection

**No. 6A854.** Shpg. wt. 0.4 lbs. List.....$55.00.
Each .....$53.80

### TIME RANGES

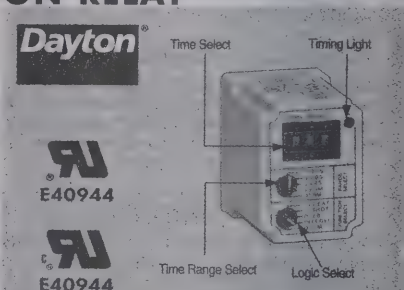
0.1 to 99.9 Seconds
1 to 999 Seconds
0.1 to 99.9 Minutes
1 to 999 Minutes

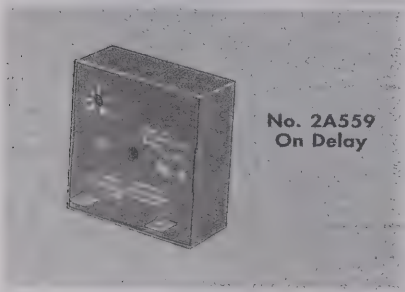
## MULTI-TIME RANGE/MULTI-FUNCTION RELAY

- FCC Approved
- User programmable, multiple time ranges and functions
- ±0.1% repeatability
- 120 VAC ±10% 50/60 Hz input voltage
- DPDT relay output rated 10 amps resistive at 120 VAC
- Coil Current Rating 16mA
- 11-pin design; use socket No. 6X156—order on page 480
- Timing light indicates unit operation
- Digital time set
- Transient voltage protection



**No. 6A855.** Shpg. wt. 0.3 lbs. List $66.00.
Each .....$59.60

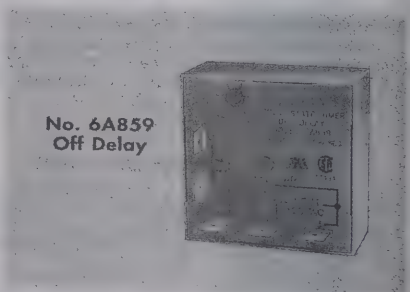
### TIME RANGES



0.05 to 9.99 Seconds
0.1 to 99.9 Seconds
1 to 999 Seconds
0.1 to 99.9 Minutes
1 to 999 Minutes

### OPERATING FUNCTIONS MODES

Repeat Cycle (Repeat)—
50% Fixed Duty Cycle
Single Shot (1-Shot)
Off Delay (D.O.B.)
Interval (Intervl)
On Delay (D.O.M.)



## SOLID-STATE, CUBE TIME DELAY RELAYS

Dayton

E49375 E49375

- Solid-state SPST circuit provides long life and quick response time
- Input voltage of 120V AC ±10%
- Flame retardant and solvent resistant filled polyester thermoplastic housing
- Fast-on terminals for easy installation

### ON DELAY

| Timing Range (Sec.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 0.05 to 1.00 | 2A559 | $22.00 | $18.01 | 0.5 |
| 0.25 to 5.00 | 2A560 | 22.00 | 18.01 | 0.5 |
| 0.50 to 10.00 | 2A561 | 22.00 | 18.01 | 0.5 |
| 3.00 to 60.00 | 2A562 | 22.00 | 18.01 | 0.5 |

### SPECIFICATIONS

**Leakage Current:** 2mA max.

**Voltage Drop:** 3.3VAC @ 1A

**Surge Current:** 20A peak, 1 cycle non-repetitive

**Power Consumption:** 3W maximum

**Control Output:** 1A max. AC resistive or inductive: minimum 10mA AC

**Dielectric Strength:** 3000VAC, 50/60 Hz RMS, terminals to mounting

- Ambient temperature of -40° to 150°F
- Reset by removing input power (On delay only); Off delay models use momentary contact with power applied at all times
- Compact cube size
- Dimensions: 2L x 2W x 7/8"D
- 120VAC only

### OFF DELAY

| Timing Range (Sec.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 0.50 to 10.00 | 6A857 | $25.00 | $21.40 | 0.2 |
| 3.00 to 60.00 | 6A858 | 25.00 | 21.40 | 0.5 |
| 15.00 to 300.00 | 6A859 | 25.00 | 21.40 | 0.5 |

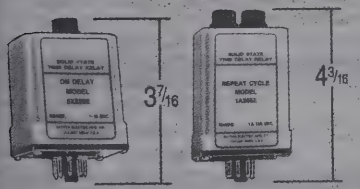
All Models



8-Pin Models

14-Pin Models

Dayton

15734 E40944

No. 5X828
On Delay

No. 1A368
Repeat Cycle

- Use in automatic control circuits, machine tool programming, sequence controls, heating and cooling operations, warm-up delays, etc.
- Transient protection on AC coils
- Easy-To-Read, top-mounted timing adjustment knob with graduated scale
- 25mA coil current rating

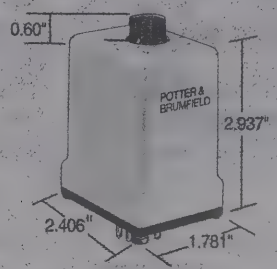
TIME DELAY RELAY SELECTION ON PAGE 493

## ON DELAY, OFF DELAY, AND INTERVAL MODELS

- Input voltage 120 VAC, 50/60 Hz ±10%
- Contact ratings: 1/3 HP at 120 VAC; 1/2 HP at 240 VAC; 10 amp at 120 VAC
- 125mSec reset time
- ±2% repeatability
- DPDT relay output
- 2⅜L x 1¾W x 3 7/16"D (less pins)

## REPEAT CYCLE MODELS

- Two top-mounted adjustment knobs allow setting On time and Off time independently
- Input voltage 120 VAC, 50/60 Hz, ±10%
- Contact ratings: 10 amps resistive at 120 VAC; 1/3 HP at 120/240 VAC
- ±1% repeatability at 25°C; 150 mSec reset time
- DPDT relay output
- 2⅜L x 1¾W x 4 3/16"D (less pins)



All Timers Use Socket No. 5X852; Except OFF DELAY series uses No. 6X156—order on page 480

## ELECTROMECHANICAL RESET TIMER — PLUG IN

- Three timing ranges and three functions in each timer
- For automatic control of circuits, machine tool programming and sequencing operations
- Large calibrated dial
- Spring loaded panel mount
- Octal plug and octal plug lock
- High impact enclosure
- Cycle progress indicator shows amount of time left in cycle
- On/Off memory allows timer to resume operation from point of cycle interruption during power failures
- Dimensions: 1.9L x 1.9W x 4.05"D
- Fits 8-pin octal socket No. 5X852—order on page 480

Electromechanical timer combines the best features of solid state and motor timers. Multi-function features are Slow Operate (On Delay), Interval (Timed On) and Single Shot (200 milli-seconds). Timers are supplied with instantaneous and permanent delayed contacts that make multi-functions possible.

# TIME DELAY RELAYS

Universal Timer

Multifunction Digital Timer

Repeat Cycle Timer

OMRON
H-SERIES

E41515

LR22310

**All Units:**

- 1/16 DIN sized (48 x 48mm)
- All units can be surface or panel mounted in standard 1/16 DIN cutouts (except 6C760 is panel mount only)
- Units contain protection against normal line spikes and noise
- Use mounting adapter No. 4A478 for flush mounting (see below)

## No. 1A983 UNIVERSAL TIMER

- Universal AC/DC power supply
- Timing range: 0.1 sec to 9990 hours
- Repeat accuracy: ±0.3%; Reset time: 0.5 sec.
- SPDT contact rated at 3A, 250VAC, resistive
- Coil Current Rating 3VA
- Offers gate, reset, start, and check inputs (no-voltage contact)
- Fits 11 pin, octal socket No. 6X156—order on page 480
- Functions: ON Delay, Signal OFF Delay I and II, Interval, Repeat Cycle, Cycle One Shot, Signal Interval/OFF Delay, and Signal ON Delay/OFF Delay; see description of timing function on page 493

### RELAY SPECIFICATIONS AND ORDERING DATA

| Function | Input Voltage (50/60 Hz) | Dimensions (In.) L | W | D | Omron Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| Universal | 24 to 240 VAC<br>12 to 240 VDC | 1.9 | 1.9 | 3.5 | H3CA-A | **1A983** | $94.75 | **$88.40** | 0.4 |

## No. 6C760 MULTIFUNCTION DIGITAL TIMER

- Timing range: 0.001 sec. to 9999 hours
- LCD alphanumeric display
- Nine functions: ON Delay, Signal ON Delay, Power ON Delay, Power ON Delay/Non-power resettable, Repeat Cycle, Repeat Cycle/Non-power reset table, OFF Delay, One-shot, Cumulative Signal ON Delay
- Selectable elapsed time (6) and time remaining (DOWN) display
- Panel mounting hardware included
- SPDT contact rated at 5A, 250 VAC
- Coil Current Rating 3VA

### RELAY SPECIFICATIONS AND ORDERING DATA

| Function | Input Voltage (50/60 Hz) | Dimensions (In.) L | W | D | Omron Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| Multi-function | 100 to 240 VAC | 1.9 | 1.9 | 2.52 | H5CR-B-AC100-240 | **6C760** | $141.11 | **$131.05** | 0.4 |

## No. 2A179 REPEAT CYCLE TIMER

- Analog-set timer
- Independent ON and OFF time periods
- Repeat accuracy: ±0.3%; Reset time: 0.1 sec.
- Timing range: 1.2 sec. to 300 hours
- DPDT contact rated at 5A, 250 VAC, resistive
- Fits 8-pin octal socket No. 5X852—order on page 480

## Nos. 6C758 & 2A180 ON DELAY/INTERVAL CYCLE TIMERS

- Analog-set timer
- Timing range: 0.05 sec. to 300 hours
- Repeat accuracy: ±0.3%; Reset time: 0.1 sec.
- DPDT contact rated at 5A, 250 VAC, resistive
- Dual function selectable either ON delay or interval cycle
- Fits 8-pin octal socket No. 5X852—order on page 480

## Nos. 6C759 & 2A436 POWER OFF DELAY TIMER

- Analog-set timer
- No. 6C759 time range: 0.05 to 12 sec., min. power-on time 0.1 sec.
- No. 2A436 time range: 0.05 to 12 minutes, min. power-on time 2 sec.
- Starts timing when power goes off to protect equipment and processes
- Repeat accuracy: ±0.3%; Reset time: 0.1 sec.
- DPDT contact rated at 5A, 250 VAC, resistive
- Fits 8-pin octal socket No. 5X852—order on page 480

### RELAY SPECIFICATIONS AND ORDERING DATA

| Function | Input Voltage (50/60 Hz) | Coil Current Rating | Dimensions (In.) H | W | L | Omron Model | Stock No. | List | Each | Shpg. Wt. |

FOR TIME DELAY SELECTION DATA, SEE PAGE 493

## CNS MULTIFUNCTION SERIES

- Up to 8 programmable timing functions
- Universal input 24-240V AC or DC
- Rated for 50 or 60 Hz
- Dip switch selection of timing function and range
- Control knob and dial scale set actual delay time
- 1/16 DIN style case
- Coil current rating 42mA

### PROGRAMMABLE TIMING FUNCTIONS

**8 or 11 Pin Models**

- Delay On Operate
- Interval On (input controlled)
- Recycle (initially Off)
- Recycle (initially On)

**11 Pin Models Only**

- Delay On Release
- Inverted Delay On Release
- Interval On (switch controlled)
- Interval Off

# PLUG-IN TIME DELAY RELAYS

SQUARE D
GROUPE SCHNEIDER

E42240

LR25490

No. 5B405

- ±1% repeat accuracy (constant voltage and temperature)
- 2VA maximum
- DPDT contacts
- 10 amp contact rating @ 120/240VAC; rated 1/3 HP @ 120VAC, 1/2 HP @ 240VAC
- On Delay, Interval, and Repeat Cycle models have 100mSec typical reset time; Off Delay and One Shot 40mSec
- Transient protected (2,000V for 100 microsec.)
- Dimensions: 4.03H x 2.34W x 1.75"D
- See page 480 for sockets

## PROGRAMMABLE, MULTI-TIME RANGE RELAYS

E42240

LR33434

No. 5B386

SQUARE D
GROUPE SCHNEIDER

- 50mSec max. reset time
- Dimensions: 3.69H x 2.38W x 1.75"D
- ±0.1% repeat accuracy
- Uses socket No. 5B586 or 5X852

- Five programmable timing ranges
- On Delay timer uses five-position rotary switch to select timing range and three pushbutton thumbwheels to select time values

### MULTI-TIME RANGE RELAY ORDERING DATA

| Timing Mode | Timing Ranges | Input Voltage @ 50/60 Hz | Square D Model 9050 . . . | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **On Delay** | 0.05 to 9.99 Sec. | 24VAC | JCK60V14 | **5B386** | $98.00 | **$98.00▲** | 0.4 |
| | 0.1 to 99.9 Sec. | 120 | JCK60V20 | **5B385** | 98.00 | **98.00▲** | 0.4 |
| | 1 to 999 Sec. | 240 | JCK60V24 | **5B384** | 98.00 | **98.00▲** | 0.4 |
| | 0.1 to 99.9 Min. | | | | | | |
| | 1 to 999 Min. | | | | | | |

(*) Repeat Cycle Mode utilizes same On-Time and Off-Time. (▲) Net prices, not subject to discounts.

## PROGRAMMABLE, MULTI-FUNCTION RELAYS

SQUARE D
GROUPE SCHNEIDER

- 50mSec max. reset time
- Dimensions: 3.69H x 2.38W x 1.75"D
- ±0.1% repeat accuracy
- Uses socket No. 5B585, 5B584, or 6X156

E42240

LR33434

No. 5B383

- Five programmable timing modes and ranges
- Use two, five position rotary switches to select timing range and mode; three position thumbwheels are used to select time value

### MULTI-FUNCTION RELAY ORDERING DATA

| Timing Mode | Timing Ranges | Input Voltage @ 50/60 Hz | Square D Model 9050 . . . | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **On Delay** | 0.05 to 9.99 Sec. | 24VAC | JCK70V14 | **5B383** | $111.00 | **$111.00▲** | 0.4 |

*Relay it, suppress it, enclose it — The leading brands are all right here.*

# RATING CODES FOR AC AND DC CONTROL CIRCUIT CONTACTS

## RATING CODES FOR A-C CONTROL CIRCUIT CONTACTS AT 50 AND 60 HERTZ

| Contact Rating Code Designation* | Thermal Continuous Test Current (Amperes) | Maximum Current, Amperes | | | | | | | | Maximum, Volt-Amperes | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | 120 Volt | | 240 Volt | | 480 Volt | | 600 Volt | | | |
| | | Make | Break | Make | Break | Make | Break | Make | Break | Make | Break |
| A150 | 10 | 60 | 6.00 | — | — | — | — | — | — | 7200 | 720 |
| A300 | 10 | 60 | 6.00 | 30 | 3.00 | — | — | — | — | 7200 | 720 |
| A600 | 10 | 60 | 6.00 | 30 | 3.00 | 15 | 1.50 | 12 | 1.20 | 7200 | 720 |
| B150 | 5 | 30 | 3.00 | — | — | — | — | — | — | 3600 | 360 |
| B300 | 5 | 30 | 3.00 | 15 | 1.50 | — | — | — | — | 3600 | 360 |
| B600 | 5 | 30 | 3.00 | 15 | 1.50 | 7.50 | 0.75 | 6 | 0.60 | 3600 | 360 |
| C150 | 2.5 | 15 | 1.5 | — | — | — | — | — | — | 1800 | 180 |
| C300 | 2.5 | 15 | 1.5 | 7.5 | 0.75 | — | — | — | — | 1800 | 180 |
| C600 | 2.5 | 15 | 1.5 | 7.5 | 0.75 | 3.75 | 0.375 | 3.00 | 0.30 | 1800 | 180 |
| D150 | 1.0 | 3.60 | 0.60 | — | — | — | — | — | — | 432 | 72 |
| D300 | 1.0 | 3.60 | 0.60 | 1.80 | 0.30 | — | — | — | — | 432 | 72 |
| E150 | 0.5 | 1.80 | 0.30 | — | — | — | — | — | — | 216 | 36 |

(*) The numerical suffix designates the maximum voltage design values, which are to be 600, 300, and 150 volts for suffixes 600, 300, and 150, respectively. The test voltage is to be 600, 240, or 120 volts. (†) For maximum ratings at voltages between the maximum design value and 120 volts, the maximum make and break ratings are to be obtained by dividing the volt-amperes rating by the application voltage. For voltages below 120 volts, the maximum make current is to be the same as for 120 volts, and the maximum break current is to be obtained by dividing the break volt-amperes by the application voltage, but these currents are not to exceed the thermal continuous test current.

## RATING CODES FOR D-C CONTROL CIRCUIT CONTACTS

| Contact Rating Code Designation* | Thermal Continuous Test Current (Amperes) | Maximum Make or Break Current, Amperes | | | Maximum Make or Break Volt-Amperes at 300 Volts or Less |
|---|---|---|---|---|---|
| | | 125 Volt | 250 Volt | 301 to 600 Volt | |
| N150 | 10.0 | 2.2 | — | — | 275 |
| N300 | 10.0 | 2.2 | 1.1 | — | 275 |
| N600 | 10.0 | 2.2 | 1.1 | 0.40 | 275 |
| P150 | 5.0 | 1.1 | — | — | 138 |
| P300 | 5.0 | 1.1 | 0.55 | — | 138 |
| P600 | 5.0 | 1.1 | 0.55 | 0.20 | 138 |
| Q150 | 2.5 | 0.55 | — | — | 69 |
| Q300 | 2.5 | 0.55 | 0.27 | — | 69 |
| Q600 | 2.5 | 0.55 | 0.27 | 0.10 | 69 |
| R150 | 1.0 | 0.22 | — | — | 28 |
| R300 | 1.0 | 0.22 | 0.11 | — | 28 |

(*) The numerical suffix designates the maximum voltage design values, which are to be 600, 300, and 150 volts for suffixes 600, 300, and 150 respectively. Test voltage shall be 600, 240, or 120 volts. (†) For maximum ratings at 300 volts or less, the maximum break ratings are to be obtained by dividing the volt-ampere rating by the application voltage, but the current values are not to exceed the thermal continuous test current.

# 16mm PLASTIC PUSHBUTTON OPERATORS AND CONTACT BLOCKS

## PUSHBUTTON OPERATORS

- **Rated for NEMA Types 1, 4/4X and 13 indoor, corrosion resistant, oil-, water-, and dusttight applications**
- **Uses mounting space of less than one square inch**
- **Pushbuttons mount easily into 16.2mm (5/8") diameter holes**
- **Use contact blocks (for non illuminated applications) or light modules (for illuminated applications) listed below**

## CONTACT BLOCKS

- **Quick connect (slip on .110") termination**
- **AC contact rating B150, 5A continuous (see chart on page 501)**
- **DC contact rating Q150, 5A continuous (see chart on page 501)**

**PUSHBUTTON SELECTION GUIDE ON PAGE 510**

# PUSHBUTTON SELECTION GUIDE AND COMMON SELECTOR SWITCH COMBINATIONS

## HOW TO BUILD A PUSHBUTTON

1. SELECT STYLE OF OPERATOR
   - 30mm Heavy-Duty or Corrosion Resistant Models Available
   - 22mm Chrome and Plastic Models Available
   - 16mm Oil, Water, Dust Resistant, and Corrosion Resistant
2. SELECT TYPE OF OPERATOR
   - Non-Illuminated
   - Illuminated
   - Pilot Lights
   - Selector Switches
3. SELECT CONTACT BLOCK(S) NEEDED
   - Normally Open or Normally Closed
4. SELECT OPERATOR IDENTIFICATION NAMEPLATE OR LEGEND (optional)
5. SELECT ENCLOSURE FOR TYPE AND NUMBER OF OPERATORS REQUIRED (optional)
   - Metallic and Plastic Available, See Page 509 and 516

ACCESSORIES AVAILABLE ON PAGES 509 (22mm MODELS) AND 516 & 517 (30mm MODELS)

## COMMON SELECTOR SWITCH COMBINATIONS

### 22mm PLASTIC SELECTOR SWITCHES

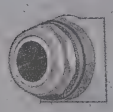
# 30mm HEAVY-DUTY PUSHBUTTON OPERATORS

## MOMENTARY PUSHBUTTON OPERATORS

- 30mm pushbuttons use contact blocks on page 513
- Oiltight, watertight, and dusttight
- Interchangeable ring nuts
- Rated for both UL Types 4 and 13 environments, without boots
- Meets major automotive standards

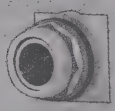


### NON-ILLUMINATED

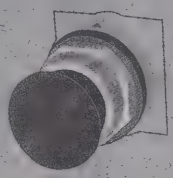
- Interchangeable color inserts make design changes easy

### ILLUMINATED

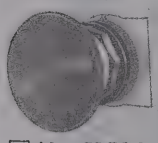
- Premium long-life incandescent lamps included



SQUARE D
GROUPE SCHNEIDER

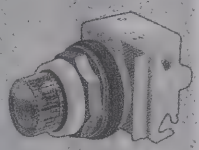


A No. 5B517



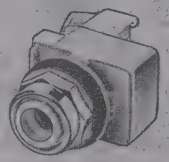
B No. 5B511

C No. 5B512



D No. 5B516

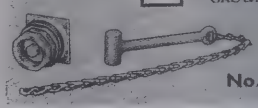
E No. 5B514



Lens not included, order separately on page 515

F No. 6B375

G No. 6B364



H No. 5B480

For color caps see page 515
For contact blocks see page 513
For legend plates see page 517

## EMERGENCY BREAK GLASS OPERATOR

- UL Type 4, 13; NEMA Type 4, 13
- Operator is held in depressed position by a glass disc
- When disc is broken with hammer, button returns to normal extended position
- Package of 5 discs included with operator

SQUARE D
GROUPE SCHNEIDER

No. 2EL29

**No. 2EL29.** Square D brand (9001K15). Shpg. wt. 0.6 lbs. List $57.25. Each ..... $54.80

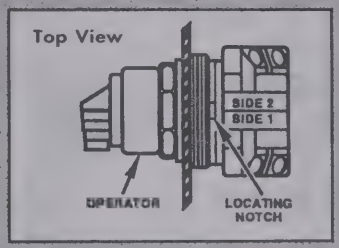
# 30mm CORROSION RESISTANT SELECTOR SWITCHES AND CONTACT BLOCKS



## CORROSION RESISTANT SELECTOR SWITCHES

No. 5B445

SQUARE D
GROUPE SCHNEIDER

LR25490 E42259

- 2, 3, 4 position selector switch
- Multiple cam/contact block arrangement for maximum flexibility
- Use with contact blocks below
- Use with switch knobs see page 515
- Rated NEMA Type 4, 4X, 13
- Manual return type

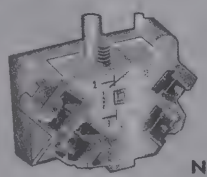
## CONTACT BLOCKS



- Terminals arranged at 20° angle eliminating interference with other contact blocks mounted in tandem
- Wire range (#12-24 AWG) allows usage of the more common small wire sizes for wiring electronic circuits
- Rated NEMA A600-P600 (See chart on pg. 501)
- Double break fine silver contacts with scrubbing action

**Screwdriver**—No. 6B412 is designed for tightening the mounting screw on the contact block. Square D brand (9001K69).

**No. 6B412.** Shpg. wt. 0.3 lbs. List $15.80.
Each ..... $15.12

## NON-ILLUMINATED MOMENTARY PUSHBUTTON OPERATORS

- 30mm pushbuttons use contact blocks on page 513
- Oiltight, watertight, and dust-tight
- Interchangeable ring nuts
- Interchangeable color inserts make design changes easy
- Meets major automotive standards
- Rated for both UL Types 4, 4X, and 13 environments, without boots

## ILLUMINATED MOMENTARY PUSHBUTTON OPERATORS

- 30mm pushbuttons use contact blocks on page 513
- Oiltight, watertight, and dust-tight
- Interchangeable ring nuts
- Premium long-life incandescent lamp, included
- Rated for both UL Types 4, 4X, and 13 environments, without boots

## ALTERNATE ACTION—(PUSH-ON/PUSH-OFF) MODULE

Module can be added to standard 9001 Type K, SK momentary pushbutton operators. Contact blocks mounted behind module (maximum of 2) will be held in depressed position when the operator is actuated once and released to their normal position when used again.

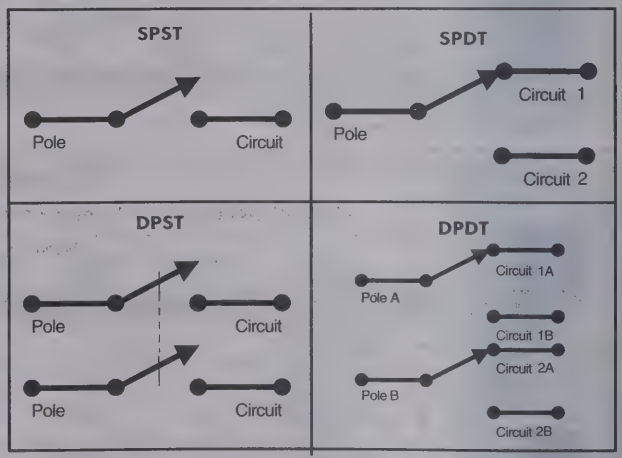
## GENERAL PURPOSE SWITCH TERMINOLOGY

**SP (Single Pole)**

A switch device that opens, closes or changes connection of a single conductor in an electrical circuit

**DP (Double Pole)**



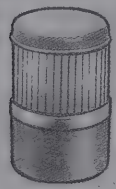
A switch device that opens, closes or changes connection of two conductors in an electrical circuit

**ST (Single Throw)**

A switch that opens, closes or completes a circuit at only one of the extreme positions of its actuator

**DT (Double Throw)**

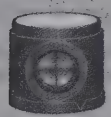
A switch that opens, closes or completes a circuit at both extreme positions of its actuator



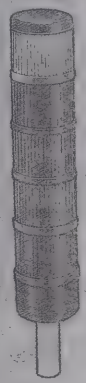
**ENERGY SAVING PRODUCTS FOR HOME, FARM, AND INDUSTRY**

Including blowers, fans, furnaces, heaters, lighting, motors, controls, thermostats, water heaters, and other items. See Index under Energy Saving Products.

# INDICATING BEACONS AND BANKS



Telemecanique



Indicating Beacon
No. 4B619

E9281

LR44087

Audible Signaler
No. 4B618

Indicating Bank, Modular Design Allows 1-5 Lenses (Requires Cover And Base Unit 4B605)

- Used for visual signaling in noisy environments; visable from a distance on a 360° radius
- Applications include: conveyor systems, automated process lines, assembly work stations, and machine tools
- Shock and vibration resistant
- Ambient operating temperature: -13°F to +158°F
- Polycarbonate lenses; 7W max.
- UL Listed and CSA Certified; UL508 Approval; Meets NEMA 1 and 12 protection, CE Certified

INDICATING BEACONS:

- Individual signaling units available with steady, flashing, or strobe light
- Include 1 cover, 1 illuminated lens, and 1 base
- Can be directly mounted to equipment or can be mounted onto extension tubes

INDICATING BANKS:

- Stackable modular systems
- Any combination of up to five lenses can be assembled to meet specific communication requirements
- Can be directly mounted to equipment on 4, 16, or 31½" extension tubes
- Requires cover and base unit (4B605) to complete unit.

### COVER AND BASE UNIT

**No. 4B605.** Telemecanique brand (XVAC211). Shpg. wt. 0.3 lbs.
List $40.63. Each ..... **$40.25**

# FOOT SWITCHES

## HEAVY-DUTY INDUSTRIAL

- NEMA 2, 4, 13
- Top pedal shield and side shields
- Oiltight, watertight, dustight, and driptight
- Momentary Action
- Contains interlock to prevent operation due to shock or vibration
- Dimensions: 9L x 5.4W x 4.8"D
- Contact form: SPDT
- Cordset: None
- Rated 15 amp @ 120VAC
- Replacement contacts No. 2ET89

**No. 2ET95.** Shpg. wt. 4.4 lbs. List .....$167.60.
Each .....$166.00

E42259 LR25490

## GENERAL PURPOSE

- Momentary action
- Cast-iron and steel construction with four mounting holes
- High strength socket head hinge screws
- Four mounting holes located 2.88" on center side to side and 4.28" on center front to rear
- Black epoxy paint
- Elastomeric base pad enhances skid resistance
- UL Listed to U.S. and Canadian Safety Standards up to 20 amp, 1 HP, 125/250VAC

### SPECIFICATIONS AND ORDERING DATA

## LIGHT-DUTY

- Momentary action
- Solid steel construction with full cover and base pads
- Redundant stainless steel spring system
- High strength socket head hinge screws
- Black epoxy coating
- Long life, enclosed snap switch
- Superior cable clamp assembly for easy field wiring
- All thread openings are extruded to provide extra thread engagement
- UL Listed to U.S. and Canadian Safety Standards up to 15 amp, 1/2 HP, 125/250VAC

### SPECIFICATIONS AND ORDERING DATA

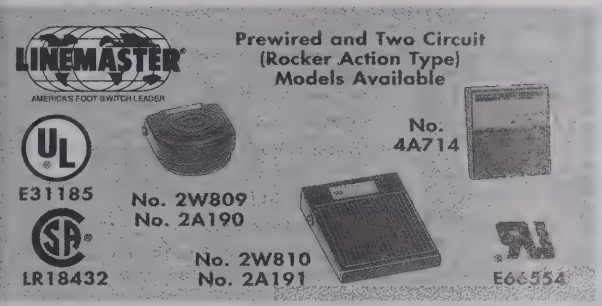
## SINGLE GUARD



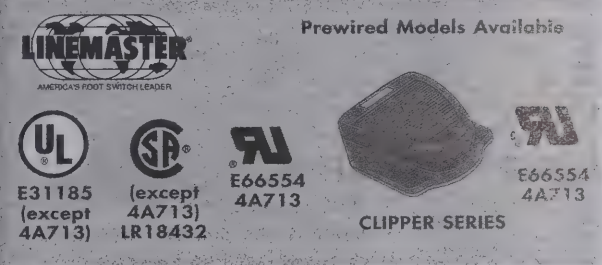
- All steel construction
- Neoprene rubber base pad enhances skid resistance
- OSHA yellow color
- For use with all Conntrol foot switches listed above
- Dimensions: 4¾H x 6W x 5¾"L
- Conntrol International Brand (864-1000-00)

**No. 5A289.** Shpg. wt. 3.0 lbs. List .....$17.84.
Each .....$17.13

### CAUTION: FOOT SWITCH SAFETY NOTE

It is the responsibility of the user to determine the suitability of a foot switch for the intended use and to determine that it will comply with all Federal, State, and Local safety and health regulations.

Use of foot switches on machinery lacking effective point of operation safeguards can cause serious injury to the operator. Foot switches should be used only where "Point of Operation" and "Pinch Point" guarding devices have been properly installed and are utilized so that it is impossible for the operator's hands or fingers to remain within the point of operation during the machine cycle.



## LIGHT-DUTY

- Steel housing with black finish
- Skid-Proof base pad resists sliding
- UL Listed (E31185) (Nos. 2A190 and 2A191)
- UL Recognized for USA and Canada (E66554) (Nos. 2W809, 2W810, and 4A714)
- CSA Certified (LR18432) (Nos. 2A190 and 2A191)
- Momentary action
- No. 4A714 has two circuits. Mechanical interlock prevents both circuits from being operated simultaneously; gray finish
- Nos. 2A190 and 2A191 are prewired with 3-prong grounded series cordset (SJT)

## GENERAL PURPOSE

- Cast-iron construction with black finish
- Skid-proof base pad resists sliding
- Strain relief connector at switch connection prevents wire fatigue
- No. 4A713 has two stage switching—a distinct "feeling" exists between stages
- Momentary action (except No. 2W808 is maintained)
- No. 2W463 is prewired with 3-prong grounded series cordset (SJT)
- No. 4A713 is UL Recognized for USA and Canada (E66554)

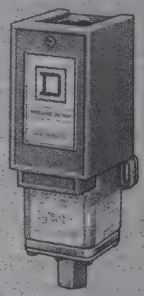
(*) Heavy pilot duty, 250VAC maximum.

## FOOT SWITCH GUARD

Use with Linemaster general purpose and light-duty models. 6H x 6W x 4½"L. (522-B14).

No. 2W811. Shpg. wt. 4.0 lbs. List $20.65. Each.....$20.41

Prior to purchase of Foot Switch, Refer to Important Foot Switch Safety Note pg. 524



# PRESSURE SWITCHES

## INDUSTRIAL PRESSURE SWITCHES

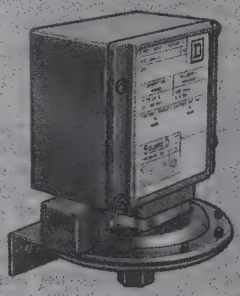
SQUARE D
GROUPE SCHNEIDER

E12158 LR25490

Replacement Parts Available 1-800-323-0620

- Designed to control or monitor pressure using air, oil, water, or other compatible fluids
- NEMA 1 enclosure
- Easily adjustable range and differential
- Buna N diaphragms
- 1/4" female inlet
- Switch mechanisms have high resistance to welding on inrush currents
- SPDT switch
- Electrical specifications—see table below
- NEMA A600, P300 rating
- Meets General Industrial Requirements

### INDUSTRIAL PRESSURE SWITCHES SPECIFICATIONS AND ORDERING DATA



| Pressure Range (PSI) | Adjustable Pressure Differential† (PSI) | Maximum Pressure Allowable | Square D Model 9012 | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **3-150** | 4.2-22 | 475 | GNG-5 | **1A352** | $130.00 | **$126.75** | 1.7 |
| **5-250** | 7.4-56 | 750 | GNG-6 | **1A353** | 148.00 | **144.30** | 1.7 |

(†) Pressure differential range adjustment values are different depending on the pressure range setting, ie., at pressure range of 3 PSI, the pressure differential adjustment is 4.2-16 PSI; at pressure range of 150 PSI, the pressure differential adjustment is 5-22 PSI for No. 1A352.

## MACHINE TOOL PRESSURE SWITCHES

SQUARE D
GROUPE SCHNEIDER

E12158 LR25490

- SPDT contacts
- NEMA 4, 4X, and 13 enclosure
- UL Listed and CSA Certified

Machine tool pressure switches are control circuit rated for use in pneumatic or hydraulic systems. Can be applied to a wide variety of machine and process applications to control or monitor system pressure and protect equipment. Switches are available with both diaphragm and piston actuators. All models are adjustable differential style.

### CONTROL DUTY CIRCUIT RATINGS

# ENCLOSED SNAP-ACTION SWITCHES AND CROSS-REFERENCE

## ENCLOSED SNAP-ACTION SWITCHES

E76675 LR21642

### ALL UNITS FEATURE

- Large, easy-to-wire switch cavity
- Diecast enclosure
- SPDT contact configuration
- 14°F-158°F operating temp. range
- 1/2"-14 NPSM conduit opening and side mounting bolts

### SEALED (BOOTED) UNITS

- Rubber boot and clamping band on head seals out dirt
- Enclosure is rated NEMA 1, 2, 3, 4, and 5; IEC, IP-65

### STANDARD UNITS

- Enclosure is rated NEMA 1; IEC, IP-50

# MINIATURE PRE-WIRED ENCLOSED LIMIT SWITCHES

Telemecanique

- Zinc die cast housing
- Pre-wired with 9 ft. of cable

CSA LR25490 UL E42259

- SPDT contact configuration, 10A rating
- Designed for use in limited access areas
- No. 2G436 has actuator with sealed boot
- Bottom exit cable
- NEMA 1, 2, 4, 6, 6P, 12 and 13 rated
- Ambient temperature range -28° to 93°C
- Similar to Micro Switch 914CE

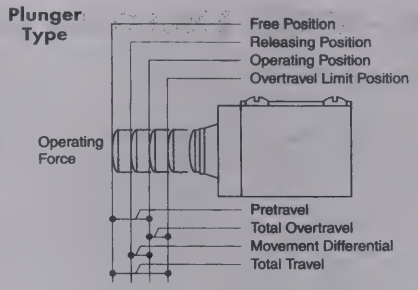
# LIMIT SWITCHES

SQUARE D
GROUPE SCHNEIDER

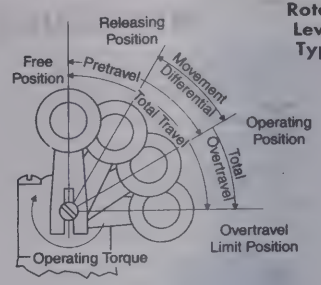
**Differential**—The distance or angle from the operating position to the releasing position.

**Neutral position**—Lever operated switch with a minimum of two contacts. One contact changes state only when the lever moves CW. The second contact changes state only when the lever moves CCW.

**Operating position**—The position of the actuator at which the contacts change state.



**Overtravel**—The distance or angle through which the actuator moves when traveling from the operating position to the overtravel limit position.

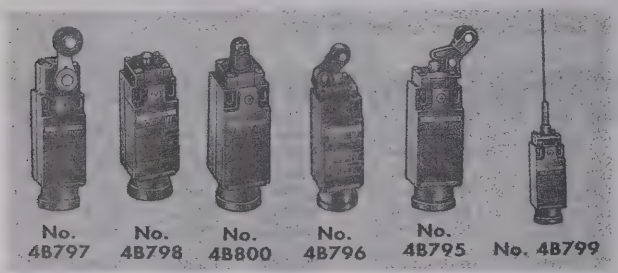


**Pretravel**—The distance or angle through which the actuator moves from the free position to the position at which the contacts change state.

**Release position**—The position of the actuator at which the contact snap from the operated contact position to the normal contact position.

**Release torque**—The value to which the torque on the actuator must be reduced to allow the contact to snap from the operated position to the normal contact position.

**Actuator lever**—The mechanism of the switch or enclosure which, when moved as intended, will operate the contacts.



**Maintained contact**—A switch which remains in a given condition until actuated to another condition, which is also maintained until further actuation.

**Momentary contact**—A switch which returns from the operated condition to its normal circuit condition when the actuating force is removed.

**Operating torque**—The minimum force which must be applied to the actuator to cause the contacts to change state.

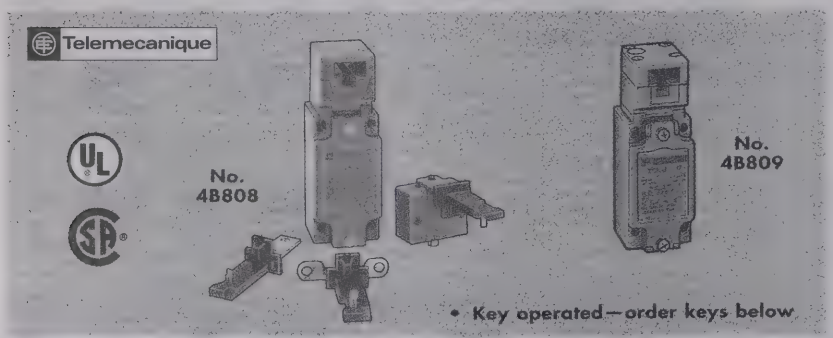
# LIMIT SWITCHES



- Complete switch
- Nos. 4B772 and 4B773 are additional lever arms
- Enclosure: Die-cast zinc
- 4-position indexing head
- Field convertible CW/CCW or both
- Captive saddle clamp terminal
- Delrin roller adjustable in 5° or 90° increments, for Nos. 4B811 and 4B810
- Lever not included for No. 4B777

Operation Temperature: .....-13°F to +158°F
Storage Temperature: .....-40°F to +158°F
Degree of Protection:.....NEMA 1, 2, 3, 4, 12
Rated Thermal Current:.....10A
Rated Insulation Voltage:.....300V AC and DC
For Short Circuit Protection Use:.....10 A fuses type SC
Mechanical Life—Lever Types:30 million operations
Mechanical Life—Neutral Position:5 million operations

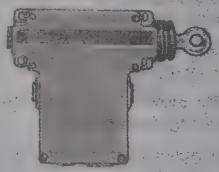
# CABLE PULL SWITCHES



SQUARE D
GROUPE SCHNEIDER

No. 4B789

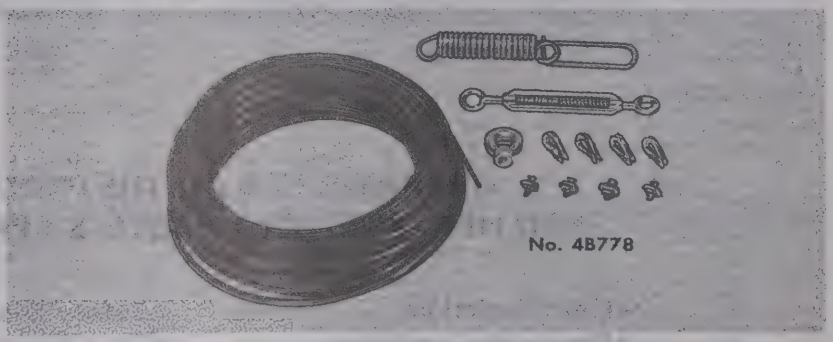
No. 4B784

No. 4B783

These cable pull switches provide for an Emergency or Normal Stop to be signaled at any point along a 165 ft. cable. The taut cable principle assures the switch will activate if cable is broken. Features positive opening contact, positive latching, force and adjustment indicators.

- **Emergency cable pull features latching contact, reset by pushbutton, and positive opening contacts**
- **Normal cable pull provides momentary action, no reset, snap-action contact**

Ambient Temperature: .....–13 to +158°F
Vibration Resistance: .....10G
Shock Resistance: .....50G, duration 11 ms
Enclosure Rating: .....NEMA 1, 4, 12
Mechanical Life: Emergency stop.....10,000 operations
Normal stop.....100,000 operations
Cable entry: .....3 x 1/2" NPT
Operating position: .....All positions



Length of protected area: .....Max. 165 feet
Rated thermal current: .....10A
Rated insulation voltage: .....300V AC and DC
Voltage Range: .....24 to 380V
Wiring terminals: .....Screw & captive clamp 14 AWG max.
Short Circuit Protection†: .....10A fast action fuse
Contact rating: .....A300 (AC), Q300 (DC)

# INDUCTIVE PROXIMITY SWITCHES

## LIMIT SWITCH STYLE INDUCTIVE PROXIMITY SWITCHES

- Heavy-duty zinc diecast plug-in body
- 5-position turret head design
- Enclosure rating: NEMA 1, 3, 4, 6, 6P, 12, and 13
- 1/2" NPT conduit entrance with many wiring and connecting options
- PLC compatible
- LED system for easy troubleshooting; indicates ON/OFF, POWER ON as well as SHORT CIRCUIT (for models with short circuit protection)
- DC models work with unfiltered power supply
- Recessed FingerGuard™ self-lifting wire terminals
- Excellent resistance to aggressive environments
- NO and NC output selectable via wiring connection
- Reverse polarity protection (DC)
- Made in U.S.A.

No. 5B237

# LIMIT SWITCH INDUCTIVE TYPES

OMRON
E2Q SERIES

No. 2A188

- Use with metallic objects
- Replaces existing mechanical limit switches
- Power on and output operation indicators
- 2 piece construction for easy installation and maintenance
- Meets NEMA 1, 2, 4, 6, 12, and 13 and IP67 (IEC 144) ratings
- Units are shielded
- Plastic housing
- Adjustable five-position head senses in any direction
- Screw terminal connection of power supply
- 1/2-14 NPT conduit opening

# INDUCTIVE TYPES

## SUBMINIATURE, FLAT-PACK TYPE

OMRON
TL W(M) SERIES

- Fits tight spaces
- Watertight construction
- Meets NEMA 1, 2, 3, 4X, 6, 12, 13 and IP67 ratings
- Ideal for conveyor wall mounting
- Rugged diecast metal or low profile ABS plastic housings available
- Prewired with 6½ ft. of PVC cable
- Nos. 6C831 and 6C832 are shielded, all other models are unshielded

## ELECTRICAL SPECIFICATIONS

# 8mm INDUCTIVE PROXIMITY SENSORS

## TUBULAR INDUCTIVE PROXIMITY SENSORS

- **Universal models designed for aggressive environments and ease of replacement: wide range, 2 wire AC/DC or 3 wire DC, cutting oil proof enclosure rating**
- **High visibility 360° indicators**
- **Significant replacement time savings using plastic mounting bracket (no gauging) or connectors. See page 541 for mounting bracket**
- **2m (6.6 ft.) cable, except where indicated**
- **Metal locknuts or plastic mounting nuts included**
- **NEMA enclosure rating: 3, 4X, 6P, 12 and 13**
- **Plastic models are non-corrosive for food applications; cutting oil proof**

# 18mm INDUCTIVE PROXIMITY SENSORS

## TUBULAR INDUCTIVE PROXIMITY SENSORS

- **Universal models designed for aggressive industrial environments and ease of replacement: wide voltage range, AC/DC 2-wire or DC 3-wire, cutting oil proof enclosure, higher temp. range, standard length**
- **360° LED indicators, 4 windows at 90° for connector versions**
- **2m (6.6 ft.) cable, except where indicated**
- **Significant replacement time savings using plastic mounting bracket (no gauging) or connectors**
- **Trouble free operation ensured by extensive protective circuitry**
- **Mounting nuts included (locknuts for metal cases)**
- **Plastic cases are non-corrosive—for food applications; cutting oil proof**
- **NEMA enclosure rating: 3, 4X, 6P, 12 and 13**

MOUNTING BRACKETS AVAILABLE ON PAGE 541

# 30mm INDUCTIVE PROXIMITY SENSOR

## TUBULAR INDUCTIVE PROXIMITY SENSORS

- Universal models designed for aggressive environments and ease of replacement; wide voltage range, AC/DC 2 wire or DC 3 wire, cutting oil proof enclosure (1P68)
- High visibility 360° indicators, 4 windows at 90° for connector versions
- Extensive protective circuitry
- 2 m (6.6 ft.) cable, except where indicated
- Significant replacement time saving using plastic mounting bracket (no gauging) or connectors. Order mounting bracket below
- Plastic models are non-corrosive—for food application (1P68 for universal, 1P67 for economy)
- Mounting nuts included (locknuts for metal cases)
- NEMA enclosure rating: 3, 4X, 6P, 12 and 13

# PROXIMITY SWITCHES

## AC MODELS

- Detects all types of ferrous metals
- Maximum switching frequency is 25 Hz
- All units are shielded
- 90–140 VAC models have short circuit protection, 20–264 VAC units do not
- Meets NEMA 1, 4, 6, 12, 13 and IP67 (IEC 144) ratings
- Maximum leakage current is 1.7mA
- Threaded, nickel plated brass housing
- LED indicator for operation status

- All units are prewired with 2 conductor cables 2 meters (6.6 ft.) long

### DETECTING DISTANCES

## DC MODELS

- Detects all types of ferrous metals
- All models are shielded and have both short circuit and reverse polarity protection
- Ambient operating temperatures -40°C to 85°C (-40°F to 185°F)
- Maximum current consumption is 13 mA
- Maximum output current is 200 mA
- All units are prewired with 3 conductor cables 2 meters (6.6 ft.) long
- Meets NEMA 1, 3, 4, 6, 12, 13 and IP67 (IEC 144) ratings
- Threaded, nickel plated brass housing
- LED indicator for operation status

# PROXIMITY SWITCHES

## INDUCTIVE TYPE

- Detects all kinds of metal at equal distance
- Offers up to three times the detection distance for aluminum compared to conventional inductive sensors
- Shielded for flush mounting in metal
- Prewired with 6 feet of cable
- Meets NEMA 1, 3, 4, 6, 12, 13, and IP67 ratings
- Threaded nickel-plated brass housing
- Circuit protection on load (output)

## INDUCTIVE TYPE

- Rugged, watertight, threaded plastic housing resists chemicals and withstands washdowns
- AC and DC switching types available
- Meets NEMA 1, 3, 4, 6, 12, 13, and IP68 (IEC 144) ratings
- Short length, threaded plastic body
- Prewired with 6½ ft. of PVC cable
- Short circuit protection and reverse polarity protection
- Operation indicator
- Shielded for flush mounting in metal

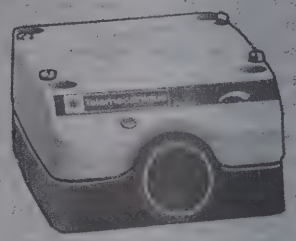
# INDUCTIVE PROXIMITY SENSORS



## LONG RANGE AC TYPE INDUCTIVE PROXIMITY SENSORS

- Thermoplastic polyester housing
- LED indicators: target sensed and power On
- Plug-in modular design
- 1/2" NPT cable conduit entrance
- Radio Frequency Immunity (RFI)
- Programmable normally open (NO) or normally closed (NC)
- UL Listed and CSA Certified
- Factory Mutual approved for non-incendive application (Div. 11)
- Unshielded

Telemecanique

E164353

## CAPACITIVE PROXIMITY SENSORS

**Capacitive proximity sensors** are ideal for sensing nonmetal objects such as glass, plastic, liquids, bulk solids or sensing level control of fluids or granular material. The threshold level is adjustable via a 20 turn potentiometer located at the rear end of the switch. This adjustment can be used to zero out the presence of a plastic tube (allowing the switch to sense through it at a liquid level).

- **Housing: Metal models are chrome plated brass. Plastic model is polyester**
- **Can be flush mounted in metal**
- **LED indication for output in closed state**
- **Plastic nuts included for threaded models**
- **Sensitivity adjustment tool included**

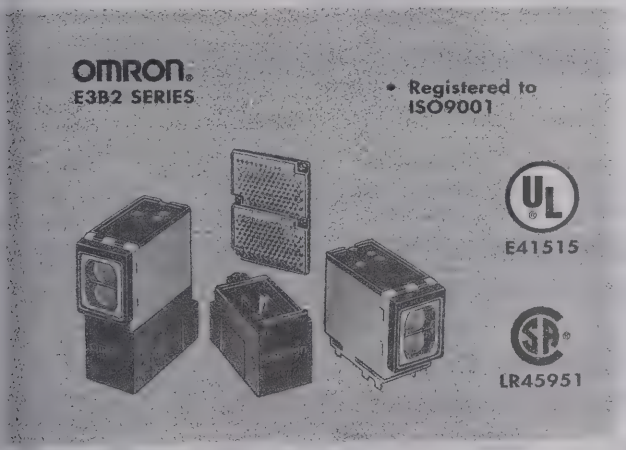
## GENERAL PURPOSE PHOTOELECTRIC SENSOR

E41515 LR45951



- Long range, heavy-duty multifunction
- Switch selectable light (incident) or dark (interrupted) ON output mode
- LED indicators for operating status
- No mutual interference (cross-talk) between sensors
- General purpose, relay type output
- PBT housing meets NEMA 1, 4, 4X, 12 and 13 and IP67 (IEC 144) ratings
- Mounting bracket included
- Universal AC/DC operating range
- Dielectric strength = 2000VAC for 1 minute
- Base accepts 3/4"-14 NPT conduit
- Can be used with sensor controller listed on page 558

### SWITCH SENSOR SPECIFICATIONS

| Type | Stock No. | Detecting Distance | Detecting Material | Directional Angle | Differential Travel |

## GENERAL PURPOSE PHOTOELECTRIC SENSOR

- Plug-in terminal for easy maintenance and installation
- Wide supply voltage range
- Switch selectable Light-On/Dark-On operation
- Mutual interference protection
- Includes 3A relay and mounting bracket
- Retroreflective types include reflector
- NEMA 1, 3, 4, 12, 13 and IP66 rated plastic enclosure
- Ambient operating temperature –13 to 131°F
- Units can be side or bottom mounted, brackets for mounting included
- Operation status indicators

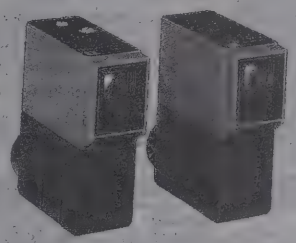
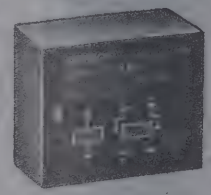
## IF YOU'RE IN A BIND, CALL GRAINGER



If it's an emergency, chances are Grainger's got the items you need today. Grainger has more than 350 well-stocked branches nationwide. So you can replace, build, or repair it right away. And we're conveniently located. To find the branch nearest you, check the Branch Locations listed in the front of this catalog.

# PHOTOELECTRIC SWITCHES

- Built-in, 4-function timer on control output
- Universal AC/DC operating voltage
- Switch selectable Light On or Dark On output mode
- Units include relay type output
- Solid state output modules available separately see below
- Polarized retroreflective light source for shiny object detection
- LED indicators for operating status
- Plastic polycarbonate housing qualifies for NEMA 1, 4X and 12 and IP 66 (IEC 144) ratings
- Fiber optic cables sold separately on page 555
- Sensitivity adjustment for accurate tuning on 4A338 and 6C778 only
- Can be used with sensor controller listed on page 558



OMRON
E3A2 Series

E41515

No. 4A337

Replacement Relay

No. 6C772

- Relays for Omron E3A2 Series available—see below for ordering data

SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE

Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.

## LONG RANGE PLUG-IN PHOTOELECTRIC SENSORS

- Thermoplastic polyester housing
- 1/2" NPT conduit entrance
- Finger Guard™ isolated wiring terminals in ready-to-wire position
- Flat lenses
- Corrosion-proof and double insulated (no grounding required)
- Adjustments protected by top cover
- NEMA 1, 3, 4, 13 enclosure rating
- Captive gaskets
- No. 5B194 contains a programmable timer with On Delay, Off Delay, and One-Shot functions
- Reverse polarity protection for DC models
- Polarized type detects shiny targets
- 2 LED alignment system
- LED output indication
- Light/Dark selectable output function
- Mounting bracket allows easy alignment in 2 planes (included)
- Reflector required on retroreflective models
- Corner-cube reflector required on polarized retroreflective No. 5B200
- UL Listed and CSA Certified

### LONG RANGE PLUG-IN PHOTOELECTRIC SENSOR ELECTRICAL SPECIFICATIONS

| Type | Minimum Switching Current | Power Supply Current (no load) | On Delay Off Delay | Temperature Range (°F) | Enclosure Rating |
|---|---|---|---|---|---|
| AC | 15mA DC for relay output | Thru-Beam:— Reflex: 45mA Proximity: 45mA | On Delay: 25ms Off Delay: 30ms | -13 to 158 | NEMA 1, 3, 4, and 13 |
| DC | — | Thru-Beam:— Reflex: 35mA Proximity: 35mA | On Delay: 2.5ms (Thru-Beam); 1.5ms (Reflex, Proximity) Off Delay: 2ms (Thru-Beam); 1ms (Reflex, Proximity) | -13 to 131 | NEMA 1, 3, 4, and 13 |

(*) With reflector No. 5B317, 5B150, see page 552.

## REFLECTIVE TAPE

Reflective tape can be used for covering unusually shaped targets. It is not a corner cube reflector.

**•Not suitable for use with polarized photoelectric sensors**

### REFLECTIVE TAPE SPECIFICATIONS AND ORDERING DATA

| Description | Dimensions (in.) W | Dimensions (in.) L | Typical Luminance Factor* | Temperature | Square D Model | Stock No. | List | Each | Shpg. Wt. |

# PHOTOELECTRIC SENSORS

## AC/DC COMPACT HIGH PERFORMANCE PHOTOELECTRIC SENSORS

- Corrosion proof and double insulated (no grounding required)

- High performance synthetic resin housing with very high ambient light immunity
- 1/2" NPT conduit entrance
- Wiring: screw terminals, #16AWG
- Enclosure rating: NEMA 1, 3, 6, 12, and 13 seamless housing—withstands washdown
- Finger Guard™ isolated terminals in ready-to-wire position
- Polarized type detects shiny targets
- AC/DC models available with separate ON and OFF delay timer
- Background suppression—Proximity (diffuse/technology) sensing mode eliminates the influence of a background behind the target to be sensed
- 2 LED alignment system with 360° visibility
- Light/Dark selectable (by wiring) output function
- Sensitivity adjustment. Mounting bracket allows easy alignment in 2 planes (included)
- Reflector required on retroreflective models No. 5B177 and 5B174
- Corner-cube reflector required on polarized retroreflective model No. 5B174
- UL Listed and CSA certified
- Application tip—the target should cover 100% of the reflector

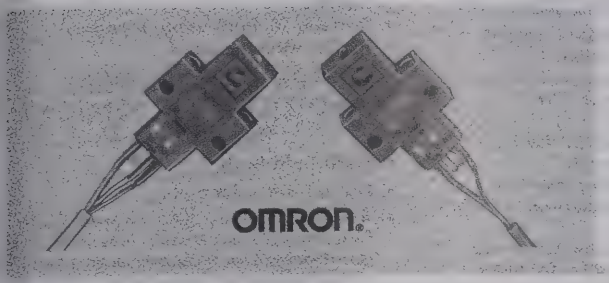
(*) With reflector No. 5B317, 5B150.

## REFLECTORS

**Corner cube reflectors** used with retroreflective photoelectric sensors provide a high degree of reliability since they return the light in the same direction it came from even if the reflector and the switch are skewed in respect to each other. Corner cube reflectors also have the only reflective surface that works with polarized photoelectric sensors. Standard range 10-100% (blind zone). Universal range 0-100%. Temperature 150°F (65°C). Select reflector smaller than your target. Telemecanique brand.



| Description | Telemecanique Model | Stock No. | List | Each | Shpg Wt. |

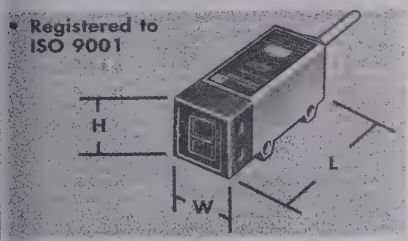
(†) Has no mounting hole, comes with adhesive tape for mounting.

*Relay it, suppress it, enclose it — The leading brands are all right here.*

# MINIATURE, BUILT-IN AMPLIFIER PHOTOMICROSENSOR

- 1-meter (3.2 ft.) sensing distance
- Supply voltage: 5 to 24 VDC for interface with TTL circuits, relays, and programmable controllers
- IP60 sealability rating
- Modulated LED for ambient light protection
- LED indicator for operating status
- Unit consists of an emitter and receiver
- PBT housing and polycarbonate lens
- Includes 2 meter wire harness



## SENSOR SPECIFICATIONS

| Operating Type | Stock No. | Detecting Distance | Detecting Material | Cable Length | Differential Travel | Directional Angle |

OMRON

E3S SERIES

- LED indicator for operation status
- Prewired with 6.5 ft. of cable
- Miniature size, horizontal mounting; mounting hardware included
- Selectable solid-state control output operates when light is present or received by sensor (light-on) or when light is absent (dark-on)
- Die-cast housing meets NEMA 1, 4X, 6P, 12 and 13 and IP67 ratings
- Sensitivity adjustment stabilizes operation for specific environments
- Output short-circuit and reverse polarity protection
- Can be used with sensor controller listed on page 558

# PHOTOELECTRIC SENSORS AND ACCESSORIES

UL E164333

CSA LR44087

CE

## 18mm TUBULAR PHOTOELECTRIC SENSORS

- Thermoplastic polyester housing
- Enclosure rating: NEMA 1, 4, 13
- Factory Mutual Approved for non-incendive application (Div. II)
- #24 AWG wiring
- Infrared modulated LED for high ambient light immunity
- Noise and transient protection
- Reverse polarity protection in DC models
- Short circuit protection (SCP) and overload protection for DC models
- PLC compatible
- LED output indicator
- Reflector required in retroreflective models
- 2 meter (6 foot) cable standard
- Plastic nuts included

## 18mm SHORT BODY PHOTOELECTRIC SENSORS (Not Shown)

- Ultra light body
- Light/Dark selectable
- Advance feature: 360 degree multi-function LED indicator; output on mar ginal detection indicator and short circuit indicator; transparent detectio
- Adjustable sensitivity—5 sensing modes available

## 90 DEGREE MIRROR ADAPTOR FOR PHOTOELECTRIC SENSORS

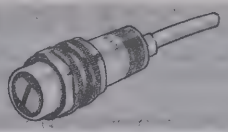
- For side sensing photoelectric sensors
- Decreases sensing distance by 20% (0.80)

| Description | Telemecanique Model | Stock No | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **For Thru-Beam sensors** | XUBZ02 | **3XJ31** | $17.90 | **$17.42** | 0.1 |
| **For all sensors (except Thru-Beam)** | XUBZ01 | **3XJ30** | 17.90 | **17.42** | 0.1 |

*Relay it, suppress it, enclose it — The leading brands are all right here.*

# PHOTOELECTRIC SWITCHES

## 18mm SENSORS



- Threaded, plastic cylindrical type
- Sensitivity fixed
- Light—ON/Dark—ON selectable output on DC models only
- Power Supply reverse polarity protection on DC models only
- LED Operation indicator
- Water, oil and dust tight construction; corrosion resistant
- Ambient temperature rating -13 to 131°F
- Prewired with 6½ ft. of cable
- Rated NEMA 1, 4, 6, 12, 13 and IP67

Can be used with sensor controller on page 558

OMRON

E3F2 SERIES

No. 3XC00

### PHOTOELECTRIC SWITCH SENSOR

## FIBER OPTIC PHOTOELECTRIC SENSORS

OMRON

E3S-X3 SERIES

Fiber Optic Types
Nos. 4A340 & 4A339

- Fiber optic sensor system consists of miniature DC amplifier and fiber optic cable; sold separately
- Cut fiber optic cable to desired length with special cutting tool; included
- Light (On) or Dark (On) output mode selected by reversing power line connection
- Die cast housing and cable meet NEMA 1, 4X and 12 locations, IP66 (IEC 144) ratings; includes mounting bracket
- Sensitivity adjustment stabilizes operation for specific environments
- Output short-circuit and reverse polarity protection

Can be used with sensor controller listed on page 558

# GLASS CORE FIBER OPTICS AND AMPLIFIER

## GLASS CORE FIBER OPTICS

- Coiled stainless steel sheeting withstands most aggressive chemical environments while maintaining a high degree of flexibility
- Transmission of light through the fiber optics is not affected by water, gasoline, oil, sulphuric acid or other organic acids
- High temperature range -50°F to 525°F (-45°C to 275°C)

## AMPLIFIER FOR GLASS CORE FIBER OPTICS

- Temperature range: -13°F to 158°F (-25° to 70°C)
- Enclosure rating: NEMA 1
- Screw terminals: #16 AWG
- Power supply current: 45mA
- 1/2" NPT conduit entrance
- NO/NC outputs
- Selectable Light/Dark
- Timer: ON delay, OFF delay, pulse selection (0.03-60s)
- UL Listed, CE

### GLASS CORE FIBER OPTIC ORDERING DATA

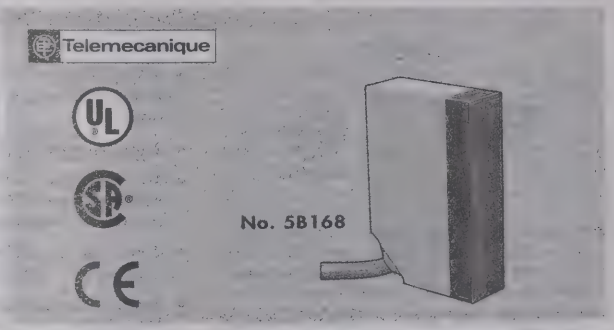
| | Separate and retroreflective types | Diffuse reflection type |
|---|---|---|
| Operates when light is interrupted (DARK-ON) | With object to be detected — Operates | Without object to be detected — Operates |
| Operates when light is incident (LIGHT-ON) | Without object to be detected — Operates | With object to be detected — Operates |

## PHOTOELECTRIC SWITCH OPERATION

- "DARK-ON" operation type photoelectric switch operates when the light flux incident into the receiver is interrupted or damped
- "LIGHT-ON" operation type photoelectric switch operates when the light flux incident into the receiver is increased



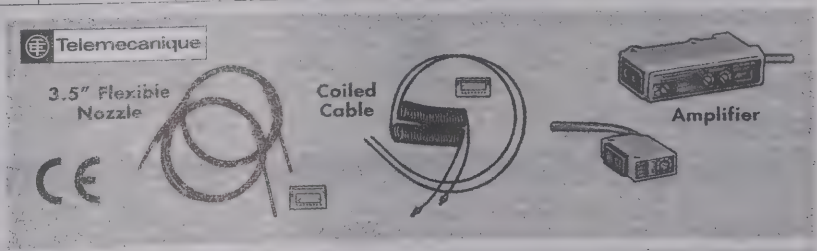
A photoelectric switch sends out a signal to energize the control coil or solid-state circuitry of an industrial or process control device. The difference between a photoelectric switch and a proximity switch is that a photoelectric switch is activated when a beam of light is interrupted or changes intensity. There are two types of sensing styles 1) **Retroreflective type:** The unit projects a beam of light to a specific target, which reflects the beam back to the unit. When this beam is interrupted, the unit is activated. 2) **Diffuse reflection type:** The unit projects a beam of light a given distance. When an object enters this beam and reflects it back to the unit, the unit is activated. Photoelectric switches have definite sensing ranges, which vary with the type of material it senses. Care should be taken in following all recommendations when installing and using photoelectric switches.

*Relay it, suppress it, enclose it — The leading brands are all right here.*

## SUBCOMPACT PHOTOELECTRIC SENSORS

- Economical, small size
- Side or front mounting
- Flat lenses
- LED visible from front and top directions
- 45° cable entry makes wiring easy
- Enclosure rating: NEMA 1, 3, 4, 6, 6P, 12, and 13
- Enclosure material: ABS/PC housing; PMMA lens; PVC cable
- 6 ft. (2m) cable

### ELECTRICAL SPECIFICATIONS



| Power Supply Current (no load) | Emitter Supply Current Max. | Relay Contact Voltage Max. | On Delay/ Off Delay | Temperature Range |
|---|---|---|---|---|
| 40mA | 5mA | 250VAC | 25ms/25ms | -13°F to 140°F |

## PLASTIC FIBER OPTICS

- Cut-to-length straight or coiled fibers
- Threaded and flexible nozzle tips
- 2 LED alignment system
- Light/Dark selectable, 2 potentiometers
- Miniature DIN rail or lateral mounting—amplifier
- CE Certified

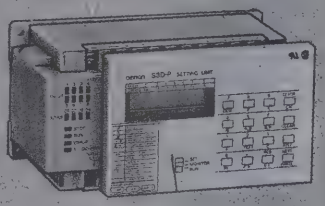
# SENSOR CONTROLLERS

OMRON

E41515



LR46463

- Contact type No. 4A468 or transistor type No. 4A469 controllers with add-on accessories act as a position sensor signal input/output center
- Self-contained power supply provides 12VDC power source for sensors
- Input response time of 1 millisecond permits detection of small or high speed objects
- 8 inputs and 4 outputs standard, expandable to 8 outputs using optional output modules
- Input modules provide amplifier function and can act as auxiliary output
- Easy to program with detachable keyboard No. 4A472
- Teach function reduces amount of required manual programming
- 100 step EEPROM memory
- DIN rail mounting
- Can be used with most brands of limit proximity, photoelectric, or rotary encoder switches

## ADDITIONAL FEATURES

- Alarm buzzer
- 12, one-shot, ON delay, Off delay timers (10 when using Interval Check key)
- Time Range: 0.01 to 999 seconds
- 12, low speed counters (10 when using Interval Check key); 400 Hz response frequency
- One high speed counter (counts up and down); 3k Hz response frequency
- Input Voltage: 100 to 240VAC, 50/60 Hz
- Input Power Consumption: 35VA maximum
- Internal Power Supply for Sensors: 12VDC, 400mA maximum

This high-speed sensor controller fills the gap between slower, expensive programmable controllers and inflexible hard-wired relay control systems. Outputs from controllers can be tied into larger programmable controllers or factory control computers. It can perform many of the complex jobs usually reserved for a more expensive programmable controller. Easy to program and easy to change. Built-in diagnostics troubleshoot the system for you.

Controller With No. 4A472 Keyboard

Output Module

Input Module

# TSX® 07 PROGRAMMABLE CONTROLLER

- **Expansion to 48 I/O (for AC units), using second base unit located up to 665 ft. from master**
- **Panel or DIN rail mounting**
- **Mix I/O types: AC and DC inputs: relay and transistor outputs**
- **LED indicators for system operation and individual I/O status**
- **1K logic programming capacity in non-volatile EEPROM memory**
- **High speed counter and pulse output**
- **Real-time clock/calendar for action triggering, event logging or time period calculations**
- **24 VDC sensor power supply rated to 150mA**
- **Up to two potentiometers for easy operator adjustment of selected variables**
- **Peer communications allow distributed processing of up to 4 CPU's**
- **I/O interface modules provide analog & discrete I/O options**
- **Hand-held terminal provides both list language programming and maintenance functions**
- **Programming software provides "Windows Like" ease of use for DOS PC's**

**CPU SELECTION**

**STEP 1:** Select desired power supply voltage. *Note:* This voltage is independent from the input or output voltages 120 to 240 VAC or 24VDC

**STEP 2:** Select number of inputs/outputs (I/O) and time calendar.

10 I/O has 6 inputs, 4 outputs and no time calendar

16 I/O has 9 inputs, 7 outputs and time calendar

24 I/O has 14 inputs and 10 outputs and time calendar

**STEP 3:** Select desired input (signal) voltage: 120VAC or 24VDC

**STEP 4:** Select output type

Relay (2 amp at 24 to 264VAC or 19 to 30VDC resistive)

Transistor (0.5 amp at 19 to 30VDC)

*Note:* Transistor outputs are available in either sink or source.

**STEP 5:** Determine any additional accessories. *Note:* A hand held programmer is needed to operate unit.

# PROGRAMMABLE LOGIC CONTROLLERS

## MODICON

• Agency approvals: UL, CSA, VDE, FM Class 1 Division 2

### MODICON MICRO

**•Agency approvals: UL, CSA, VDE, FM Class 1 Division 2 •Up to two plug-and-play communication ports for programming, host computer interfacing and ASCII devices •Built-in expansion link for connecting together up to four micros •All-in-one package includes controller, I/O, power supply, and communications •Interrupt processing for high throughput applications •Non-volatile Flash-PROM memory eliminates battery maintenance •Utilize standard foil-shielded flat telephone cables •Highly secure, noise resistant •Shares I/O status or data between Micros •Configure, program and monitor application program and data values •On-board, non-volatile memory to store and transfer application programs •Ladder logic programming software runs in DOS and Windows environments •Dimensions: 5.5H x 10W x 3"D**

### CPU SELECTION

**STEP 1:** Select the desired level

**STEP 2:** Select desired power supply voltage. *Note:* This voltage is independent from the input or output voltages 115 to 230 VAC or VDC.

**STEP 3:** Select desired input (signal) voltage: 115 or 230 VAC (uses relay/triac output); 24 VDC (uses relay or transistor output); Analog (CPU 612 series only)

**STEP 4:** Select output type: Relay (2 amp at 24 to 250VAC and 2 amp at 24 to 30VDC); Transistor (.05 amp at 20 to 30VDC source* switching); Triac (0.5 amp at 20 to 30VDC); Analog (CPU 612 series only). *Note:* All units with triac outputs have 8 triacs and 4 relays.

**STEP 5:** Determine additional accessories. *Note:* A hand held programmer or computer transfer mode kit is needed to operate unit.

(*) PNP switching the positive side to the load.

## CPU SPECIFICATIONS AND ORDERING DATA

| Description | Power Supply | Inputs Volts | Output Type | Modicon Model 110CPU . . . | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **LEVEL 1 (CPU 311): 1 K words user logic, 400 words data, 16 inputs 12 outputs, 4.25-5 ms/1000 logic scan, 1 Modbus/ASCII port, high speed I/O expansion port, Basic 984 instruction set** | 115 to 230VAC | 24 DC | Relay | 31100 | **6U769** | $426.00 | **$362.25▲** | 5.0 |
| | 115 to 230VAC | 115 AC | 8 Triac/4 Relay | 31101 | **6U768** | 552.00 | **469.25▲** | 4.3 |

# 1/16 DIN TEMPERATURE CONTROLLERS

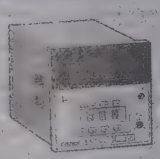
- Compact size; International 1/16 DIN dimensions—48mm x 48mm (1.89")
- Thermocouple input (see page 598)
- Relay type output rated SPDT, 3A @ 250VAC (resistive)
- Hardware included for panel mounting
- No calibration required

### Nos. 4A479 and 4A480

- LED display
- Type J thermocouple input
- 8-pin octal relay socket mountable; order No. 5X852 on page 480

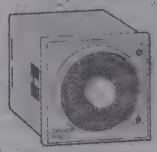
### Nos. 4A481 and 4A482

- Manual dial setting
- Type J thermocouple input
- 8-pin octal relay socket mountable; order No. 5X852 on page 480



### No. 3XC07

- Field-selectable temperature ranges: 0 to 200°C/°F, 0 to 300°C/°F, 0-400°C/°F, 0 to 500°C/°F, 0 to 600°C/°F, and 0 to 999°C/°F
- Field-selectable On/Off and proportional-integral-derivative (PID)* control with auto tuning of proportional band
- 8-function alarm; SPST-NO, 1A contact @ 250VAC
- Tamper-proof setting, faulty sensor compensation, and controller diagnostics
- Memory backup
- Deviation indicator and LED display show actual and desired temperature
- Type J or K thermocouple input



OMRON

LR59623

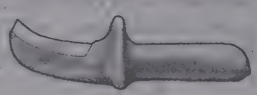
# INSULATED HAND TOOLS

- All Klein insulated tools comply with IEC 900 and ASTMF 1505-94 standards for insulated hand tools
- Klein insulated tools will reduce the risk of electrical shock which results from the tools making contact with energized lines or equipment with voltages up to 1000 volts when the tools are correctly used under proper conditions
- Each tool consists of two-layers: the high-dielectric white inner layer is a thick, exceptionally tough base coating which is bonded to the tool; the outer layer is a flame-retardant, impact-resistant, bright orange color

FOR A WIDE RANGE OF HAND TOOLS FOR USE IN ELECTRICAL APPLICATIONS, SEE PAGES 1311 thru 1331

KLEIN TOOLS

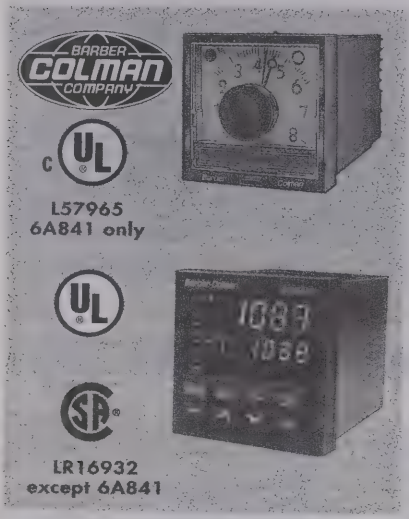
Made in U.S.A.



A High Leverage Cable Cutter

B Crimping Tool

C Wire Stripper-Cutter



D Lineman's Skinning Knife

# TEMPERATURE AND PROCESS CONTROLLERS

## 1/4 DIN MODELS

- **Monitor and control temperatures in applications such as environmental chambers, plastics processing machinery, furnaces, ovens, dryers, and packaging machinery**
- **Panel mount design**
- **Slide-out housing for easy serviceability**
- **Uses Type J thermocouples**
- **120/240VAC**

### No. 6A840 ANALOG CONTROLLER

Reliable, cost-effective. Relay switching output. SPDT time proportioning switching, proportional action with manual reset. Large, 6.3" scale with setpoint bullseye. Thermocouple break protection. Front panel lamp lights to indicate relay action. Controller can switch small electric heaters, solenoids, and contactors.

**ORDER THERMOCOUPLES AND PROBES ON PAGE 564**

### No. 6A841 1/4 DIN TEMPERATURE AND PROCESS CONTROLLER

±0.3% accuracy, 300 millisecond control response, both setpoint and control value displayed, universal TC, MVDC, VDC, and mADC inputs, Universal AC Power Supply, AT™ Self Tune, Auto Comp™ Sensor Break, selectable °C or °F, Loop Break, Setpoint Ramp, selectable decimal point, pass code security, eight large tactile feedback keys, second setpoint and tuning constants, Triac output (1A/24-240 VAC), indicator only option, case depth 4.2". Made in USA.

### No. 6A842 ANALOG LIMIT CONTROLLER

Factory Mutual (FM) approval is intended to meet specific regulations (codes, insurance and in-plant directives). Selectable high or low limit relay action. LIMITROL® can shut down process at preset high temperature. Front panel lamp lights when setpoint is exceeded; relay contacts open until temperature falls below setpoint and reset button is pressed. Reset button must be pressed to resume normal operation upon power interruption or power application.

# 1/16, 1/8, AND 1/4 DIN MODELS

**For controlling processes involving temperature, pressure, flow, humidity, conductivity, PH, etc.**

- **Accepts 22 different inputs, including thermocouples, RTD, and current and voltage types.**
- **Advanced PID or Fuzzy self-tuning with temperature input. Provides more precise control of the process and/or control outputs. Program has unauthorized tampering prevention**
- **Display shows process and set point values**
- **Heater burnout alarm**
- **Auto/Manual On/Off operation**
- **Heat and Cool modes; separate control periods**
- **Set point and manipulated variable limiters**
- **Control period is pulse output of 1 to 99 second in units of 1 second**
- **Front panel is rated NEMA 4x (IP66)**
- **Auxiliary alarm output, SPST-NO; rated at 1A@ 250VAC**
- **Self or field calibration**
- **Field-interchangeable output boards; one per container. Select 1, appropriate for the output desired. Output boards sold separately**

## CONTROLLER SPECIFICATIONS

| Supply Voltage | Indication Accuracy | Ambient Temperature |
|---|---|---|
| 100-240VAC, 50/60 Hz | Thermocouple: (±0.3% of indication value or 1 C, whichever greater) ±1 digit max.<br>Platinum resistance thermometer: (±0.2% of indication value or 0.8 C, whichever greater) ±1 digit max.<br>Analog input (±0.2% of indication value) ±1 digit max. | Operating Range: -10° to 55°C (14° to 131°F) with no icing |

## TEMPERATURE RANGES

| Input Type (switch selectable) | | Thermocouples | | | | | | Platinum RTD 100Ω |
|---|---|---|---|---|---|---|---|---|

## CURRENT# TRANSFORMERS FOR HEATER BURNOUT ALARM

| Hole Diameter | Max. Current | Omron Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 5.8mm (0.23") | 50 Amps | E54-CT1 | 6C049 | $20.59 | $17.89 | 0.1 |
| 12.0mm (0.47") | | E54-CT3 | 6C050 | 30.90 | 27.15 | 0.1 |

(#) Required when heater burnout alarm is used.

# TEMPERATURE CONTROLLER ACCESSORIES AND TERMINOLOGY

## MOUNTING ACCESSORIES

**For General Purpose Assemblies.** Adjustable compression fitting. Place on 3/16" tube or MgO sheathed wire. Cannot be removed after installation. Nickel plated brass construction. Barber-Colman brand (PF70-K0100-188).

**No. 6A851.** Shpg. wt. 0.1 lbs. List $2.71.
Each ..... **$2.67**

**For Heavy-Duty Assemblies.** Adjustable flange. Fits 1/2" pipe size. Two set screws included for clamping on to protection tube. Cast-iron construction. Barber-Colman brand (PF40-B0000-004)..

**No. 6A850.** Shpg. wt. 0.6 lbs. List..... $14.77.
Each ..... **$14.53**

## TYPE J THERMOCOUPLES AND WIRE

All thermocouple assemblies meet standard limits of error accuracy of ±4°F (2.2°C) up to 530°C, and ±0.75% from 530°F to 1400°F. JIS standard.

### LOW TEMPERATURE ASSEMBLY

Rigid sheath probe for direct immersion in noncorrosive liquids or gases. 600°F temperature limit, type J thermocouple, single element. Grounded hot junction 3/16" OD sheath. 6 ft. leads with stripped wire ends. Fiberglass extension wire. Shrink sleeve strain relief.

| Type | Probe Length (In.) | Material | Barber-Colman Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| J | 6 | 304 SS | SK4558 | **6A843** | $16.38 | **$16.12** | 0.2 |

### GENERAL PURPOSE ASSEMBLIES

Insulated sheath allows probe to be formed or bent to measure temperature in hard-to-reach locations. Probe can be sealed against pressure up to 100 PSI with optional mounting accessory. 1100°F temperature limit, type J thermocouple, MgO insulation, single element, grounded hot junction. 3/16" OD sheath. Quick disconnect plug and jack.

| Type | Probe Length (In.) | Material | Barber-Colman Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| J | 12 | 304 SS | M115-10012 | **6A848** | $30.20 | **$28.90** | 0.9 |
| | 18 | | M115-10018 | **6A849** | 33.65 | **32.15** | 0.2 |

### HEAVY-DUTY ASSEMBLIES

Rugged, heavy-duty, pipe-protected thermocouple element for use in heavier industrial applications. Easy field wiring of enclosed terminals found inside protected head. Optional flange mounting provides adjustment of immersion depth. 1100°F temperature limit, type J thermocouple, 1/2" pipe size, closed end. General purpose aluminum head. Black steel for noncorrosive atmospheres, 304 stainless steel for corrosive environments.

| Type | Probe Length (In.) | Material | Barber-Colman Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| J | 12 | 304 SS | J14I-19312 | **6A844** | $58.54 | **$57.65** | 2.0 |
| | 18 | 304 SS | J14I-19318 | **6A845** | 66.42 | **65.35** | 3.5 |
| | 12 | Black Steel | J14I-03312 | **6A846** | 46.53 | **45.80** | 2.0 |
| | 18 | Black Steel | J14I-03318 | **6A847** | 52.54 | **51.75** | 2.5 |

### THERMOCOUPLE LEAD WIRE

Type J thermocouple lead wire accommodates connections between thermocouple and instrument. Accuracy of PVC extension grade wire is +4°F (2.2°C) up to 221°F (105°C). Fiberglass covered thermocouple grade wire is ±4°F (2.2°C) up to 530°F, and ±0.75% from 530°F to 900°F (482°C). Type J thermocouple wire on 5" diameter spool heads. PVC insulation is extension grade wire; fiberglass is thermocouple grade.

| Length (Ft.) | Gauge | Wire | Insulation | Barber-Colman Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **100** | 20 | Solid | PVC/PVC | WJ20-51502 | **6A852** | $28.44 | **$27.20** | 1.7 |
| **100** | | | Fiberglass/Fiberglass | WJ20-11304 | **6A853** | 58.92 | **56.30** | 1.2 |

**Control Point.** Temperature to be maintained for a system.

**Differential.** Temperature difference between the temperature at which controller turns heat off and the temperature at which heat is turned back on (expressed in degrees). Refers to On/Off controllers.

**Hysteresis (dead band).** Temperature band between the On and Off of an output in the On/Off control action. No heating or cooling takes place. Band occurs between the times when the heat is turned off upon rising temperature and turned on upon falling temperature.

**On/Off Control Action.** A control action with two controlled states.

**Proportional Band.** Range of temperature in which a manipulated variable is proportionate to any deviation from the set point.

**Proportional Control Action (P).** A control action in which a manipulated variable is proportionate to any deviation from the set point.

**Proportioning Control plus Derivative Function (PD).** A time-proportioning controller that has a derivative function. Derivative function monitors the rate at which a system's temperature is either increasing or decreasing and adjusts the cycle time of the controller to minimize overshoot or undershoot.

**Proportioning Control with Integral and Derivative Functions (PID).** A time-proportioning controller that has integral and derivative functions. The integral function automatically raises the stabilized system temperature to match the set point temperature to eliminate the difference caused by the time-proportioning function. The derivative function monitors the rate of rise or fall of the system temperature and automatically adjusts the cycle time of the controller to minimize overshoot or undershoot.

**Range.** Area between low and high limits which a quantity is measured.

**Rate Action (D).** Controller senses rate of change of temperature and provides an immediate change of output to minimize the eventual deviation.

**Set Point.** Value set on the temperature controller to control a system.

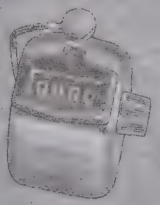
# HAND-ACTIVATED, MECHANICAL, AND ELECTROMECHANICAL COUNTERS



## HAND-ACTIVATED COUNTERS

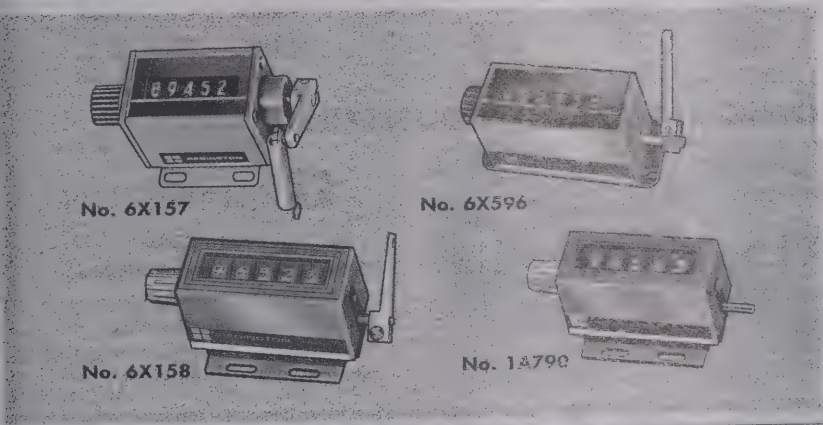
REDINGTON

1800 SERIES

**STANDARD FEATURES**

- Dimensions: 1⅜W x 1¾" diameter
- Suitable for most applications requiring totalizing
- Units have reset knob
- Chrome plated housing

No. 6X164 Hand-Held Type



No. 1A189 Desktop Type

Base Diameter 2¼"

**COUNTER SPECIFICATIONS AND ORDERING DATA**

| No. of Digits | Life, Total Counts | Mounting | Reset | Redington Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 4 | 5 x $10^6$ | Hand-Held | Knob | T4-1804 | **6X164** | $24.10 | **$23.48** | 0.2 |
| | | Desktop | | T5-1804 | **1A189** | 28.05 | **27.45** | 0.3 |

## MECHANICAL COUNTERS

No. 6X157

No. 6X596

No. 6X158

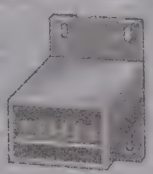
No. 1A790

REDINGTON

**STANDARD FEATURES**

- Suitable for industrial applications
- All units right-hand and counter-clockwise operation as viewed from shaft end
- Units have reset knob
- Test life of 50 million counts (except No. 6X596—100 million counts)
- Shaft on No. 1A790 is 0.125" diameter

**COUNTER SPECIFICATIONS AND ORDERING DATA**



| No. of Digits | Maximum Strokes/Revolutions Per Minute | Type | Operation | Redington Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|

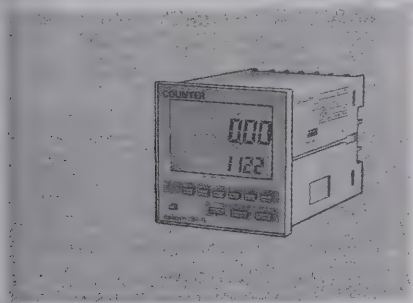
# PREDETERMINING AND ELECTRONIC RESETTABLE COUNTERS



OMRON. H7CR Series

E41515 LR22310

- Preset counter with single set point fits 1/16 DIN size cutouts
- Backlit LCD display
- Remote signal or manual reset
- All units have a nonvoltage (dry contact) type input
- Includes lithium battery; not replaceable
- Memory protection and selectable operating modes including sustained and one-shot outputs
- Prescaling range of 0.0001 to 99.999
- Counter provides 12VDC power source for external sensors except No. 6C859
- Panel mounting adapter included
- Dimensions: 4 3/16L x 1 7/8W x 1 7/8"D

OMRON.

E41515 LR22310

- Remote electrical signal or manual reset
- 12 or 24VDC selectable sensor power supply
- Compact 2.83 inch (72 mm) square size
- Single preset type
- Backlit LCD display
- Contact and transistor (NPN) outputs
- No. 6C857 has batch counting function and automatic reset with 8 selectable operating modes
- No. 6C858 provides large/small discrimination mode with 4 selectable operating modes
- Includes lithium battery; not replaceable
- Rescale function allows counting of lengths or volumes
- Key protected programming
- Nonvoltage (dry contact) input
- Dimensions: 2.83L x 2.83W x 4.17"D

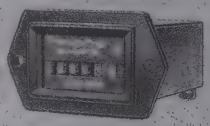
# AC & DC HOUR METERS



## DC VOLTAGE QUARTZ HOUR METERS

LR42455 AU1774

- Quartz accuracy to within ±0.02% over entire voltage and temperature range
- Temp. range from -40 to 185°F
- Record operating time of vehicles or powered equipment; useful for measuring maintenance intervals or tracking cost vs operating time for DC powered equipment
- DC voltage applications, 10 to 80V
- Relay driven odometer
- Shock resistant cases sealed to prevent premature wear and failure in dusty or damp environments
- Flange or bracket mounting; clear glass lens
- 1/8"H hour digits are white on black; decimal digits black on white

Hobbs Corporation

LR42455 AU1774

No. 2A642 Flange Mount (1.45 x .95" Cutout)

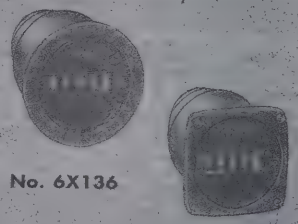
## AC VOLTAGE HOUR & MINUTE METERS



- Input voltage 115V, 60 Hz
- Permanent magnet motor for accuracy; ±50mSec. per start stop, 100% when running at normal frequency
- Large, easy-to-read numbers—whole numbers are white on black, decimal numbers black on white
- Housing material high impact black styrene
- Continuous duty cycle
- No. 6X141 3½" model and No. 6X143 have NEMA standard round or square detachable bezels
- Includes 22-gauge wire leads 6" long
- Mounts in 2¼" diameter hole; mounting hardware included

CRAMER

## ELECTRONIC HOUR METER

- Ideal for panel mount installations
- LCD display
- Operating temperature range from 14 to 131°F
- No. 2A543 needs no external power. Self-contained power supplied by nonreplaceable lithium battery with 10-year average lifetime under continuous operation
- Molded plastic housing
- Clamp and thumb screw mounting system
- Wiring screw terminals at rear of indicator keeps wiring harness terminations away from other instruments
- Blinking decimal point indicates when signal is applied correctly
- Dimensions: 1.9W x 0.95L x 1.95"D

# LAMP, APPLIANCE, AND WALL SWITCH TIMERS

## LAMP AND APPLIANCE TIMERS

### A No. 2E274

- Up to 2 On/2 Off setting per day
- Cordless; plugs into any receptacle
- Manual On/Off override
- 2-prong plug and receptacle

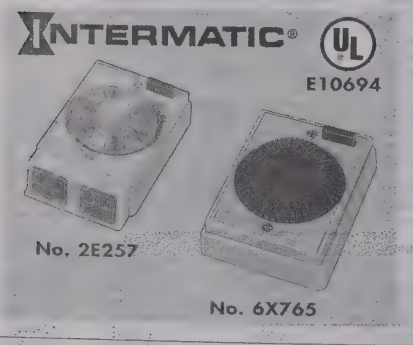
### B No. 6X763

- Up to 2 On/2 Off settings per day
- Random setting turns light On and Off at slightly different times each day to avoid predictable "timer controlled" look
- Cordless; plugs into any receptacle
- Manual On/Off override
- 2-prong plug and receptacle

### C No. 6X764

- Up to 24 On/24 Off settings per day
- Multiple daily programming
- Cordless; plugs into any receptacle
- Manual On/Off override
- 2-prong plug and receptacle

### D No. 1XC70



- Up to 2 On/2 Off setting per day
- Table-top style
- 2-prong plug and receptacle
- Includes 5 ft. cord

## E 7-DAY DIGITAL, PROGRAMMABLE LAMP AND APPLIANCE TIMER

- Up to 6 On/6 Off settings per day
- Random setting turns light On and Off at slightly different times each day
- LCD digital clock and readout
- To-the-minute setting accuracy
- Cordless; plugs into any receptacle
- 3-prong plug and receptacle
- Manual On/Off override
- Replaceable AA battery; maintains program during power failure

LR3730

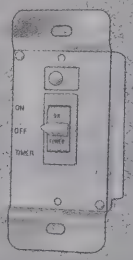
No. 5A691 Digital, Programmable Wall Switch Security Timer



## DIGITAL, PROGRAMMABLE WALL SWITCH SECURITY TIMER

- Up to 4 On/Off settings per day
- Replaces any standard wall light switch; use to control light from a single wall switch (single pole) or 3-way (2 switches)
- Random setting turns light On/Off at slightly different times each day or can be programmed for a precise, to-the-minute schedule
- Three-minute memory guard protects program during power failure
- LCD digital clock readout
- 15-minute "lights off" delay setting
- Energy saving dimmer
- Digital display turns off if light bulb fails—replace light bulb and reprogram timer
- Manual On/Off override (does not affect timing program)
- Incandescent lamps 40 to 500W; individual lamp 500W maximum total load 120V, 60 Hz
- Dimensions: 3½L x 2¼W x 1"D
- White in color
- Intermatic brand (SS5C)

**No. 5A691.** Shpg. wt. 0.4 lbs. List $54.57. Each.....$35.50

E78300

LR3730

No. 4A219 Time Limit Wall Switch Timer

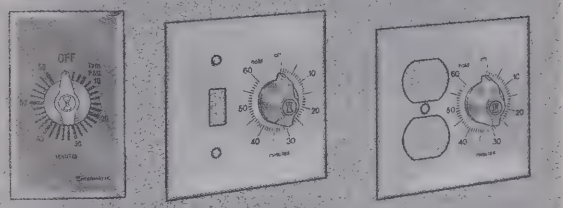
## TIME LIMIT WALL SWITCH TIMER

- Two-way operation—immediate switch off, or after 15 minutes
- Controls light from a single wall switch (single pole)
- Saves energy—turns light off automatically
- Keeps critical areas lit for limited time
- Use for incandescent or fluorescent fixtures with P-type ballasts, lamps 40 to 500 watts, 120V, 60 Hz (not to be used with par lamps, use No. 5A691 above)
- Dimensions: 4L x 1 1/16W x 1⅛"D
- White in color
- Intermatic brand (EI15MH)

**No. 4A219.** Shpg. wt. 0.3 lbs. List $32.45. Each.....$18.44

**DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER**

Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.



# SPRING-WOUND MECHANICAL TIMERS

- Timers use no energy to operate
- Use where precision timing is not required
- Time switches are open in the Off position
- Hold feature used for continuous On applications
- Durable plastic time knob and metal wall plate
- Nos. 2A513 and 2A514 mount in standard 4 x 4" outlet box. All others mount in minimum 2 x 4" outlet box
- Nos. 2A513 and 2A514 are provided with faceplates designed for accepting electrical wiring devices. No. 2A513 accepts a single standard (toggle) switch. No. 2A514 accepts a duplex standard receptacle. (Wiring devices not included. See Index under Wiring Devices)

# DECORATOR SPRING-WOUND MECHANICAL TIMERS

- Timing dial fits either standard toggle or decorator style switchplates
- Timing mechanism has all metal gears
- Upfront teeter terminal connections for easy, reliable wiring
- Ivory color faceplate and knob
- Fits most standard 2½" deep junction boxes
- "Press On" knob and insert design eliminates setscrews
- Switchplate not included
- For use with toggle or decorator switchplates, see pages 699, 700, and 701

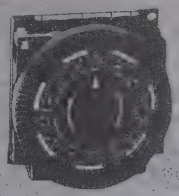
# 24-HOUR AND 7-DAY ELECTROMECHANICAL MODULES AND TRIPPERS

## 24-HOUR AND 7-DAY ELECTROMECHANICAL MODULES



Ideal for Panel Mount Installations

24-Hour Timer Module

DIEHL

LR63414 E76164

7-Day Timer Module

- Up to 48 On-Off settings per day (24 hour timers)
- Up to 42 On-Off settings per week—6 settings per day (7-day timers)
- Quartz drive motor on Nos. 2A519 and 2A520; synchronous on Nos. 2A517 and 2A518; draws 0.1 watt
- Nos. 2A519 and 2A520 have battery reserve to keep timer running for approx. 90 hours during power failures; nickel cadmium battery included, not replaceable
- 2½" (64 mm) diameter opening for dial if mounted through panel

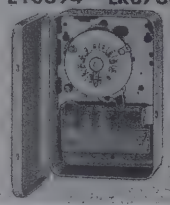
# 24-HOUR TIMERS

## ELECTROMECHANICAL TYPES



- Heavy-duty gears with a clutchless design that cannot slip
- Contacts are tungsten rated to handle inrush 10 times greater than their rating
- Contact resistive voltage rating 120-480VAC, tungsten or inductive voltage rating 120-277VAC
- 6X758 voltage rating up to 240VAC
- Clock motors are permanent magnet, self-lubricating, synchronous type
- Snap-out timing mechanism. Settings per day: Up to 12 On/Off
- Units available that allow selected day or days to be skipped over (omitted by the time program)
- Manual On/Off override does not alter program
- Furnished with trippers (see chart). Maximum 12. Additional trippers available (see chart)
- Metal enclosure with gray enamel finish. Hasp and knockouts provided. Outdoor type 3R enclosures available in steel or noncorrosive plastic
- Adjustable time setting on Nos. 2E025 and 6X758
- Designed to save energy, control process operations, and provide security

# ELECTRONIC 24-HOUR 1-CIRCUIT TIMERS

INTERMATIC®

LR3730

EZ6987

No. 1XC68

- Provides scheduling for HVAC equipment, indoor and outdoor lighting, and other energy consuming equipment
- Settings per day: Up to 4 On/Off cycles
- 30 amp, heavy-duty relay output
- 24-hour, to-the-minute programming
- Easy "rolling entry" programming—2 slide switches and 4 pushbuttons for programming all information
- Completely isolated input/output circuits eliminate electrical noise interference problems
- Minimum 3 year battery carry over—AA industrial grade battery included with timer
- Heavy-duty terminals provide for wiring up to 10-gauge wire
- Metal indoor enclosure with locking hasp for tamper-proof protection
- Dimensions: 7¾L x 5W x 3"D
- Manual override
- Operating temperature –40° to 155°F

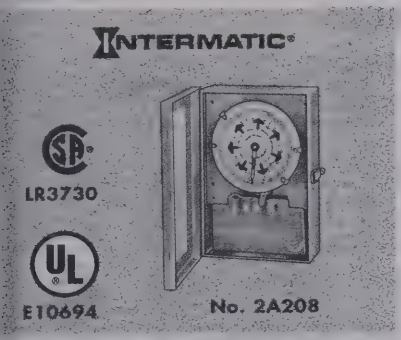
## ELECTRONIC 7-DAY PROGRAMMABLE 2-CHANNEL TIMERS



- Two channels with independent programming for each circuit
- 7-day programming—a different program possible for each day
- Over midnight settings possible
- Adjustable cycle model
- 24 pulse outputs adjustable from 1 to 59 seconds and 1-60 minutes; ideal for ringing bells
- Automatic or manual operation following power failure
- Five-year battery backup for memory protection; nonreplaceable lithium battery included
- Manual override
- Easy-to-use prompted programming
- Available in either panel or surface mounting
- Dimensions for No. 1XC72: 2¾L x 2¾W x 2¼"D
- Dimensions for No. 1XC73: 2¾L x 5W x 2¾"D

### DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.

## ELECTROMECHANICAL TYPES

- Major application—time-of-day scheduling of HVAC systems
- Resistive contact voltage rating 120-480VAC; tungsten and inductive contact voltage rating 120-277VAC
- Different programs for each day of the week. Skipper allows any day or days to be omitted from program
- Heavy-duty gears with clutchless design prevent slipping
- Brass contacts are tungsten rated to handle inrush currents 10 times their rating
- 7-day dial with manual override lever
- Snap-out timer mechanism in NEMA type, indoor, gray finish, metal enclosure with knockouts; hasp provided
- All timer motors are permanent magnet, self-lubricating, synchronous type
- Spring-wound carry over feature on Nos. 2A209, 6X757, and 1A220 provide a maximum of 16 hours of continuous duty during power failure; rewinds itself during resumption of power
- No. 2A210 features compact design, contact rating of 120-277VAC
- Nos. 1A219 & 1A220 contact rating 120-240VAC

# ELECTRONIC PROGRAMMABLE TIMERS

## 7-DAY 1 AND 4-CIRCUIT TIMERS

- Easy to progam, to-the-minute control, manual override
- Choice of 1 or 4-circuit control on same time schedule
- Daily or skip-a-day programming; repeat programming feature provides up to 196 operations per week
- Dimensions: 7¾L x 5W x 3"D
- Ideal for HVAC and lighting loads; for inductive loads (surge suppressors must be installed across output contact; see below)
- LED display for easy programming in poorly lit areas
- Lockable metal enclosure; for indoor use
- Automatic rechargeable battery back-up to maintain program for a minimum of 24 hours (4 AA batteries included)
- Operating temperature –40° to 150°F

**Certified by the California Energy Commission under Title 24, Part 6, Section 131(D) of the California Code of Regulations.**

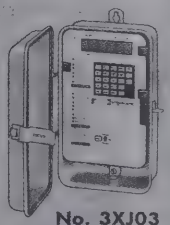
## ASTRONOMIC LIGHTING CONTROL AND 2-CHANNEL TIMER

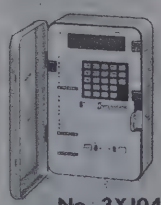
- Full year control with 99 "holiday" schedules of any duration
- User selectable override from 1 minute to 6 days, 23 hours and 59 minutes
- Fully automatic daylight saving time adjustment, with override, does not require yearly adjustment or programming (internal calendar to year 2094)
- Lifetime memory protection for all program data uses non-volatile RAM
- 8-year lithium battery backup for time keeping and calendar data
- Large 3/8" digital display and LED prompts simplify programming
- Input voltage 120/208/240/277 field selectable—50/60 Hz self adapting
- Heavy-duty 20 amp SPDT contacts with 20 amp 120 volt ballast rating
- Operating temperature range: –40° to 122°F

### LIGHTING CONTROL No. 3XJ03



- For parking lots, automobile dealerships, garages, illuminated signs, billboards, decorative, security lighting and more
- Automatically adjusts daily for changing sunset and sunrise times
- Features 5/2 day programming and copy days programming
- Manual load control and green LED load status indicator
- Lockable NEMA 3R metal enclosure for outdoor use

### 365-DAY TIMER No. 3XJ04



- To-the-minute timing control for two channels on independent schedules
- Provides programming for astronomic (outdoor lighting) and momentary (bell ringing and latching contactor) switching for 1 to 127 seconds
- Minimum of 400 set points, 5/2 day programming, and copy days feature
- Independent load control and green LED indicator for both circuits
- Lockable metal enclosure for indoor use

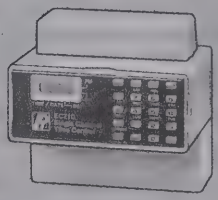
# ELECTRONIC 365-DAY PROGRAMMABLE 1 AND 2-CHANNEL TIMERS

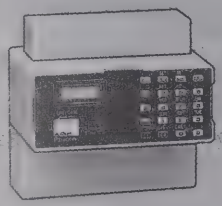
- Automatic daylight saving time changeover
- Manual override through keyboard
- 100 hours of carry over with a 9-volt alkaline battery or 275 hours of carry over with a lithium battery. Battery carryover maintains programming during power outages. Battery not supplied. See Index under Batteries.
- Surface or DIN rail mountable
- Operating temperature –40 to 140°F

## 1-CHANNEL TIMER



- Single channel, SPDT
- 18 On/Off/Momentary set points adjustable from 1-59 seconds
- 7-day programming—plus an eight day holiday using 365 day calendar
- 11 holiday durations programmable by date
- Dimensions: 4L x 4⅛W x 3"D

## 2-CHANNEL TIMER



- Two-channels with independent programming for each circuit
- 365-day programming with 12 single holidays and 2 holiday durations
- Built-in line filtering for electronic circuitry, preventing normal line disturbances from altering the program
- 32 momentary operations preset at 2 seconds
- Dimensions: 4L x 4.1W x 3"D

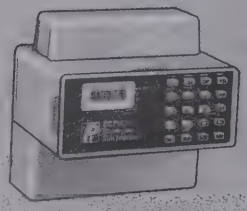
# ASTRONOMIC PROGRAMMABLE ELECTRONIC LIGHTING CONTROLS

**Electronically Turns Lights On and Off with the Movement of the Sun**

## OPEN TYPE

- Ideal for use with illuminated signs and billboards, parking lot and security lighting, and lighted display windows

PROGRAMMING FEATURES INCLUDE:



- Automatically adjusts for changing sunset and sunrise times on a full year schedule; 365-day programming
- One On/Off event to be scheduled between sunset and sunrise
- Manual override
- 100 hours battery backup; requires 9V battery, not supplied. See index under Batteries
- DIN rail or surface mountable
- Operating temperature –40° to 160°F

# 365-DAY PROGRAMMABLE TIMERS

## ELECTRONIC 4-CHANNEL TIMER

- Four independent channels, each capable of daily programming
- Three programs plus skip feature per channel; manual override
- 365-day programming, includes 32 holidays, daylight saving time, and leap year adjustment
- Provides one channel with astro-dial; auto-adjust program changes length of day during year, eliminates photoelectric cell
- Momentary contacts adjustable from 1 to 99 seconds
- Four month battery carry over protects program, battery included
- Provides normal line isolation for electronic circuitry
- Applications include time-of-day scheduling of HVAC equipment, indoor and outdoor lighting, and bell ringing
- Indoor (NEMA 1) housing with display window, brown enamel finish, 10⅞L x 7¼W x 3⅛"D

**No. 1A404.** 4-Channel Timer. Paragon brand (EC74/192MA). Shpg. wt. 7.0 lbs. List $1680.25. Each.....**$994.50**

## ELECTRONIC 7 AND 12-CHANNEL TIMERS

- Twelve independent channels, on No. 2W542, with daily programming capability; 7 on No. 2A515
- 365-day programming, includes 32 holidays with No. 2W542, 16 with No. 2A515, daylight saving time and leap year adjustment
- Repeat programming feature allows a specific daily program to be repeated for other days—expands On/Off capabilities
- Manual and timed program override
- 4 month battery carry over protects program, battery included
- Provides normal line isolation for electronic circuitry
- Indoor (NEMA 1) steel housing with display window, blue enamel finish
- Dimensions No. 2W542: 13¼L x 8¾W x 4¼"D
- Dimensions No. 2A515: 10⅞L x 7⅜W x 3"D.

These units provide 2 methods of energy management time control. One method is time-of-day scheduling, where the timer turns off the power to electrical devices during times when they are not in use. The other method is time-based duty cycling, where one cycles various pieces of electrical equipment in a system to be on for an interval and off for an interval. This is typical for heating and air conditioning systems where several units may be used. This method may be used to reduce the peak demand level of daily electricity usage, which usually carries a penalty charge from the power companies.

# SWIMMING POOL TIMERS

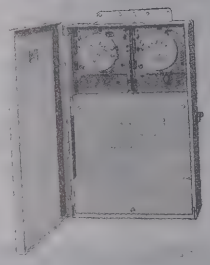
## No. 1A850 TIMING/CONTROL CENTER

- Two timers in one enclosure; time switches can be wired to operate pool filter/heater with the other timer being wired to automatic pool cleaner
- Timers can be wired so filter pump is always on when automatic cleaner is on to prevent damage to automatic pool cleaner
- Contains two No. 2E353 timer mechanisms; wire together or independently
- Includes main lug load center with 100 amp service, up to eight single circuits
- Accepts GE (THQL); Square D (HOM); Siemens (QP); Westinghouse (BR) Circuit breakers; uses single, 2 pole, or GFI breakers
- Outdoor NEMA 3R steel enclosure, circuit panel provides knockouts for external switches and outlets; beige finish with hasp for lock
- Dimensions: 16½L x 10⅞W x 4⅞"D

## No. 6X767 TIMING CENTER

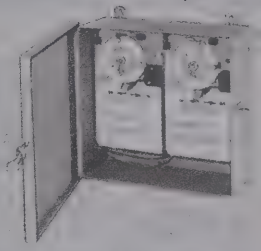
- Same as No. 1A850, except without control center capability (circuit breaker)
- Knockouts provided for additional installation of GFCI or spring-wound timer
- Dimensions: 10¾L x 10¾W x 4"D

## No. 6X768 DUAL TIMING/HEATER CIRCUIT CENTER



- Circuit center has additional heater circuit designed to turn off gas fired swimming pool heater approx. 20 minutes before filter pump is turned off (both switch on simultaneously)—eliminates pounding and knocking due to overheated water and reduces scale and lime deposits that cut service life
- Contains two timer mechanisms—wire together or independently
- Additional circuit for gas heater solenoid
- Outdoor NEMA 3R steel enclosure with beige finish; hasp for lock and knockouts
- Separate grounding terminal
- Dimensions: 10¾L x 10¾W x 4"D

## Nos. 2E352 and 4E026 TIMING/HEATER CIRCUIT CENTER



- Same as No. 6X768 except with only one timer mechanism
- Additional circuit for gas heater solenoid
- No. 2E352 has outdoor NEMA 3R steel enclosure with beige finish. No. 4E026 has outdoor NEMA 3R plastic enclosure; knockouts provided
- Dimensions: 9⅜L x 5½W x 3⅝"D

# SPRINKLER TIMERS

**For time-based management and allocation of water resources. Designed for automatic control of irrigation systems, sprinkling systems, greenhouse misting systems, water conditioning equipment, liquid pumps, agitators and other applications requiring short range daily control.**

## LAWN SPRINKLER TIMERS

- Skipper allows 14-day programming
- 3PST circuit plus fourth circuit for operating pump or master valve concurrently
- 24-hour time dial with manual override
- Synchronous clock motor
- NEMA 1 steel enclosure with spring hasp for seal or lock; knockouts provided
- Rain switch override

# SHORT RANGE TIMERS

ALL TIMERS HAVE HEAVY-DUTY, SELF-LUBRICATING MOTORS

## CYCLE TIMERS

- Complete cycle repeats after elapsed time range
- 120 tripper slots in equal increments. Snap-out mechanism for easy installation and maintenance
- Metal indoor case with knockouts
- 100,000 cycles rated life at 20A resistive load
- Extra trippers available, see page 574

INTERMATIC®

## PERCENTAGE CYCLE TIMERS

- Controls ventilation in poultry houses
- Repeats cycle continuously as long as maintained power is supplied to the timer motor
- On-time from 2% to 90% of range, 100% On or Off also provided
- Visible dial with movable pointer
- Aluminum enclosure for surface or control panel mounting. Two pryouts included
- 5⅛L x 3⅜W x 2 13/16"D

PARAGON

| JW-30-00 | **2E210** | 139.04 | **84.20** | 1.3 |

## INTERVAL TIMERS

- Two sets of contacts: one set NO; one set NC
- Can transfer loads in unison
- Unit resets at end of each cycle. Requires external momentary or maintained contact signal to start each cycle
- Momentary contact signal causes one contact to serve as an interlock
- Maintained contact signal can provide independent operation of contacts; allows for two separate poles

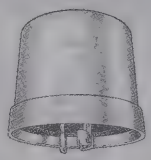
# PHOTOCONTROLS

## INTERMATIC®

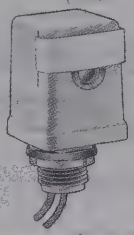
(Except No. 5U789) (Except Nos. 6P004 & 5U789)

**INTERMATIC LIMITED WARRANTY**

5-years on Nos. 6P005, 5U791, 6P007, 5U788, 6P008, and 5U790. 3-years on Nos. 6P004, 6P006, 5U792, and 5U793. 1-year on No. 5U789. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

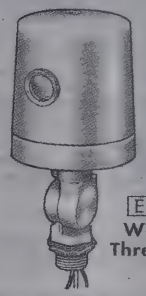


A Screw-Type Socket Adapter



For Outdoor Use Commercial Grade

B Heavy-Duty Wired-In No. 6P005



C Locking Thermal Type

D 1/2" Male Threaded

E Swivel-Type With 1/2" Male Thread No. 6P008

E Swivel-Type With 1/2" Male Thread No. 5U790

### A SCREW-TYPE SOCKET ADAPTER

- For outdoor PAR lamp fixtures and coach lights; incandescent bulbs only
- Screws into standard medium base socket
- Adjustable photocell shield allows adjustment to compensate for light level variations
- 3½H x 2¾" diameter
- UL Listed (E78749)

### B HEAVY-DUTY WIRED-IN

- For controlling incandescent, fluorescent, and HID lighting
- Mounts into standard 1/2" knockout or 11/16" hole in lamp post or lighting fixture
- Snap switch with built-in delay; prevents false cycling due to car headlights, lightning, etc.
- 1 13/16L x 1 5/16W x 13/16"D
- UL Recognized (E42722); CSA Certified (LR38068)
- No. 6P005 for 120VAC
- No. 5U791 for 208-277VAC

### C LOCKING THERMAL TYPE

- Meets EEI-NEMA standards for locking devices with solid brass terminals
- Snap switch with built-in delay prevents false cycling due to car headlights, lightning, etc.
- Integral housing and UV stabilized lens protects photocell from moisture and sun rays
- 2¾H x 3" diameter
- UL Listed (E59121); CSA Certified (LR38068)
- No. 6P006 for 120VAC
- No. 5U792 for 120-277VAC
- No. 5U793 for 120-277VAC with lightning arrestor

### D 1/2" MALE THREADED

- For use on HID, wall mounted fixtures and signs
- Photocell shield allows adjustment to compensate for light level variations
- Snap switch has built-in delay which prevents false cycling due to car headlights, lightning, etc.
- 2 5/16L x 1 9/16W x 1 9/16"D case with 1/2"-14 male pipe threaded fitting
- UL Listed (E42722); CSA Certified (LR38068) (except No. 5U789)
- No. 6P007 for 120VAC
- No. 5U789 for 25 Amp 120VAC
- No. 5U788 for 208-277VAC

### E SWIVEL-TYPE

- Swivel and sliding photocell shield allow adjustment of sensitivity and ability to compensate for light level variations
- Swivel provides 360° adjustment in one plain, 210° adjustment in second plain
- Base has 1/2" male pipe thread
- Gasket and locking nut provide for secure weather-tight installation
- Snap switch has built-in delay to prevent false cycling
- 5½L x 1 9/16W x 1 9/16"D
- UL Listed (E42722); CSA Certified (LR38068)
- No. 6P008 for 120VAC
- No. 5U790 for 120-277VAC

## CAROLPRENE® TYPE SOW/SJOW

- Carolprene® jacket resistant to oil, moisture, and abrasion
- Rubber insulation over stranded copper conductors
- Meets OSHA and Bureau of Mines (MSHA) requirements
- For indoor/outdoor use
- Temperature range: -40°C to +90°C
- See page 595 for jacket type information

No. 3ZK60

## Thomas&Betts TWO-SCREW CONNECTORS

- Non-insulated
- 1/2"–1" steel; 1¼"–2" malleable iron
- UL Listed for use with rubber and thermoplastic flexible cords (both single and multiple cords and 2 oval cables)

Rounded cable grip and smooth bushing protect the cable sheath and wire insulation. Since saddle is threaded, screws do not travel or extend beyond the connector body as it is clamped to the cable. An extra lip on the saddle closes the unused part of the connector opening.

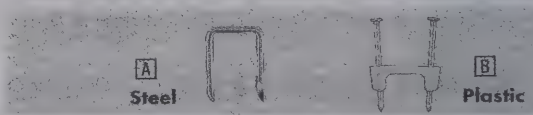
## ALL PLASTIC CONNECTORS FOR NON-METALLIC CABLE AND FLEXIBLE CORD



- Connects Romex (non-metallic sheathed cable) and flexible cord to boxes or enclosures
- High impact thermoplastic (UL Class 94V-1) suitable for 105°C applications
- No. 3LK49—For use with 10-2, 12-2 and 14-2 NM cables; 18-2 and 18-3 SJ and SJO cords and 18-2 SV, SVO, SJT and SJTO cords, single or multiple; cord capacity .125-.300 in. dia.
- No. 3LK41—For use with 10-3, 12-3, 14-3, 10-2, 12-2, 14-2 NM cables; multiple (2) 12-2 and 14-2 NM cables; single and multiple flexible cords in wire range .300 in. to .600 in.
- No. 3LK42—For use with 8-3 and 6-3 NM cables; (2) 14-3, 14-2, 12-2 and 10-2 NM cables; single and multiple flexible cords in wire range .500 in. to .850 in.
- Push-in design
- Captive locking wedge secures cable with single squeeze of standard electrician's pliers
- Provides excellent insulation, strain-relief and high pull-out value

## CORD AMPERAGE RATINGS

**Based on a 3 conductor cordset (two carrying current, one ground) per NEC when used with suitably rated plug and connector.**

| Conductor Size - AWG | CORDSET LENGTH | | | | |
|---|---|---|---|---|---|
| | 10 ft. | 25 ft. | 50 ft. | 100 ft. | 250 ft. |
| 18 | 10 Amps | 10 Amps | 10 Amps | 7 Amps | 3 Amps |
| 16 | 13 | 13 | 13 | 10 | 4 |
| 14 | 15 | 15 | 15 | 13 | 7 |
| 12 | 20 | 20 | 20 | 15 | 11 |
| 10 | 30 | 30 | 30 | 20 | 18 |

## CORD AND CABLE GLOSSARY

| Type Jacket | Max. Volts | Temperature Range (°F) | Duty | Special Features | Applications |
|---|---|---|---|---|---|
| HPN | 300 | 0 to 194 | Medium | Heat Resistant Cord | Heat Producing Appliances (soldering irons, heat guns) |
| S | 600 | -40 to 140 | Heavy | General Purpose Cord | Machine Tools, Motors, Drills, Power Tools |
| SE | 600 | -58 to 221 | Heavy | All Temperature Cord | Construction Equipment, Motors, Outdoor Lighting |
| SEW | 600 | -58 to 221 | Heavy | All Temperature Cord—UL Listed for Outdoor Use | Construction Equipment Motors, Outdoor Lighting |
| SJ | 300 | -40 to 140 | Medium | General Purpose Cord | Power Tools, Floor Polishers, Sanders, Portable Lighting |
| SJE | 300 | -58 to 221 | Medium | All Temperature Cord | Blowers, Motors, Dryers, Outdoor Lighting |
| SJEW | 300 | -58 to 221 | Medium | All Temp. Cord—UL Listed for Outdoor Use | Blowers, Motors, Dryers, Outdoor Lighting |
| SJEOOW | 300 | -58 to 221 | Medium | Jacket Resists Swelling & Decomposing when exposed to oil or Grease | Motors, Power tools, Lighting |
| SJO | 300 | -40 to 194 | Medium | Jacket Resists Swelling & Decomposing When Exposed to Oil or Grease | Motors, Power Tools, Portable Lighting |
| SJOW | 300 | -40 to 194 | Medium | Same as SJO and UL Listed for Outdoor Use | Motors, Power Tools, Lighting |
| SJOOW | 300 | -58 to 221 | Medium | Jacket and Insulation Resists Swelling & Decomposing when Exposed to Oils, Acids and Chemicals. Abrasion and Flame Resistant | Motors, Power Tools, Lighting, Blowers, Industrial Equipment |
| SJT | 300 | 0 to 140 | Medium | General Purpose Cord | Motors, Power Tools, Lawn & Garden Equipment, Appliances |
| SJTW | 300 | -40 to 140 | Medium | General Purpose Cord—UL Listed for Outdoor Use | Motors, Power Tools, Lawn & Garden Equipment |
| SJTO | 300 | 0 to 140 | Medium | Jacket Resists Swelling & Decomposing when Exposed to Oil or Grease | Motors, Power Tools, Lighting |
| SO | 600 | -40 to 194 | Heavy | Jacket Resists Swelling & Decomposing when Exposed to Oil or Grease | Tools, Cranes, Hoists, Industrial Equipment |
| SOW | 600 | -40 to 194 | Heavy | Same as SO and UL Listed for Outdoor Use | Tools, Cranes, Hoists, Industrial Equipment |
| SOOW | 600 | -58 to 221 | Heavy | Same as SJOOW | Motors, Machine and Power Tools, Lighting, Blowers, Construction and Industrial Equipment, Cranes & Hoists |
| SPT-1 | 300 | 32 to 140 | Light | General Purpose Cord | Lamps, Speakers, Appliances |
| SPT-2 | 300 | 32 to 140 | Light | Heavier Construction than SPT-1 | Lamps, Speakers, Appliances |
| SPT-3 | 300 | 32 to 140 | Medium | Heavier Construction than SPT-2 | Tools, Major Appliances, Fans, Motors |
| ST | 600 | 0 to 140 | Heavy | General Purpose Cord | Motors, Power Tools, Construction Equipment, Portable Lighting |
| STW | 600 | -40 to 140 | Heavy | General Purpose Cord—UL Listed for Outdoor Use | Motors, Power Tools, Construction Equipment, Portable Lighting |
| SVT | 300 | 0 to 140 | Heavy | General Purpose Flexible Cord | Vacuum Cleaners, Office Equipment |

# ELECTRONIC/DATACOM CABLE

## EXTENDED FREQUENCY DATA/LAN CATEGORY 5 CABLE

General Cable CORPORATION

**APPLICATIONS**
- Voice •T1 •10 BASE-T (IEEE 802.3)
- 4/16 Mbps Token Ring (IEEE 802.5)
- 100 Mbps TP-PMD (ANSI X359.5)
- 100 VG-AnyLAN
- 55/155 Mbps ATM

**INDUSTRY APPROVALS**
- UL Listed Type MPR/CMR and MPP/CMP
- C-UL Listed PCC FT4 and FT6
- ANSI/TIA/EIA 568A (Category 5)
- ANSI/ICEA S-90-661 (Category 5)
- NEMA WC63.1 (Category 5)

**INSULATION**
- Non-Plenum-Polyolefin •Plenum-FEP

**FEATURES**
- Suitable for high-speed data transmission (i.e. 100 and 155 Mbps)

**TYPE MPR/CMR**
- UL Listed Type MPR/CMR for installation in vertical risers and general horizontal applications when installed in accordance with the NEC Article 800-51(b) (g)

**JACKET**
- Flame retardant PVC
- Sequential footage markings

**TYPE MPP/CMP**
- UL Listed Type MPP/CMP for installation in ducts, plenums, and other spaces used as environmental air returns when installed in accordance with NEC Article 800-51(a) (g)

**JACKET**
- Flexguard™ flame retardant PVC
- 0°C low temperature handling rating
- Sequential footage markings

| Conductor Size AWG | Conductor No. of Pairs | Jacket Color | Nom. O.D. (In.) | Spool Length (Ft.) | GCC Model | Stock No. | Priced Per Spool List | Priced Per Spool Each | Shpg Wt. |
|---|---|---|---|---|---|---|---|---|---|
| **TYPE MPR/CMR** | | | | | | | | | |
| 24 | 4 | Gray | 0.20 | 1000 | 2133200 | **3ZK44** | $343.76 | **$172.00** | 22.0 |
| **TYPE MPP/CMP** | | | | | | | | | |
| 24 | 4 | Blue | 0.16 | 1000 | 2131431 | **3ZK40** | 1034.53 | **517.50** | 20.0 |

## HIGH SPEED VOICE/DATA/LAN CATEGORY 3 CABLE

For Use with Telephone Systems/Voice Transmissions

General Cable CORPORATION

**APPLICATIONS**
- Voice •T1 •10 BASE-T (IEEE 802.3)
- 4 Mbps Token Ring (IEEE 802.5)
- 55 Mbps ATM •100 VG-AnyLAN

**INDUSTRY APPROVALS**
- UL Listed Type MPR/CMR and MPP/CMP
- C-UL Listed PCC FT4 and FT6 •IBM Type 3
- ANSI/TIA/EAI 568A (Category 3)
- ANSI/CEA S-90-661 (Category 3)
- NEMA WC63.1 (Category 3)

**INSULATION**
- Flame retardant semi-rigid PVC

**FEATURES**
- Excellent transmission characteristics meeting Category 3 requirements

**TYPE MPR/CMR**
- UL Listed Type MPR/CMR for installation in vertical risers and general horizontal applications when installed in accordance with the NEC Article 800-51(b) (g)

**JACKET**
- Flame retardant PVC
- Sequential footage markings

**TYPE MPP/CMP**
- UL Listed Type MPP/CMP for installation in ducts, plenums, and other spaces used as environmental air returns when installed in accordance with NEC Article 800-51(a) (g)

**JACKET**
- Flexguard™ flame retardant PVC
- 0°C low temperature handling rating
- Sequential footage markings

# ELECTRONIC CABLE

## ELECTRONIC MULTI-CONDUCTOR BRAID SHIELD CABLE

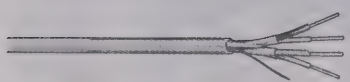
General Cable CAROL BRAND

No. 2W986

**APPLICATIONS**
- Electronic circuits where RF shielding is required
- Video interconnect
- Broadcast and Studio
- Sound systems
- Low capacitance for long runs

**INDUSTRY APPROVALS**
- UL 2092
- Passes UL 70,000 BTU Vertical tray flame test

**INSULATION**
- Premium polyethylene, color coded (see Color Code table on page 603 )



**SHIELD**
- 80% Tinned copper braid for noise reduction

**JACKET**
- Gray PVC, temperature range from -20°C to +80°C (-4°F to +140°F), 300 Volts

| Conductor Size AWG | Conductor No. of Pairs | Color Code Table No. | Description | Stranding | Nom. O.D. (In.) | Spool Length (Ft.) | Carol Model | Stock No. | Priced Per Spool List | Priced Per Spool Each | Shpg Wt. |

## ELECTRONIC MULTI-PAIRED INDIVIDUALLY SHIELDED CABLE

General Cable CAROL BRAND

No. 2W985

**APPLICATIONS**
- Use where total isolation of signal is required
- Computers •Equipment control circuits

**INDUSTRY APPROVALS**
- NEC Article 800 Type CM
- CSA Type PCCFT-1
- Passes UL 70,000 BTU Vertical tray flame test

**INSULATION**
- Premium polyethylene, color coded (See Color Code table on page 603 )

**JACKET**
- Gray, PVC, temperature range from 20°C to +75°C (-4°F to +140° F), 30 Volts
- Twisted pairs

| Conductor Size AWG | Conductor No. Of Pairs | Color Code Table No. | Description | Stranding | Nom. O.D. (In.) | Spool Length (Ft.) | Carol Model | Stock No. | Priced Per Spool List | Priced Per Spool Each | Shpg Wt. |

## ELECTRONIC MULTI-PAIRED INDIVIDUALLY FOIL SHIELDED CABLE

General Cable CAROL BRAND

No. 4W002

**APPLICATIONS**
- For total signal isolation in critical computer control circuits
- Suitable for high frequency transmission •Industrial equipment

**SHIELD**
- Individually shielded pairs, 100% Flexfoil-aluminum/polyester foil facing in protects transmissions from external interference between adjacent pairs
- Stranded tinned copper drain wire for each pair channels electrostatic charges to ground

**INDUSTRY APPROVALS**
- UL •CSA Type PCCFT-1
- Passes UL 70,000 BTU Vertical tray flame test
- NEC Article 800 Type CM (except No 2W989)

**INSULATION**
- Premium grade polypropylene, color coded (refer to Color Code table on page 603 )

**JACKET**
- Chrome gray, PVC, temperature rang from -20°C to +60°C (-4°F to +140°F 30 Volts

# SPEAKER CABLE

General Cable CORPORATION CAROL BRAND

No. 2W485

### APPLICATIONS

- Stereo sound systems •Intercoms •Paging systems
- Not recommended for multiple line electronic systems
- Stranded conductors

### INDUSTRY APPROVALS

- UL Wires Misc. (UL:120V)

### JACKET

- Clear PVC insulation

| Conductor Size AWG | No. of | Nominal O.D. (In.) | Spool Length (Ft.) | Carol Model | Stock No. | Priced Per Spool List | Priced Per Spool Each | Each / Lots 2 | Shpg. Wt. |

# TELEPHONE CABLE

General Cable CORPORATION CAROL BRAND

No. 2W599

### APPLICATIONS

- Telephone systems •Intercom systems •Speaker extensions
- Not recommended for multiple line electronic systems

### INDUSTRY APPROVALS

- UL Listed (E60233) •NEC Article 725 Type CL2/CM/MP

### INSULATION

- Premium polyethylene, color coded (refer to page 603)

### JACKET

- Beige, PVC, temperature range from –20°C to +75°C (–4°F to +140°F), 90 Volts

| Conductor Size AWG | No. of | Color Code Table No.† | Nominal O.D. (In.) | Spool Length (Ft.) | Carol Model | Stock No. | Priced Per Spool List | Priced Per Spool Each | Each / Lots 2 | Shpg. Wt. |

## CABLE INSTALLATION TOOLS

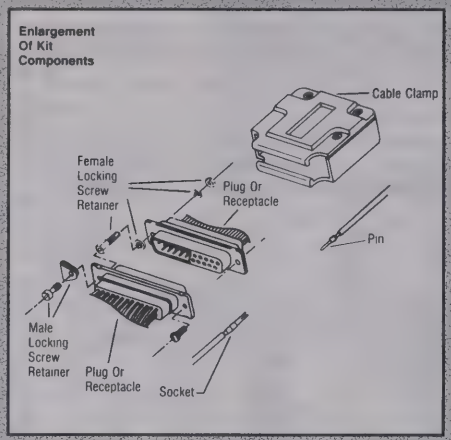
A lightweight tool for least critical applications. Clinch tie to desired bundle and twist tool to remove excess strap. Recommended for use with 18–50 pound ties. Thomas & Betts brand (GQC-100).

**No. 5A308.** Shpg. wt. 0.3 lbs. List $16.78. Each ..... **$15.11**

Heavy-duty tool for use with 18–50 pound ties. Automatic cut-off and adjustable tensioning for dependable use in assembly applications. Thomas & Betts brand (GL-400).

**No. 1A887.** Shpg. wt. 0.5 lbs. List $68.43. Each ..... **$61.60**

**DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER**



**Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.**

# CABLE CONNECTORS AND KITS

AMP

No. 4A223
BNC Connector Kit

No. 6A548
AMPLIMITE
Multi-Position Kit

E28476

**Use AMP connectors for terminations between computer and a wide range of accessory applications.**

LR7189

## BNC, DUAL CRIMP COAXIAL CONNECTOR KIT

BNC plugs for RG59/62 cable types are used for installing or repairing communications or data equipment. Crimp-type BNC plugs are smaller in diameter and lighter in weight compared to soldered plugs. Interchangeable with all comparable UG/U plugs. Kit Stock No. 4A223.

## AMPLIMITE SUB D RS232 CONNECTOR KITS

AMPLIMITE plugs and receptacles are used for a variety of int face connections between computer and peripherals. Used mass terminations of discreet wire and jacketed cables. Kit Sto Nos. 6A547 and 6A548.

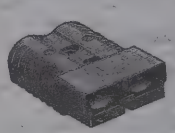
## BATTERY AND CABLE CONNECTORS

Used in all electric forklift truck applications in addition to batteries, battery chargers, sweepers, personnel carriers, golf carts, construction equipment, and marinas. One-piece polycarbonate Lexan connector housings are impact-resistant for physical and dielectric strength.



Silver-plated electrolytic copper contacts offer low resistance and high conductivity with annealed barrel to ensure even crimping. Solid barrel contacts are flared for easy insertion of stripped wire or cable. Contacts are supported by tempered stainless steel leaf springs to maintain constant pressure and vibration resistance. Systems Material Handling brand.

### BATTERY AND CABLE CONNECTOR HANDLE

Heavy gauge insulated steel assist handle easily installs on any of the 175 amp or 350 amp rated connectors listed below. Covered with red plasticsol for excellent resistance to corrosion and insulation from electrical shock. Comes complete with hardware. Systems Material Handling brand (SY175-350H).

Thomas&Betts

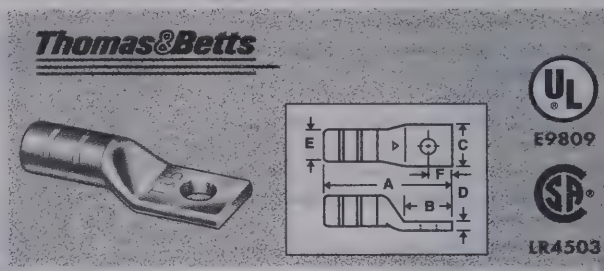
LR4503

E9809

- Assure positive, all around compression with low resistance and high pullout values
- Made of high conductivity wrought copper
- Contain heavy reinforcing ribs which locate the compression dies as well as strengthen the compression joint
- Ideal for pigtailing, 2-way splicing or tapping to an unbroken continuous main
- Order installation tools and dies on pages 612 and 613



YOUR PRODUCT SOLUTION RESOURCE...CALL GRAINGER TODAY!

Grainger will supply you with the dependable, brand name products you need to keep your operation running smoothly-plus the solutions you need to keep your operation running more profitably.

# COLOR-KEYED® COMPRESSION CONNECTORS FOR ALUMINUM/COPPER CODE CABLE

## 1 HOLE LUGS—90°C, 600V TO 35KV APPLICATIONS

- Designed and approved for aluminum and copper conductors
- Long compression areas assure complete contact and multiple compressions prevent creep of the aluminum conductor
- Filled with a high temperature oxide inhibitor compound
- Finish—Electro-tin plated to prevent electrolytic corrosion when in contact with copper and assure lowest contact resistance
- Material—High conductivity wrought aluminum
- Order installation tools and dies on pages 612 and 613

## 2 WAY CONNECTORS FOR 600V 90°C APPLICATIONS

- AL and CU concentric conductors and compact code AL strandings
- Material—High conductivity wrought aluminum
- Finish—Electro-tin plated
- Permit aluminum conductors to be spliced to copper conductors, as well as aluminum-to-aluminum conductors
- Order installation tools and dies on pages 612 and 613

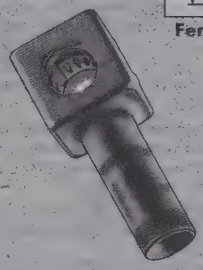
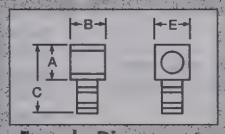
When the spec calls for brand names, you'll find the best here.

# COLOR-KEYED® MOTOR PIGTAIL CONNECTORS AND SEALANT



## MOTOR PIGTAIL CONNECTOR—1 LINE TO 2 LOAD (3 WIRE)



- Provides quick and easy changeout of motors and transformers with less down time
- Eliminates bolting, tapping and loose connections
- High-amperage interface band
- Compact size
- Snug-fit size, slip-on insulator
- Precision male and female design
- Easy, error-free installation
- Wire range: No. 16 to 4/0 AWG
- Rating: 600V, 90°C
- Material: High conductivity copper
- Insulator: Thermoplastic Elastomer
- Plating: Tin

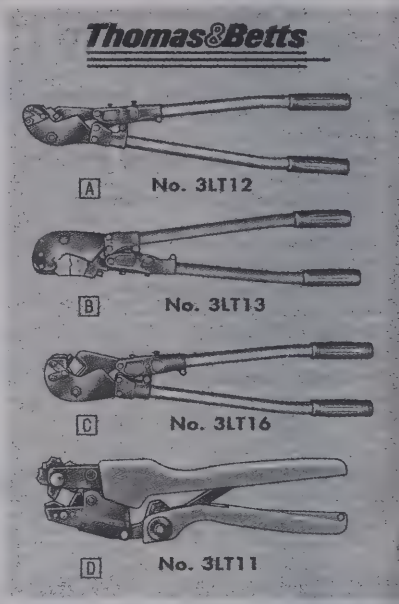
# COLOR-KEYED® COMPRESSION CONNECTOR TOOLS

## MECHANICAL TYPE CRIMPING TOOLS

**A No. 3LT12**

- Installs copper lugs, splices and taps
- Equipped with SHURE STAKE® mechanism
- Order dies seperately on page 613

**B No. 3LT13**

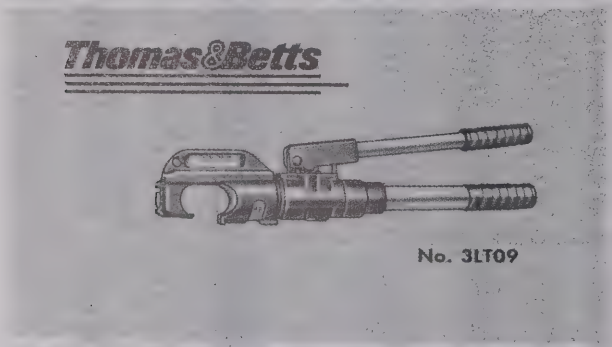


- Installs H taps, copper lugs, copper splices, copper taps, aluminum lugs, and aluminum splices
- Equipped with SHURE STAKE® mechanism
- Order dies separately on page 613

**C No. 3LT16**

- Installs copper lugs, C taps, and aluminum lugs
- Equipped with SHURE STAKE® mechanism
- Includes steel case
- Includes the following installation dies: 3LJ75, 3LJ76, 3LJ77, 3LJ78, 3LJ79, 3LJ80, 3LJ81, 3LJ82
- Replacement dies may be ordered separately on page 613

**D No. 3LT11**



- Compression connector installation tool
- Includes a 5 nested die wheel for the following die codes: Red 21, Blue 24, Gray 29, Brown 33, and Green 37 (C taps only)
- Dies are color coded
- Equipped with SHURE STAKE® mechanism
- Replacement dies may be ordered separately on page 613

### MECHANICAL TYPE CRIMPING TOOL ORDERING DATA

## 14-TON MANUAL HYDRAULIC CRIMPING TOOLS

- Self-contained 14 ton crimping tool
- Installs copper and aluminum lugs, copper and aluminum 2-way connectors copper C-taps, aluminum H-taps, and grid connectors
- Features rapid-ram advance mechanism for fast installation
- Field replaceable by-pass cartridge
- Short fiberglass handles for confined work spaces
- Includes carrying case
- Order dies separately on page 613
- Thomas & Betts brand (TBM14M)

**No. 3LT09.** Shpg. wt. 24.0 lbs. List $1837.58. Each.....$1700.00▲

## SEALANT

- Use with motor disconnect boots
- Description: Polybutene Compound
- Application Temperature: 40°F–100°F
- Service Temperature: -40°F–180°F
- Dimensions: Thickness 1/8", Length (Std. Roll) 10 ft. wrapped on release liner
- Resists normal aging process
- Resists most acids, bases and alcohols
- Dielectric Strength: 200 v/mil minimum
- Volume Resistivity: $10^{13}$ ohms/cm
- Flame Retardancy: Pass VO Vertical Flame Test
- Thomas & Betts brand (MDBOOT-SEAL)

**No. 3LR57.** Shpg. wt. 1.0 lbs.
List..... $37.65.
Each.....$35.80

## KOPR-SHIELD®

- Blend of colloidal copper and inhibitors
- Anti-seize and conductive compound
- Prevents oxidation corrosion—compound flows between and around cable strands and reduces inner-strand resistance
- Rated for NEC applications up to 8 KV and 90°C

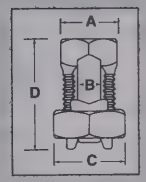
### KOPR-SHIELD ORDERING DATA

| Contains | Thomas & Betts Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1/2 lb. Can w/Brush | CP8-TB | 3LP03 | $32.81 | $31.20 | 0.3 |
| One lb. Can w/Brush | CP16 | 3LP02 | 47.51 | 45.15 | 0.9 |

## ALUMA-SHIELD® ALUMINUM JOINT COMPOUND

- For aluminum cable connections
- Contains fine zinc particles which break through oxide film on cable strands upon compression of connection
- Assures a low resistance contact and seals out air and moisture
- UL Listed only for use on electrical cables in cable connector assemblies, or on bus bars rated for NEC applications up to 8 KV and 90°C
- Contains 8 oz. brush cap can
- Thomas & Betts model AP8

No. 3LN47. Shpg. wt. 0.7 lbs. List $18.05. Each.....$17.16



# BLACKBURN® MECHANICAL CONNECTORS—GENERAL APPLICATIONS

## HIGH STRENGTH SPLIT BOLT CONNECTORS

- For copper to copper connections
- Bolt and nut of high strength corrosion-resistant bronze alloy
- Bolt and nut of hex design up to 350 kcmil
- Round bolt design over 350 kcmil

UL recognizes solid and stranded conductor configurations for sizes #8 and smaller, and stranded configurations only for sizes #6 and larger.

Thomas&Betts

# COPPER MECHANICAL CONNECTORS

- For copper conductors
- Screws are plated steel
- Compact design
- One-piece construction for strength and durability
- Excellent for confined areas
- No. 3LR07 is cast from high strength bronze alloy
- Nos. 3LR06, 3LR08, 3LR04, and 3LR05 are cold forged from pure electrolytic copper with 99% conductivity
- Nos. 3LR06 and 3LR08 have screwdriver slot head screws, all others are socket style

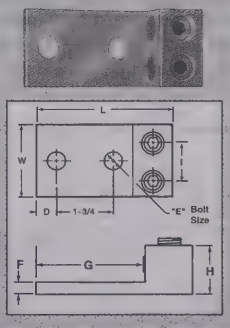
# ALUMINUM DUCT-RATED MECHANICAL CONNECTORS-ALCUL™



- For copper and aluminum conductors
- Easy installation—no special tools required
- Tin plated for low contact resistance
- UL 486B tested, AL9CU Rated
- All aluminum bodies
- Slotted screw on lugs up through 2/0 str.; 5/16 socket screw on sizes 250 through 350 kcmil; 3/8 hex socket on sizes 500 kcmil
- NEMA spacing: 1¾" centers on Nos. 3LN42 and 3LN46

Connectors accommodating conductors 600 kcmil and larger have double row of set screws.

# STA-KON® FORK TERMINALS

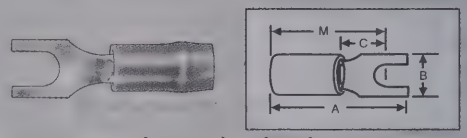
## NYLON INSULATED FORK—INSULATION GRIP

- Fork terminals with nylon insulation sleeves, recommended for temperatures up to 105°C
- Inner bronze insulation grip sleeve lengthens flex radius of conductor and eliminates conductor creep
- Nylon jacket is color-coded
- #22-16 and #18-14 AWG stock thickness: .03"
- #12-10 AWG stock thickness: .04"
- 600V
- Order installation tool on Page 619

## NYLON INSULATED FORK FLANGED TONGUE—INSULATION GRIP

- Fork terminals allow easy installation because screw needs only to be loosened
- Suffix S indicates a flanged-tongue fork with turned up tips for extra holding protection
- #22-16 and #18-14 AWG stock thickness: .03"
- #12-#10 AWG stock thickness: .04"
- 600V
- Order installation tool on Page 619

## NYLON INSULATED LOCKING FORK—INSULATION GRIP



- Locking fork terminals have a specially designed tongue that lets them go on like a fork and stay on like a ring
- #22-16 and #18-14 AWG stock thickness: .03"
- #12-#10 AWG stock thickness: .04"
- 600V
- Order installation tool on Page 619

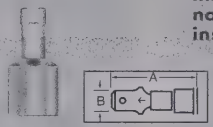
# STA-KON® DISCONNECTS AND SPLICE CONNECTORS

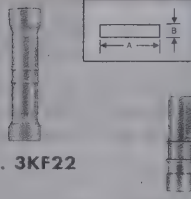
E9809

LR4503

Thomas&Betts

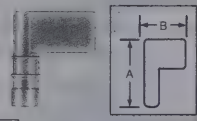


- Material: Brass
- Finish: Tin plated
- Insulated terminals have nylon insulation



A Standard Female Partially Insulated

D Standard Male Fully Insulated



B Standard Female Fully Insulated

E No. 3KF22

Sold only in package quantities

C 90° Flag Female Open Top Partially Insulated

Disconnect terminals provide a quick, reliable method of connection to terminal blocks and boards without the use of tools. They are supplied in a variety of styles to meet virtually all quick-disconnect requirements. Female disconnect terminals and matching male tabs accommodate a range of 22-10 AWG, and are available in non-insulated, partially insulated, and fully insulated styles. Insulated terminals have nylon insulation. They are available in various tab widths including .250, .187, and .110". A unique construction of the female disconnect offers long-terdependability. In butt splices, the wires are butted together and crimped at each end of the splice. Nylon insulated splices meet or exceed the requirements of MIL-T-7928.

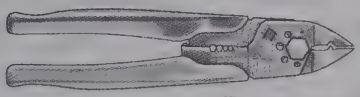
# STA-KON® CRIMPING TOOLS

Thomas&Betts New

A No. 3KH44

B No. 3KH45



C No. 3KH46

D No. 4LV85

E No. 3LT13

F No. 3KH52

G No. 3KF66

## A No. 3KH44 Pliers Type

- Installs Series A, B, C non-insulated terminals and splices, and Series A and B non insulated terminals with insulation grip
- Terminal gauges accepted: Series A & B: .030–.050: Series C: .075–.095

## B No. 3KH45 Pliers Type

- Installs Series A, B, C, PT non-insulated terminals and splices
- Includes wire cutters
- Terminal gauges accepted: Series A & B: .027–.053; Series C: .072–.098
- Plastisol handles
- Wire stripper for removal of most types of insulation from #22-10 AWG stranded wire and #18-8 AWG solid wire

## C No. 3KH46 Pliers Type

- Installs Series RA, RB, A, B, C non-insulated and RC insulated nylon and vinyl terminals and splices
- Includes wire cutters
- Plastisol handles

## D No. 4LV85 Mechanical Type

- Installs NW series non-insulated high temperature terminals
- Use front nest to install 22-18 awg
- Use rear nest to install 16-10 awg
- Shure-Stake mechanism helps ensure a complete crimp cycle before it releases the tool

## E No. 3LT13 Mechanical Type

- Installs Sta-Kon nylon insulated terminals and splices sizes RD - RM
- Shure-Stake mechanism helps ensure a complete crimp cycle before it releases the tool
- Use 4LV59 for 6 AWG wire and use 4LV60 for 4 or 3 AWG wire. Order separately below. See page 613 for more dies

### Nos. 4LV59 and 4LV60 Crimping Tool Dies

For use with No. 3LT13 Sta-Kon crimping tool

***New*** **No. 4LV59.** Shpg. wt. 0.7 lbs. List..$288.51. Each.....$267.00▲

***New*** **No. 4LV60.** Shpg. wt. 0.7 lbs. List..$288.51. Each.....$267.00▲

## F No. 3KH52 Pliers Type

- Installs Series A, B, C, AB, PT, RA, RB, RC insulated and non-insulated terminals and splices
- Wire cutters for #10 AWG and smaller solid or stranded wire
- Wire stripper for removal of most types of insulation from #22-10 AWG stranded wire and #18-8 AWG solid wire
- Cutters chasing feature for screws, sizes 4-40, 6-32, 8-32, 10-24, 10-32

## G No. 3KF66 Ergonomical Design

- Installs Series RA, RB, RC nylon & vinyl terminals, splices, and disconnects
- Ergonomically designed to reduce the risk of carpal tunnel syndrome
- Delivers the same crimp with up to 60% less handle force than other terminal hand tools
- Rubberized thermoplastic handle
- Shure-Stake mechanism helps ensure a complete crimp cycle before it releases the tool
- Terminal gauges accepted: Series A: .100–.106; Series B: .116–.124; Series C: .148–.156

## WIRE CONNECTORS

**For making branch circuit wire or fixture wire connections on numerous combinations of solid and/or stranded copper wire.**

- Five space efficient, color-coded sizes
- Wire range #22-10 AWG copper only
- Flame retardant thermoplastic shells
- Deep, wide connector entry
- Plated steel, square wire springs
- Rated 105°C (221°F)

# ELECTRICAL TAPE

## VINYL PLASTIC ELECTRICAL TAPE

Scotch™ Brand — Registered to ISO 9002 — E129200 — LR48769

**Super 33+ Vinyl Plastic Electrical Tape** is a premium-grade 7-mil vinyl plastic electrical tape with an aggressive adhesive that provides fast, sure grab. Use as a primary insulation for wire cable splices up to 600V and for fixture and wire splices up to 1000V. Flexible vinyl backing conforms readily to irregular surfaces and goes on smoothly at temperatures as low as 0°F and seals safely up to 220°F. Super 33+ is flame retardant, resists weather, ultraviolet (UV) rays, abrasion, alkalis, acids, and corrosion. Meets requirements of ASTMD-3005, Type 1; UL510; HHI-595C; and CSA 22.2.

Tape is 3/4" wide. No. 2A225 is sold in individual plastic cans, No. 2A226 is sold in 10-roll cartons, priced per carton in table below.

| Roll Size | No. of Rolls | Stock No. | List | Pack, Each | Shpg. Wt. |

**Super 88 Vinyl Plastic Electrical Tape** is a heavy-duty 8.5 mil, flam retardant, cold and weather resistant plastic tape with superio cold weather handling features. Super 88 resists UV rays, mois ture, alkalis, acids and corrosion. Temperature range: 0°F to 220 F. Meets requirements of ASTMD-3005, Type II; UL510, MIL-I 24391, and CSA 22.2. Sold in one roll individual plastic containe each roll 3/4" wide x 66 ft. long.

**No. 2A227.** Shpg. wt. 0.4 lbs. List $4.61. Each ..... $4.35

**35 Vinyl Plastic Electric Tape for Color Coding** is a 7-mil, flame reta dant, weather resistant tape available in nine colors. Resist abrasion, UV rays, moisture, alkalis, solvents and many acids Temp. range: 32°F to 220°F. Use indoors and in protected ou door applications for phase identification, identifying moto leads, insulating splices, terminations and harnesses, and mark ing safety areas. Meets requirements of UL510 and CSA 22.2. Sol per roll in individual plastic container, each roll 3/4" wide x 66 f long.

## HIGH TEMPERATURE ELECTRICAL TAPE

**27 Glass Cloth Electrical Tape** is a 7-mil glass cloth tape with thermosetting, pressure-sensitive adhesive which performs at Class B temperatures (130°C/266°F). Scotch 27 provides heat-stable insulation for hot-spot applications such as furnace and oven controls, motor leads, and switches. CSA Certified for 130°C (LR93411). UL Recognized Component listing for 150°C (Guide OANZ2, E17385).

| Roll Size | Stock No. | List | Per Roll Each | Shpg. Wt. |
|---|---|---|---|---|
| 1/2" x 66 ft. | 2A456 | $8.37 | $8.28 | 0.2 |
| 3/4 x 66 | 2A457 | 12.42 | 12.29 | 0.3 |

**69 Glass Cloth Electrical Tape** is a 7.5-mil tape with thermosettin silicone adhesive which performs at Class H temperature (180°C/356°F). Scotch™ 69 is used to secure insulation in hig temperature areas, and to splice wire rated at 150°C, 180°C 200°C SF and SFF. Also, 69 can reinforce insulation in electric installations where heavy loads cause high heat and breakdow of insulation such as in motor control exciter feeds; splicing sil cone-covered glass wire; insulating Class H dry-type transforme leads; and insulating splices made on SA-type wire in heat tre areas. 3/4" wide x 66 ft. long roll. Meets Requirements of Mil-19166C and has UL Accepted Component listing for 200°C (Guid OANZ2, E17385); CSA Certified for 180°C (LR93411).

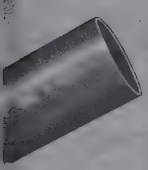
**No. 2A458.** Shpg. wt. 0.2 lbs. List $16.03. Each ..... $15.85

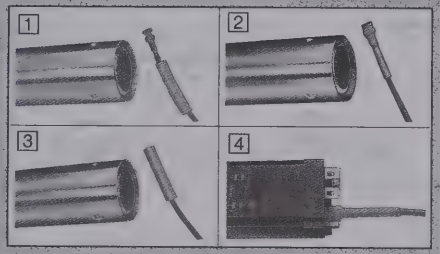
**130C Linerless Rubber Splicing Tape** is a self-bonding, 30-mil, EPR-based, corona-resistant insulating tape. Provides a tight, void free moisture-resistant insulation without loss of electrical characteristics. Use 130C tape as a primary electrical insulation for splicing all solid dielectric cables through 69 kV, and for building stress cones on cables up to 35 kV. Also use for jacket ing on high-voltage splices and terminations; moisture sealing electrical connections; bus bar insulations; and end-sealing high-voltage cables. 3/4" wide x 30 ft. long roll. Meets Requirements of HHI-553C. Grade A•B, & ASTM D-4388, Type III. Rated for up to 90°C continuous operating temperature and short term 130°C overload service. UL Recognized (E17385).

**No. 2A459.** Shpg. wt. 0.5 lbs. List $9.45. Each ..... $9.34

**70 Self-Fusing Silicone Rubber Electrical Tape** is a self-fusing, 12-mil high temperature, track-resistant tape composed of inorganic silicone rubber. It is designed as a protective overwrap for terminating high-voltage cables. Scotch™70 can also be used as pr mary cable insulation where Class H temperatures (180°C/356°F) are encountered. Roll is 1" wide x 30 ft. long.

**No. 2A460.** Shpg. wt. 0.3 lbs. List $30.46. Each ..... $30.20





Here's all the power you need to get it running and keep it running.

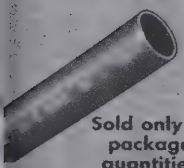
# SHRINK-KON® HEAT SHRINK TUBING

Thomas&Betts

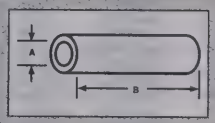
LR52390 E79546

Sold only in package quantities

## THIN WALL HEAT SHRINK TUBING



1. Prepare electrical connections. Before crimping connection together, slip appropriately sized shrinkable tubing over wire.
2. After crimping connection, slip shrinkable tubing over connection, then apply heat.
3. Apply heat with a suitably sized heat gun to the entire surface of the shrinkable tubing for a neat, clean insulator.
4. Heat shrinkable tubing, when properly applied, provides a form-fitting insulator around electrical and mechanical connections.
5. Do not store in areas where temperature may exceed 100°F.



- **Designed to insulate and protect electrical wiring**
- **Flame retardant**
- **Material: Cross-linked polyolefin**
- **Temp. range: 125°C**
- **Voltage rating: 600 Volts continuous**
- **Shrink ratio: 2:1**
- **6 Inch lengths**

## HEAVY WALL HEAT SHRINK INSULATING TUBING

- **Heavy duty protection**
- **Full range of sizes from #16 to 1000MCM**
- **Field proven reliability—rated 600V, 90°C**
- **Internally applied sealant offers protection against moisture**
- **Listed for direct burial per U.L. 486D to meet most environmental and temperature conditions as noted**
- **Material: cross-linked polyolefin**
- **Shrinks at 250° to 275°F • Shrink ratio: 3 to 1**
- **May be used over lead, steel, aluminum, copper, standard plastic and elastomeric insulating materials**

## ADHESIVE INSULATING COVERS

- **Material: 6 mil electrical vinyl backing, butyl rubber mastic adhesive approx. 1/8" thick**
- **Rated up to 600 Volts**
- **Adheres to metals, rubber and synthetic materials**
- **Seals against moisture**
- **Workable from 14°F to 120°F**
- **Maximum operating temperature 176°F**
- **No installing tools required**
- **For use with compression connectors**

# TY-RAP® CABLE TIES

- Made from nylon 6/6
- Stainless steel lock maintains right tension
- Infinitely adjustable design
- Less stress-sensitive than notched type ties
- Registered under Standard 1565
- Qualified under OPC 23190
- Recommended for use in temperatures between 185°F and –40°F
- Black weather-resistant ties are recommended for outdoor use. The addition of carbon black provides good ultraviolet resistance and prolongs useful life.
- Identification ties may be marked with Red (No. 3KH48) or Black (No. 3KH47) marking pens or may be heat stamped (See page 629)

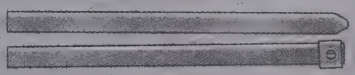
# TY-RAP® STAINLESS STEEL CABLE TIES AND INSTALLATION TOOLS



## STANDARD STAINLESS STEEL CABLE TIES

- Type 304 stainless steel
- Strong, safe, low-profile permanent single wrap ties
- Unique dual lock design
- 0.015" (38mm) thick
- For use in damaging environments such as boiler rooms, chemical plants, refineries, and pulp and paper mills
- Fireproof
- Resistant to corrosion and UV light

## SCOTCHCODE™ STD WIRE MARKER TAPE DISPENSER

3M

Registered to ISO 9002

**ScotchCode™ STD Wire Marker Tape Dispenser** is a compact refillable dispenser which provides a fast, convenient method for marking wire and cable. Easy cut-off, no waste. Applications include all types of marking or identifying: load center panels, repair and replacement parts, wires and hoses, terminals, sub-assemblies, etc. Dispenser has 10 refillable compartments filled with ScotchCode™ SDR Wire Marker Tape numbered 0 through 9 inclusive. ScotchCode™ SDR tape is polyester film combined with an acrylic adhesive for superior oil/solvent resistance. Tape is white with black numerals; each roll 0.125 inch wide x 11 feet long. Dispenser: 1¼" diameter x 5" long (STD-0-9).

**No. 2A233.** Shpg. wt. 0.2 lbs. List $31.41. Each .....**$31.15**

Refills for numbered or colored tape are available. Call 1-800-323-0620 for fastest service.

# WIRE MARKING PRINTER AND ACCESSORIES

Registered to ISO 9001

**BRADY 90-DAY WARRANTY**

See page opposite inside back cover.

## I.D. PRO™ PLUS PRINTER AND ACCESSORIES

- **Printer features rechargeable battery pack and easy-load cartridge**
- **Prints labels, markers, and sleeves**
- **Automatic serialization**
- **Bold text capability**
- **Upgradable print speed and 8 lines of variable text**

The I.D. PRO Plus from Brady is the smallest, most affordable method available to print wire markers on site and on demand. Desinged for versatility as well as portability, the printer can accommodate three different material widths from .5" to 1.5". The self-adjusting printhead accepts a wide variety of labeling materials including self-laminating and vinyl cloth, plus BradySleeve™ and PermaSleeve™ heat shrink wire markers (see page 636). Brady USA Brand.

### PORTABLE PRINTER MATERIAL GUIDE

| Type | Item | Max. Service Temp. °F (°C) | Use | Special Properties |
|---|---|---|---|---|
| **Nylon Cloth** | B-499 | 193(90) | Low profile through-conduit wire marker | Low-profile; permanent adhesive |
| **Polyester** | B-619 | 311(155) | White permanent label | Solvent and heat resistant; CSA approved and UL listed |
| | B-969 | 311(155) | Metallized permanent label | Print receptive; CSA approved and UL listed |
| **Polyolefin** | B-321 | 221(105) Heat Shrink | Sleeve markers | Permanent; shrinkable |
| | B-341 | 275(135) Heat Shrink | Wire ID and insulation | Permanent; shrinkable |
| **Vinyl** | B-292 | 150(66) | Wire and cable labels | Heat and solvent resistant; conformable |
| | B-607 | 211(100) | Non-removable applications | Tamper resistant |
| **Vinyl Cloth** | B-502 | 180(82) | General marking | Oil, water and humidity resistant; permanent or removable |

## WIRE MARKING SLEEVES

Registered to ISO 9001

### PERMASLEEVE™ - B-341 - HEAT-SHRINK WHITE POLYOLEFIN SLEEVES - 100 PER ROLL

Brady PermaSleeve full-circle insulating wire markers meet the rigid insulating and marking requirements of MIL-I-23053/5 Class 1, MIL-M-81531, MIL-STD-220F, Method 215, and UL224. The heat-shrinkable irradiated polyolefin does not smudge or fade when printed, while the unique flattened, full-circle design provides fast, permanent wire marking. Brady USA Brand.

### BRADYSLEEVE™ - B-321 - HEAT SHRINK WHITE POLYOLEFIN SLEEVES - 500 PER ROLL

Durable BradySleeve markers stand up to tough conditions, assuring long life and permanent legend. The exclusive topcoat "soaks up" ink and retains it permanently, without additional curing. Brady USA Brand.

HUBBELL WIEGMANN

## NEMA TYPE 3R ENCLOSURES

For Outdoor Use Where Exposed to Rain, Sleet, and Noncorrosive Liquids

- 16-gauge zinc coated steel, 14-gauge on Nos. 6C719 and 6C720
- Finish: ANSI 61 powder paint on inside and outside
- Comes with dripshield and rear mounting holes
- Interior panels sold separately (see data below)
- Screw cover has removable cover fastened at bottom by screws and is lockable (except No. 3A909)
- Hinged cover has continuous hinge door with hasp for padlocking

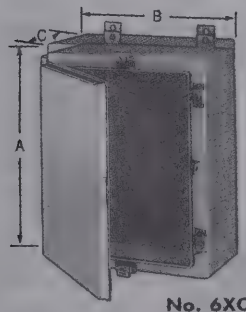
# NEMA TYPES 4 (JIC) AND 4X STAINLESS STEEL ENCLOSURES



WIEGMANN

E6924 LL66078-2

No. 6XC08

E6924 LL66078-2

No. 6XC24

## NEMA 4 (JIC) STAINLESS STEEL

For regularly hosed down or other wet applications

- Continuous hinge enclosures
- 14 gauge stainless steel with grained exterior finish; available in both 304 and 316 stainless
- Conform to NEMA 4, 12, 13, and Joint Industrial Council standards
- Interior panels sold separately below; panels are not stainless steel

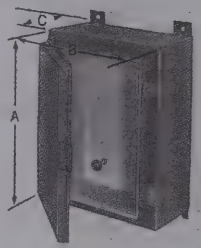
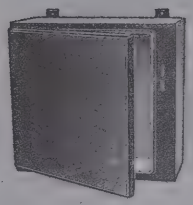
# ELECTRICAL ENCLOSURES

## NEMA TYPE 12/13 ENCLOSURES



HUBBELL WIEGMANN

LL66078



E6924 (Hinged)
E23553 (Screw)
E64791 (Hinged/ Flange-Mounted)

New

Interior panels sold separately—see below

N12
No. 2W824

SDN
No. 6C735

### JIC AND NEMA TYPE 12/13

- NEMA type 12 & 13 enclosures and NEMA type 13 models meet Joint Industrial Council (JIC) standards
- 14 gauge steel, ANSI 61 enamel inside and outside on NEMA 12 types
- Gray polyester powder exterior and interior on JIC types
- Neoprene gasketing
- Pocket on inside cover to hold circuit diagrams on NEMA 12 types
- Screw cover has removable cover fastened at corners with captive plated screws
- Hinged cover has continuous hinge door with plated screw fastened clamps with hasp
- N12 Series has hasp for padlocking

### FLANGE-MOUNTED DISCONNECT-NEMA TYPE 12/13

- Designed to house the following flange-mounted disconnects and operating mechanisms: Allen-Bradley 1494V, Cutler Hammer C3611C371, GE TDA, ITE maxi-flex and Square D Class 9422
- Will not accept Allen-Bradley 1494F or 1494D Series
- 14 gauge steel; ANSI 61 enamel inside and outside
- Removable print pocket
- External mounting feet
- Disconnect switch, operating mechanism and door hardware are not included

## TRUKTRAK™ MODULAR CABLE PROTECTION SYSTEM

HUBBELL® Wiring Device-Kellems

### FEATURES & BENEFITS

- Modular nonmetallic cable protection system that protects valuable cables and cords from damage
- Provides a safe means for vehicle and pedestrian crossover traffic
- Made of all-weather polyurethane with heavy load capacity
- Multiple channels and sizes
- Modular interlocking design with yellow liftcover and end caps
- For indoor and outdoor use

### APPLICATIONS

- Industrial, convention centers, amusement parks, utilities, municipalities

Note: Rectangular brass covers listed above are for replacement use with Hubbell rectangular floor boxes. They do not fit round floor boxes listed above.

## PLASTIC FLOOR BOXES

### FEATURES & BENEFITS

- Rugged box is molded from non-conductive, non-corroding PVC and 100 cubic inch volume provides extra capacity and wiring room
- Plastic box is adjustable for height; can also be leveled
- Optional low voltage divider permits power and voice/data in same floor box
- Adapter ring adjusts to floor level
- Heavy-duty hub entrances withstand rigors of both installation and pour
- Flush brass 3-service fitting provides power and voice/data
- Duplex cover flaps are spring-loaded; keeps debris out when not in use

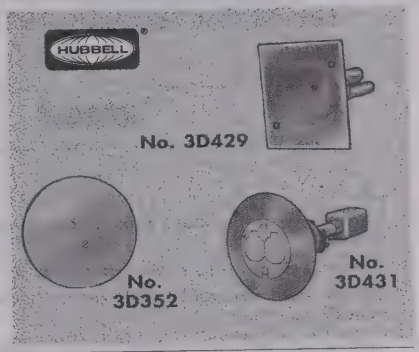
# FIRE-RATED POKE-THROUGH SERVICE BOXES

## APPLICATIONS



- Institutions, offices, wholesale/retail
- Provides power and/or phone/data after concrete has been poured; maintain floor's integrity against fire as required by NEC

## LISTINGS & APPROVALS

- UL Classified for fire resistance in 1-4 hour rated floors

## FEATURES & BENEFITS

- A 2" diameter poke-through has separate EMT tubes for power and voice/data; 3" diameter allows for larger capacity of service
- Flush poke-throughs can be wired and installed from above the floor
- Adjustable fire barrier allows for installation in a variety of floor thicknesses, from 2¼ -7"
- Maximum flexibility is offered in above-floor fittings with either complete pedestals or ability to create your own

| Description | Floor Hole Size/ Conduit Sizes | Hubbell Model | Stock No. | List | Each | Shpg. Wt. |

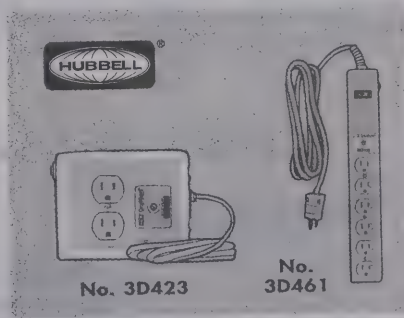
# SURGE STRIPS

## APPLICATIONS

- Industrials, institutions, hospitals, offices, labs, wholesale/retail
- For personal computers, fax machines, CAD/CAM & test equipment, point-of-purchase terminals, medical devices, etc.



## LISTING & APPROVALS

- UL Listed to Standard 1449 (Transient Voltage Surge Supp.), 1363 (Temp. Power Taps), 498 (receptacles). CSA Certified to Spec C22.2 No. 42M.

Suitable for ANSI/IEEE C62.41-1980 (IEEE 587) installation cat. "A" & "B"

## FEATURES & BENEFITS

- Protect sensitive electronic equipment from transient voltage surges
- Rugged tamperproof metal enclosure
- Power cords are 6 ft., 14/3 AWG-SJT
- Noise filtering reduces possibility of EMI/RFI interference •Visual and audible surge status indicators
- Resettable circuit breaker with overload/short circuit protection

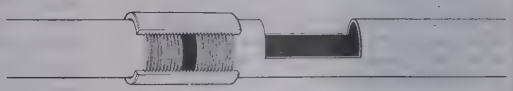
## ELECTRICAL METALLIC TUBING (EMT)



- Uniform wall thickness provides resistance to physical damage
- Galvanized coating seals out corrosion
- Ductile steel cuts and bends easily to reduce waste and installation time
- Interior coated with protective lubricant for easy wire pulling
- UL Listed (E32464); ANSI C-80.3

allied TUBE & CONDUIT

UL

## INTERMEDIATE METAL CONDUIT (IMC)

- Uniform wall thickness provides resistance to damage
- Galvanized coating seals out corrosion
- Larger internal diameter than Rigid for easier wire pulling
- Direct replacement to Rigid conduit for all applications
- NPT threads cut and galvanized to comply with all UL standards
- One coupling installed on each 10 ft. piece
- Provides radiation protection and magnetic shielding
- UL Listed (E58688); ANSI C-80.6

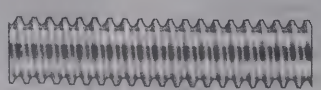
## BEAM CLAMPS—MALLEABLE IRON—ELECTROPLATED FINISH

- For 1/4" through 1/2" threaded rod
- Tapped holes in base and back to accept bolt or hanger rod
- Jaw openings accommodate I-beam, column or angle flanges up to 2" thickness
- Hardened steel cup-point set screw is tapped at an angle for maximum locking action and holding power

Thomas&Betts

No. 3KF30



Sold in package quantities only

## CONDUIT/PIPE TO BEAM CLAMPS

- Conduit/Pipe to Beam Clamps—Hot-Dipped Galvanized
- Right angle type for corrosive environments
- Typical applications include petrochemical plants, refineries, pulp and paper mills, waste and water treatment plants, ship building, and coastal areas
- Made of malleable iron saddles with steel hardware
- Malleable iron saddles are hot-dipped galvanized after fabrication in accordance with ASTM A153-82
- Hardware mechanically galvanized in accordance with ASTM B695-85
- Sold only in package quantities

Thomas&Betts

## T & B INSULATED BUSHINGS

- For Threadless Rigid Conduit and Intermediate Metal Conduit (IMC)
- Provides a well rounded insulating surface over which conductors may be pulled or on which conductors may bear while in service
- Designed to be pushed onto conduit end
- High impact thermoplastic construction
- Listed for 105°C (221°F) application
- Flammability Classification UL 94V-1
- Conforms to: UL 514, ANSI C80.4, ANSI C33.84, NFPA 70-1978 (ANSI)

## UL LISTING AND CSA CERTIFICATION

When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.

## T & B KNOCKOUT BUSHINGS

- To bush knockout openings in metal boxes or enclosures
- One piece construction designed to snap into outlet box, switch box, or other enclosures left vacant by wiring modifications or maintenance changes
- High impact strength self-extinguishing non-dripping (per UL 94V-1) thermoplastic construction
- Rated for 105°C (221°F) application
- Wall thickness of box or enclosure:
  .095" max. up to 1" trade size
  .140" max., 1¼ through 2" trade size
- Provides smooth, rounded insulation surface for easy wire pulling
- Easily installed by hand

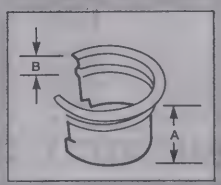
## T & B INSULINER® SLEEVES

High dielectric nylon, 105°C

Snapped into a regular bushing makes a UL Listed insulated bushing



For standard rigid conduit, EMT (thin-wall conduit) or any standard bushed outlet

- Especially suitable for use with flexible metallic conduit
- Converts ordinary bushing to code approved insulated bushing without disturbing wiring

Thomas&Betts

E23018

LR2884

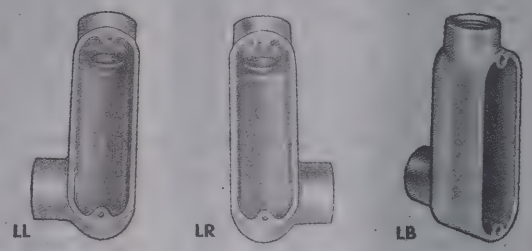
# CONDUIT BODIES, BODY COVERS AND GASKETS

## CONDUIT BODIES

- Provide convenient access to conductors for easy maintenance
- Allow for bends in conduit system without bending conduit
- For use with threaded Rigid and IMC conduit (compression connector required for threadless)
- For use with EMT conduit when used with proper compression connector
- Flat back design gives extra wiring capacity and simplifies installation
- UL Listed (E2527) and CSA Certified (LR65183)
- Suitable for Class 1, Division 2 classified locations if installed in compliance with NEC501-4(B)
- Appleton brand
- Covers and gaskets sold below

### INDUSTRIAL GRADE

- Features malleable iron for use in high-abuse areas or where extra strength is required



### COMMERCIAL GRADE

- Features copper-free aluminum, ideal for use in corrosive areas where iron conduit bodies are not suitable

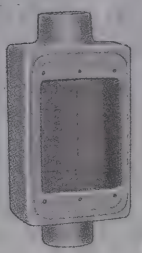
# CONDUIT OUTLET BOXES



- Accepts standard flush switches and receptacles
- Provides openings for making splices
- Permits access to conductors for maintenance
- Allows connections for branch conduit runs
- Meets UL standard 489 and 514
- Weatherproof, rain-tight and dust-tight when used with cast gasketed covers
- Industrial grade—malleable iron for use in high-abuse areas or where extra strength is required
- Appleton brand

# TITE-BITE® CONNECTORS

- Steel or malleable iron
- Easy to install with double grip saddle
- Connectors are completely salvageable
- 3/8" and 1/2" sizes are made of formed steel which produce a uniform high quality and a smooth throat that protects conductor insulation
- 3/4" and larger size are malleable iron

Thomas&Betts

CSA LR2884

UL E23018

# FLEXIBLE METAL CONDUIT

electri-flex

E53253 LL18858

No. 6A419

- For use in industrial, commercial, institutional, and residential wiring applications
- Replaces EMT conduit in difficult or impractical locations
- Use with: lighting fixtures, fans, motors, machine tools, switch and receptacle wiring
- Easy to cut, no bending required
- UL Listed (E53253) NEC Article 350 and Fed. Spec. WW-C-566C. For dry locations only
- Electri-Flex brand

# LIQUID-TIGHT FLEXIBLE CONDUIT

- Provides complete wiring protection from weather, water, dust, most corrosive fumes and vapors, grease, oils and non-concentrated alkalies
- Sunlight and ozone resistant, withstands and absorbs motion, vibration and bending
- Applications include air conditioning, machine tools, presses, cranes, blowers, pumps, hoists, lubrication and irrigation equipment
- Gray color
- Electri-Flex brand

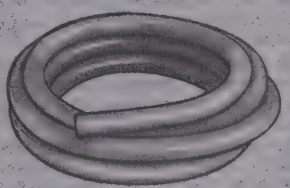
### UL LISTED (E29278) STEEL CORE CONDUIT

Conduit has continuous copper ground for permanent circuit protection with electroplated galvanized steel core. Seamless interior makes wire pulling easy. High tensile strength core design resists unraveling. Suitable for direct burial in poured concrete, air plenums, raised floors in data processing centers, and outdoor electric signs. Temperature range -4 to 140° F, intermittent to 194°F. Suitable for hazardous locations: Class I Div.2, Class II Div. 1&2, Class III Div.1 &2. UL listed E29278, CSA certified LL18858, NEC Article 351-A.

### INDUSTRIAL JIC APPROVED STEEL CORE CONDUIT

Electroplated galvanized steel core is designed with high tensile strength to resist unraveling. Non-wrinkling PVC jacket won't pull away from fittings. Seamless inerior for easy wire pulling. Temperature range is -4 to 176° F.

### NON-METALLIC CONDUIT



Tough, lightweight, corrosion resistant PVC construction with rigid spiral reinforcement for greater crush resistance. Easy to cut and handle-suitable for all standard duty, direct burial, and poured concrete applications. May be used with non-metallic or metallic liquid-tight fittings. Temperature range is -4 to 176° F bruy, 140° F wet, 158° F oil. UL listed E79308, CSA Certified LL18858, NEC Article 351-B.

### ECONOMY JIC APPROVED STEEL CORE CONDUIT

Corrosion resistant flexible steel core with liquidtight PVC jacket. Temperature range is -4 to 176° F. Conforms to JIC Standards.

# FLEXIBLE LIQUIDTIGHT NONMETALLIC CONDUIT, TUBING, AND FITTINGS

## POLYTUFF® I CONDUIT

- Fused PVC materials form a rugged, tough, but flexible conduit in standard sizes with no metal core
- Suitable for all standard duty applications
- Nonconductive, lightweight, nonmetallic materials provide corrosion resistance
- Gray color,100 Ft. roll
- Cuts easily and cleanly
- Liquidtight for inside or outside use
- Crush and crimp resistant
- UL Listed (E94909(M)), CSA Certified (LL66786), NEC Article 351-B

## POLYTUFF® II TUBING

- Extra flexible tubing for use in tight spaces and short corners
- Fused PVC materials provide mechanical protection
- Black color, 100 Ft. roll
- Lightweight; suitable for light and standard duty applications
- Cuts easily
- UL Listed (E92035(M)), CSA Certified (LL68808)

## SWIVELLOK™ FITTINGS

- Assumes any position, from straight to 90°
- Replaces all angle fittings
- Feed wires straight through, then twist to desired position for quick installation
- SwivelLock is available in 1/2, 3/4, and 1" sizes, black or gray
- All fittings made of tough, corrosion-resistant nylon for longer life
- All nonmetallic fittings UL Listed (E54121(M)), and CSA Certified LR27278 (PolyTuff I), LR68808 (PolyTuff II)

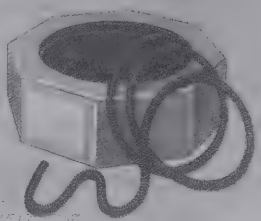
## FLEXIBLE CONDUIT KITS

HUBBELL® Wiring Device-Kellems

UL

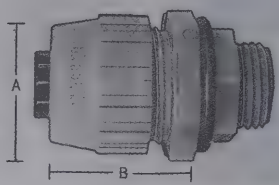
No. 6D267

1/2" Kit contains 2 gray SwivelLok connectors and 6' PolyTuff I conduit. Kellems brand (PS05GY KIT).



**No. 6D267.** Shpg. wt. 1.2 lbs. List .....$13.86. Each.....$11.09

3/4" Kit contains 2 gray SwivelLok connectors and 6' PolyTuff I conduit. Kellems brand (PS07GY-KIT).



**No. 6D268.** Shpg. wt. 1.7 lbs. List .....$21.76. Each.....$17.41

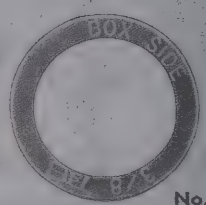
## UNDERGROUND LIQUIDTIGHT FEEDER CABLE FITTING

- 1/2" Hub size
- Cable opening: 0.235 x 0.500 In.

Oil-and water-resistant neoprene bushing is especially designed for sealing around underground feeder cable. Stainless steel retaining ring provides a bearing surface for the glandnut and eliminates cable twist. Ribbed glandnut is strong and easily tightened with a wrench to make a connection of high strength. Thomas & Betts brand (2116).

**No. 2A252.** Shpg. wt. 0.1 lbs. List $4.45.
Each.....$3.67

## SEALING RING WITH STAINLESS STEEL RETAINER



- NEMA 3R, 4, 6 and 13
- For use with T&B Fittings
- Sealing material resists oil, coolants, and hydraulic fluids as well as water
- Stainless steel retainer
- Resilient seal flows and seals rough surfaces
- When used with an externally threaded connector provides a tight seal against oil, fumes or moisture at the K.O.'s opening

## LIQUIDTIGHT STRAIN RELIEF CORD CONNECTORS

- Connects flexible cord or power cable to a box or enclosure and provides adequate strain relief
- Taper threaded hub
- Neoprene bushing applies pressure against cable the full length of bushing
- Thermoplastic or stainless steel retaining ring
  (1) Will not abrade cord/cable jacket
  (2) Reduces installing torque effort
- UL Listed for liquidtightness, strain relief and as an outlet bushing; CSA Certified watertight
- Gland, Body Steel/Malleable Iron/Zinc, Die Cast
- Retaining Ring: Thermoplastic/Stainless Steel
- O-ring: Buna N
- Electro Zinc Plated and Chromate Coated

**No. 3LK35 Chase Connector:**

- O-ring seal, nylon insulated throat, and neoprene bushing
- Ideal for installations where space is limited inside the enclosure

(*) Remove sufficient outer covering of cable to permit conductors to pass through connector body.
Temperature rating 105°C. Suitable for hazardous locationsuse in Class I, Div. 2; Class II, Div. 1 and 2, Class III, Div. 1 and 2, where general purpose equipment is specifically permitted per NEC Section 500-2(a).

## MACHINED ALUMINUM STRAIN RELIEF CORD CONNECTORS

- Factory lubricated bushing ensures liquidtight seal around cord while minimizing tension on terminals
- Patented Gotcha® Ring, color-coded by cord size, grips conductor through cord jacket
- Machined aluminum components are more durable and reliable than cast metal parts
- UL Listed (E54218(M)), CSA Certified (LR27378)

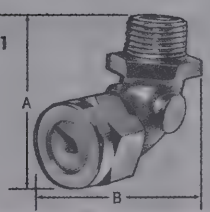
## MACHINED ZINC PLATED STEEL METAL STRAIN RELIEF CORD CONNECTORS

HUBBELL® Wiring Device-Kellems



New

- Use steel for highest impact resistance and tensile strength
- Zinc plating provides longer life
- Machined steel parts are more durable and reliable than cast metal parts
- Includes patented, color-coded Gotcha® Ring
- UL Listed (E54218(M)), CSA Certified (LR27378)
- Order locknuts on page 661

# NYLON STRAIN RELIEF CORD CONNECTORS

- Nylon construction is highly resistant to corrosion, yet tough, durable
- Provides liquidtight seal around cord minimizes tension on terminals
- Ideal for wash-down areas
- Color-coded, Gotcha® Ring grips conductors through cord jacket
- Factory lubricated bushing ensures even compression inside body for reliable liquidtight seal
- UL Listed (E54218(M)), CSA Certified (LR27378)

# LIQUIDTIGHT GRIPS FOR CORD AND CABLE

- Applications include wiring enclosures, pendant stations, construction sites, processing and material handling equipment, pumps, motors, and machine tools
- Deluxe cord grips completely eliminate pull tension on terminals
- Control cable arc-of-bend and prevent cord pull-out
- For indoor or outdoor use to seal out moisture or cutting oils
- Features a stainless steel mesh for cable bend control and corrosion resistance
- Aluminum fitting connects to box or hub sealing out contaminants
- UL Listed

## I-GRIP STRAIN RELIEF DEVICES FOR HUBBELL INSULGRIP® PLUGS AND CONNECTORS

No. 6D190
Grip only, plug not included. See page 709 for plugs.

Kellems I-Grips are made of high strength, plastic coated galvanized steel strand. Six sizes will fit all cable diameters used with Insulgrip products.

- Control cable arc-of-bend and reduce high pull tensions from wiring terminals on cord sets
- Fits all 2, 3, 4 and 5 wire Hubbell Insulgrip plugs and connector bodies
- Eye tabs fit under nylon cord clamp and screws slide through eyelet holes, securing grip in place
- UL Listed

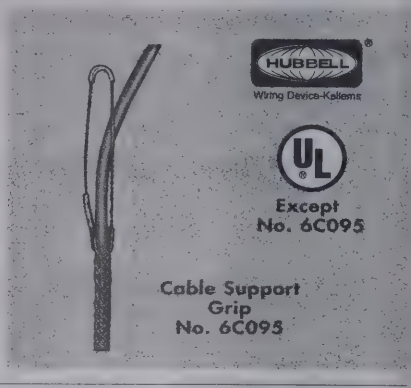
## JUNIOR PULLING GRIP KIT

- Kit contains 6 grips, one of each size listed on page 674
- Comes in a reusable, storage pouch
- Kellems brand (033-05-1114)

**No. 6D189**. Shpg. wt. 1.3 lbs. List $181.98. Each **$145.60**; Lots 5 ..... $131.08



Junior Pulling Grip Kit No. 6D189

# CABLE SUPPORT, PULLING GRIPS AND WIRE SPOOL RACK

## CABLE SUPPORT GRIPS FOR BUS DROP CABLE

- Bus drop grips provide a safe, easy, and economical method to support flexible cord or bus drop cable
- For assembly equipment in manufacturing, processing or material handling applications
- For indoor use only
- Features a galvanized wire mesh grip to ensure holding power
- Single eye provides easy attachment to any hanger
- UL Listed (except No. 6C095)

## JUNIOR PULLING GRIPS

- Designed to pull electrical, data, and communication wires at low tension through conduit during construction, replacement, repair, and repositioning projects
- Feature galvanized steel mesh grip for positive holding power during the pull
- Rubber boot contains, protects cable ends
- Flexible single eye provides easy attachment to pulling lines and fish tapes

**Note:** Never use grips at tensions up to listed breaking strength. Always use a safety factor in applications. Recommended Factor of Safety—5.

## WIRE SPOOL RACK

**Wire Spool Rack** has four removable plated-steel rods for storing and dispensing spools of wire in stockroom, maintenance, or industrial settings.

- Accommodates spools of wire up to 10" diameter
- Easily assembled
- Measures 26⅛W x 36½H x 5¾"D
- Can be counter, wall, or vehicle-mounted using lag holes and keyhole slots provided
- All steel construction
- Gray baked enamel finish
- Durham brand

**No. 5W887.** Shpg. wt. 20.0 lbs. List.....$94.95. Each .....**$71.70**

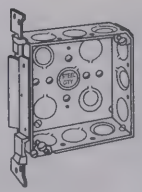
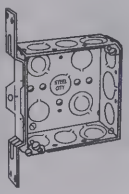
# ELECTRICAL BOX INFORMATION

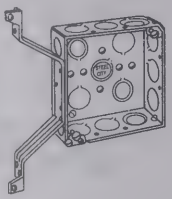
## STEEL BOX BRACKETS



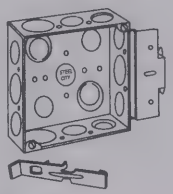
**"S" or "B" BRACKET**
Mounts to face of stud. Used on switch, handy, or square boxes. 2" long, 2⅛" wide.



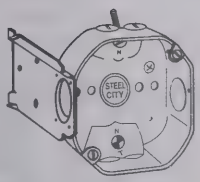
**"T" BRACKET**
Positions handy box against the face and side of stud. 5½" long, ⅛" wide.



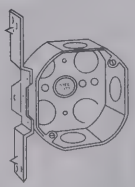
**"SV" BRACKET**
Mounts to side of stud with positioning spikes. 7⅜" long, 1" wide, ⅜" offset.



**"CV" BRACKET**
Mounts to flat side of metal studs or wood studs. 7⅜" long, 1" wide, ⅜" offset.

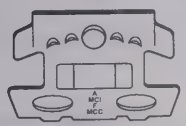


**"DV" BRACKET**
Mounts box offset from stud 1½". 6¹³⁄₁₆" long, 1" wide, 1½" offset.



**"MS" BRACKET**
Mounts to any depth of metal stud, open or closed side. Patented bracket. 2½" long, 1¹¹⁄₁₆" wide, ⅜" offset.

**"L" BRACKET**
Used to mount octagon boxes. 2⅝" long, 3⅝" wide, ¼" offset.



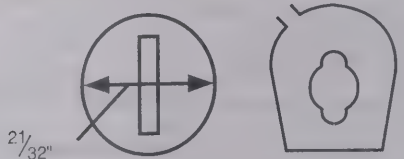
**"V" BRACKET**
Mounts to flat side of stud. 5¹¹⁄₁₆" long, ¹⁵⁄₁₆" wide, ⅜" offset.

## CLAMPS

**"C-1" CLAMPS**
Standard for armored cable boxes.

**"C-3" CLAMPS**
For armored cable.

**"C-5" CLAMPS**
Standard for most nonmetallic cable boxes.

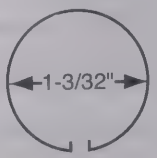


**"C-8" CLAMPS**
Loom only. For non-metallic sheathed cable and non-metallic tubing (loom).

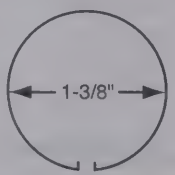
**"C-10" CLAMPS**
Supplied in 3/4" deep ceiling pans.

## KNOCKOUTS AND PRI-OUTS

Steel City® conduit KO's have standard trade size dimensions. KO's are uniform and true for attachment of cable or conduit connectors. Pri-outs for cable entrance are slotted — a twist with screw driver removes them. KO's and Pri-outs are precision stamped to permit easy removal, but remain sufficiently strong and sturdy when not removed.



**Cable pri-outs are always in pairs.**



**1/2" and 3/4" Knockout**

**1/2" Conduit KO**

**3/4" Conduit KO**

**1" Conduit KO**

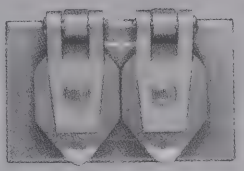
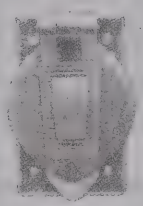
# WEATHERPROOF PLATES

**PPLICATIONS**



- Industrials, institutions, offices, convention centers, wholesale/retail, hotel/motel
- Use indoors and outdoors to protect devices from the elements and to protect people from accidental contact

**STING & APPROVALS**



- UL Listed and CSA Certified

**EATURES & BENEFITS**

- All thermoplastic weatherproof plates have stainless steel metallic parts and are corrosion resistant
- All weatherproof plates ending in "WO" are UL Listed for wet and damp locations, cover open. All others are UL Listed for wet and damp locations, cover closed
- 3D249 is furnished with a fiber shield which provides an effective means of weatherproofing toggle and lock type switches when used in combination with the plate

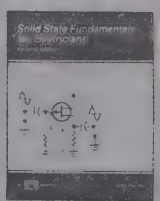
## ELECTRICITY AND BASIC ELECTRONICS

By Stephen R. Matt. Intended for high school, vocational and technical schools, and adult classes. Covers basic laws, circuit networks, meters, semi-conductors, integrated circuits, computers, fiber optics, and power supplies. 368 pages. Hard cover. 1998 Edition.

**No. 5H553.** Shpg. wt. 2.6 lbs. List..... $41.00. Each..... **$36.00**



## SOLID STATE FUNDAMENTALS FOR ELECTRICIANS

By Gary Rockis. The latest, most up-to-date textbook on the construction, operation and applications of solid state components used in industry. Designed and written for electrical students or workers already familiar with electrical concepts who require a background in solid state. Provides a logical and sequential approach including the study of fundamentals, theories, systems, with "how-to" testing procedures for typical components. 240 pages, hard cover.

**No. 5H670.** Shpg. wt. 1.5 lbs. List.....$32.85. Each **$32.10**; Lots 10.....**$30.50**

No. 5H553

No. 5H670

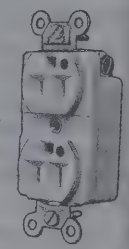
# HOSPITAL GRADE STRAIGHT BLADE RECEPTACLES

## APPLICATIONS

- Hospitals, laboratories, emergency care facilities and prisons
- Used in patient rooms, ICU/CCU, emergency rooms, treatment rooms and hallways

## LISTING & APPROVALS

- All are UL Hospital Grade Listed, CSA Certified (except configuration 5-20R), and meet Fed. Spec. WC596



## FEATURES & BENEFITS

- One piece mounting strap and integral ground contacts ensure positive, low-resistance ground continuity
- Patented "Bypass" design of power contacts increases contact force and provides constant contact pressure
- Tough, reinforced thermoplastic polyester base is heat resistant; thermoplastic, polyester face resists chipping, cracking and breaking
- External back wiring clamp and large head, oxide cutting, silicon-bronze terminal screws provide positive secure terminations
- Nickel plated metallic components provide corrosion resistance

## SPECIALTY VERSIONS

- Style Line decorator duplex—a rectangular face for a more contemporary appearance
- Safety Duplex—Tamper resistant receptacle requires insertion of both current-carrying blades of plug to energize receptacle. Device has lead wires instead of screw terminals.
- Lighted Duplex—Built-in, long lasting neon lamp makes it easy to locate the receptacle in dark areas

# INDUSTRIAL/INSTITUTIONAL STRAIGHT BLADE RECEPTACLES

## APPLICATIONS

**Industrial facilities, institutions, utilities, laboratories and offices**

**For industrial equipment, fans/blowers, test equipment, lighting fixtures, etc.**

## LISTINGS & APPROVALS

**UL Listed and CSA Certified (except configurations 5-20R & 6-20R)**

## FEATURES & BENEFITS

**One piece mounting strap and integral ground contacts ensure positive, low-resistance ground continuity**

**Patented "Bypass" design of power contacts increases contact force and provides constant contact pressure**

**Thick walled thermoset base is heat resistant; impact resistant thermoplastic face resists cracking and breaking**

**External back wiring clamp and large head, oxide cutting, brass terminal screws provide positive secure terminations**

**Body and bridge are locked together on 3 places; solid brass center rivet provides maximum strength**

## SPECIALTY VERSIONS

**Corrosion-resistant—nickel-plated metallic components resist effects of salt and chemicals**

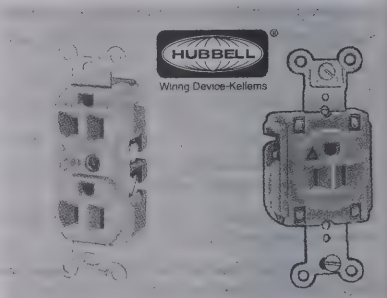
(*) Side wired only. All others back & side wired.

# ISOLATED GROUND RECEPTACLES AND SURGE SUPPRESSION RECEPTACLES

## ISOLATED GROUND RECEPTACLES

### APPLICATIONS



- Hospitals, laboratories, emergency care facilities, institutions, stores, and offices
- Use for sensitive electronic equipment such as test equipment, point-of-purchase terminals, medical and communications equipment, etc.

### LISTING & APPROVALS

- For use in accordance with NEC/NFPA Article 250-74, Exception #4
- ANSI #C73, NEMA WD-6
- UL Listed to Standard #498; CSA Certified (except configuration 5-20R); CSA C22.2 #42

### FEATURES & BENEFITS

- Insulation barrier construction isolates ground contacts from mounting strap for a noise-free ground
- IG triangle indicates isolated ground device on face of receptacle
- Impact resistant nylon face protects against cracking and chipping
- Reinforced thermoplastic polyester base provides impact strength and heat and flame resistance

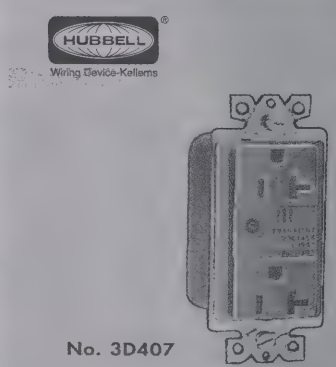
## SURGE SUPPRESSION RECEPTACLES

### APPLICATIONS



- Hospitals, laboratories, factories, institutions, schools, stores, and offices
- Use for sensitive electronic equipment such as personal computers, fax machines, CAD/CAM and test equipment, point-of-purchase terminals, medical and communications equipment, etc.

### LISTING & APPROVALS

- For use in accordance with NEC/NFPA Article 250-74, Exception #2
- ANSI/IEEE C 62.41-1980 (IEEE 587) installation categories "A" & "B"
- UL Listed to Standards #1449 & #498; CSA Certified (except configuration 5-20R)

### FEATURES & BENEFITS

- 210 joules protection per mode
- 4 metal oxide varisters absorb transients providing high level of surge protection
- Power-on indicator light verifies power is available and suppression circuit is functional; light off means power has been interrupted; surge protection has been damaged if indicator light is flashing
- Most models have alarm that sounds when surge protection is no longer functioning; continuous beeping (muting switch included)
- High impact nylon face resists breakage
- Isolated Ground versions protect equipment from effects of "noise" on ground circuit

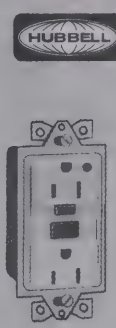
# GROUND FAULT CIRCUIT INTERRUPTERS

## HOSPITAL & INDUSTRIAL/INSTITUTIONAL SPECIFICATION GRADE RECEPTACLES

### APPLICATIONS

- Hospitals, industry, institutions, hotel/motel, schools, workshops, and offices
- Protects people from line-to-ground electrical shock hazards in job sites, around spas and pools, and outdoors with weatherproof protection



### LISTING & APPROVALS

- UL Listed 498 & 943 Class A, conforms to 1993 NEC requirements
- 15A models are CSA Certified

### FEATURES & BENEFITS

- Nylon face resists impact and abuse
- Pre-stripped 4" wire leads make installation quick and easy
- Feed-through feature provides GFCI protection for receptacles downstream
- 1½" receptacle depth permits installation in any standard 2½" box
- Band on reset button provides visible indication of ground fault trip
- All models have a 20A circuit rating of the GFCI
- Come with wire-nuts, matching color nylon and stainless steel wall plates

Note: GFCI-type receptacles should not be used in critical care patient areas or for electrical life support equipment applications because of the possibility of power interruptions.

## COMMERCIAL SPECIFICATION GRADE GFCI RECEPTACLES

### APPLICATIONS

- Hotel/motel, schools, workshops, offices, and homes
- Used to protect people from line-to-ground electrical shock hazards in bathrooms, kitchens, garages, basements, around spas and pools, etc.

### LISTING & APPROVALS

- UL Listed 498 & 943 Class A, conforms to 1993 NEC requirements
- 15A and faceless models are CSA Certified

### FEATURES & BENEFITS

- Feed-through feature provides GFCI protection for receptacles downstream
- Screw terminal feature speeds installation
- All models have a 20A circuit rating of GFCI
- 1⅛" receptacle depth permits installation in any standard 2½" box
- Faceless model can be used as a motor control or in damp or humid areas such as dairies, food processing plants, marinas, and within 10 ft. of swimming pools
- Matching color nylon wall plate included

Note: GFCI type receptacles should not be used in critical care patient areas or for electrical life support equipment applications because of the possibility of power interruptions.

# COMMERCIAL STRAIGHT BLADE RECEPTACLES AND FOUR OUTLET CLUSTER

## COMMERCIAL STRAIGHT BLADE RECEPTACLES

No. 1XC11 No. 5Z850

### APPLICATIONS

- Offices, retail stores, wholesale facilities, hotels/motels
- Used for office equipment, lighting, light duty equipment

### LISTING & APPROVALS

- UL Listed and CSA Certified (except configuration 5-20R)

### FEATURES & BENEFITS

- Smooth face design provides clean, contemporary look
- Thermoplastic face provides impact resistance
- Wraparound, locked-on bridge ensures a secure assembly and support
- Pre-tensioned ground contacts provide positive ground continuity
- T-type power contacts ensure reliable uninterrupted power
- Exclusive anchor hole with wire restraint feature on side wired devices facilitates wiring ease and provides a high quality terminal connection
- Back and side wired devices have 8 internal holes with wire restraint for stranded and multiple conductor connections
- Open terminals allows for fork terminal application as well as looping of wires

### VERSIONS AVAILABLE

- Style Line decorator series—a rectangular face
- CBR series—back and side wired
- CR series—side wired only
- CRO series—open terminal

## FOUR OUTLET CLUSTER

- Cluster with four 15A, 125V receptacles (NEMA 5-15R) is ideal for temporary use in workshops and garages to easily provide multiple plug-ins
- Unit is brown phenolic with steel cover and swivel hook
- Accepts cord from .296 - .562" in diameter (cord not supplied)
- Hubbell brand (HBL9259)

**Note:** This device is not UL Listed.

**No. 3D296.** Shpg. wt. 0.8 lbs.. List $108.38. Each.....**$86.70**

No. 3D296

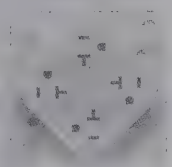
# 4-PLEX RECEPTACLES

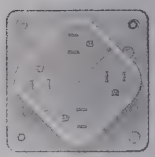
HUBBELL®

A

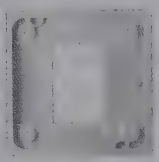
B



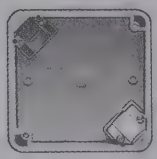
C



D



**NEMA Configuration**



5-15R

5-20R

E

F

G

H

## APPLICATIONS

- Laboratories, hospitals, schools, stores and offices
- Use on test equipment, monitoring devices, office equipment, personal computers and point of purchase terminals

## LISTING & APPROVALS

- All are UL Listed and CSA Certified (except configuration 5-20R) except the portable box and 4-PLEX receptacles when the portable box is used

## FEATURES & BENEFITS

- 4 outlets in one replaces existing single or duplex receptacles
- Eliminates need to replace duplex receptacle and box with 2 gang box, 2 receptacles and a wall plate
- Impact resistant thermoplastic construction protects against cracking and chipping
- Adapter plate adapts 4-PLEX receptacles flush to 1 or 2 gang device box or 4" square boxes
- Portable box with integral cord grip ideal for temporary power

## AVAILABLE VERSIONS

- Industrial/Institutional Specification Grade for heavy duty applications
- UL Listed Hospital Grade for use in health care facilities
- Surge Suppression for use with sensitive electronic equipment
- Isolated Ground for a noise free grounding path for electronic equipment

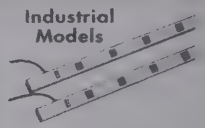
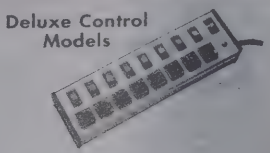
# PREWIRED ELECTRICAL RACEWAY AND OUTLET STRIPS

WIREMOLD® Wire Management Systems

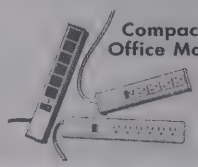


## WHY YOU SHOULD CHOOSE A WIREMOLD PLUG-IN OUTLET CENTER

Wiremold® Plug-In Outlet Centers let you bring power safely to wherever you need it. Connect appliances, audio/video equipment, power tools, computers, test equipment, office machines, lighting and more. All Plug-In Outlet Centers feature:



- **Resettable overload circuit breakers**
- **Aluminum Housing (unless otherwise noted)**
- **15 Amps, 120 Volts (unless otherwise noted)**
- **14/3-SJT color coordinated cord**



### PLUG-IN OUTLET CENTER® UNITS ARE IDEAL FOR:

- **Computer Rooms**
- **Offices**
- **Factories**
- **Workstations**
- **Retail store displays**
- **Home workshops**
- **Entertainment centers**
- **Schools**

# ALUMINUM SERVICE POLES

**APPLICATIONS**

- Institutions, offices, laboratories
- Power poles provide power and voice/data from ceiling to any point in a room

**LISTINGS & APPROVALS**

- UL Listed

**FEATURES & BENEFITS**

- Divider allows a single pole to accommodate power, voice, and data
- Aluminum construction for strength
- All (except blank pole) are prewired and ready to install
- Accessible data/communications section accommodates mounting of 2 Style Line communications outlets
- Power and communication devices mount on the same side of the service pole
- Variety of heights to fit most ceilings
- Ceiling trim plate/mounting bracket makes for easy installation and relocation (included)
- Optional T-Bar assembly No. 3D307 allows fastening pole between suspended ceiling grid

No. 4LM32

SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE

Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.

# GROUND FAULT CIRCUIT INTERRUPTERS AND ACCESSORIES

## GROUND FAULT CIRCUIT INTERRUPTERS

### 4 OUTLET PORTABLES

- UL Listed and CSA Certified
- Lift covers protect receptacles from dirt and damage
- Impact resistant polycarbonate housing and covers resist abuse
- STOW-A power cord with plug and sliding hanger for strain relief
- GFCI duplex provides downstream protection to second duplex for use by multiple users

### PLUG-IN PORTABLES

- UL Listed, Class A
- Turns any standard outlet into a GFCI (indoor only unless protected from rain)
- Optional permanent mounting
- 3 outlet model has retractable ground pin; use with either 2 or 3 wire systems
- Single outlet model has rugged case for impact resistance

### GFCI LINE CORDS

- Use manual set models with drills, saws, floor polishers, battery chargers, hedge trimmers, wet/dry vacuums, high pressure washers
- Use automatic set models with equipment intended for continuous use where temporary power failure is likely and undesirable. Examples include pumps, pressure washers, portable signs or lighting, and engine heaters
- UL Listed, Class A, Group 1, and CSA Certified
- Waterproof GFCI mechanism allows indoor and outdoor use
- Manual set GFCI line cord requires the GFCI to be manually set by pressing the reset button upon plug in and after loss of primary power
- Provides protection for grounded appliances and tools
- PVC housing resists moisture, chemicals and sunlight

### SPECIFICATIONS

- Trip level—4-6 mA.; Trip time—.025 seconds nominal; Class A
- Input voltage—120V +10% -15%; Frequency—60Hz
- Max. interrupting capacity—2000 amperes; Operating temperature -30°F (-35°C) to 150°F (66°C)
- All units have "no-voltage" release feature

## GROUND FAULT CIRCUIT INTERRUPTER PLUGS

- For industrial applications, construction sites, hospitals, school and universities
- High-impact, UV-resistant PVC housing
- Heavy-duty cord clamp relieves cable strain and prevents pull out
- Large "On" light verifies power status
- Manual set prevents unintentional restart of equipment after loss of primary power
- Rated 15A, 120VAC

| Color | NEMA Plug Configuration | Hubbell Model | Stock No. | List | Each | Shpg. Wt. |

## GROUND FAULT CIRCUIT INTERRUPTER TESTER

- Measure milliamp (mA) trip level of GFCI breakers, GFCI receptacles, GFCI portables and wired in GFCIs within any range from 2 to 7 mA, or leakage of electric drills, extension cords, electric saws, small appliances, and pumps within a leakage range of 1 to 7 mA
- Easy to read instructions are printed on laminated band around tester body
- Impact resistant nylon body resists abuse
- Sturdy knob dials in trip level and is easy to use
- Use on any AC circuit of 110, 120 or 130V at 15A or 20A and circuits above 20A with use of one of the adapters on page 715
- Hubbell brand (GFT2G)

**Note:** This GFCI Tester is not intended to determine: incorrect receptacle polarity, "quality" of ground or any combination of incorrect wiring.

**No. 3D360.** Shpg. wt. 0.9 lbs. List $211.23. Each .....$169.00

When the spec calls for brand names, you'll find the best here.

# SURGE PROTECTION DEVICES

**SENTREX™**
*Power & Data Quality Systems*

- **All models feature an extended manufacturer's warranty**
- **All models feature an aluminium housing unless otherwise noted**

## WHY YOU NEED SURGE PROTECTION

Surge protectors provide prtection for computers and electronic equipment from transient power surges, spikes, and EMI/RFI nois and help prevent:

- **System crashes**
- **Corrupted data files**
- **Disk drive errors**
- **Computer lock-up**
- **Hardware failure**

Select the right surge protector for the application.

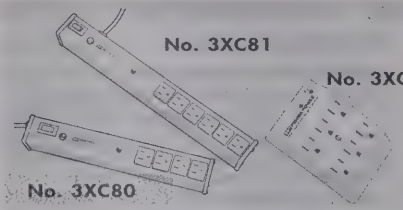
## SENTREX® HIGH PERFORMANCE MODELS

Helps protect advanced and critical electronic and computer applications. Features a 4 stage, 4 element hybrid circuit, UL 330V clamping, maximum surge current of 33,000 amps.

## PERMA POWER COMPUTER GRADE MODELS

Helps protect computer equipment and hardware. Features a 2 stage, 2 element hybrid circuit, UL 400V clamping, maximum surge current of 13,000 amps.

## PERMA POWER HOME ENTERTAINMENT MODELS



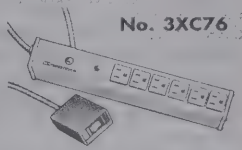
Helps protect TVs, VCRs, stereos, and phone answering machines with coax and phone line inputs. Features UL 330V clamping, maximum surge current of 20,000 amps.

## PERMA POWER ELECTRONIC GRADE MODELS

Helps protect personal computers, office equipment and small appliances. Features UL 400V clamping, maximum surge current of 6,500 amps.

## SENTREX PANEL ZONE® HARDWIRED MODELS

Provides maximum protection at the main service entrance or at distribution panels.



**SURGE PROTECTORS**
- **Available in many configurations to protect against surges, spikes and EMI/RFI noise**

**PHONE/FAX/MODEM SURGE PROTECTORS**
- **Provides protection for power outlets and phone lines**

**REMOTE SWITCH SURGE PROTECTOR**
- **Lighted, remote switch on a 44" cord allows easy power up of all equipment**

UL SP

LR62645 except No. 3XC84

**HARDWIRED SURGE PROTECTORS**
- **Provides maximum protection at the electrical distribution panel for a floor, area or room**

### SURGE PROTECTORS—6 Ft. CORDS

(*) Plastic housing (†) Wall plug in (#) NEMA Type 1 enclosure.
Note: maximum surge current is based on the sum of components. Actual maximum could be less.

# PASSIVE INFRARED MOTION SENSORS

## PASSIVE INFRARED WALL SWITCH SENSORS

### APPLICATIONS

- Automatic control of lighting loads through use of passive infrared (motion/heat) sensing
- Lights turn on when entering the sensing area and remain on until leaving
- May be used with fluorescent & incandescent lighting loads; compatible with energy efficient electronic ballasts
- For commercial or private offices, industrial, institutional, wholesale/retail & hotel/motel

### FEATURES & BENEFITS

- Indoor use, box mount
- Fluorescent & incandescent ratings: 1500 watts max. load 120-277VAC
- Meets California Title 24 requirements
- Install in less than 15 minutes when replacing standard wall switch
- May qualify for local utility rebates as an energy saving device
- Time On adjustable from 1 to 20 minutes

HUBBELL Wiring Device-Kellems

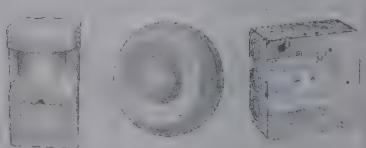
## CEILING AND WALL MOUNTED SENSORS

### APPLICATIONS

- Industrials, institutions, offices, convention centers, wholesale/retail, hotel/motel
- Infrared sensor is in control of lighting—walk into a room, lights go on, leave and lights go off automatically



### LISTING & APPROVALS

- UL Listed 88C1 (Industrial Controls Equipment) and CSA Certified

### FEATURES & BENEFITS

- Passive infrared technology is sensitive to small movements so lights stay on when room is occupied
- No. 3D067 has a 360° degree field of view which offers wall to wall coverage, even in off-center applications
- One control unit can control 1 to 15 sensors
- Lens masking segments included. Allows custom installation and prevent unwanted areas from being detected

## BRK PASSIVE INFRARED MOTION SENSOR

- Designed as a ceiling-mounted, bare bulb light socket
- Handles 25 to 100W incandescent at 120 VAC
- Detects motion in all directions—approximately 360°. Senses activity across 15-ft. dia. (when mounted 8 ft. above floor). Works in any light level

Sensor detects changes in temperature caused by the motion of persons or objects. Sensor turns on lights providing safety, security, convenience, and energy savings in residential, commercial, and industrial applications. UL Listed (E103200).

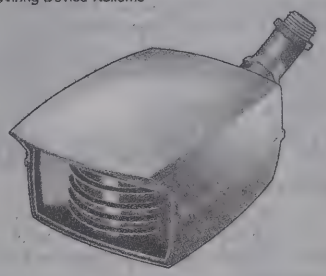
## A NATIONWIDE NETWORK OF BRANCH LOCATIONS



Across the street or across the country, finding the Grainger branch location nearest you is a snap when you reference our Branch Locations listed in the front of this catalog. We have more than 350 locations, ready to serve you in all 50 states.

## MOTION ALERT OUTSIDE SENSOR

- Applications include parking lots, driveways, walkways, agricultural areas
- Sensor controls outdoor lighting—move in area and lights go on; leave area and lights go off
- Passive infrared technology is extremely sensitive to movement
- 100° field of view with a 60 ft. range covers up to 3100 sq. ft. with coverage for large areas outdoors
- Raintight unit is virtually impregnable to moisture; ideal for all-weather use in humid environments, marinas, etc.
- Operates on 120V AC
- Contact ratings: 1000 watts for tungsten, halogen and quartz loads; 250 watts for fluorescent loads
- Time interval ranging from 8 sec. to 10 minutes can be set by user
- Adjustable photocell control disables unit at any light level desired
- Operates at temperatures of -40 to +150°F to withstand harsh conditions
- Raintight to UL Standard 773A

**No. 3D408.** Motion Alert Outside Sensor. Hubbell brand (OS120A). Shpg. wt. 1.0 lbs.

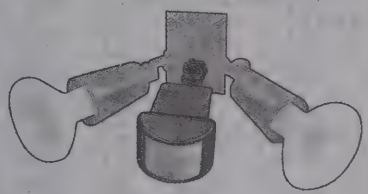
## YARD-SCAN™ INFRARED MOTION DETECTOR



- Detects motion outside the home or office. Turns lights On automatically. Includes dusk to dawn 24 hour reset
- Die-cast aluminum housing with rain-tight construction makes unit suitable for all-weather outdoor operation
- Passive infrared sensor detects moving people or vehicles up to 60 ft. away. 110° horizontal width; 180° right angle adjustment
- Built-in photocell distinguishes daylight from darkness
- Use existing wall switch (no modifications needed) to control all operating modes (off, auto, test, dusk to dawn manual override)
- Combination of heat and movement turns lights On. When motion stops, lights remain On for 5 minutes and then shut Off
- Switching capacity: 300W fluorescent load, 500W max. incandescent load, switched by a relay, 120VAC, 60 Hz
- UL Listed; NEMA 4X rated

**For optional weatherproof lampholders, see page 934. For boxes and covers, see pages 682 and 684.**

## H-MOSS® ADAPTIVE TECHNOLOGY OCCUPANCY SENSOR WALL SWITCHES

- Sensor automatically adjusts the time delay to fit the application, eliminating the need for manual adjustment and reducing installation time and cost
- Push-button control allows for quick, accurate setting of the ambient light level threshold
- Three-color LED display provides visual indication of sensor status
- Front press switch allows occupant to switch from Auto mode to Momentary Off mode; 30 minutes after the last motion, switch returns to Auto mode
- Flame retardant UL 94 V-0 ABS housing and polyethylene lens
- Operates at temperatures between 32 and 122°F
- Soft tone alert provides warning of sensor time-out 15 seconds prior to switching lights off
- UL Listed

# SPECIFICATION GRADE HEAVY-DUTY SWITCHES

HUBBELL® Wiring Device-Kellems

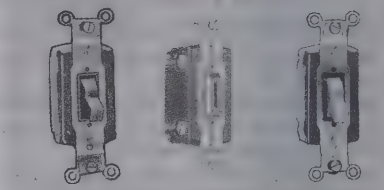
## APPLICATIONS

- Industrial, institutional, hospital, office, retail and agricultural
- Use on lighting, motor loads, heating & AC, pumps, blowers, & oil burners

## LISTING & APPROVALS

- UL Listed and CSA Certified. 15 and 20A versions meet Fed. Spec. WS896

## FEATURES & BENEFITS



- One piece, rivetless spring contact arm and terminal plate eliminate stress, weak points and contact misalignment
- Silver cadmium oxide contacts reduce contact erosion and prevent welding
- User-ready back and side wiring on most switches provide wiring ease
- Grounding terminal standard on switches; allows compliance with NEC 380-12
- Stainless steel automatic grounding clip assures ground continuity between mounting strap and metal wall box

## SPECIALTY VERSIONS

- IL versions have neon lamp that glows when switch is off; PL versions have neon lamp that glows when on
- Locking versions require special key (provided with each locking switch) to operate, preventing unauthorized use

# GENERAL DUTY SWITCHES AND FIBERGLASS FD BOX

## APPLICATIONS

- General purpose switches for lighting, fans, and appliances
- Offices, retail establishments, hotel/motel and storage areas
- Style Line versions offer low profile rocker design with aesthetic appeal for upscale applications

## LISTING & APPROVALS

- UL Listed and CSA Certified

## FEATURES & BENEFITS

- One piece spring contact design ensures contact alignment
- Silver cadmium oxide contacts reduce contact erosion and prevent welding
- Large binding screws with deep-cut screwdriver slots aid in proper torque when making wire connections

## VERSIONS

- CS versions are side wired only toggle switches providing secure, visible terminations
- CSB versions and Style Line versions offer back and side wiring options and are popular for stranded wire connections

## FIBERGLASS FD BOX

- For factory, institution, marina, and construction site applications
- Yellow corrosion-resistant box with threaded 3/4" hubs
- Ridge around front surface prevents water from getting between box and weatherproof plate
- 4 9/16H x 2 15/16W x 3 1/4"D
- Brass inserts for screws to attach to allow more torque without stripping
- 22 cu.-in. capacity provides room for conductors

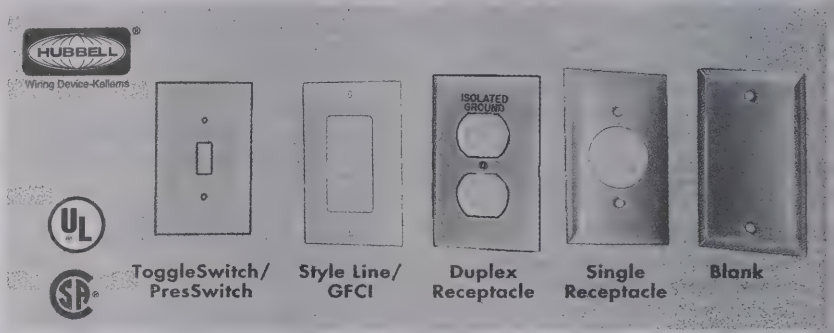
**No. 3D234.** Hubbell brand (60CM83). Shpg. wt. 0.9 lbs. List..... $55.65. Each $44.55; Lots 5 ..... $40.07

No. 3D234

# WALL PLATES

## SMOOTH PLASTIC & METAL WALL PLATES

### APPLICATIONS



- Industrials, institutions, offices, convention centers, wholesale/retail, hotel/motel
- Use indoors to protect devices from the elements and to protect people from accidental contact with the devices

### LISTING & APPROVALS

- UL Listed and CSA Certified

### FEATURES & BENEFITS

- Smooth styling of all nylon and metal plates provides a contemporary look and makes cleaning easy
- Virtually unbreakable nylon plates resisting cracking during installation and use
- All metal plates feature a brushed finish to complement smooth styling

- Stainless steel plates are Type 302/304 with a high nickel and chromium content for improved corrosion resistance
- Anodized aluminum plates offer corrosion resistance of stainless steel
- .040 brass plates are ideal where a rich, plush finish is desired

| **Torx Driver w/Bit** | Torx Driver | SWPBIT | **3KV04** | 15.07 | **12.06** | 0.7 |

### FEATURES & BENEFITS

- **Security wall plates are made of two-piece cold rolled steel construction**
- **White powder epoxy paint**
- **TORX tamper resistant mounting screws**
- **Plates are available in 1, 2, and 3 gang versions in multiple configurations**
- **Mount to standard boxes with adapter plate (included)**

## SPECIAL COVERS FOR SWITCHES

- **Protect switches from water, rain, dirt, etc.**
- **No. 3D012 for use with FS/FD and standard type boxes**
- **No. 3D013 has 120V pilot light to indicate when load is on**
- **No. 3D014 used with all standard length toggle switches and PresSwitches**
- **No. 3D014 has clear silicone bubble so switch handle position is visible on Lighted and Pilot Light switches**
- **No. 3D298 fits over standard metal switch plate and has a keyed lock. Key is provided with locking cover**

No. 3D012

No. 3D013

HUBBELL® Wiring Device-Kellems

# THREE-POSITION SWITCHES AND MANUAL MOTOR STARTING SWITCH

## THREE-POSITION SWITCHES

### APPLICATIONS

- Industrial, institutional, hospital, office, retail, and agricultural applications
- Use on lighting, motor loads, motorized projection screens, heating & AC, pumps, blowers, and oil burners
- Momentary contact switches are single pole, double throw and control two AC circuits; handle remains at center-OFF position until pushed and held up to close Circuit 1 or held down to close Circuit 2

### LISTING & APPROVALS

- UL Listed and CSA Certified

### FEATURES & BENEFITS

- One piece, rivetless spring contact arm and terminal plate eliminate stress, weak points, and contact misalignment
- Silver cadmium oxide contacts reduce contact erosion, prevent welding
- Grounding terminal standard on switches; allows compliance with NEC 380-12

HUBBELL® Wiring Device-Kellems

No. 3D376

## MANUAL MOTOR STARTING SWITCH

### APPLICATIONS

- Industrial, institutional, hospital, and agricultural applications
- Used on 3 phase AC motor loads

### LISTING & APPROVALS

- UL Listed and CSA Certified

### FEATURES & BENEFITS

- Heavy duty manual motor control switch provides On/Off modes where overload protection is not required or is provided separately
- No. 3D007 NEMA 1 enclosure has an impact resistant, non-conductive cover for safety
- Integral toggle guard on enclosure with lockout capability helps meet OSHA lockout/tagout regulations

HUBBELL® Wiring Device-Kellems

No. 1X975

## 12 Volt DC Rated, 5 Amp Lamp Load, 15A Inductive Load

### TOGGLE SWITCH

Fits panels up to 1/4" thick when not using the back-up nut provided; fits panels up to 3/16" thick when using the back-up nut. Requires a 1/2" mounting hole.

### LIGHTED TOGGLE SWITCH

Built-up pilot light (red and green) for night vision. Fits panels up to 1/4" thick when not using the back-up nut provided; fits panels up to 3/16" thick when using the back-up nut. Requires a 1/2" mounting hole.

### LIGHTED-TIP TOGGLE SWITCH

Red pilot light visible in tip of toggle only. Fits panels up to 1/4" thick when not using the back-up nut provided; fits panels up to 3/16" thick when using the back-up nut. Requires a 1/2" mounting hole.

### ROCKER SWITCH

Requires a 1½H x 7/8"W rectangular opening.

### LIGHTED ROCKER SWITCH

Built-in red pilot light for night vision. Requires a 1½H x 7/8"W rectangular opening.

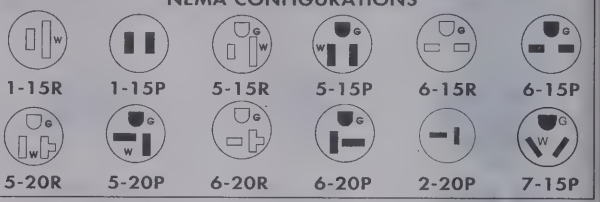
# INDUSTRIAL/INSTITUTIONAL/COMMERCIAL PLUGS & CONNECTORS

## APPLICATIONS



- **Factories, light assembly areas, shipyards, utilities, schools, construction sites, restaurants, agricultural environments, and offices**
- **Use on motors, tools, grinders, high pressure washers, lighting, test equipment, and other portable electrical equipment**

## LISTINGS & APPROVALS

- **All devices are UL Listed and (except configurations 5-20R & 6-20R) are CSA Certified**

## NEMA CONFIGURATIONS

## FEATURES & BENEFITS

**Insulgrip Style:** Tough, ribbed nylon housing withstands heavy abuse; offers secure, non-slip holding. "Picture window" wiring lets you see if conductors are inserted correctly and angled wiring entrance holes permit "straight in" conductor insertion. Vari-Size™ cord grop adjusts to a wide range of cord sizes. Accepts 10/3 SO to 18/3 SJ cord.

**Anchor Locking:** Thumb screw through ground blade locks plug into connector body or receptacle when fully engaged to prevent accidental pull-out. UL Recognized.

**Angle Style:** Enables cord connected equipment to be placed closer to wall as cord can be positioned at a right angle to receptacle. Outer shell is keyed to accept blade holder in any of 8 right-angle positions.

**Elastogrip Style:** Thermoplastic elastomer housing resists weathering from sun and ozone. Dust and moisture seal around cord on standard device keeps out liquids and metal filings.

**Elastogrip watertight versions** have nylon compression nut and rubber grommet to seal out water, dust, mud and other contaminants. Watertight versions provide seal at plug/connector interface (watertight to NEMA Standard 250, Type 4).

**Valise Style:** Powerful cord grip resists conductor slippage, prevents strain on terminals and accommodates a wide range of cords. Large, easy-to-wire clamp type terminals feature a "bundling" effect on conductors for improved terminations. 1-piece nylon construction with 2 assembly screws and system of special locking lugs for security, and quick assembly.

**Rubber Finger Grip:** Dead front nylon blade holder with rubber body and metallic cord clamp.

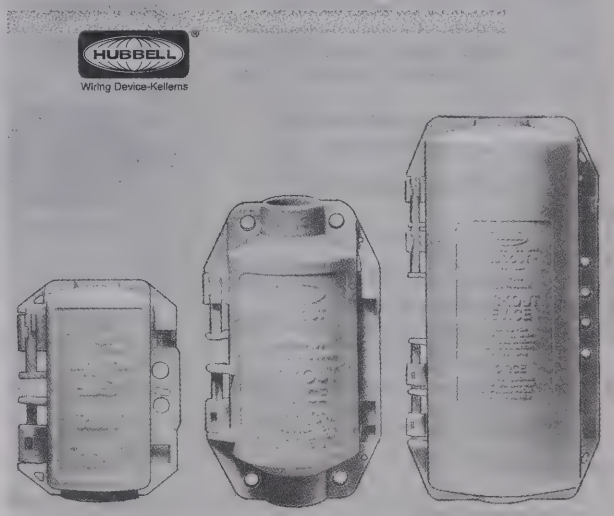
# LOCKOUT DEVICES FOR ELECTRICAL PLUGS

**APPLICATIONS**



- Factories, service industry, hospitals, restaurants, food processing plants, contractors
- Provides assured method of complying with OSHA Lockout/Tagout regulations
- Provides for "locking out" of plug for cord connected electrical equipment when performing maintenance and servicing activities. When installed in accordance with installation instructions, device protects against unexpected energization or start-up of equipment

**FEATURES & BENEFITS FOR PLUGOUT DEVICES**

- 3 devices handle a wide range of plugs, from 15A molded cords to 60A Pin & Sleeve
- Accepts up to 3/8" lock shackle diameter and has multiple padlock capability
- Impact resistant UV stabilized polymer for indoor or outdoor use
- User information molded into housing for permanent guidance information
- Optional holes for identification tags provide identification for authorized user

**FEATURES & BENEFITS FOR SWITCHOUT DEVICE**

- For standard toggle switches
- Accepts up to two padlocks with up to 5/16" shackle diameter
- Housing is nylon, heavy metal free colorant
- Installs without removal of existing wall plate screws

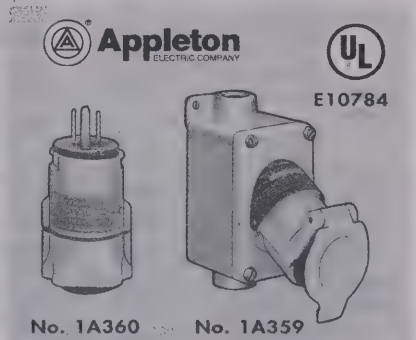
# HAZARDOUS AREA U-LINE PLUG AND RECEPTACLE

For use in areas made hazardous by the presence of ignitable gases, vapors, dusts, or fibers. Also for areas subject to corrosion or moisture. Suitable for use in Class I, Division 1 and 2, Groups B*, C, and D; Class II, Divisions 1 and 2, Groups F† and G; Class III.



**No. 1A360 Plug.** 15A, 125VAC, 60 Hz, 1HP, 2 Wire, 3 Pole. Constructed of copper-free aluminum. A twist of the plug produces audible "click" to indicate fast make and break of built-in switch contacts. Twisting locks plug in place—cannot be accidentally pulled out. Fits NEMA 5 or 6 receptacles in non-classified areas. Appleton brand (ECP-1523).

**No. 1A360.** Shpg. wt. 0.5 lbs. List .....$61.89.
Each .....**$49.60**

**No. 1A359 Receptacle.** 20A, 125VAC, 60 Hz, 1HP, 2 Wire, 3 Pole with 1/2" feed-through hubs. Both copper-free aluminum receptacle and malleable iron mounting box have epoxy finish. Stainless steel screws mount receptacle to box. Ordinary location plug (NEMA 5 or 6) will not activate receptacle. Appleton brand (EFSC150-2023).

**No. 1A359.** Shpg. wt. 4.3 lbs. List.....$205.06.
Each .....**$164.25**

(*) Suitable for Group B, providing that external seals are used.
(†) Do not use where electrically-conductive dusts are present (most coal dusts are not electrically conductive).

No. 1A360 No. 1A359

# HEAVY-DUTY STRAIGHT BLADE DEVICES

## APPLICATIONS

- Hospitals, institutions, schools, restaurants, offices, and factories
- For use with food processing equipment, ranges, dryers, portable generators, photocopiers, conveyors, and machine tools

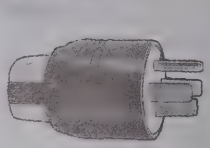
## LISTINGS & APPROVALS

- UL Listed and CSA Certified

## FEATURES & BENEFITS

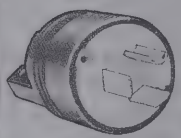
### PLUGS

- Nylon bodies withstand severe abuse
- Heavy-duty cord clamps handle a wide range of cable sizes and hold conductors securely in place
- 4 position angle versions allow cord to enter from top, bottom or either side and stay close to wall
- Ribs on body provide a secure gripping area and make plug insertion/removal easier



### RECEPTACLES

- One-piece contacts provide low operating temperatures
- Large head terminal screws permit high clamping pressure and torque necessary for larger conductors
- Can be mounted to either standard or FS/FD type boxes



**Note:** HP ratings shown are Phase-to-Phase. Values in parentheses are Phase-to-Neutral. HP ratings are applicable to plugs and receptacles only and do not apply to connector bodies.

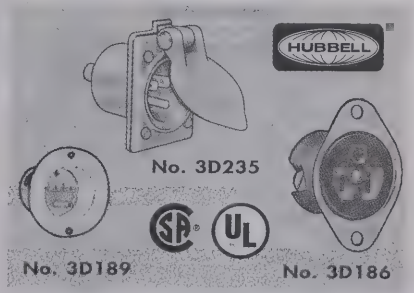
## FLANGED INLETS & RECEPTACLES

### APPLICATIONS



- Factories, restaurants, hospitals, offices
- Use on panel mounting surfaces in applications where a permanently attached cord is not desired

### LISTINGS & APPROVALS

- UL Listed and (except configuration 5-20R) CSA Certified

### FEATURES & BENEFITS

- Nylon flange for mechanical mounting strength will not stress-crack when exposed to hydrocarbons
- "Picture window" wiring facilitates proper wiring connections
- Angled entrance holes permit easier conductor insertion
- "CM" versions are corrosion resistant, one piece with integral weatherproof cover and boot to protect cable entry and terminations

| Type | Rating | NEMA Config. | Description | Color | Hubbell Model | Stock No. | List | Each | Lots 10 | Shpg. Wt. |

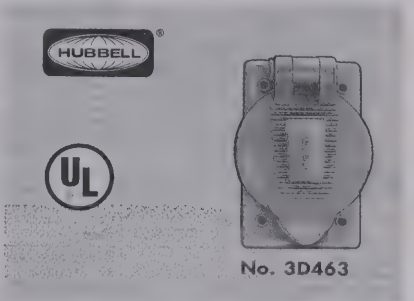
## WEATHERPROOF PLATE FOR FLANGED INLETS & RECEPTACLES

### APPLICATION

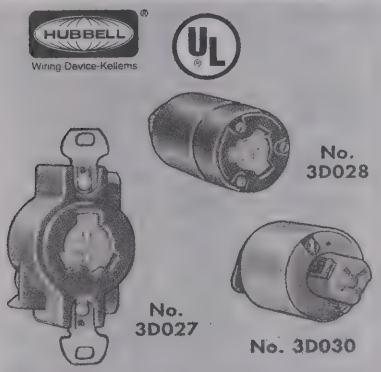


- Factories, food processing plants, restaurants, job sites
- Protect flanged inlets and receptacles from liquids, dust, metal filings, etc.

### LISTING

- UL Listed as "WDL closed" weatherproof plate

### FEATURES & BENEFITS



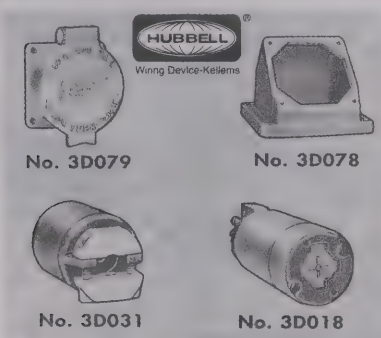
- Nickel plated and stainless steel metallic parts resist corrosion
- Gray thermoplastic base and cover resist impact and twisting
- Fully protects from contaminants when cover closed
- For use with 15 and 20 Amp 2-pole, 3-wire flanged inlets and receptacles above
- Hubbell brand (WP1)

**No. 3D463**. Shpg. wt. 0.3 lbs. List $60.36. Each.....$48.30

# HOSPITAL HUBBELLOCK AND INDUSTRIAL HUBBELLOCK DEVICES

## HOSPITAL HUBBELLOCK

**APPLICATIONS**
- Hospitals, health care facilities
- Used on diagnostic equipment, mobile X-ray equipment



**LISTING & APPROVALS**
- UL Listed

**FEATURES & BENEFITS**
- Spring-loaded safety shutter automatically ejects plug if not properly locked into female device
- Spring-loaded safety shutter snuffs out arcs when devices are connected or disconnected under load
- Positive locking ensured by nose of plug keying into a detent in mating device
- Lock is independent of contacts or a separate mechanical lock
- Access to contact springs of connectors/receptacles is restricted by spring-loaded safety shutter
- Longer life assured by supplementary springs
- Explosion-proof devices are designed for hospital operating rooms and other Class 1, Division 1, Group C atmospheres

**Note:** 50A X-ray Plug fits either 50A or 60A Hubbell Hospital Hubbellock Mobile X-ray Receptacles. Hubbell 24312 plug will fit any of the 20A 125V receptacles listed below. 23000 Series plugs will only fit the 23000HG Receptacle.

| Type | Rating | Description | Color | Hubbell Model | Stock No. | List | Each | Shpg. Wt. |

## INDUSTRIAL HUBBELLOCK DEVICES

**APPLICATIONS**
- Factories, convention centers, food processing plants, oil processing
- Use on portable generators, food processing equipment, oil well equipment, injection molding machines, machine tools

**LISTINGS & APPROVALS**
- UL Listed unless otherwise noted

**FEATURES & BENEFITS**
- Nylon plugs and connectors withstand impact and heavy abuse
- Spring-loaded safety shutter ejects plug if not properly locked into connector/receptacle; shutter snuffs out arcs when devices are connected or disconnected under load
- Positive locking ensured by nose of plug keying into a detent in mating device; lock independent of contacts or separate mechanical lock
- Wire terminations are assured with box terminals with pressure pads
- Nylon versions have large, 2-piece cord grip that secures cable in place, reducing terminal strain
- Internal neoprene grommets on nylon devices make cord end watertight

# HOSPITAL GRADE PLUGS AND CONNECTORS, WEATHERPROOF BOOTS, & RECEPTACLE TESTER

## HOSPITAL GRADE PLUGS & CONNECTORS

### APPLICATIONS

- Hospitals, laboratories, emergency care facilities and prisons
- Use on test equipment, monitoring devices, electrically powered beds, other portable electrical equipment

### LISTINGS & APPROVALS

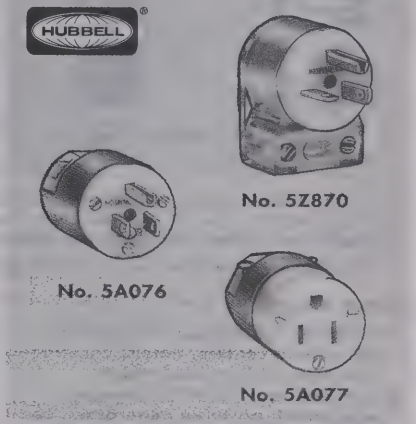
- UL Hospital Grade Listed, CSA Certified (except config. 5-20R)
- Meet Fed. Spec. WC596 (15A only)

### FEATURES & BENEFITS

**Insulgrip Style**

- Tough, ribbed nylon housing withstands heavy abuse and offers secure, non-slip hold
- Powerful cable grip jaws offset cable to prevent strain, eliminate cord pullout
- Accepts 10/3 SO to 18/3 SV cord

**Transparent Style**



- Clear housing and wiring chamber allow quick inspection of terminations

**Angle Style**

- Outer shell is keyed to accept blade holder in any of 8 right-angle positions

**Valise Style**

- Powerful cord grip resists conductor slippage, prevents strain on terminals, and accommodates a wide range of cords
- Large, easy-to-wire clamp type terminals feature a "bundling" effect on conductors for improved terminations
- 1-piece nylon construction with 2 assembly screws and system of special locking lugs for security and quick assembly

## WEATHERPROOF BOOTS FOR 15A & 20A INSULGRIP PLUGS & CONNECTORS

### APPLICATIONS

- Food processing plants, restaurants, job sites, marinas
- Use on electrical equipment, such as tools, extension cords and food processing equipment exposed to water, mud, and other liquids

### FEATURES & BENEFITS

- Elastomer material withstands harmful UV rays and many chemicals
- Heavy hand-grip knurl provides an improved no-slip gripping area
- Graduated step design at cord entry enables easy boot cutting, allowing use with a wide range of cord sizes
- Closure plug slips over long boot used with connectors to keep liquids from entering front of device when not plugged in

| Description | Color | Hubbell Model | Stock No. | List | Each | Lots 10 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| Short weatherproof boot for Insulgrip plugs | Black | HBL6017 | **3D226** | $11.55 | **$9.24** | **$8.32** | 0.2 |
| Long weatherproof boot for Insulgrip connectors | Black | HBL6018 | **3D227** | 12.82 | **10.26** | **9.24** | 0.2 |
| Closure plug for long weatherproof boot above | Black | HBL6019 | **3D228** | 15.34 | **12.28** | **11.05** | 0.1 |

**Note:** Weatherproof boots are for use only with Hubbell Insulgrip straight blade plugs and connectors on page 704.

## RECEPTACLE CIRCUIT TESTER

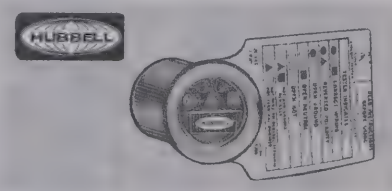
### APPLICATIONS

Hospitals, factories, institutions, offices, contractors

Arrangement of neon lights indicate and identify various fault conditions in electrical circuits

### LISTING

UL Listed



### OPERATION

Plug tester into single phase 125V, 2 Pole 3 Wire outlet and combination of lighted and/or unlighted lamps will indicate circuit condition

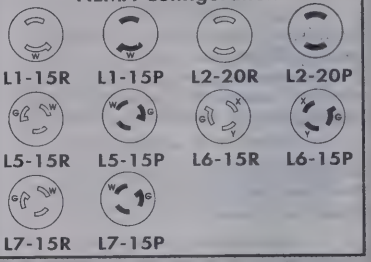
### FEATURES & BENEFITS

- Large easy-to-read symbols make indication quick and easy
- Recessed indicating lamps with one-piece polycarbonate lens less susceptible to breaking
- Impact resistant nylon housing withstands abuse
- Instructions printed on attached rotatable polyester labels for easier reading •Hubbell brand (HBL5200)

**Note:** To test single phase, 125V 2 Pole 3 Wire receptacles other than NEMA 5-15R, use an adapter shown on page 715.

**Caution:** When testing other receptacle types, use this tester only with polarized adapters. Do not use on circuits supplying cardiac catheterized patients—may be a shock hazard.

**No. 3D176.** Shpg. wt. 0.2 lbs.
List $57.60. Each.....$46.10



# TWIST-LOCK® DEVICES

No. 5A072

No. 5A073

No. 5A074

**NEMA Configuration**

NOTE: For weatherproof boots for plugs and connectors, weatherproof plates for flanged inlets or receptacles, or wall plates for receptacles, note the item's accessory group and see pages 685 and 714.

## APPLICATION

- Factories, institutions, restaurants, convention centers, hotels, construction sites, utilities and offices
- Use with tools, food processing equipment, portable generators, conveyors, motors, high bay lighting, and other heavy equipment

## LISTINGS & APPROVALS

- UL Listed and CSA Certified

## PLUGS & CONNECTORS

### FEATURES & BENEFITS

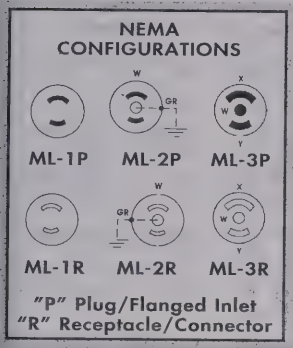
- Nylon body and housing are impact and crush resistant and withstand industrial chemicals, solvents and hydrocarbons
- Cord grips have offset jaws to hold conductors in place and prevent strain on terminals
- Two part cord grip has broad gripping area to accommodate a wide range of cable diameters
- Totally insulated dead front construction keeps non-current carrying parts from becoming energized
- Ribbed nylon housing provides secure gripping; makes plug insertion/removal easier
- Individual wiring terminals enclosed in separate chambers prevent stray strands from contacting other terminals

For details on Elastogrip and Watertight Elastogrip style devices, see page 704.

## RECEPTACLES

### FEATURES & BENEFITS

- Thermoset base provides excellent heat and flame resistance and dimensional stability
- Impact and abuse resistant nylon face protects against breaking, chipping and cracking
- All brass grounding system provides a lower resistance ground path and greater resistance to corrosion
- One piece contact with long spring arm and oxide cutting nibs prevent stress and overheating
- External back wiring "wraparound" clamp with anti-rotation strand containment feature also bundles conductor strands for better termination and lower heat rise
- Wire restraint recess for both back and side wiring greatly reduces possibility of loosening terminal connections
- Wire indentor with bump and barbs achieve oxide cutting and retention of conductors
- Face color coding band by voltage facilitates locating and mating of proper devices
- Wall plates for receptacles on page 701



NOTE: Horsepower ratings shown ar Phase-to-Phase. Horsepower ratings ar applicable to plugs and receptacles onl and do not apply to connector bodies.

# MIDGET AND ISOLATED GROUND LOCKING DEVICES

## MIDGET LOCKING DEVICES

### APPLICATIONS

- Factories, institutions, laboratories, offices, health facilities
- Used for electronic equipment, lighting, lab & test equipment

### LISTING & APPROVALS

- UL Listed; CSA Certified

### FEATURES & BENEFITS

- Nylon plugs and connector bodies are impact and abuse resistant
- Valise devices have offset jaw cord grips to prevent strain on terminals
- 2 Wire Valise devices have bundling clamp screw terminals; 3 Wire Valise devices have insulation displacement terminals
- Angle devices provide low profile for limited space usage
- Weatherproof boots protect devices from moisture, dust, metal filings, etc.

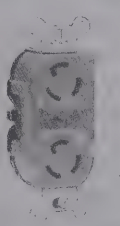
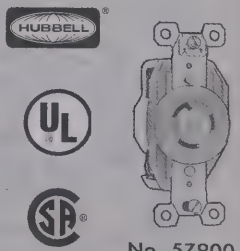
## ISOLATED GROUND TWIST-LOCK RECEPTACLES

### APPLICATIONS



- Hospitals, labs, emergency care facilities, institutions, stores, and offices
- Used for sensitive electronic equipment such as test equipment, point of purchase terminals, medical and communications equipment, etc.

### LISTINGS & APPROVALS



- For use in accordance with NEC/NFPA Article 250-74, Exception #4
- ANSI #C73, NEMA WD-6
- UL Listed to Standard #498 and CSA Certified, CSA C22.2 #42

### FEATURES & BENEFITS

- Insulation barrier construction isolates ground contacts from mounting strap for a noise-free ground
- Green grounding screw connected directly to grounding contacts
- IG triangle indicates isolated ground device on face of receptacle
- Impact resistant nylon face protects against cracking and chipping
- Reinforced thermoplastic polyester base provides impact strength in addition to heat and flame resistance
